*** rec.radio.info - Posting Guidelines and Etiquette ***

Two introductory articles about rec.radio.info are posted to this group and to rec.answers/news.answers every month. You are now reading the second article, which explains how to submit something to rec.radio.info, and which answers some Frequently Asked Questions about the submission process. The first article is titled "Welcome to rec.radio.info", and it might be a good idea to check it out as well.

-- How do I submit something to rec.radio.info?

Two possibilities. You can use your newsreading software to just post the article to rec.radio.info, as you would do with any other newsgroup. The difference is that the software recognizes the special status of rec.radio.info as a moderated group, and will e-mail your article to us, the moderation team, instead of posting it to the group.

Alternatively, you can mail your article directly to us at the following address:

rec-radio-info@panix.com

Mailing us directly is probably (a wee bit) faster, but using the transparency offered by the newsreading software is probably more convenient.

If you have any questions, or wish to deal with some administrivia with the moderation team, we suggest mailing to the following address:

rec-radio-info-request@panix.com

-- How soon will I see my article appear?

It depends on how busy we are. Your article reaches us as mail, we have to read it first, give it the stamp of approval, and finally send it on to the group. We will attempt to read and decide on all submissions within 72 hours at the very least, though we will probably be able to process submissions much faster in actual practice.

The site from which we moderate this newsgroup, "Public Access Internet and Unix, NYC" (Panix), is directly connected to the Internet, and articles posted at that site should appear at most major news sites, including Google Groups, the same day. The principal delay, therefore, will be the wait in the moderator's submission queue.

If you post a periodic article, and have shown to be trustworthy, we may allow you to post directly if the article is of a timely nature. See the section below on direct posting.

-- Should my article be in a specific format?

No. If it is not totally illegible, we will accept it, and if it does not have a correct subject-line we will correct it with your permission -- that's what a moderator is for.

However.

You could do us a big favor by making sure your article conforms to these simple requirements:

1) The article must present information, not discussion or requests, We

will reject the article or require you to change the wording if it is worth it.
2) A good, descriptive Subject line.
3) Always mention what source you got the information from.
4) Don't forget to include a Followup-To header, at least if you don't want further discussion to automatically be forwarded to you, the poster, which is the default if the article is only posted to rec.radio.info.

As we said: if your article is appropriate we will post it even if you don't follow these guidelines, but then don't blame us for not processing it immediately. 'Perfect' articles we can send on with a couple of keystrokes. Stuff that needs minor editing is going to have to wait until we have time to do so.

Please do not waste both our and your time by posting requests, as this is an information only news group.

-- What about crossposting?

If you send something to rec.radio.info, just name any group you'd like to cross-post to in the Newsgroups field. Then, when we approve the article for rec.radio.info it will get automatically cross-posted to any other groups mentioned. This will also override the default Followup-To: poster, replacing it with the groups you cross posted to.

We would prefer if the group be cross-posted to the various discussion groups in the rec.radio.* hierarchy that are appropriate:

rec.radio.amateur.misc	Amateur (ham) radio and related matters
rec.radio.amateur.packet	Amateur Packet Radio discussions
rec.radio.amateur.policy	Amateur Radio practices, rules, etc.
rec.radio.noncomm	Non commercial radio discussions
rec.radio.shortwave	International broadcasting on the 'HF' bands
rec.radio.cb	Citizens Band (27 MHz) discussion
rec.radio.scanner	Scanner discussions (unsupported group)

or in one of the moderated groups:

rec.radio.amateur.moderated	Amateur radio practices, rules, etc.
rec.radio.broadcasting	Discussion of *domestic* radio broadcasting

We will leave it up to the poster to decide which group(s) are appropriate, but reserve the right to add groups if we feel it has broader interest. We will consult with the poster first.

Notes on crossposting:

- rec.radio.broadcasting is also a moderated group. The rec.radio.broadcasting moderator prefers to review all articles himself before posting. Placing rec.radio.broadcasting before rec.radio.info on the Newsgroups line should accomplish this. We will typically abide by the rec.radio.broadcasting moderator's decision whether the article is appropriate for rec.radio.info.

- rec.radio.amateur.moderated is also a moderated group. As the rec.radio.amateur.moderated Moderation Team manages both rec.radio.amateur.moderated and rec.radio.info, we can manage crossposting and approvals for both newsgroups. The rec.radio.amateur.moderated group does not allow crossposting to other discussion newsgroups, whether moderated or unmoderated. However, we would like to manage rec.radio.info as consistently as possible with how it was done by previous moderators, including the grandfathering of existing regular postings. Therefore, the submitter can choose rec.radio.amateur.moderated or the other unmoderated rec.radio.amateur.* discussion newsgroups for crossposting, but not both.

- Any FAQ or informational posting approved by the rec.answers/news.answers moderation team that is also crossposted to any rec.radio.* newsgroup (besides just rec.radio.info) is also automatically pre-approved for rec.radio.info. See below for more information.

If you post to another moderated group, it may be better to make special arrangements with both moderators before posting by contacting us at our administrivia addresses.

In addition, cross-posts do not take up extra space; modern newsreaders can be configured to show you cross-posted articles only once anyway; not everybody reads rec.radio.info; and rec.radio.info was never meant to reduce the volume of the regular discussion newsgroups. But keep in mind that some of the mail gateways may filter out the informational postings (at request of the subscribers) to keep the load down.

You decide.

-- I have a regular posting with timely information, can I make arrangements to help speed up delivery by posting directly from my site?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as timely.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires cooperation and good will to be beneficial to the community in the rec.radio.* hierarchy.

If you are currently maintaining (or plan to maintain) a radio-related periodic information posting, you may wish to consider crossposting it to rec.answers/news.answers. Postings that are approved by the rec.answers/news.answers moderators for this treatment are automatically pre-approved for crossposting to rec.radio.info (as the news.answers requirements are far more rigorous than the requirements this newsgroup ever plans to use). For more information about this option, consult the appropriate information articles and posting guidelines in rec.answers/news.answers.

Realize also, that even if your post is not approved for rec.answers/news.answers, it can still be approved for rec.radio.info. The intention is not so much to get every last bit of radio-related information on rec.answers/news.answers, but rather to provide an alternative avenue of approval (as well as grandfather existing maintainers of radio-related information and spare them additional bureaucratic hurdles). Again, crossposting to either rec.radio.info or rec.answers/news.answers, both, or neither, is at the discretion of the poster (subject to the approval of the moderators). You decide what is most appropriate for your article.

Please remember that as an information maintainer, you are not alone. There are many others on the net who maintain and post periodic information postings, using various intermediate-to-advanced features of Usenet (usually via automated tools). Various degrees of technical support and general hand-holding are available from many Usenet veterans. Send us some E-mail describing your needs to our administrative address below, and we'll try to help, or at least refer you to the right knowledgeable individual(s).

-- And Follow-ups?

If the only newsgroup you have specified is rec.radio.info, then the Followup-To: field will always be set to poster. If you do not want this, you must supply a Followup-To line of your own, and we will honor that one, as long as it is a subset of the original Newsgroups line.

If you specify newsgroups to cross-post to, then the Followup-To field will be set to include all the cross-posted groups, excepting rec.radio.info itself. Again, if you do not wish this behavior, supply your own Followup-To line.

We maintain other standards on the various RFC-1036 (news transport) header lines. For example, if the article is appropriate for passing into the Packet Radio Information Network, we encapsulate the Packet Bulletin Identifier (BID) in the Message-ID: news header line indicating the machine of origin as the ampr.org domain:

```
 Message-ID: <$opa.55.1994@ampr.org>
```

where the Packet Radio BID, in this example, is `$OPA.55', and it was posted in the year 1994, because some of the Bid numbers are cycled yearly. Hopefully, this can be used as a key to re-introduce the articles for the Packet Radio network. Also, if the article is a repost of an already existing information article in the rec.radio heirarchy, we ensure that the References: header line is linked to that previously posted article. This also helps to tag articles, and may be used for additional filtering if needed.

Since the articles are archived, please use the Summary and Keywords header lines to help one search for your article.

-- Why have I received no reply from you?

We never reject anything in silence, and we make a point of it to answer all our mail. However, E-mail, like a brain cell, can and does get lost, every now and again.

So, if you send us something, and you don't see it appear it rec.radio.info, and you still have not heard from us in reply after say, five days, you can be pretty sure that either your mail never reached us, or that our answer has never reached you. In that case, please try again (We will filter out duplicates).

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

(Adapted, with permission, from the original article written by Mark Salyzyn, AG4YD, ex-VE6MGS.)

:>falls into that category. The fact is, you "offer" to help in however you
:>can. It is up to the poster to accept it or reject it - try it or not. If
:>he - owning the unit - knows full well a suggestion can't work or has
:>already been tried, then move on to the next.
:>
:>You managed to get what appears to be the best of help to him - so the
:>credit goes to you.

Heh, he seems a bit ungrateful this morning.   LOL.   Oh well.   We
both tried and I've given him the Radio Shack part number for some AA
Ni-Mh batteries and charger that I use in my Pro 97 scanner.   He can
take that advice or leave it.   :)

:>Yeah, I know what you mean about the radios and so on. My dad bought us a
:>set of walkie talkies - 3 channel jobs - and at that time - my parents were
:>coerced into CB by some aunts and uncles. I had already had a knack for
:>electronics, tearing things apart - etc. Well, that first set of walkie
:>talkies - combined with the CB thingy going - was my opening. I wasn't
:>satisfied with the range - so I started experimenting and finding my work -

:>to be making some progress - though I was still dumb as a stump when it come
:>to electronics. So - I then went and bought a bunch of books from money from
:>cutting grass and doing all sorts of errands, chores, etc. Started learning
:>on my own - til I got into High School - for a "formal" shop class - and
:>went on from there. I wish I still had those walkie talkies for sentimental
:>reasons alone.

Ah, you are an expert compared to my experiences!   I share your
curiosity on how things work but have never done any practical
experimentation.   My one claim to fame was I tutored a friend for her
Tech class license and she Aced the test!   I'm not an Amateur Radio
operator myself but I got through university so she figured I could
help her cram for the test.   This friend later volunteered to go to
NYC after 9/11 and she helped provide communications for the
firefighters and rescue workers at ground zero.   She was assigned to
a firehouse and ran her " shack" from there.

Regards, Sarah

It's as OFF as you're going to get.

:>I mean OFF as in , nothing displayed, no options available..

I know what you mean, but I can't magically make the radio do
something it's obviously not designed to do.

My advice? Buy Ni-Mh rechargable batteries and charger from Radio
Shack [I have # 23-1302 which has 4 AA's and it cost me $21] .
The charger is free when you buy the batteries and will recharge the
Ni-Mh's in 2 hours. I get almost 10 hrs of continuous use on a charge
in my Pro 96 scanner radio.

And yes I know your Midland has a supplied "charge jack" for
rechargable batteries but I'd recommend the RS batteries and charger
and would recommend you use the charger from RS.   If it's necessary
to have the radio operational for the 2 hr recharging time get
yourself a couple of disposable AA batteries or keep 2 of the Ni-Mh's
charged at all times.

You're welcome. :)

:>If I suspect the "new off" for this generation is some pseudo off ?

:>p.s. Before I posted that question I had downloaded the PDF you speak
:>of since I hate reading that user's manual that is 2 cigarette packs
:>big in size....
:>
:>have a nice evening...

It's pretty dry and composed of mostly one-way mesages. The biggest
problem is the complete lack of organization. It's just a date

sequenced dump of tens of thousands of single messages with no structure. It has the potential to be useful if the moderators would organize the information by subject.

```

Well now - there is something you can be proud of. Indirectly - you were helping those in need. There is no code - anymore - so that is one less hurdle - should you desire "to" go for your license. If you helped her cram for one - I'm sure you must remember some things from the question pool. Ask your friend as a return favor - to help you - then you two can converse via many more modes than just phone, cell phone or computer. You two can grow together in the hobby.

Honey, "I" am "far" from an expert. Anyone who thinks they are - is dead in the water - there is "always" something to learn. You have to go into this stuff with an open mind as much is based on theories and at that - some of those were done in "labs" - and can be tested outside the lab.

If you decide to get into the Hobby, I wish you the best of luck - maybe one day we can talk on the H.F. Bands.

Whatever "I" can answer - I will. I'm sure if you read many posts - you see varying opinions as to results and so on - so - that is why I say - keep an open mind.

Take care,

Lou

This is an un-moderated news group.
A total mish mash of postings that sometimes helps others of like interests.
It is, and has been useful to many seeking help and knowledge about radios.
If this does not serve your needs, then go elsewhere.

I have one, didnt build it.
Never measured the specs but I know I can hear AC a hundred miles away.
There is no front end on the thing and its subject to image problems and interference from strong FM stations. You get what you pay for.

Jimmie

TrunkPCR version 0.87.229 Now Available for Downloading from homepage:
http://members.cox.net/fiftyone.50/TrunkPcr/TrunkPcr.html

This update has a few fixes, changes and additions
Aug 15,2007 - -----: Replaced Timer routines in PCR Control with Timer controls to test Freeze bug.
Aug 16,2007 - Fixed: Program crashing with PCR1500 and Moto Trunking.
Aug 16,2007 - Fixed: Moto VHF Call Grants.
Aug 17,2007 - -----: Removed RING Picture from COM Status.
Aug 17,2007 - Added: RxData Picture to display status of Received Data from PCR when COM Status is Active.
Aug 19,2007 - -----: COM Status Menu disabled when Spectrum Sweep enabled.
Aug 19,2007 - Fixed: COM Status Menu set to Saved State when TrunkPcr starts.
Aug 22,2007 - Fixed: Moto Status/Text Message Ack Responses.
Aug 22,2007 - -----: Selecting MPT1327 in Trunk Settings now Set as Conventional (until MPT is fixed).

Version 0.86.229 Released 08/23/2007

Regards,
Jay

> This is an un-moderated news group.

Which "this" are you referring to. The rec.radio.shortwave,
rec.radio.scanner or that other forum that is essentially a date-based
dump of single message postings.

> A total mish mash of postings that sometimes helps others of like interests.

Which "A" are you referring to.

> It is, and has been useful to many seeking help and knowledge about radios.

Which "it" are you talking about. If you are referring to the info group any information posted there would be of use for only a very short period of time because there is no organization or structure to the messages. Under rec.radio-shortwave messages are posted under topics. The info board should adopt that structure to correct the chaotic structure.

The administrators of rec.radio.info are adept at creating overly-long lists of behaviour rules, standards for editing message content and levels of review. They are woefully short on presenting those fully sanitized messages in any useful order however.

> If this does not serve your needs, then go elsewhere.

Again, which "this" are you referring to. When cross posting you have to give a point of reference to a, this, that and it.

029047 <-- Are you suppose to Begin the code with the Zero?

Is it suppose to be 6 digits and if no number starts the 2nd of 6
digits, you're suppose to add a zero to the front?

A county for example is 21099 as listed with NWS, am I suppose to add
a zero to the front, making it 021099???

I set the radio up this way and did not receive the test signal
weekly. NWS guy told me Wednesdays 10am-noon was the time, it never
happened.
I'm quite concerned that this radio does not seem to currently have
the ability to alert me to even a TEST signal..

It's Midland Model #74-250
Here's the Manual for it>
http://www.midlandradio.com/comersus/store/catalog/74-250.pdf

thanks if you can help me..

I'm wondering if your area NWS transmitter is "yet" - fixed up for such transmissions. IF that radio operates (I don't know the unit) - like a "PL" system, it "should" cut out all transmissions if a code - especially the wrong one - is entered. The code - would block all transmissions "unless" a sub audible tone is sent to open the receiver - "or" a tone sent ahead of a message to open the receiver - depending on it's circuitry - that the radio is waiting to get. The NWS was going ahead with placing County codes in for each county so that an alert tone for a specific county could be sent - rather than a "broad" alert - but the question is, is "all" of those offices so equipped as yet? Example.... if the radio is on a PL of 151.4 hz, and you have the radio set to pl (some radios can have pl turned off/set - manually) - unless that receiver sees 151.4 Hz - either in front of the message (alert tone) "or" subaudibly during the message - the receiver will act dead. This "may" not be the "exact" way the radio is set up - but it is probably as close as I can get to telling you how it "may" be behaving - based on your issues and the manual - not knowing the radio due to lack of ownership or schematic.

The manual gives a statement of: "and the "0" indicates the subdivision of the county. In this case and most cases the code will have a zero for the first digit, indicating that no subdivision is in use."

Therefore - YOU will have to find someone who knows if there is in fact a subdivision or not. IF there is - then the "0" - would appear to be inaccurate - and may need removed. OR experiment with it on "Wednesdays" til you get it right. Yeah, it can be a pain. If you have no way to reproduce the signal, it could be a bitch to get it right. There "is" a Phone number AND internet address which "reportedly" have information on your particular codes needed - listed in the manual

Are you sure you have the "correct" NWS freq installed? If not, no matter what "code" you have in - you won't get anything.

It also says "When no icons are displayed, the radio is off. Only time and temperature is active." Therefore - there will still be "minmal" current drain from your batteries. I do suggest buying the NiMh batteries and charging them. You'll pay a bit - but save money as well - in disposables.

I'm not trying to be smart by saying this, but it would be a help if you go back through the manual and "READ" it - play with buttons, change settings to get used to them and then set it as you wish - to familiarize yourself completely with the radio. Once you get to know the radio better- maybe you can better figure out what the issue is you are having. Not having one in hand - those of us trying to help - are sort of helpless.

This is about all I can offer - if you keep having issues, try contacting Midland - http://www.midlandradio.com/ they have a "Contact us" button there.

I think I'm out of help for you at this stage. Good luck.

L.

This is the only response I will make to this posting.

Mr. Stern once again is dreadfully wrong.

Mr. Stern claims I was arrested by the Feds. I was never arrested by the feds.

I sure hope Mr. Stern has done more fact checking regarding his frequency lists than he has during this character Assignation. But we

all know Mr. Stern has badgered me for years. And still to this date
I have no clue as to why.....

Yep, me too. It helps to read the manual plus Google shows there is a
wealth of info available if you actually try and look for it. :)

74-250(c) MIDLAND [yellow one], cannot figure out how to turn the unit OFF... help?

I'll be buying dozens of batteries per month at this rate.

any / all help appreciated.

p.s. this radio [midland 74-250(c)] sucks and is hard to program, too small, easy to break, etc...

Hey Allan,
So David Brown is another one of his aliases.... How many did he have?

The CASE NO. is the same from his January court appearance.
This confirms that George's time in jail is for the original order in his Probation judgment in January.

Note # 20 on Page 3 of his Probation Order states it.
He was suppose to serve out 30 days. He served at least 8 of them
when he was first arrested and bonded out.
He was to appear by August 1, 2007 to complete his sentence.
The bad comb-over should be out by August 23rd.

Best we can hope for is that he sleeps in terror every night he is in
jail.

So long.

In mid-October I'll be on Amtrak's Train 6 from Sacramento to Reno.

Does anyone have frequencies for that portion of the UP?

Thanks!!

Al

We'll continue to check http://volusia.org/corrections/search_page.htm to see if
that indeed happens.

Al good luck.

I found when the UP took over from the SP they did a big freq. change.
So what i did was to search/scan as much as possible.
but try 161.55 it is used a lot here in so cal LA area.
have fun on the train

Back to DEERFIELD - Again!!!!

W1RC and friends invite ALL radio enthusiasts to attend the Fall 2007 NEAR-Fest at Deerfield on Friday October 12th and Saturday October 13th 2007! The Deerfield (NH) Fairgrounds was the site of the legendary "Hosstraders Tailgate Swapfest" for fifteen years until the event was moved in 1993. "Hosstraders" is just a fond memory now but NEAR-Fest is continuing the "Grand Tradition" and returning to the magnificent Deerfield Fairgrounds.

Full details may be found at: www.near-fest.com

Is it possitble to program in the freq from the audio side of a pay-per-view
event so that you can get the audio side and as least listen to the
announcer's decribe whatever is going on?

How did you get a copy of his Probation Order. I'd love to read that.
Is it on-line?

I built a couple of their kits - and they worked for what they were intended to do. However - a friend of mine built a "receiver" kit - and it really sucked. He called Ramsey to see about getting it "repaired". They wanted like $75 to do so. He paid almost $50 for the kit. He didn't feel like shelling out another wad of cash - so he junked it.

All I can say is ask them about their repair/replacement issues first - decide if you want to proceed - especially if you're not that skilled in electronics. Good luck!

A quick Google will bring you many appraoches --- If you are not going to have Vonage upgrade your firmware for you (on-line)

*** NOT for the faint of heart

There is a way to unlock and install new firmware. You will need to run an executable file called CYT46.exe and the firmware version WRTPG_fw_3.1.17_US.img and follow these instructions: http://forums.linksys.com/linksys/board/message?board.id=VoIP_Routers&message.id=43

David Stretch (dds@leicester.ac.uk) wrote:
: In article <19960418.000817.55@hotch.hotch.demon.co.uk>,
: Iain L M Hotchkies <iain@hotch.demon.co.uk> wrote:
: >The (remote) possibility remains that 'Mike Corley' is either
: >not schizophrenic (but is 'pretending' to be so) or 'he' is
: >a product of a number of persons (?psychology students).

: Given other ways in which I have seen people exploit some of The Internet's
: capabilities to disrupt or indulge in sophistry, or to exploit a medium
: that resembles speech without the non-verbal and intonation cues, etc
: as a means of denigrating others, I question your use, albeit in quotes,
: of the word "remote". I'm not saying it isn't remote and therefore it is
: great, I'm just saying that I don't think we can easily classify it as
: remote, moderate, or great.

I think you can build up quite a good picture based on what someone says
and on their posting patterns. I don't think "The Internet" (capitals, no
less) is as opaque a medium as you make it out to be.

: It is not easy to determine the validity of all information on The
: Internet without making use of extra supplementary information.

: We do have the problem, pointed out by someone else, of the possibly
: "too perfect" textbook characteristics of what is being posted.

I explained that one, but I don't mind explaining it again (you don't mind having it explained again to you, do you now?). The reason my "symptoms" are such a perfect fit to the textbook is because the people causing the campaign "fitted me up" in such a way that what they did would resemble the symptoms of schizophrenia. Hence TV, radio, other media, people in the streets etc. By a fortunate coincidence (for them) these mthods of harassment are the ones which offer easiest channels of access (for them).

It's really quite neat. All it takes is for people to start believing that the "symptoms" aren't symptoms but reality, though, and the house of cards collapses in a heap. And there are _lots_ of people now who knoiw full well what has gone on.

: If harrassment by email, etc, has happened by someone out of the country,
: can a complaint be made that results in arrest or whatever upon that
: person's entry into the country? An interesting point which Mike may be
: able to inform us about, as he's said he will be in the UK in a few weeks
: time.

Picture the scene at the airport;
"I arrest you for being Mike Corley and mailbombing people"

"But my name isn't Corley. Who he? Mailbombing isn't illegal is it? You'd have to lock up a lot of people if sending annoying email was a crime"

"Er....."

===

: context-free parts of articles, conversations and things-on-the-TV and
: assume they are meant for you. Mike, this is called paranoia.

But that's the way real abuse works, too. People interject words and phrases into what they say which they know will have meaning for the listener.

And sometimes, they make it obvious. The very first evening of my job in Oxford, we went for a drink with the technical director, and a couple of other employees. The TD said in an "as-if" aside to one of the others, "Is this the bloke who's been on TV?" (he said it directly in front of me, and obviously meant mke to hear him saying it). The other person replied, "Yes, I think so".

I think the subtext of what the TD said was "Why are they bothering with him? He's so insignificant, why would they possibly want to spend the resources going after him and putting all that expensive technology in his home, when there must be much better targets?". The Technical Director was given to sometimes disrespecting people, you see, and in my case he couldn't see the point of anyone expending money on harassing me.

: The point is that there are two possibilities happening here-

: 1. There's a large conspiracy of people out to get you, for no
:   other reason than that they have the means to do so, and that
:   it involves a lot of the Media & a proportion of the public

: 2. You (who admit to having some headspace problems) are suffering
:   from acute paranoid schizophrenia.

: Possibility #1 is _possible_, but would be unprecendented (OTOH,
: how would we know?), unfeasible, and many other things beginning
: with _un_ which I can't think of at the moment. Besides, if there
: was something going on, chances are some of us here would know
: about it, and I'm convinced that nobody does.

"Unprecedented" hits the nail on the head. It _is_ unprecedented, but we
have only just reached the technical stage at which it is feasible, and
we know video-spying is done to other people (NB the Diana-Hewitt
episode) and is a routine tool of security agencies.

Perhaps what is unprecedented is not the technical side, but the social
manipulation of many people by a concealed element in what other
countries would be called the secret police. The most disturbing element
is the degree to which people allow themselves to be unquestioningly
manipulated by an evil element within the state.

>

You guys don't fall over each other to help me all at once.

I found my answer, no not from the manual, nor the midland website..

Could have received an answer here but that seems impossible now.

I guess these [4] newsgroups are nothing more than 'let's talk about how far I got out [miles] last night' bragging etc.

OK, I guess I'll just READ messages and hope my answer is already posted.

thanks again... ;-)

Sorry, I had a rather busy week....... I'm not familiar with this unit to offer much more than -

1. IF it is soley battery powered - remove the batteries until you either repair the unit yourself or get it repaired, or use an optional adaptor to supply power. But duh - you probably already knew that.

2. As to the problem - sounds like you've got a defective on/off switch - OR - possibly a strand of wire or solder blob - across the switch - effectively shorting it out - and not useable for control.

midland are tards... Manual says to 'save batteries' place unit in non
receive mode, their is NOT AN OFF SWITCH according to manual.

I will NEVER buy anything again from midland.

Even if midland had an offer of 2 high-end computers for $99 I'd not
buy one.

HUH? No on/off switch? THAT IS WEIRD! Well, if there is any room on the
chassis/cabinet, you could always wire one in - sure a lot more convenient

than burning up batteries. "Shouldn't" take much to put a switch in the
unit.

Not able to see a top, rear, or right side view of the unit OR inside, it "appears" you "might" be able to put a micro toggle switch on it - if you don't mind drilling a small hole in the case. BUT - the problem is, is the case is supposed to be "Water proof". So - to drill any holes, you're asking for trouble. Apparently - they've designed it to remain on to "protect you". Most of the Weather radios I've seen, had an on/off control on them. I guess the "Snooze" mode - maybe would work OR on a channel not covered by N.O.A.A. - in your area. What would then be a "Squelched" condition would have less drain on the cells - but still drain - none the less.

What sort of batteries are you using? It "says" it has "in unit charging"........... So - you should be able to reduce battery purchase - according to that. Does it have a drop in charger? It says nothing of any "jack" to charge with only and earphone jack.

Thanks a lot for helping. I got an email from Vonage today after 3 days.

I have a "Blinking" power light so I may have to force it but they sent info
about the auto load. I'll try that first then see what happens.

Thanks,

Burr

: Given other ways in which I have seen people exploit some of The Internet's

: capabilities to disrupt or indulge in sophistry, or to exploit a medium
: that resembles speech without the non-verbal and intonation cues, etc
: as a means of denigrating others, I question your use, albeit in quotes,
: of the word "remote". I'm not saying it isn't remote and therefore it is
: great, I'm just saying that I don't think we can easily classify it as
: remote, moderate, or great.

I think you can build up quite a good picture based on what someone says and on their posting patterns. I don't think "The Internet" (capitals, no less) is as opaque a medium as you make it out to be.

: It is not easy to determine the validity of all information on The
: Internet without making use of extra supplementary information.

: We do have the problem, pointed out by someone else, of the possibly
: "too perfect" textbook characteristics of what is being posted.

I explained that one, but I don't mind explaining it again (you don't mind having it explained again to you, do you now?). The reason my "symptoms" are such a perfect fit to the textbook is because the people causing the campaign "fitted me up" in such a way that what they did would resemble the symptoms of schizophrenia. Hence TV, radio, other media, people in the streets etc. By a fortunate coincidence (for them) these mthods of harassment are the ones which offer easiest channels of access (for them).

It's really quite neat. All it takes is for people to start believing that the "symptoms" aren't symptoms but reality, though, and the house of cards collapses in a heap. And there are _lots_ of people now who knoiw full well what has gone on.

: If harrassment by email, etc, has happened by someone out of the country,
: can a complaint be made that results in arrest or whatever upon that
: person's entry into the country? An interesting point which Mike may be
: able to inform us about, as he's said he will be in the UK in a few weeks
: time.

Picture the scene at the airport;
"I arrest you for being Mike Corley and mailbombing people"

"But my name isn't Corley. Who he? Mailbombing isn't illegal is it? You'd have to lock up a lot of people if sending annoying email was a crime"

"Er....."

: context-free parts of articles, conversations and things-on-the-TV and
: assume they are meant for you. Mike, this is called paranoia.

But that's the way real abuse works, too. People interject words and phrases into what they say which they know will have meaning for the listener.

And sometimes, they make it obvious. The very first evening of my job in Oxford, we went for a drink with the technical director, and a couple of other employees. The TD said in an "as-if" aside to one of the others, "Is this the bloke who's been on TV?" (he said it directly in front of me, and obviously meant mke to hear him saying it). The other person replied, "Yes, I think so".

I think the subtext of what the TD said was "Why are they bothering with him? He's so insignificant, why would they possibly want to spend the resources going after him and putting all that expensive technology in his home, when there must be much better targets?". The Technical Director was given to sometimes disrespecting people, you see, and in my case he couldn't see the point of anyone expending money on harassing me.

: The point is that there are two possibilities happening here-

: 1. There's a large conspiracy of people out to get you, for no
:   other reason than that they have the means to do so, and that
:   it involves a lot of the Media & a proportion of the public

: 2. You (who admit to having some headspace problems) are suffering
:   from acute paranoid schizophrenia.

: Possibility #1 is _possible_, but would be unprecendented (OTOH,
: how would we know?), unfeasible, and many other things beginning
: with _un_ which I can't think of at the moment. Besides, if there
: was something going on, chances are some of us here would know
: about it, and I'm convinced that nobody does.

"Unprecedented" hits the nail on the head. It _is_ unprecedented, but we have only just reached the technical stage at which it is feasible, and we know video-spying is done to other people (NB the Diana-Hewitt episode) and is a routine tool of security agencies.

Perhaps what is unprecedented is not the technical side, but the social manipulation of many people by a concealed element in what other countries would be called the secret police. The most disturbing element is the degree to which people allow themselves to be unquestioningly manipulated by an evil element within the state.

> incident that had happened between him and a friend a few days earlier.

It is in the same style as his other pieces, but it's so close to what actually happened a few days previously, that it's completely reasonable to assume that someone told Levin about the meeting, hammed it up a little bit and motivated him to write that article.

Look at the parallels;

1. "madman running loose about London"

2. it's about a meeting which took place recently

3. the police are called (he must be controlled, however much that consumes in resources)

4. he might be violent, approach with caution, yes we're laughing but really we're afraid of him, or is it perhaps our own propaganda that we're letting manipulate us

5. he "bursts into tears, and swears it's all true - and it is" a very exaggerated impression of the conclusion of that meeting

Don't worry if you don't believe me, neither my friend to whom I explained this nor my GP believe me either (until the friend found out otherwise!). If someone just presented this to you as I am presenting it now then I wouldn't find it credible (most likely), so it's not until you actually find out it's true that you can find it credible. And by then it's too late, because they've got you in their trap and explained how "funny" the abuse is.

Given that Mr Corley clearly holds a certain fascination for some people, and that his website, although "informative", isn't exactly ideal for encouraging discussion of the sort that we all enjoy so much (including Mike himself, by the look of things), would anyone be up for a Mike Corley newsgroup - uk.fan.mike-corley, alt.fan.mike-corley, whatever?

(Sorry, I'm not very well up on these things.)

This would be a perfect place for Mike to post his writings, and perhaps the occasional "look at the ...mike-corley newsgroup" posting in uk.misc and so on would be accepted in place of the current cross-posts.

:AND a second posting which appeared in uk.legal on 5th July 1996 (isn't Mr :Corley popular ?)

> Dear Mike,

> I've just spoken to a man who knows and he has told me you
> have never ever been a target.

> My man knows because he once wrote a report on you after
> you made complaints.

Come off it "Big Ears", if you're going to pretend someone else is giving me advice then at least get one of your fellow coppers to write it so that it isn't obviously written in the same style as your posts.

Also both your post and the one you're pretending isn't yours were posted from pipex via news.dircon.co.uk, viz:

YOURS;

Sad, confused and emotional disturbed Mike Corley wrote:

{ snip }

Because he has made himself into a martyr and now he finds it impossible to back down. Mike's big secret has now been exposed. He made everything up.

Every time Mike makes allegations against the police, MI5, Tom-Dick-and-Harry etc. those organisations have taken people off vitally important work to ascertain whether or not there was any substance in Mike's ranting allegations.

When I'm told by someone who really does know such things that there was never any plot to get Mike then I trust that person sufficiently enough to accept his word.

The problem is Mike has escalated matters to an extreme level and like many silly billys he will find it impossible to give up all his self created crap and to live a normal life. After all what can Mike do now this crap has been exposed as untrue ? What new cause can Mike dedicate himself to ?

(Some might read that as: who else can Mike now start upsetting ?)

So Mike write to John Major, c/o the Private Secretary, 10 Downing Street, London SW1A 2AA and ask the Prime Minister to help you. I'd normally disclose his fax numbers but if I did that you might jam up the lines with abusive postings just like you do here on Usenet.

Is anyone interested in joining with me to do a mass e-mailing of protests to Anon Penet and to Toronto Free Net in an attempt to flood their computer systems thus forcing them to seriously consider pulling the plug on Mike ? I'm not sure but is my proposal called a "flame" ?

Perhaps we should give Mike 7 days from today (6 July 96) to come to his senses and they start a massive multiple E-mailing campaign to Toronto Free Net. If all us victims send multiple copies of E-mails to the right addresses in Toronto then perhaps the Canadians will begin to get the appropriate message.

Copy e-mailed to Mike, just so he knows what is coming if he persists.

I see. So they're not wasting six years of manpower to persecute you. They're wasting six years of manpower to prove I'm _not_ being persecuted.

I wish I was clever enough to think of something like that. I really, really do.

>When I'm told by someone who really does know such things that there was
>never any plot to get Mike then I trust that person sufficiently enough to
>accept his word.

Come on "Big Ears", why don't you admit that you made this posting? This is exactly the same line you were feeding me a few months ago. The posts are from the same news server, it's even the same newsreading software (Forte Agent .99e/16.227).

I'm afraid that if you friend "in the know" denied the existence of a plot then he was being, as they say, economical with the truth. Judging by the extreme reaction in London in May, and the panic you're showing now, as well as the replay post yesterday, I would say that things are hotting up again. But for you this time, not for me. I am out of harm's way, and there is very little you can do as long as I stay out of the UK.

Can't disagree with that sentiment.

Wasn't it documented that MI5 sometimes "bought" journalists and broadcasters?
I remember reading a report by some jouralist who had been offered an extra
tax-free income by MI5 to become their covert mouthpiece, and had refused.

Bet you lots of others didn't refuse. Why do you think MI5 have such easy
access to the BBC and media? Because they're directly paying them off, that's why.

It has been reported several times. The most recent was in Private Eye,
a few months back. As I recall they also wanted information from him;
journalists would be a natural choice for members of the Security Service
and the Secret Intelligence Service for information sources.

> It might be interesting to see what he had to say regarding their
> attempt to recruit him.

He was most concerned that many others would have accepted such an
offer. However, we can probably make an educated guess as to some of
those who accepted: Nigel West (Rupert Allason, MP) and Chapman Pincher
would come near to the top of the list.

This is true. I frequently employ private detectives to spy on people (there's a good reason for this and I'll tell you if you guess correctly) and one such detective showed me the latest technology only last week. A small rucksack. One strap of the rucksack has a tiny hole in it that you wouldn't notice unless someone pointed to it. That's the camera: the wires lead into the rucksack itself where there is a video tape recorder little bigger than a Walkman. I don't know if that's what Roger Cook uses but it certainly explains why it is that the subject can look straight into the lens and not realise (s)he's being filmed. Now, I say "latest technology" and I think that's the technology that the police use as well as the retired police who become private detectives, but no doubt the security services have far more sophisticated equipment.

: >Corley's allegations are true, there needs to be evidence of two
: >things. Firstly, there must be evidence of subversive activity on
: >his part. Secondly, there needs to be evidence of MI5 taking

: >measures to counter this subversive activity, in proportion to the
: >magnitude of the threat posed. Upon reading Mike Corley's posts,

: Alan,

: What about the following scenario? MI5 conducts "experiments" including
: field trials of novel surveillance methods. Say there was a "research
: project" underway to see just how invasive a surveillance of an
: individual could be. Perhaps it wasn't research, perhaps it was for
: training of novice personnel. Either way, there is a sizeable risk of
: detection. In order to minimise the consequences of this, you choose
: someone who is out of the public eye, and if possible someone whose
: credibility is already damaged - by diagnosis of schizophrenia, for example.
: This will facilitate the "plausible denial" if something goes wrong.

: I think this would be closer to Mike's theory.

: Mike, if you are reading, please don't post the story again. Anyone can
: read it at [snip] if they are interested. Also, don't
: think that I actually *believe* the above. On cost alone, it is extremely
: unlikely to be true, and some elements of the story (people in the media
: being "in on it") are just too crazy (though I can see how the paranoia
: builds to the extent that you can see "them" everywhere).

My argument is that the fact that it's so totally crazy is what makes it so
plausible and so hard to prove.

I shall continue to try to find ways to kick down the house of cards. Because
it is a brittle structure. It only needs one person to corroborate, and then
it's all over.

: P.S. Anyone else ever thought of "what-ifs" along the same lines? I
: remember as a boy daydreaming that maybe I was the focus of national
: attention in a "let's follow the life of one person from life to
: death" study - that while I was out or in bed there were programmes on
: the television about my life so far, etc. It makes for a good fiction,

Perhaps MI5 have become victims of their own paranoia. Their agency has been
thought of as acting disreputably, so when their decision arrives, they don't
think twice about breaking the law. Whereas say CSIS (the Canadian equivalent)
is at pains to point out how it would never ever do anything in contravention
of the law, and how it is strictly controlled in what it does and how it does it.

If this matter does ever make it into the public gaze, then it won't just be a
few individuals in the media or security service who'll get hit. The UK is
supposed to be a civilized democratic country (East Germany called themselves a
democracy and they had the Stasi, but anyway). In a civilized country these
things shouldn't be happening - and it is ultimately Parliament and the
government who are answerable for not imposing sufficient restraints and
accountability on those who are supposed to be ensuring security for citizens,
not jeopardising it.

I don't have florid symptoms. But I'm in a difficult situation, because those people who don't know, aren't going to believe, and those who do, they just go along with the crowd. It's never a good idea to go against the grain, and the grain here is defined by interests in the establishment and the media. Even people who could say out loud what was happening won't, because then there's a risk that they'll be seen as traitors and ostracised.

Usually this type of 'hidden abuse' is racial and targetted at a racial minority within a country. You keep the minorities out of the good jobs, but you don't admit discrimination exists. It happens everywhere, not just in Britain. The persecution that is going on now is in reality a refined form of racism. Instead of "nigger" it's "nutter", and abusing the mentally ill is still socially acceptable today. In 50 years it might not be, but today there isn't any social or legal sanction against it.

So really they've refined racial harassment down to a minority of one. The words may be different, but the methods are the same.

Considering he spammed it far and wide (well, at least to alt.angst and
alt.folklore.urban which I saw and each of those included other groups
in the Newsgroups line) I doubt he'll be seen anywhere for long. Using
the xs4all remailer doesn't really help if you post the url to a
web site which makes it clear who you are.

Nuala, who thinks that the sad thing is he used frames much better
than many sites done by supposedly 'sane' people.

(sent 20/11/96)
Subject: No Justice for those with mental illness
Newsgroups: uk.misc,uk.legal
Organization: Toronto Free-Net
Summary:
Keywords:

Well, the "legal option" has just foundered on the rock of lawyers refusing to deal with me on the grounds that my perception of harassment must be due to the disease.

So we're back to square one again, the same place we were two years ago.

Now perhaps one of our uk.legal participants can clarify this point. To me it seems illogical that lawyers should have the final say on whether you are allowed to proceed with a civil case or not. Is there a default mechanism or agency for cases such as mine where it is difficult to find a solicitor to represent you? What exactly is the "official Solicitor"? What is it possible to do if you can't find a lawyer to represent you?

A chance to get a useful response out of the uk newsgroups! perhaps they can be good for something else besides spamming.
....

Represent yourself....like the defendants in the McLibel trial.
you will need to read some law..but you CAN legally represent yourself I believe.
Mike W.
....
From: burridge@osiris.win-uk.net (Paul Burridge)

Yes, a lot of people do this nowadays. Saves on legal fees too. Lots of reading up required first, though.

What can I do to get competent legal help though? If the case is on the face of it so bizarre that no solicitor would represent me or talk to me, then surely there must be a default mechanism? What is the "official Solicitor" that's been mentioned?
....

All you need do is go to a good library & read up about it - that's what the McLibel 2 did.

Subject: "Absolute Obscene" David Hepworth (GLR)
Newsgroups: uk.misc,uk.legal,alt.radio.uk,uk.media,uk.media.radio.misc
Organization: Toronto Free-Net
Summary:
Keywords:

Last night (21/Feb/97), I was listening to BBC GLR. You have to understand that I was listening by stealth. Back in 1990 I used to have Capital blaring out of the speakers all over the garden ("if he listens to Capital then he can't be all bad", thanks ever so much). But now I listen on my walkman on headphones with the volume turned right down. It could not possibly be overheard by any listening device, no matter how sensitive, because sound does not carry from the headphones.

Yet somehow they are still able to tell which station I am listening to on the walkman. And last night, I bravely tuned to GLR 94.9FM at around 8.45pm. Everything went well for the first half hour or so. The DJ (today GLR told me it was David Hepworth) had a "rock star spelling competition" (how do you spell Shakespear's Sister?), no trouble there. I was recording the show onto tape just in case anything unpleasant happened, as I had reason to think it might.

Around 9.10pm, it did. Here, precisely, is what Hepworth said after the song "Come Around" by the Muttonbirds (I have this on tape, and at some point will be posting the audio on my website);

"New album's called 'Envy of Angels', that comes out soon, that's the single that's already out, I would imagine, that's 'Come Around', the Muttonbirds, er, coming up after this, we got the rock-and-roll A-level, we have, I assume, Brian do we have an embarrassment of prizes in there, we do, don't we, (EMPHASIS) absolute obscene (END-EMPHASIS) amounts of prizes, there will no doubt be a riot at the back door", and that's, er, A-level coming up after this"

The key phrases in what he said are, "EMBARRASSMENT of prizes", and what he himself emphasized verbally, "ABSOLUTE OBSCENE amount of prizes". It is my belief (based on content and tone of voice) that when he spoke these phrases he knew I was listening, and that the phrases refer directly to my situation. The "EMBARRASSMENT" is the embarrassment he and other media people would feel at having their wrongdoing exposed; the "ABSOLUTE OBSCENE" (which he verbally emphasized) described the disgusting sexual abuse which the harassers have been throwing at me.

Needless to say, I can't prove this is what he meant, although this has happened enough times that it's hard not to recognise it when you see it. But I shall be sending him a copy of this explanation. We'll see what he has to say for himself.

I will try to explain with greater clarity.

I am prone to have ideas of "interactive watching" by people on TV, and
"interactive listening" by people on the radio; which means as I listen to
their programme, they are aware that I am listening (because my home is spied
on, and those doing the spying phone up the radio station and tell them that I
am listening to them), and they then interject nasty remarks in what they say.
This is what I believe may have happened on Friday night with GLR, and what I
was trying to explain in my article.

It's happened before with other radio stations, most worryingly when I am
listening quietly on my walkman as happened on Friday. This time, the
interjected words were "embarrassment" and "absolute obscene". The "absolute
obscene" referred to the abuse which is currently being directed at me.

I hope that's a little clearer.

But it is possible that those two sets of interjected words could have
validly referred to something else.

Subject: "Scandalous, Frivolous or Vexatious"
Newsgroups: uk.misc,uk.legal
Organization: Toronto Free-Net
Summary:
Keywords:

A couple of weeks ago I issued a summons against the BBC in my local county court, for the tort of private nuisance caused by the spying by their newsreaders on my home. My argument was that their spying had prevented me watching the news at home, and therefore interfered with my normal use of my home.

The BBC's Litigation Dept at White City have replied not with a defence, but with an application for my claim to be struck out because;

(a) it discloses no reasonable cause of action; and/or
(b) it is scandalous, frivolous or vexatious.

Their application will be heard next week. They have not made any affidavit in support of their application, nor have they given particulars as to why they consider my summons to be unarguable in law, which would be a necessary condition for there to be no reasonable cause of action.

I am more worried about point (b). Allegations are scandalous (says Stuart Sime's book) if they impute dishonesty against another party; which my allegations do, against the BBC's newsreaders. As for frivolous or vexatious, I think that will be up to me to make a good argument for the effect the BBC's spying has had on my life, and up to the district judge's opinion of my case.

Apparently seeking to have a claim struck out in this way is common practice when the plaintiff is a litigant-in-person. Even if it is struck out, there is always the opportunity to appeal. I think we could be in for a fight next week.

Yep. Just not, the, I think 180 posts, one week, when his illness
got really bad. Oh yeah, and there was only three real posts,
just repeated 60 times.

>Mike does a first class job of drawing out the real personality
>of the person hiding behind a node name. The way people react
>to Mike gives it all away.

Erm, explain this rather dubious statement.

>As for you. Don't you think it's a trifle condescending to refer
>to people as mad. I know they are homeless and without internet
>access, but maybe they are just eccentric.

Congratulations. This is my first real flame for about a year.

I try to control my anger when I come across another uninformed
naive idiot on usenet, but sometimes it goes free. We've had Corley
for well over three years now, and his constant spams of various degrees
have killed a couple of usenet groups I really rather lied. uk.media,
to name but one. I gets my goat to read another useless fucker
thinking he is a harmless eccentric.

Mike is mentally ill. He is unwilling to deal with it. He seems to
think that uk.misc is some sort of forum that MI5 reads. And it
should be avenged. He's mailbombed a large quantity of people,
because they opposed his spamming.

1. He thinks MI5 watches him through his television
2. He thinks all references to mad people, refer to him
3. He thinks all people shouting, are shouting at him.
4. He's been diagnosed as mentally ill, just not a paranoid schizophrenic.
5. He gives not a shit about any newsgroups he abuses.
6. He goes through quiet periods, then _very_ nasty periods.
7. All evidence of this great conspiracy is laughable, to say the

least.
8. He gives internet/usenet a bad name to the media. Including mailbombing Chris Tarrant and faxing various celebrities.

I do not condescend to him. I actually know what he does, and has done in the past, and am frankly not too respectful of him. He can be openly referred to as "mad" because he is. Let's check my mailbox saves:

Repost of when I thought I'd seen the last of loopy mike:

>MC had seen the light and stopped spamming.

He hadn't seen the light at all. His level of spamming had got to such outrageous proportions that we had to mount a concerted attempt to get his account(s) closed. The reason for the lack of spam lately is that Mike has been furiously swotting up on Law so he can bring an action as a LIP against the BBC (all solicitors having quite rightly and honourably declined to act for him). When this course of action is exhausted without result, I confidently

predict that we will once again be the innocent victims of his ire
and the spamming will commence again.

Ya gotta love this.
Here is a posting Fetter just made on the CFLG yahoogroup.
At the end he threatens to sue the Listowner for allowing discussion
of his thievery.
Notice too, he no longer puts his website addresses in his Signature
and he has dropped the legend "I make $50,000 a week on the Internet;
let me show you how."
With the Fetter Emails and postings I have stored away, I cannot wait
to testify at any lawsuit involving Fetter.

Here's Fetter's posting:

5a. Re: Fetter
Posted by: "GeorgeF." av8tor@flash.net georgef2
Date: Mon Aug 20, 2007 1:20 am ((PDT))

> The reported FBI and Secret Service year-long investigation

I don't think any report mentioned FBI.

Any report of Secret Service was incorrect, never was arrested, questioned and my Attorney was never contacted by either FBI or Secret Service. This was a pure error on part of all media outlets.
This is a prove-able fact.

Reports of 'arrested' by Secret Service was done probably so the news story was picked up by National Media outlets as the local police investigator was fishing for a 'big fish'. Also Mr. Stern, you failed to mention that media also reported that I stole over 1 million dollars. If that were true then I would have made bail that very same night.

> of your activities supported your arrest.
> Because you have preyed on the radio community,

Not one person listed on the court documents as a "victim" is nor ever was a user of rec.radios... Not one "victim" had anything to do with radios in any way.

> although I believe the good Judge has ordered
> you to stop all your Internet sales.

Again an incorrect statement. Read the court documents, they state "tangible property by internet". Any and all current internet activity has been approved by Judge Parsons.

And finally "it is ordered and adjudged that the adjudication of guilt is hereby withheld". A plea of guilty was never entered and there never was a trial.

> Better check that with your attorneys Simpson & Delgado.

Nearly everytime I have to sneeze I do check with my Attorney Mr. Delgado himself.

Again this has nothing to do with scanning but only to beat a dead horse to death.

The monitor of the CFLG group should have put a stop to this witch-hunt long ago before I contact Mr. Delgado regarding a civil law suit.

Mr. Fetter
back to CW and Scanning.....

Subject: I am being ignored
Newsgroups: uk.misc,uk.legal
Organization: Toronto Free-Net
Summary:
Keywords:

Something mildly unusual is happening. Nobody has been getting at me for the last couple of weeks. Best of all, about three weeks ago I bought a video recorder to try to get some evidence from the News etc, and despite having watched Martyn Lewis, Michael Buerk and the whole lot of them, not one of them has said anything to me in the last three weeks. And I have been listening to and recording Capital, with no ill effect. All in all, I am being comprehensively ignored.

Of course, I should have video-taped the news programmes back in 1990/91/92 (and even 93) when it was still all going on. Anthony Johnsson (casually name-drop to stick the knife in) will tell you how intelligent a person I am, yet I didn't have the good sense to record the programmes at the time, and it's a bit late now.

Today another avenue of exploration closed when my second summons against the BBC was struck out (basically through lack of evidence), and an order was made by the district judge saying that I could not sue John Birt again without the express permission of the court. She explained that this was for my own good, to save me the summons fees. Costs were not awarded though (the BBC didn't even really seek costs), and I am free to sue anyone else I take a shine to.

....

It is not that you are being ignored.... it is just that as your mental health improves, so your paranoia eases.

OR...

The dark forces are gathering strength for the final battle with you...

Seriously though, it's nice to see you back - cos as long as they are persecuting you, I can relax knowing they haven't got time to bother me!

Mike Corley (bu765@torfree.net) wrote:

[unreasonable optimism snipped]

Well, that didn't last very long, did it?

Capital Radio this evening approx 8.35pm, Neil Long's programme a few moments after I switched to it (I am listening to it as I type this). The following spouted from his mouth;

"want to see Jacko in town? what a gig it's going to be, that guy is amazing, and PSYCHOTIC, but amazing on stage, 0171-4200958, on stage he's a MADMAN but he's wonderful"

God, I am so tired of this. It's been going on for seven years. When's it going to stop?

I have the above extract on tape. When I get around to it I will post it, and the Hepworth snippet, as audio files on the website. Of course, all the doubting Thomases and Smids can carry on doubting, because the mere fact that moments after switching on the DJ starts talking about "psychotic", that's not proof is it?

I wrote an aggrieved letter to Chris Tarrant at Capital and sent it off today, copied to Richard Park, Group Director of Programmes. I suppose they'll just lie as usual. Bastards, basically.

....

The solution is surely to not have a TV, video, radio or telephone in the house, Mike. That way they can't be used to watch you.

No. I tried that strategy in 1990/91 when I sold my television and stopped listening to the radio. It didn't work because they got at me through co-workers and eventually the general public.

The solution is to gather evidence by recording everything, and then complain or sue if possible. I wish I'd recorded it all five or six years ago, then I might be more successful in a legal action now.

....

Did anyone else watch the X-Files on Sky last night (Sunday 13th April) and recognise Mike's symptons in the chap with the tattoo? It was quite interesting to see someone responding in precisely the same way, picking up on individual words and phrases in ordinary sentences and applying parts to themselves as though they were intended.

Not a pleasant ending though. You take care, Mike, and keep taking the medication. uk.misc just wouldn't be the same without you now.

No, it isn't, but you knew that anyway.

Mike, how is it that you think that this can't be a coincidence because it happened 'moments' after you switched on the radio? Haven't you just told us that you haven't heard a thing for two weeks? Going two weeks watching TV & listening to the radio without a reference to 'mad', 'crazy' or 'loony' is quite an acheivement, especially given the trashy radio you seem to prefer.

I've just spent a lot of the weekend trying to keep a manic depressive under control, so that she doesn't have to go back into hospital and lose the last few months' memories to ECT. One thing I've noticed is that manic depressives almost seek to foster their fantasies, they enjoy the control and the high. You seem to be the same - you refuse to answer the points put to you that explain away what you call persecution totally - do you have the courage of your convictions to reply to this? Or do you enjoy the attention your illness brings you?

Do please tell the *truth*. It has been longer than *2* weeks as I'm sure you have noticed, hasn't it ?

Well I claim responsibility for the absence of persecution. When I rang John Major's personal private secretary, not the personal political one or any of the others in the same office, and I said you would vote for the Conservative Party at the General Election the secretary said Johnny would be so happy and as a sign of gratitude he rang-up the Head of MI5 and told them to save money for tax cuts by abandoning forthwith their campaign against you. Consequently MI5 and MI6 have been able to redeploy urgently needed resources (i.e. manpower and telecoms interceptions) against an international band of (*****censored*****).

On behalf of the law-abiding and decent citizens in the British islands, I would like to sincerely thank you for your invaluable contribution to crime fighting by your instrumental achievement in releasing badly needed and very scarce MI5 and MI6 resources.

Many thanks,

Perhaps it is for the best. Now that it is all over, you can return to
Canada. Did you manage to get your Canadian citizenship ?   What did your
contracts at MI5 say about you becoming Canadian ?   You never did mention
the name of your MI5 liaison officer nor of any of the others.

> Today another avenue of exploration closed when my second summons against the

That's true. But as it is now all over there is no need to worry about
the past. MI5 said your file has been removed from the Registry and put
in a burn-bag so there is nothing left for anyone ever to find.

By the way, what was the URL of your famous Corley web site ?

I have to admit that it is actually mildly amusing to have newsreaders watching you, although it is tiresome after a bit. I am currently in an interesting situation, because after my lawsuits against them I think the BBC newscasters have stopped watching me entirely; I also think that ITN, in particular John Suchet, *are* still watching but they're being subtle about it (his blink pattern followed mine).

Being called nasty words is quite horrible though, and seems gratuitous; what do they gain by it, except to exercise their sadism?

You have. They're not pleasant atmospheres, especially the secure wings, which have more in common with prisons ('airlock' doors, list of 'banned' articles, continuous observation). They have to be that way, unfortunately.

>Uh-oh. Peak Practice slagging you off as well now, eh Mike?

You better believe it. Tuesday's episode had one of its characters being labelled as a "lunatic" with "something wrong with them". I changed channels rapidly at this point, but in retrospect perhaps I should have carried on watching and taped the program.

A few days ago I bought a video recorder (about time too) for evidence gathering purposes. But strangely the TV news (both BBC and ITN) haven't uttered a sound over the last few days. Almost as if they know they're being taped...

>labelled as a "lunatic" with "something wrong with them".

And?

There are many characters in TV programmes who _are_ lunatics with 'something wrong with them'. Why do you think this alludes to you?

In the eponymous book, Cervantes' Don Quixote is described as 'crazy' 'mad' and 'lunatic'. Do you think this is a reference to yourself, albeit written by a time-travelling 17th century Spaniard?

If you accept that the character of Don Quixote can be described thus without it being a reference to you, what problem do you have with Peak Practice? Or do you enjoy tilting at your own little windmills?

A friend's lodger has turned out to be paranoid schizophrenic. Her obsessions are strikingly similar to yours, she is convinced that she is being bugged, and that students at her college are making fun of her for being foreign. She has been looking for the services of a private detective. Maybe Oxford has this unfortunate effect on foreigners?

I must say that I'm surviving rather well, or that's what the man under the stairs told me yesterday.

....
So Mike, you are a woman, married to a doctor,have two children, speak spanish, and living in the Peak District. Is that a fair description of you?

BAZZA

Like, so in walks this, out of work time Lord who thinks to converse to the masses about the most basic of reasons to save the lives of innocent others, leaving him convinced, he really needed an audience for this fable to rise as profitable venture. So, it was followed to make it out there in this real world, is to care for Justice measured. All so to bring greater hope for a better future as all would follow, boy, were they surprised when Johnny continued!

911 Leaders Saying They Are Jesus
http://rss.nfowars.net/20070802_Thu_Alex.mp3

Jason Bermas "I just want to let people know, that if this is a hit piece that involves, you know, saying that we're all blaming the Jews, or the Zionists, or something ridiculous, where we go after an ethnic group, [Jason Bermas suggests "Jews" =3D "Zionists"?] 'we' can not be associated with ANTI-SEMITISM, space beams, utter kookery.

Alex Jones "Or Jesus! they have 911 leaders saying they are Jesus now. They have people saying it's space beams from Pluto. And folks, I've tracked these people, they all were formally in intelligence, or connected to the Bushes, the space beam thing came from a almost cabinet member level Bush member, and folks this is a setup to poison our movement."

Now??

I've given my phone number several times to Alex Jones, of which he's not as of yet, invited me on as official guest, for fears he can find no arguments against US I presume. 911 financier Ahmad =3D al Qaida, and we have molten iron on video flowing like water. Demon Bush Jr. gave US zero, while closing criminal investigations immediately after the terrorist offense of no questions!, no questions! Case closed. But no, the American media rarely if never mention these facts, while insisting Bush's deathly war criminalling

is as only a puppet, look away! look away!, leaving without challenge on the, teen like naivety of wearechange.org's consistence that "we", who demand justice for 911, who might also hold the opinion that zionist behavior does not blindly equal being Jewish, should not be allowed to speak Justly for our public challenge, because bushite Amerika has no defense for censorship against ANY of our judicial wanting, as documented positions on behalf of the suffering to death victimized public. Why? Because we are Just. Well, I try to be anyway. (I've spoken as written for YEARS, with NO ONE WORLD WIDE countering in the public realm, but for the strangely odd insult. Bushite do exist, don't get god wrong, but dumb evil bushite brood in darkness with censorship like all zionists do, selling to be 'godly' honorable men, when in truth, they'd murder anyone of US for a stolen nickel given to a neocon. I, as open line talk radio producer, win every time, always, forever, never fail. [er.. yet..] Why? Because I treat YOU fairly. America should do the same. We are all in this together. Zionists like robbing then killing defenseless innocent Christians, and Jews, while just lying that they don't without scened factual TV perception. Demon 911 WITCH, zionist Condi 'okayed' the dropping of more than SEVEN MILLION land-mines on Lebanon, purposefully done to indiscriminately murder ourselves for generations. Jason might foolishly call you an "anti-Semite" in fear for speaking such not understood truths. And importantly, not because they can publicly disagree so in open debate, so sides to not allow US to rise in acknowledgement to bring about Justice as demanded, for ALL as ANY. (Gee, who's the neocon now eh? (we're all sinners.))

If Americans really want 911 Justice:

Help US out by putting the video of molten iron flowing like water out there in the minds of any who have doubts, tell them hypno mugger Bush, gave US zero to substantiate his public falsehoods, and tell US about Ahmad as more than a passing fact that means little of nothing, then, WE, The People, will believe this has more to do with Justice for Humanity, than the American suffering movie goer ego being, "leading the free world", by voicing no public concerns on the criminality of the bushmob shysters. Left happying in the George Norry, as a TRAITOR to a dying America not hearing. An enemy of Liberty to the, tried to be free soldier, who is led TO DIE still un-wittingly by lie for the misfortuned neocon bounty of global tyranny through coast to coast story lining. Look, the peenackers will tell you freakishly, that they work to lie to us all, to take advantage of a plain to view weakness. I swear. The neocon wants to con your kid to die for a war lied into with as our stolen goods. We lose as crime victims, while they win free accountability because, (well... I'll just let you finish that one liner sucker punch..)

Ron Paul Slams Ron Paul!
http://youtube.com/watch?v=3DeAvt7BdvJiM

"If you happen to be working for a big company, or the government, you get health benefits dirt cheap.[?] But if your trying to make it on your own, and you don't have insurance, you might be charged two or three time more than the government will pay!"

Almost. PBS showed a man who fell from a ladder, broke a rib, and was bankrupt from his near $250,000+ bill for, for private "free market" health care. Money demanded that doesn't go to the doctors, nurses, or "public" hospitals. So what is Ron Paul saying about Ron Paul? I'd wager, he doesn't know himself, and fears like FOXNEWS from open debate of those who try to teach US to walk through his own argument, (or follow the money (al-Qaida=3DAhmad)) and find the fault of all proud blind Libertarians. Look, don't you want the best service possible for the dollars expended? Why give your BASIC health care treatment dollars to a do nothing shareholder, or hedge fund CEOer for procedures, who's success is not made better by needlessly increasing the costs for nothing but selfish sicko greed by bribe payers. Again, rarely are those that "earn" billions in public health care, care givers, but takers. Someone ask Dr. Ron Paul, or Ross Perot, why those with leverage, are able to negotiate better deals through intelligent design, leaving others as single payers, (poor unrepresented pension people,) to flip their expenses? Do we want to publicly sanction screwing over the poor with ignorance, to feed the pay no taxes either, talentless as lowly, highest ranking rich? I suppose if it means radiation treatments.. anti-psychotics or, the play time of genetically altered vaccine strains of true quackery, as has to be done trusting religiously on someone for our money. Money lost as investment on privilege in the market equation of lowering the human capital available to maximize the de-profiting of our shares for nothing but money grubbers. Again, Americans pay TWICE as much as Canadians per-capita, where for those dollars Canadians get full coverage, while Americans are then expected to go out and buy insurance now. TWICE. (Did you know that DO NOTHING hedge fund managers can "earn" as much as 1.7 billion per year in salaries by nickel and dooming everything? And, it's only an elite small few who are 'lawed' to do so? Now, who would want that in a free to be me democracy?)

traffic light for commies, traffic light for commies

A dying waged - by the painfully wealthy status-quo ignoramuses "this is the first step to socialized medicine!!" ahhh!!! caring doctors with calculators are connecting for better prices to improve care.. We'll take less and they'll be free to think.. FOR THEMSELVES! AHHH!!! bare ass and run for cover!! embarass for. a caring Doctor with math skills and Law is a comin' round, play smart stupid. "What do we do again"?, play smart stupid. . (`_`)

To fix this we must decide what this issue that encompasses the "Health Care Industry", is passing ourselves away off as. Politicians who promote pushing the power of pill popping to purchase your peace of mind is phucked,

Do Republicans mean to bring health care suffering out of control with no market values, because truly they have little of no skills when it comes to fixing their own buffoonery? Hmm... unless they count to hide the bean all together, fixing the game intentionally to have US lose by remote controlling stupidity! 300 channels, and nobody's taking our call from the space cased file of, "what's this freedom war against Life for again"? Look, is mercury as a medicine good or bad do you think?, let's ask someone for Christ's sake. Or for Deb, Henry, Bill, Beth, Mark, Carol or Tony. Johnny Wizard, our everyday normal magic man of folklore, opens up the stage to ask all the people together, "Are we Man or machine to take this all lying down quietly"? We need to talk about what a King like me, is doing in a place like this, under appreciated, and left alone without my home, dying for a break in radio running, as President of the company that started the sands running, Shareware Earth Co., a god-like production of miracle and wonder!! You just participate, and you won't even believe how good we could have it, Rejoice, for Johnny Jesus has come down for diplomatic talks. Give away! Give away!

Again, CNN, CBC, and FOXNEWS, (who advertise their listening) suggest G.W. Bush and Co. have publicly acted nothing warranting immediate arrest, or have openly supported the great Kucinich's plan for Impeachment, and consequently, are leveraging America into this mess 'because' we were portrayed as sold to the U.N. for freedom as Iraqis Grand Strategy. BOGUS! Nothing about the PLANNING of killing people indiscriminately for financial criminal gains as bonafide terrorists, for we had unrestricted access prior to dropping bombs for mangy LIAR neocons. ORHA. I have yet heard FOXNEWS complain in pains of liar BUSH personally being the al-Qaida cause responsible, (like Alex Jones sells foolishly falsely also) More than a million INNOCENT people have been murdered directly by the criminal action of the broken Bush Rule, UN-CONSTITUTIONAL! Don't they know of what You speak? Now???

Make it so,

President and CEO of Shareware Earth Co.
King Johnny Wizard

Christ is Person ! ! !

A reminder: Peres, the Devil demon LIAR, sounds as sweet as any little old man could, but for the fact that he LIES about targeting innocent godly people for murder! While playing ignorance, as if, he doesn't faith G-D as a real Jew would from Israel. Zionists are atheists who lie as neocons who sacrifice all for ill gotten money stolen from US as the blind foolished already with G-D from the Ol? Testament, all on how this Life suspends storied belief as Devine, to say finally, out loud, "hey wait a minute, who's in charge here?", is really something of a miracle. At least when I say it.

Justice to the bushite, Justice to the enemies of America, so called out the Son to God as King of men:

BELIEVE!

Like, so in walks this, out of work time Lord who thinks to converse to the masses about the most basic of reasons to save the lives of innocent others, leaving him convinced, he really needed an audience for this fable to rise as profitable venture. So, it was followed to make it out there in this real world, is to care for Justice measured. All done so to bring greater hope for a better future as all would follow, boy, were they surprised!

Johnny Wizard has arrived..

Spare me some money won't you please for this art of tragedy?

P=2ES. I'm still hoping that Coast to Coast will bill me godman co-host, all to openly address these freedom for all operations, with Justice ruling our way over the irrational tyrannies practiced by others happily blinded. Evidence is required to convince ourselves on who is good or evil. Period. Don't like it? Too bad. We are on charged!!

Intelcenter.com =3D alqaida videos you can get nowhere else!

It is important to also realize, this intecenter terror bringer does nothing to sell the arrest of the actual perpetrators of 911 by supporting our Policed requirement to form actual evidenced conclusions in our the land of the make believe. Now, who personally are these pro-bushite anti-American terror scripters, and what is it going to take to find an informed citizenry out in these here parts, to make the proper conclusions by phone calling for furthering our infos around to channels of command of the big ringers in the sky. I'm sure we's a be furious over these facts of high treason in America if we were allowed to freely say as much on our radios and TVs. Al-Qaida =3D General Mahmoud Ahmad

That's what I'm talking about.

over and out

-

/ / A group of wounded civilians were also brought to a hospital in neighboring Kandahar. Journalists were barred from filming or talking to them inside the wards. \ \

Freedom from what do bushite murder indiscriminately?

/ / Iowa GOP is STILL planning to use the easily rigged Diebold computers to "count" the vote at the Straw poll! \ \

THIS IS TREASON. But, look, teen soldiers are commanded to be bushite nazi savages, who cowardly refuse to defend America from Mr. al-Qaida, General Ahmad, all to thieve further from the undefended American public.

The Arts - an Inside Job

Look, CNN, CBC, and FOXNEWS is lying to US. They know the EVIL bushmob did 911, and have decided to kill your kids for more rewards, instead of defending the innocent. They hold the true value of YOUR LIFE in contempt. Demand justice to defend our freedoms why don't You?

-

THEY GANG RAPED A FOURTEEN YEAR OLD WHILE CARRYING LOADED WEAPONRY

AFTER RAPING THE CHILD IN FRONT OF HER FAMILY - THEY SLOWLY MURDERED EVERY SINGLE ONE AS INNOCENT GOD LOVING HUMANS

- but -

BUSHITE AMERKA CLAIMS THIS DOESN'T WARRANT THE DEATH SENTENCE?

Again, evil bushite THIEVES claim they are justified when indiscriminately bombing populated cities to MURDER US People.

General Johnny would teach MY soldiers to immediately arrest to kill for such criminality. In fact, I'd likely even throw in some bonus cash, an a Freedom medal from all lovers of Liberty. Did you know, many bushite sing a song about killing innocent young girls for pleasure? Did you know that also, an "American" radio host likes playing that same song as recorded on "American" airwaves? Fight back for God, or die from self contempt my friends, fight back for life and love.

Again, evil bushite THIEVES claim they are justified when indiscriminately bombing populated cities to MURDER US People. All to help 'escape' the neocon ENEMIES of America - they also support "officially" destroying Our public infrastructure, thieving humanitarian aid, while incarcerating innocent people to collectively be punished by the TRULY Satanic enemies of GOD. Ten "CIA" bushite enemies have been found to have kidnapped near one thousand innocent Americans to be tortured to death, in tyrannical nations friendly under American funding by Bush unquestioningly. Fight back for your neighbor, fight back for America, fight back for YOURSELF. Or, don't.

See the bushite, you bill it for Christ, You bill it for America, You bill it for them, you bill it for US.

Murdering bushite gang rapists try escaping true accountability

http://womensspace.wordpress.com/2006/07/09/rape-of-the-hadji-girl-part-3-f=
ive-more-us-soldiers-charged-abir-hamzah-was-14-years-old/

/ / Why did the Army, within three hours, return to tell neighbors that this was the work of insurgents apparently without any investigation? \ \

See? in Johnny's world, that "the Army" person would have been the FIRST questioned, then likely arrested. But look, it hasn't even been acknowledged as evil doing in progress. (Every time you read, "The Army says..", become aware.)

It should be noted, ungodly bushite enemy commanders call every car bomb in Iraq, al-Qaida, without even pretending to do freedom operations for YOUR protections, as just another dead body in the rubble. (Likely caused by Aegis for cash profit.) So then, look my friends, Amerka refuses to demand justice to save the lives of their very own sons and daughters. And when, WE, Humanity, beg them to answer our calls for accountability, they refuse but for to LIE, stating publicly, "God" would grant robbing from innocent others, to enrich their great unholy tyrannical demon liar. They know easily that the bushmob did 911, and they like it. No, they crave it. The chance of murdering their own "loves" to enslave the human race for the antichrist, sounds great, just as long as they can get themselves in on the take.

/ / Idiot General Says Dead U.S. Troops Best Reason To Keep War Going And Kill More U.S. Troops

[Option B: More Dead U.S. Generals And Fewer Dead U.S. Troops ?] \ \

If the sacrifice of soldiers lives is going to mean anything, it going to mean how long it took, Americans to care for themselves as really worth something. When, or if that day should come, it will be the day where Iraqis victims are seen, as just you or me. Today, there is nothing more i wish, than to hear bushite nazi savage thieves for the neocon die rightly, before the innocent they target for murder. All in an attempt to 'escape' those truly responsible for the crimes of 911 a bushite whore practices, as an enemy to Christ and America.

Just look at that my friends of Earth just look at that. Americans speak only contempt for the value of human life. Every day, INNOCENT Iraqis die by the criminal actions of the demonic neocon enemy forces of EVIL, and our deaths as the god loving mean nothing. A small few die in a bridge ACCIDENT, and every corporate channel devotes the entire day's news as it. Allawi confesses to killing children for "CIA" money, and there, as with the soldiers who braggingly, beat innocent children to death for sexual pleasure, bomb people indiscriminately, or steal all the humanitarian aid, don't command your slightest concern as impartial paying for it TV viewers. They say, US people who aren't "Americans", do not deserve due process, the freedoms they claim to own exclusively, of which WE, are granted nothing of. See?, by not using evidence to from your guilty verdicts, how can it be therefore possible, to know, you've arrested, tried, then executed a mass murdering NEOCON war criminal? I don't think Americans could possibly be more disrespectful to God and country, Johnny and Justice right now, do You?

http://existentialistcowboy.blogspot.com/2007/06/911-culprits-why-towers-re=
ally-fell.html

/ / We know that a crime was committed on 911. George W. Bush, of course, quashed all investigations before they could begin. Since when are crimes not investigated? [...] It is not too late, however, to begin such an investigation. There is no statute of limitations on mass murder. \ \

We, as Humanity, have to rise against the neocon LIAR enemies who forsake the value of Human life. Death to the bushite, death to the enemies of America's America.

/ / Army Secretary Pete Geren asked a military review panel to decide whether Lt. Gen. Philip Kensinger, who led Army special forces operations in Afghanistan after the Sept. 11 attacks, should also have his rank reduced. \ \

A bushite demon CAUGHT aiding and abetting the crime of FIRST DEGREE MURDER of a trying to be Patriot Soldier, is made to fear in bushite amerka, he might face a reduction in rank! MURDER~!

/ / Congressman Dennis Kucinich, a member of the House oversight and government reform committee, which has been investigating war contractors. "Theres no democratic control and theres no intention to have democratic control here." \ \

Right. The demonic lawless actions of Aegis posing as al-Qaida killing police officers undermine freedom for Iraqis and Americans, alone with ALL the rest of US. All criminally gotten assets of lawless mercenaries will be hunted by every police service; those that complain as traitors to Freedom as Justice, WE, the real Patriot warriors, committed to defensive measures, will be rewarded to bill for. IF! Johnny is recognized a Mythical King with money to spend better than a neocon saboteur. Your call... Reminder: The neocons in YOUR power, were never elected, nor, was Bush the demon enemy of all Human Life. A demon that says if you disagree with his blind blanket statements against innocent Life, YOUR a terrorist. At least with GOD, we'd be only killing criminals we couldn't otherwise defend ourselves from with evidenced conclusion through practiced Law judged fairly.

http://www.guardian.co.uk/Iraq/Story/0,,2138917,00.html

/ / TheSpyWhoBilledMe.com regularly breaks news on the clandestine world of private contractors and US intelligence, recently established that Washington spends $42bn (#21bn) annually on private intelligence contractors \ \

do the math - do the math - do the math - do the math

42 billion. 42 thousand million. Or, hiring maybe twenty or thirty bushite LIAR enemies, who blindly giving Americans pay not only billion dollar saleries, but also with their forsaken lives as unworthy of real protections. CNN, CBC, and FOXNEWS knows the bushmob did 911.

So, million dollar saleries? I doubt. Likely a neocon enemy or two robbing from an undefended America. Remember, Peter Power wants US to believe ALL of Scotland Yard would murder Brits for stolen bucks. Frankly chaps, I just refuse to believe such bullocks.

Be me man,

King Johnny Wizard

-

The Ground Truth
http://www.informationclearinghouse.info/article15319.htm

The part where pro-bush "American" soldiers drive over children to kill them for fun, all because they say our Humanity let's those responsible escape retribution for being Satanically evil as enemies to Christ, left me angered beyond words. While CNN, CBC, and FOXNEWS couldn't care less for those children, but will tell us, these 9 accident victims must rule, so far, two full days of wall to wall coverage. "Pro-Western" Allawi blowing up school buses for "CIA" money? Who cares? Really who cares in TV America for defending OUR children's lives I'm saying? Get me in the news my brothers and sisters, and I'll make the best of it. Just do it. Fear not for my life loves, fear for your life left to silently die in contempt for Humans being.

Thanx much.

-

"He never would have called me 'sniveling,"
http://www.democraticunderground.com/discuss/duboard.php?az=3Dview_all&addr=ess=3D389x1466466

/ / "He never would have called me 'sniveling,"' O'Neal said. "I don't remember ever speaking to this chaplain, and I find this characterization of Pat really upsetting. He never once degraded me. He's the only person I ever worked for who didn't degrade anyone. He wasn't that sort of person."

The chaplain's name is blacked out in the documents. \ \

-

Jeeze, nobody tell Chris what CNN is reporting

MSNBC'S CHRIS MATTHEWS :

" So, the longer we stay there.. do the number of people in al-Qaida grow or become lesser? Aren't there more al-Qaida every year?... Because if we stay there four more years.."

Jeeze, nobody tell Chris what CNN is reporting, where the murder of innocent people outside of Baghdad makes the neocon soldiers appear as Heroes, all because they can blindly blame the CRIME on al-Qaida without even the slightest inquiry. Catch this Revelation, among many others, in one of many miraculous Mr. America, Johnny Wizard Podcasts. Get your copy before they're all gone!!1 Haahahaheh.. boy I'm I ever one hell of a great guy.. know..

Love yeah!,

President and CEO
of Sharewhere Earth Co.
King Johnny Wizard

-

"I just brought TERROR to someone else, under the "American" flag, and that is just not what I joined the "American" Army to do." - dying needlessly for the enemy of GOD antichrist responsible personally for the treasons of 911 with his zionist neocon partners of EVIL.

-

/ / President Shimon Peres has called on the world to unite against Iran and to force it to abandon its nuclear weapons program. \ \

Let Jews of the World rise to demand Peres "The Devil", be put to death for alleging a FALSEHOOD to murder Humanity for our stolen religious values. Peres is the actual Devil. No, seriously. I am as surprised as anyone.. No, seriously.

Signed,

Poor Jew Johnny, the richly Magnificent!

/ / DCI said the children confessed to the charges brought against them after extended periods of interrogation, which occurred before their court appearance. The report includes personal testimonies from children that expose physical and sexual abuse at the hands of the Israeli army and brutal treatment during lengthy periods of interrogation. At the end of the interrogation process the children were told to sign papers, despite not knowing what they were signing. \ \

Realize: American tax payers fund this unquestioningly.

-

http://www.talkleft.com/search?string=3Dhaditha

All military "Judges" must be arrested for TREASON, tried on the decisions they've made as unqualified. And on those decisions unjustified, as on the charges of murder, THEY, will be put to Public Judgment for a death sentence gloriously for freedom and country, I will be assistant Prosecutor, who will speak facts, unlike bushite, who calls every "foreign fighter" al-Qaida (except the REAL General Mahmoud Ahmad) - and bombing victims "SUSPECTED" women-loving-child-schooling-Taliban. Death to the bushite my friends, death to the bushite enemies. These demon nazi fukers believe that those who bomb cities indiscriminately, wouldn't be put to death for the defense of our communities in Christ. I, Christ, intend to change that by example. Americans will pay $25,000 a head for every nazi bomber, or those who fly in the Apache, captured, tried, and put to death as the Satanic bushite enemies of Creation. Kill a bushite today why dont YOU lover of GOD as Just Causes to save Our dying Universes? Those who victimize ourselves as the innocence of Humanity, are going to answer to US scientifically. Death to the bushite, death to the enemies of America.

-

The King of America - Citizens Face Full Asset Seizure

http://www.rense.com/general77/asset.htm

/ / "(ii) to have materially assisted, sponsored, or provided financial, material, logistical, or technical support for, or goods or services in support of, such an act or acts of violence or any person whose property and interests in property are blocked pursuant to this order; \ \

So, those who don't support the return of all stolen monies from Iraq, who continue to undermine Humanity's chances for Justice in Iraq, (like every neocon LIAR and foxnews broadcaster, lawless mercenary antichrist disciple, or Haliburton shareholder,) needs their assets seized, and tried publicly for treason as war criminals. Every war profiteer holding more a one hundred thousand dollars will be hunted by the will of Humanity. so says - The Son to God as Man to men.

Bush To Veto Ban On Mercury In Vaccines
http://thimerosal.worldwidewarning.net/www/archives/59

/ / "Under the current administration, mercury has been and will continue to be knowingly injected into the youngest of American citizens. The controversial mercury-containing preservative thimerosal has been linked by thousands of parents as being the cause of their children's mercury poisoning and autism." \ \

Please, I beg you as the Son of Man, to fight back against those who threaten the lives of innocent American children, by forbidding defenses for US, the People. As recognized King of my forsaken World, this wouldn't happen I'm telling you. Support my rise to tax every American ten cents to start up my company of accountability. Running on free open line communications where ANYONE CAN CALL US, and call me a Jerk, just don't expect I wont fairly defend myself. Live broadcasts out in the fields, trumping evil demons by the power of the word. These individuals responsible for criminally victimizing American children, need to be arrested from continuing their action against our families. Support US please, to work on Just causes for the betterment of the human species, Or don't and die unworthy you bunch of bushite nazi savages.

We Have A Problem Here

Look, Bush closed investigations on 911 immediately, then started firstly on Iraq, for war mongering thieves, with General Ahmad escaping un-accosted for the neocon enemies. Not relevant? Your Constitution is laying undefended, a National act that can not be done by any other terrorist group but those who claim your freedom rights denied by bushite command. Not treasonous? Look Condi, the demon 911 nazi witch PERSONALLY assisted in dropping more than seven million land-mines on Lebanon indiscriminately in Your terrorized dying names. Hate Life and God as yourself do You?

Don't anyone be deceived that the neocon enemies minimally assisted these crimes by refusing to allow US pursue the evil doers by following the actual crime scene leads, but we lack REAL leadership skills that are naturally required to see molten Iron flowing like water from the 911 towers on YouTube. Oh golly gee, who is that theatrical man from Canada with all the answers on Justice for Peace with Freedom Ruling Supreme? with atheists and everything? A brilliant man given next to no chance at receiving acknowledgment in Bushite media amerikan impires.?

Ray McGovern on 911 broadcast nation-wide on the coast to coast radio network "What we need here is an investigation. There are answers out there, but no one has pursued the answers." Similarly, there are questions that we isn't [allowed] figuring.

"No one has pursued the answers"? Come on Ray, don't tell US, you have no internet access, or haven't seen the video of molten iron flowing like water... blahblahblah

http://www.peaceandjustice.it/impeach/

/ / Executive members of the American Israel Public Affairs Committee lobbied Congress to pass Iran sanctions bills. \ \

These DEMONS need to be arrested, tried, and EXECUTED for TREASON. There is no evidence against Iran to substantiate their DEMON LIES to murder millions of People for the pleasures of the sadistic zionist enemies of Human Life, enemies of GOD as LOVE. Just because repuglicons like Liebermann, take bribes to murder US folks as the innocent, doesn't legitimize their treasonous conduct against YOU, my freedom loving dying brothers and sisters. Stand up for Jew Boy Johnny why dont You.

Who as America will bother to care they die by naked zionist criminal command? Johnny Wizard has been screaming for help to America, begging them to pick up their phones leastly, to air concern for the survival of the Nation, for YEARS! to publicly challenge happy happy, joy joy pro-child killer demon enemy George Norry and bullshitter no-national thief of Life Art Bell, and they've near completely refused while laughing and singing by who cares for you zionist news command.
They, as America's Coast to Coast voices, would rather richly die YOU sacrificed for CRIMINAL zionist Israel, (Israel, where the government leaves actual Jews to die in the streets starving as garbage dumps, to make it look good for MORE giving American charitable donations to disappear elsewhere) before saving the lives of THEIR VERY OWN. Americans don't seem to care they die by their own unwillingness to communicate openly for Justice. I ask you again, to spare me a few dollars so I can feed myself. I am actually, near starving, and never in my most feared nightmares, thought this world, with our communication technology, would leave me without any financial assistance. I seriously need to eat. Please help me, by supporting our cause to not starve to death. If you appreciate my words in defense of the once great Human race, donate a few dollars to this cause. Justice and Freedom for all, especially God as Just, and worthy our praise

Peace.

FEMA covered up toxic danger in trailers given to Katrina victims
http://www.wsws.org/articles/2007/jul2007/fema-j21.shtml

I'll tell YOU again, CBC, CNN, and FOXNEWS knows the bushmob did 911, and lie to you entertainingly to sacrifice even more of US to the demon antichrist forces of evil.. While I ABSOLUTELY destroy bushite with joy for God and the defense of love.

/ / Support me, or fail to recognize true wisdom when it speaks to you of need for desperate change to save your dying selves. No evidence against an accused is US being truly abused.

"These are not terrorists, they are not al-Qeada, they are ordinary innocent men, women and children." \ \

-

TRAITORS TO LIFE

"I told him, there's women and kids in that room," Lance Cpl. Humberto M. Mendoza said of Lance Cpl. Stephen B. Tatum. Tatum's response was, "Well, shoot them,"

If Americans don't proudly put to death Tatum, on behalf of the Family that lost their son, their Marine, Johnny will formally conclude, Bushite america is an ungodly evil nazi fascist state of intolerance and hate to US, the Great Human Race. Bushite amerka does not own Freedom, nor do they own our rights to be Just. Join me in demanding the Public execution of the satanic demon liar Tatum, on his Public insistence that murdering innocent families to thieve from for the neocon, is a crime not warranting the death sentence enforced by any family man. Death to the bushite. death to the enemies of man. The neocons will be arrested, tried, and executed for the crimes of 911 as traitors to Life.

Bush Outlaws War Protest - Citizens Face Full Asset Seizure
http://www.rense.com/general77/asset.htm

"Who cares? to listen to a dying unheard America",
as the growing richer ungodly neocon enemy traitors shrill.

-

Death to the bushite instead of the innocent loved in God

/ / IntelCenter issued a tacit warning that the footage may be re-hashed when they released the "new" tape to the media, but they failed to mention the fact that they released portions of the exact same clips in October 2003. \ \ amazingly - I witnessed blurred-out faces of those they claimed al-Qaida in another instance just recently. (Then, look at the dog fight vids that CNN and CBC refuse to show the dog haters faces in..)

I say American taxing payer folks, flip me some dollars, and I'll pay out rewards - after a moderate lunch - all to take these IntelCenter AL-QAIDA! - AL-QAIDA! - AL-QAIDA! straight to public trial, then public execution for high treason - like holy fuk mon let's get real here People. Or don't and we die further for bin Laden's fear of cameras. Offer a 500,000,000 dollar reward for Zawahererri's crew to get the rest of this done quick like. I wanna rock! Death to the neocon enemy LIARS, death to those who WAR - WAR - WAR innocent Humanity for the continuing bushmob's escape plan from nowhere. See? Heaven or Hell? YOU DECIDE.

Don't EVER forget, the private company Aegis has been officially found dressing up as AL-QAIDA! - AL-QAIDA! - AL-QAIDA! to murder pro-western forces in Iraq, while desecrating Elvis. Elvis Presley. If you don't love Elvis, there is something seriously wrong with America. Now yous messing with a real son-of-bitch. HeY!, question: why don't Americans kill a bushite for Yourself bud? - because Bushites insist "we're" willingly being led by the antichrist enemy of all human life as Satanic LIARS who intend to cheat ourselves of freedom through self respect. Pro-neocon-media enemies are nazi savages, and I don't like it..How about you?

Death to the bushite instead of the innocent loved in God

-

Time is Up

Al-Qaida Kagan "Al-Qaida, their whole strategy revolves around generating sectarian violence, because that is how they embed themselves within local communities "

What?? For friendship?

What is the demon TRAITOR to HUMANITY in America saying about the reasons he embeds an Iraqi under 50 odd divergent NEOCON labels? Wouldnt most Al-Qaida take great joy in killing a bushite nazi grunt like any real Family man would also? These LIAR dumfuk grunts who cheer "whore yeah", routinely, can barely read or write, so, how possibly does this FOXNEWS expert, expect such ungodly antichrist forces to delineate Al-Qaida from the local communities they PROVABLY indiscriminately bomb as Satanic?

Kristol and Kagan: Put Everything Behind Escalation So We Can Bomb Iran and Syria

Kristol and Kagan MUST be put to death for treason against America, treason against Life, treason against GOD. They both have continued to Publicly advocate murdering more innocent peoples indiscriminately they call, "Al-Qaida", all to rob further monies from an undefended America. It is easily learned by any as all, the victims of bushite tyranny are exclusively, US, The People, guilty of nothing but our shared love of GOD. Remember forever: there was NO JUSIFIED REASON for bombing PEACEFUL Samara, NONE! that bombers confess was done as ordered by Allawi INDISCRIMINATELY, all for getting killed Marines sent in later for more stolen cash from America. P2OG. [hundreds of bushited Marines died rightly almost immediately - (wow eh?)] A Satanic action, Kistol and Kagan, both blame without thought to question on "Al-Qaida".

The action of Satanic bushite bombers targeting Samara as war criminals is FULLY documented.

Death to the bushite neocon LIARS, death to the enemies of Freedom for Humanity. My beloved friends of GOD, please, when you see the mute bushite, kill it for Christ, kill it for Love, kill it to defend your loved family. (Any soldier who doesn't proudly talk of how it hunts those British soldiers who kidnapped barefoot children and victimized them on video, is a soldier worth destroying NOW to defend GOD and Life from needless death.) I HATE the REAL demon antichrist Christ says.

Kagan "You rarely know in the middle of a war, what the outcome will be."

Johnny Wizard the Creator "I win."

-

/ / The US has also been backing some pro-western politicians like Iyad Allawi \ \

Do you know who Allawi is? Allawi confesses to blowing up school buses filled with children for "CIA" money. NOT THEORY. HE ADMITS IT AS AN ACTUAL SATANIC DEMON! Allawi, the truly insane mad man, confesses to having ordered the murder of doctors and nurses that treated wounded god loving women and children from Fallujah. It was these DOCUMENTED acts that had him thrown out of 'the CBC, CNN, and FOXNEWS TV expert scene as workable', all for fears that US humans might actually wake the fuk up on WHO is Our True Enemies here. All three, pro-private-bank zionist news stations are well aware that the bushmob did 911, but lie to YOU as forsakenly dying for their growing riches and world wide broadcast fame.

CBC National Newz - July 11th 'tens of thousands have died in Iraq since the war against truth started.'

Anyway, these two Allawi incidences are fully documented, look it up, then demand the "The US" pro-western politician person quoted as supporting Allawi - be found guilty of CRIMES AGAINST HUMANITY, Demand publicly, having the neocon zionists EXECUTED by America, for America, as America. A Just America that defends America from criminal madness. Or don't. Death to the bushite, death to the enemies of Man I say.

-

ABCNEWS.com : FBI Called off Terror Investigations

A question Johnny Wizard has for America: Tell me, is this not a treasonous act - for Bush to close criminal investigations, immediately after the terrorist crimes of 911? Shouldn't the demon enemy be put to arrest for that godless act alone in this forsaken dying world? A world left instead suffering further the tyrannies of the war criminal ENEMY of all Human Life?

A refresher: the neocon will tell you openly, they live to lie to the Public for cheating and stealing by murder of US, innocent peoples purposefully enslaved by a made ignorantly entranced TV audience that is repeated reminded, we have no power worth respecting.

CNN, CBC, and FOXNEWS arent taking are calls presently, but just lie and tell US they do. Look to see, almost all political internet traffic condemns Bush straight to hell well he rightly belongs, but the polls still say no - WE, seeking for Just cause, are the minority.. just roll over and die for the neocon betrayers to god and country, life and loving.

-

George Bush "The same folks that are bombing innocent people in Iraq were the ones who attacked us in America on September the 11th"

George Bush 'Iraq has nothing to do with 911, you bunch of nazi dumfuk grunting LOSERS. Whore yeah - praise Satan - die America die. I mean... I love Jesus'

So it was as I thought too: the direct co-operation of the joint chiefs of staff assisting General Ahmad, in committing the murder of thousands in America on 911 for the neocon TRAITORS, as the same 'escaping' enemies today, responsible for 'secretly' ordering these indiscriminate terror attack bombings against YOUR Humanity for their continuing stolen pleasures as

Satanic.

-

/ / U.S. Marines are said to have killed as many as eight unarmed Iraqi prisoners when U.S. forces attacked Fallujah in November of 2004. \ \

HA! Trying to ignore the murder of more than 200,000 People as if OUR lives have no real meaning. WE KNOW they murdered everyone they could in around between 15-55, but went ahead gunning for infants and the elderly too under Sattler. Look it up. Death to the demonic bushite LIARS, death to the enemies of Man, so says the Son to God as Man to men - Kill the dishonorable bushite enemy and be Loved by all as Savior.

-

DEMON MURDERER PETER POWER TRIES TO LIE HIS SOCKS OFF ABOUT HOW HE MURDERS LONDONERS AS A FOR REAL TERRORIST RECRUITER

[letter written as signed by Peter Power to MSNBC et al.]

/ /It is confirmed that a short number of 'walk through' scenarios planed [sic] well in advance had commenced that morning for a private company in London (as part of a wider project that remains confidential) and that two scenarios related directly to terrorist bombs at the same time as the ones that actually detonated with such tragic results. \ \

Little Peter Power is threatening literally BILLIONS of US there. So.. what we a going to do my partners in living? Die or survive? Your call...

-

Petraeus quietly urged his commanders to "get the word out"

Homeland Security Committee Chairman Bennie G. Thompson

/ / Thompson continues by asking Chertoff to further explain what measures the country should take based on his instincts, "What cities should be asking their law enforcement to work double shifts because of your "gut feeling?" Are the American people supposed to purchase duct tape and plastic sheeting because of your 'gut feeling?'" \ \

Homeland Security Committee Chairman Bennie G. Thompson

NOTE: Americans are literally paying billions for Chertoff's THREAT of "gut feeling". Billions, while the neocon walk away from MURDERING Americans on 911 with the bushite on America's Coast to Coast radio network, claiming they don't know you know, nor, ever will. They'll tell you, blame the shadows in the New World Order, but don't rely on evidence to form your conclusions on who PERSONALLY is responsible for criminal actions against YOUR rights to be free as alive. Evil is real my friend, evil is real. Death to the bushite, death to the enemy LIARS of human kind. Death to the enemies of Love and God. Death to the enemies of Life.

"A dead Iraqi is just another dead Iraqi... You know, so what?"

These demons are murdering god loving people as enemies to Humanity with the nazi assistance of corporate news america. Will YOU please, support my rise to speak publicly challenging anyone who disagrees with me, GEORGE WALKER BUSH needs to be arrested immediately for 911. Peter Power needs to be arrested for the London bombings. Sattler, Blount, and Russell need to be arrested, tried and put to death for WAR CRIMES against Iraq, along with those responsible for other indiscriminate targetings against innocent PEOPLES for the zionist neocon god betrayers hidden in shadows as the un-known "Joint Chiefs of Staff" demon enemies.

Fight Back for Christ Sake God Damn You

/ / Wash. Post parroted White House claim that Iraq war was authorized by U.N. Security Council \ \

Treason charges must be sought against zionist reporters who LIE with such blatant disregard for your freedom in America.

-

The fascist control bushite, don't like You to think

independently for Yourself, for we independents out here
make them look as stupid as they are. Thank you very
much for that not so secret info.

-

The Other War: Iraq Vets Bear Witness
Chris Hedges and Laila al-Arian, The Nation

/ / Many said that these acts were perpetrated by a minority.
But they nevertheless described such acts as common and said
they often go unreported - and almost always go unpunished. \ \

/ / In addition to this sadistic and prolonged torture of the
innocent,
according to Gush Shalom, (Gush Shalom is a Jewish peace movement-
true Judaism is opposed to Zionism) \ \

Moore vs. Greed
http://www.crooksandliars.com/Media/Download/19156/1/TSR-Moore-Wolfie.wmv

Moore: "Why dont you [at CNN, CBC, and FOXNEWS] tell
the truth to the American people?"

Because as zionists, THEY hate a liberating people who want to
TRULY make their lives better by understanding Justice is Freedom.

-

"Al-Qaida" =3D "General Mahmoud Ahmad" =3D "bush's ungodly partners in
crime"

Why will you not as a member of Humanity, make the call
to the Coast to Coast radio network of demon evil nazi
savages who deny your legitimate concern be addressed freely?
Hate God and Love do you? Couldn't care less could you
for the giving lives of ignorant Americans as an American?

Death to the bushite, death to the enemies of Man.

-

http://www.liveleak.com/view?i=3D456_1177473318

/ / An [BUSHITE ENEMY] American soldier boasts of having tortured
[INNOCENT] Iraqis and making a 15 years old Iraqi girl commit
suicide after she had been raped. \ \

Tell US, who wouldn't take great pride in warring this boastful enemy
of Humanity? Or, are you like CNN, CBC, and FOXNEWS would suggest, it
is heroic - for all are heroic who DIE for the neocon?

-

/ / It is strange that the 'Secret Organization of Al Qaeda in Europe,' the group that is allegedly responsible, would have escaped notice (to say nothing of their odd, 'double secret probation' type of name). \ \

Bushite are EVIL to all, as enemies to Human kind. During Katrina, the bushites responsible for protecting America, slaughtered everyone's confiscated pets for joy and happiness. Three schools filled with hundreds of dogs, cats, snakes and bats. There was no need to kill everyone's beloved pet, but as the bushite will FREELY tell YOU, it was fun to serve demonically as the antichrist enemies of God and love. demand Justice for God, demand Justice for Johnny.

/ / The mere fact that one can deduce a motive for a person or a group does not mean that they perpetrated the act...and it hardly suffices as proof of anything.\ \

Just try telling that to 'why work to make life better' CBC, CNN, or FOXNEWS censors. Look at me!! They refuse to acknowledge my documented info as REALLY important to your continued ACTUAL survival.

Who fuking cares right? Certainly not the enemies of America at the Coast to Coast radio network, who would kill Americans for the rich neocons without question. It's JUST American kids getting conned to die as bad guys.

-

DEMON LIAR George W. Bush "The larger point is, and the fundamental question is, did Saddam Hussein have a weapons program? And the answer is, absolutely. And we gave him a chance to allow the inspectors in, and he wouldn't let them in."

/ / Witnesses claim a village in British-run Helmand was
bombed for three hours \ \

BUSHITE, THE ENEMY

It is not just a Muslim who sees the bushite as an enemy to Humanity. These lawless savages have been acting without accountability to anyone, because they are largely enemies of America, who cowardly run from responsibility in America to defend their own brothers and sisters from the neocon, and die instead as/with rapists, torturers, and THIEVES.

"Al-Qaida" =3D "General Mahmoud Ahmad" =3D "bush's ungodly partners in crime"

/ / How can those who want accountability be termed
anti-Iraqi? only through cowardly liars, is an American
told America's not going to hunt down those who stole in
their names as neoCONNED for dying. \ \

/ / Israeli officials have told us that the Finance Ministry is budgeting basic social services at a percentage of their known costs \ \ EVIL BEYOND WORDS. KILLING JEWS FOR MONEY. We can really be something greater, while a murderous bushite thief, a LIAR, can hardly read or write Liberty without flinching from self contempt.

Jesus man, do I truly hate these zionist nazi thieving LIARS on our magic TV shows who con our kids to die as bad guys. How about You?

These naked LIAR enemies who bank to thieve more from Iraq, Afghanistan and America, must be brought down by Humanity's ultimate triumph over tyranny through Law. A just law, where those accused without any evidence are Innocent, and WORTHY yOur defenses.

OBSTRUCTING JUSTICE FOR AMERICA

Tony Snow "The executive branch is under no compulsion to
testify to Congress because Congress, in fact, doesn't have
oversight abilities."

IT LOOKS like they are going to attempt making the move of
BLATANTLY TREASONOUS war criminals acting to measurably now
destroy yOur Freedoms in godless America. The Satanic
neocon's 'faith', is in that YOU as an American, will watch
the same corporate drivel that offers next to nothing to
empower YOURSELF to speak Justly for a dying America. Instead
of demanding 24 hour, wall to wall news coverage, of war
criminals going down one by one by the will of Man to Justice,
CNN, CBC, and FOXNEWS will broadcast your blind 'belief' that
you are only a impartial viewer, who doesn't really care about
dying right in front of yourself for the zionist's riches, and
great worldly power of tyranny through lawless nazi bushite
censorship.

"Al-Qaida" =3D "General Mahmoud Ahmad" =3D "bush's ungodly partners in crime"

Jesus man, do I truly hate these zionist nazi thieving LIARS
on our magic TV shows who con our kids to die as bad guys.
How about You?

/ / If Bush and his PNAC buds are innocent, then Investigate
911! What have innocent people to fear from a fair, complete
and real investigation? \ \

They are guilty, so, of course, the demon Bush enemy,
OBSTRUCTED JUSTICE FOR AMERICA.

I hear the national radio program Coast to Coast is still feeding us neocon lies. Why don't you make the call for Johnny.. believe in yourself for a change why don't you?, buddies??... I am Your god king. King Johnny I am. Champion of Universal Life! Not enough? Who cares?, to allow US speak on our broad casts as legitimate? Worried I'm going to love Life as truly honorable, and Greater than those who openly lie to our soldiers to have them unjustly die for no better good or reason understood? Let us make life better than the neocon envision, and support our rise to popular acclaim by allowing US to speak openly for public challenge in defense of America.

Death to the neocon soldier, death to the enemies of Man.

-

True US Bush Iraq-Afghan Wars Deaths At 21,000
http://www.rense.com/general77/true.htm

"In the last four years of war in Afghanistan and Iraq, the unreported death toll of American military personnel is in excess of 20,000 (20,871)"

It's in cowardice that 'Americans' don't speak out for
the lost 'loves' of their dumber than dumb sons.

-

Thinking of vacationing in occupied ungodly neocon aipac israel? Check out the criminal zionist's 'best' selling point...

ISRAEL PEDDLING WHORES TO ATTRACT TOURISTS
http://desertpeace.blogspot.com/2007/06/israel-peddling-flesh-to-attract.ht=
ml

[The freely self confessed child murderers of the IDF, tell US as demon liars, they're "Jews". Anyone in Israel KNOWS this factually to be so. For, the zionist forbid 'by law', to allow military service from anyone in Israel who disagree that

God would will the thieving and murder of the completely innocent in GOD accepting without question. Now why would YOU want that?]

The nazi IDF does what Canada's dope pusher O'Conner suggests we accept. Demon enemy bushite in Afghanistan murder children without real understanding 'by accident', [no evidence is shown to ANYONE, just treasonous demon evil bushite necon spewing, "red handed"] lies after lies, while, the Taliban, we are told, are so much worse, because they would murder "ANYONE." Make sense? No. Remember: (The bush regime has been found funding Al-Qaida in Iran to commit terrorist acts against COWARDLY soldiers without free minds to speak in their own defenses.)

/ / The group is demanding his impeachment not only for his crimes against humanity but for lying to the American people about his worship of Satan. \ \

It almost makes me laugh, and then, I push to remind, we are so very far from where civilized is dreamed to reside. Look, think of US as actors, (because that is who we are,) and support my rise to proclaim by the will of a suffering for real human kind. Believe in US, as if your life depends on it, because it does my friends, because it does. Live free or die unwillingly.

cause I am just,

King Johnny Wizard
President and CEO

http://cleveland.indymedia.org/uploads/2007/06/christ_in_america.mp3
http://rochester.indymedia.org/usermedia/audio/6/christ_in_america.mp3

I BEG the Christian men of Earth to help GOD

/ / The currently ongoing "pacification" of Baqubah, a city with 300,000 inhabitants, by some 10,000 U.S. troops is using the same methods as documented in the NGO report with regard to Fallujah \ \

I BEG the Christian men of Earth to help GOD in destroying the lawless bushite nazi thieves, who lie cheat and steal from Humanity for the 'escape' of the ACTUAL zionist 911 perpetrators. Death to the LIAR bushite, death to our enemies, so say Johnny America, Lord and Savior.

Coast to Coast radio hosts MUST face treason charges as enemies to Life as we know it. They lie to the American child, to trick them into sacrificing more lives for the tyranny of the antichrist.

-

/ / Cheney's office has refused to provide his staff with details regarding classified documents or submit to a routine inspection as required by presidential order, \ \

It seems Cheney wants to go it completely alone as an escaping war criminal in America eh?

Demon G. W. Bush "Our responsibility to history is already clear: to answer these attacks waged against us by stealth, deceit and murder and rid the world of evil."

"Deceit" and "murder" to rid our world of justly what dum-uk enemies?

Kill a lawless bushite THIEF for America why don't You Patriot Warriors?

-

Bin Laden may have arranged family's US exit: FBI docs

-

AMERICA HATES BUSHITE

Nationally broadcasted every day across America, Mr. George Norry publicly supports the murder of innocent Arab children, and I'm beginning to really hate a silent dying America for it. Speak to defend the innocent in this world American, or die yourself from self contempt.

Bushites war LIFE itself. So then pleads I again the Son to God, as Man to Men: war to kill the enemy bushite nazi savage thieves, for real Freedom is waged truly by Just causes. The mute, pro-censorship/tyranny THIEVING bushite savaged nation, has NO EXCUSE for the crimes they have committed in our dying names. I demand our voices heard internationally for Justice as Freedom is Godly.

To, with a Love in your Heart for GOD, kill such contempt for Human life, is to serve American freedom to the last bushite neocon breathing. Death to the neocon soldier, death to the enemies of Man.

/ / "They can try to have their votes of no confidence," the president said, "but it's not going to determine - make the determination - who serves in my government."

MY government? Now that's entitlement. And you thought George Bush didn't have a vision for America \ \

Hitler, the mad man, wasn't as insane as our demon enemy George Bush Jr. is.

/ / The [BUSHITE ENEMY] US has said it would refuse any request by Italy to extradite the accused [satanic bushite torturers of completely INNOCENT PEOPLE]. \ \

Christ, The Son of Man, Begs the Godly Men of Earth

Christ, The Son of Man, begs the godly men of Earth, to judicially bill on sight, any neocon soldier who supports the carnage waged in Afghanistan as cop killing dope pushers. They shoot innocent women and children dead in the streets for humor, and bushite pirates at CBC and CNN, state bushite in Afghanistan are doing a good thing helping the bushmob escape the crimes of 911 by warring for Muslim fundamentalism, persecuting INNOCENT women and Christians, while for entertainment, bomb innocent families running for their lives from a Holy Church. Soulless child killing soldiers who CBC execs would tell are our DEMONIC heroes. Lawless dope pushing cop killers have got to go down dead screaming, instead of the innocent - YOU and me they target for MURDER. Death to the dishonorable bushite THIEVES, death to the enemy neocon LIARS of GOD and man.

We can really be something greater, while a murderous bushite thief, a LIAR, can hardly read or write Liberty without flinching from self contempt.

Kill a bushite LIAR, why don't you my brothers and sisters of the faith in something greater than bushite godless tyranny?

Brig. General David Fraser - former nazi commander of NATO who 'okayed' the bombing of defenseless innocent Afghan women and children for the Satanic enemies of Man, stated on CBC, he liked killing police officers, along with innocent women and children, (deliberately targeted for the pleasures of the demon antichrist) because, Afghanistan's children hope to learn. See? The bushite 'will' murder all our children and teachers on hope that we will never learn the Taliban, led by "Omar the Just", were loyal to Christ as REAL American Freedom, when publicly demanding evidence to form your conclusions. Thus is why the ENEMY to LIFE neocon state on YOUR TV and radio, WE must never be allowed to speak openly with the Taliban regarding the FACTS. Because if we did, neocon pension thievers would be hunted down in the streets for public trial, and then gloriously put to death by Christian values committed to TRUE freedom from lawless godless zionist LIAR tyrannies against Mankind - YOU included.

George Norry and Art Bell are the most evil of bushite, who as betrayers of the Human race, deny soldiers to know: General Ahmad funded Atta. They will both support the murder of Your American Son or Daughter for further zionist evils, before allowing true open line communications, to defend ourselves from the lawless demon enemies of Man. Do something about it, or don't. Let TRUTH set US free.

Instead of making an easy phone call today for your dying brothers and sisters, die as Satanic bad guy enemies of Life on Earth, sacrificed in cowardice to the real demon antichrist, and see if we, the true, strong, and free, care. The Son of Man SCREAMS before coming home to GOD'S America: We are coming to destroy Satanically lawless bushite enemies, all for the love of God, we shall succeed my friends, we shall succeed. I will not willingly live in a forsaken world with LIAR zionist war criminals conning US to believe, God is not Great, True, Strong and Just.

Die bushite die!

-

/ / A manifest showed the goods [BUSHITE HEROIN] were to be shipped from Kabul to Dubai and then on to Canada. \ \

"We have nothing to do with poppy eradication. We stay away from [pro bushite heroin to kill YOUR kid with] it as far as we can," Maj. Steve Graham of the Royal Canadian Dragoons

-

To Kill a Bushite, is to be Heroic

To further murder as these ungodly bushite liars do today as our suffering Mankind, is to blindly swear public allegiance to the for real DEMONIC antichrist THIEVES. Bushite enemies are evil nazi dumfuk scum, liars who cowardly watch America in her weakness be high jacked, and squeak nothing for Just words in our REAL defense for dying.

JOHNNY ROCKS

AMERICA'S Mr. O'Really responding to accusations that FOX NEWS refuses to cover the war in Iraq on behalf of concerned, AS DYING, American families, [and forsakes Christ as demon betrayers to the paying victim audience] Stated:

"Do you care if another bomb went off in Tikrit? Does it mean anything? NO! It doesn't mean anything."

Why should WE continue to silently die unjustly victimized?, for the bushite's contempt of Mankind censored?, the Eternal Son of Man to GOD forever answers correctly.

Kill a bushite as the Love of Justice for Humanity

The Son of Man BEGS all honorable men to defend Life from bushite enemies of GOD who murder, rape and steal from innocence through lawlessness as thieves of everyone. Please kill the bushite for the love of women and children. kill the bushite for the love of GOD. Please, defend ourselves further hardships by supporting immediate war crime trials to begin against all neocon traitors who LIE OPENLY to kill America's America as enemies to truth, as enemies to Christ.

Charles Goyette Interviews Scott Horton
http://dissentradio.com/charles/aw061107scotthorton.mp3

/ / Look, do you understand what these [TV politico] people are saying?

These people, one right after another, are up here talking about a nuclear strike! [more bushite DEMON mass death and suffering against Life] On a country that hasn't threatened US?, hasn't harmed US?, has no capability to attack US? Do YOU understand the madness we have descended to? \ \

'Kill Anyone Still Alive': American Special Ops
http://www.atlanticfreepress.com/content/view/1784/81/

Can you not as a American Man, destroy bushite brayers to defend innocent life? Americans could not care less presently for the value of Human life. Americans do nothing to defend their lives, but officially plan to murder more for the Satanic demon antichrist in silence. Out of millions, how many even bother to make a phone call to talk radio against the neocon. how many? Five or six? Seriously.. How many? I know bushites are demon liars for the neocon, but is it really impossible for "Americans" to try speaking?, in the face of murdering millions more forsaken by enemy mortal, pro child killer George Norry? George Norry too nice of a guy to even bother question the value of American children? The THIEF Art Bell's voice too soothing to care that neocons own pirated America, and on everything she stands whoring as WAR CRIMINALS to the FOR REAL antichrist?

Death to the lawless bushite, death to the enemies of Mankind

p3
http://pr.indymedia.org/uploads/2007/01/law_of_the_land_-_we_rule.mp3

God is Great

Again, George W. bush did 911 with General Ahmad, but CBC zionists, actual treasonous LIARS, actually smile to dying Canadian soldiers with only true contempt. CBC kills Canadian kids, with their intentional demon lies, trying to subvert Justice for God and Johnny. In fact, yesterday, they did a special, all on how "God is NOT Great", giving that bush bitch demon LIAR, all the space to pontificate it's hatred for Wisdom, Science, and GOD, with only nods and smiles from the 'illiterate' hord. Remember: A zionist KNOWS it's an enemy of Humanity when it supports dropping seven million land minds to murder indiscriminately OUR CHILDREN for decades, or stealing a Christians Home because they say God says Jews would do such ungodly acts. Blame innocent Jews the holocaust denying zionist shout, of which not one, is a Jew. Like me.

To Kill a Bushite, is to be Heroic

Pro child killer George Norry, enemy of the American soldier, still blabs about how more must die unjustly for bin Laden with LIES, knowing full well, video of steel flowing like water from the WTC exists, and that General Ahmad funded Atta. George Norry is a traitor to the FBI, who further plans more to die sacrificed under the censorship of the tyrant antichrist. Who cares I ask about America truly dying as neoCONNED, for George Norry has millions to not take your calls for protection, and honestly, 'Americans' couldn't care much less for Our Humanity's future. Live free by defending liberty by killing pro lawless pro torture pro fascist bushite enemies my friend, live free by defending Yourself and GOD.

/ / The U.S. State Department recently issued a report calling Sudan a "strong partner in the war on terror." \ \

The high jacking Bush regime is supporting financially a TYRANNICAL 'government' that openly practices Genocide, as just the sort of "American" partner to assist in determining which further murder victims are terrorists. While the same demon administration confesses to FUNDING middle eastern al-Qeada to commit TERRORIST acts in Iran, as demon evil tyranny against the sleeping Sheeple. Again, it is fully confessed that the Satanic bushmob is pro terror now. Death to the enemies of Freedom, death to the bushite betrayers of Life instead of YOU my innocent friends. Instead of US.

/ / US 'used forced [SLAVE] labour to build Iraq embassy' \ \

Kill a bushite LIAR and be loved by God as Life is True.

DOWN WITH EVIL, UP WITH FREEDOM.

-

Love to God Gives US Strength

The Son of Man begs the Men of Earth to defend Ourselves from the unholy forces of our tyrannical enemies. Death to the ungodly bushite thieving LIARS, death to the ungodly enemies of American children everywhere. GOD praises all Men, who kill the murderous bushite enemies of Just causes. The THIEVING satanic bushite forces, speak only contempt for GOD on our demandings of the public execution of the boastful terrorists, like the bushite who video taped the murderous assault of OUR kidnapped bare footed children, or murdered Iraqis while desecrating ELVIS, done all to please the "escaping" satanic demon antichrist zionist, Our Mr. bush Jr., who with his private business partner, General Ahmad, actually committed the ungodly treasons of 911 in a land of blind men sleeping., according to the eternally Honorable FBI anyway.

Death to the ungodly bushite thieving LIARS, death to the ungodly enemies of American children everywhere. GOD praises all Men, who kill the murderous bushite enemies of America's America. "The Liar" Hannity's America, can go it alone as treasonous liars, who boastcast a con to 'neutralize' America; 'finding' that we believe their demon lies about how one dies sacrificed 'Heroic' without any IMPORTANT questions answered. do we do?

To Kill a Bushite, is to be Heroic

To further murder as these ungodly bushite liars do today as our suffering Mankind, is to blindly swear public allegiance to the for real DEMONIC antichrist THIEVES. Bushite enemies are evil nazi dumfuk scum, liars who cowardly watch America in her weakness be high jacked, and squeak nothing for Just words in our REAL defense for dying. Play pretending their actually real men, because to really be so, requires real strength. Not bush bitch Marines "WHORES YEAH!" strength, where they cowardly can't figure to defend America from ungodly war criminals. War criminals who deliberately set them up with Satanic 'black magic' to be killed in criminal actions. P2OG. But see?, the bushite fodder, can't care enough for Life to read, because it already knows like the zionist, it's an ungodly coward and a thief, as siding to lying and censorship, this will out work for evil doers in the long run without any consequences to themselves as Our sworn eternal enemy.

Bushites 'think' that being Satanic brethrens for the LIAR neoCON, they'll die sacrificed not seen by all Patriot Warriors, as a dead coward - too fearful to stand as a godly Man for true accountability to living Life honorably. Cheney, McCain, and 911's gooliannie believe, You can only TV 'see' them protected Satanically by "Molech" [THEIR DEMON COG] Immune from REAL American Justice the bushite bray, We are told they believe so anyway. By Satanic command, 'inconceivable' to see the bushmob up on high treason charges... Oohh. Yeahhh.. I can see that going for real - quite excitedly I am about saving innocent lives. So, let's get done what needs to be a doing to save ourselves, so we can get this talking all behind us now, and reach for something truly breath taking as awarding,

Your Servant,

King Johnny Wizard
President and CEO

-

Why should WE continue to silently die unjustly victimized?, for the bushite's contempt of Mankind censored?, the Eternal Son of Man to GOD forever answers correctly. We can really be something greater, while a murderous bushite thief, a LIAR, can hardly read or write Liberty without flinching from self contempt. Bushite tyranny is a dead end road paved with missed opportunity. change your evil ways in other words, and join the living side that's light to know what we are, in deed, looking at here under the dying spoils of bushite, "we pay" misfortune. To hell with Satanic demon devil worship by the President of the United States, We, the People answer, for now anyway, we have some really serious business just presently, and we really don't need to be any more reminded about Mr. Bush's satanic Devil, demon whoreship, of, "Molech", a religion practiced to deceive America into sacrificing our kids for cash with YOUR blood.... Tricked. Tricked. Tricked.

Nationless bushites who blindly war Life as the neocon enemies, war for the 911 perpetrators to escape American Justice. that is why I, as of GOD, cheer to hear the deaths of these pro torture, pro theft, pro Satanic enemies of Man. They confess freely to targeting INNOCENT People for murder.

-

CIA 'disappeared' seven-year-old children
http://pressesc.com/01181202133_39_names_enforced_disappearences

COFER BLACK is the "CIA" LIE, KILL COFER BLACK FOR TORTURING INNOCENT PEOPLE TO DEATH FOR THE ANTICHRIST. Death to the bushite, death to the enemies of Mankind.

-

New admissions of widespread prisoner abuse
http://www.wsws.org/articles/2007/jun2007/tort-j05.shtml

/ / The Bush administration is finalizing new guidelines for Central Intelligence Agency (CIA) interrogation methods that will give broad latitude for torture techniques \ \

These are crimes against Christ, and any 'Christian' who lawlessly participates in this pro-bush torture of US Humans, MUST be hunted down by the Patriot, to have the STANDING LAW in America enforced to institute the Death Sentence to those bushite responsible for such ungodly enemy actions.

Hillary "[DEMON] Bush pulled out the inspectors."
[DEMON] Bush declared, "and he wouldn't let them in."

In Hell

Firstly, the White house doctored the NIE in an act of HIGH TREASON.

Two:

CNN with Hillary acknowledges that the demon Mr. Bush pulled inspectors out of Iraq, but then... how is this not HELL to pay?

/ / Bush declared, "and he wouldn't let them in. And, therefore, after a reasonable request, we decided to remove him from power." \ \ HE LIED. Not the 'NWO', George Walker Bush, who Alex Jones tells US to look away, because he's only a puppet. Should not Bush be held accountable to the criminal actions he is PERSONALLY responsible for Christ asks YOU?

Arkansas GOP head: We need more 'attacks on American soil'
http://rawstory.com/news/2007/Arkansas_GOP_head_We_need_more_0603.html

Look, bushite DO exist as enemies of the Human.

800,000 Christians protected under Saddam, now killed under Bush
http://www.uruknet.de/?p=3Dm33389&hd=3D&size=3D1&l=3De

Look, bushite DO exist as enemies of the Human.

-

Neocon Soldier

Bushites who war as the neocon enemies, war for the 911 perpetrators to escape American Justice. that is why I, as of GOD, cheer to hear the deaths of these pro torture, pro theft, pro Satanic enemies of Man. They confess freely to targeting INNOCENT People for murder.

The Haditha perpetrators, if convicted, are looking at serving, maybe, a couple of years, for freely confessing to the targeting MURDER, of innocent women, men, and infants.

To, with a Love in your Heart for GOD, kill such contempt for Human life, is to serve American freedom to the last bushite neocon breathing. Death to the neocon soldier, death to the enemies of Man. - The Son of Man, as the Man of Men,

Johnny Wizard

-

CBC and CNN with FOXNews Calls him Al Qaeda, but his Jewish Father calls him Adam Pearlman, a godless enemy zionist, A thieving NAZI liar who hates freedom, who wants to kill INNOCENT Americans for his NEVER ELECTED neocon pro war buddies. Did we mention torture? See? The zionist KNOWS its OUR enemy. An enemy of Humanity, who counts that YOU personally will not phone Coast to Coast radio hosts to allow open line FREE communications. Oh well.. Americans are truly dying evil dum-uks.

-

Enemy LIAR of America, pro-child killer George Norry,
"McCain is leading in all the polls."

-

PEOPLE

Who IS running this bushite nazi liar show, where they, our elite corporate media masters, kill our stupid kids with their flagrant naked monster lies, while refusing all calls for clarity, Johnny America really wants to know. Like immediately. Help us out here some man, don't be evil.

Demon bush told us Saddam wouldn't let inspectors in, and that's why he irrationally started this war against God conflict. Impeach him, then have him PUNISHED for high treason against a further dying as truly unheard from America - for that lie alone - we ALL could/should stand together as equals demanding re-dress for the innocent murder victims who've suffered for such contempt, and belligerence for the basic precepts of freedom as Justice, or G-D as Johnny.

People of Earth, know, these bushite soldiers war Creation proudly with repeatedly committing aggravated felons, and South African death squad goons, all to war Love for the neocon god haters. Who, as peenacking atheists, as their very own documents stress, would murder anyone of US for a stolen nickel.

Our Mr. Bush Jnr. "The war is for you or for us [neoCONS] to win. If we [neoCONS] win it, it means your defeat and disgrace forever."

Die bushite die.

King Johnny Wizard
President and CEO

-

Kucinich for President!
http://www.democracynow.org/index.pl?issue=3D20070524

Now, it's true, America's Alex Jones states Kucinich wants to take away all your guns, and is a communist, but, Alex as sometimes, is terrified of those who seek the requirements to defend freedom directly, as more specific. (Example: NWO isn't the name of the specific guy who financed 911 to murder America.) So, as a consequence, he gets near ridiculous with labels applicable to generalizations only dummies could believe blindly. With Kucinich campaigning on ACCOUNTABILITY, Alex Jones looks quite foolish. But, he's still trying. Thank god for that. Thank god for that. Talk radio in America should take open line calls on our ideas about how to actually plan to defeat these, found factually to be, traitors to God and Country.

MSNBC Poll: Over 400,000 (88%) Say Bush Should Be Impeached
http://prisonplanet.com/articles/may2007/210507_b_Impeached.htm

See? Canadians who TRUST CBC would never know by Paul Hunter.

-

Bush Successful at Permanent Legalization of Torture
http://www.prisonplanet.com/articles/march2006/070306Torture.htm

/ / The truth is that the Bush Administration has used the McCain anti-torture bill to codify a policy of torture that is now embedded in our legal system for perpetuity. \ \

McCain is some kinda demon enemy of God isn't he? To say publicly, he apposes torturing innocent people to death for the practicing Satanic bushite LIAR bad guys, leaves US thinking, shouldn't WE put McCain to death for OFFICIALLY sanctioning such criminality? I'd easily, without a second thought, put to death all those FOXJunkies in that debate audience who cheered from hell with JOY, the prospect of torturing innocent people to death, 'if it means' such IRRATIONAL action protects "American lives". See? the Magic TV and radio people refuse to allow me or anyone to think through such absent minded ungodly EVIL intent. Example: If you take FOXNews' word for it, and 'knew' your potential victim knows for sure of an impending terror attack... ... .=2E . How so? See? demon enemy f-cks, the ungodly bushite nazi vermin haters of Justice measured, [who steal in MY America as TRUE EVIL DOERS,] forbid such wisdom communicated as understood, for that would mean, we'd have to allow the real Victims more air time.

And wise poor men such as myself would command respect and gratitude.

and together, WE'D be hunting down those bushite liars who torture innocent people to death for their satanic pleasures. For, you know it does warrant the Death Sentence in America, right? (You can thank Reagan for that...)

-

/ / In a move that hardly indicates that he was a terrorist plotting to attack a US government installation Tatar then went to the Philadelphia police department to complain that he was being pressured by someone into getting a map of Fort Dix and that he thought this had something to do with a terrorist plot. \ \

Didn't see this on our TV news either did You?

-

The King of the Jews is True Red White and Blue

King of the Jews

http://chiapas.indymedia.org/local/webcast/uploads/the_king_of_the_jews.mp3
http://melbourne.indymedia.org/uploads/the_king_of_the_jews.mp3

-

/ / On CBS' "Face the Nation," she claimed that intelligence errors before the war were "worldwide" even though the International Atomic Energy Agency's Mohamed ElBaradei publicly stated there was "no evidence" of an Iraqi nuclear program \ \

That from the 911 witch, who forbade a stop to hostilities IN AMERICA'S NAME against the innocent in Lebanon. Nazi Israel ADMITS to the targeting MURDER of any innocent persons who drive in a truck. Perhaps Americans. Who cares? Not CBC or CNN they'll tell you consistently absent from the crimes scene.

-

Pill popping American GI teens are becoming.. CRACKHEADS!

http://www.zmag.org/ZMag/articles/march02levine.htm

/ / Dexedrine affect the same neurotransmitters as cocaine; and ADHD drugs and cocaine are both classified by the DEA as Schedule II psychostimulants (Schedule II drugs are legal drugs that have the highest potential for abuse and addiction). \ \

American grunts get FREE all the Dexedrine they can shoot

Do you know how a crackhead finds itself? Lost by indifference to the ultimate, only goal, more dope. Freedom Fighter? or crackhead WHORE, who hopes to find a dollar 'somewhere' to stave off it's crackmaster, the "American People", led by the un-elected demon dictator, our criminal Mr. bush Jr., as the true enemies of all Mankind. Bushites are on serious dope to be so dumb as cowardly accomplices to a traitor of themselves, that they would die as, before actually defending God's America - that they gave an Oath to.

I guess a soldier's word doesn't count for much in bushville.

The bushmob did 911 as traitors to God and Country, don't you know anything worth living for? my dying unjustly brothers and sisters? My friends, please fear not wisdom communicated by a REAL Man, for, we explain ourselves to the best of YOUR ability to listen simply. G. W. Bush used no evidence to form America's "conclusion" on who did US wrong on 911. So, Please, stop forsaking yourself, for, we're going nowhere. Support Johnny's call to demand open debate without censorship from the magic radio and TV execs, who hide in darkness, pretending to be our friends, while refusing intelligent dialog to answer any of our big troubles easily. Why? because largely, they're powerless without beating us down as giving 'Christ like' VICTIM so much - with their irrational ignorance for our survivals by the fittest. The fittest Ideas that rule this Universe, are the simplest, most easy to understand, but I digress about GOD'S greatness, for we know,. the corporate media elites as our voice, "Couldn't Care Less".

CBC just did a report about all the great heroin coming in from Afghanistan, that will still cause crime, and be illegal, (and maybe give you life in prison as an American,) but brought in with the help of the demonically evil bushite

thieving murderous military, by the likely ton full to attack our direct family left un-protected, BY YOU PERSONALLY. And guess what? THEY, our media masters, couldn't care less if they actually tried to be our good guys. Reminder: the god guys is good, the demon liar antichrist demon enemies who thieve from Life with censorship is bad. If they hide ourselves too far, they loose all around, up and down. So get to it. Or don't. Your choice. Life lived Now, or damnable death by cowardly design brought forthwith under your own power to do nothing under such terrible costs against our suffering natures.

Typical tyranny for media control over all of Life for the beginners is this treasonous betrayal against our Nature, by refusing to be honest about our potential to be far greater than first considered. If they'd only allow US to have open communications, all our worlds would be better living for it.

Demand Coast to Coast hosts allow America to defend America.

I want air time with the one and only real man in these here parts, Mr. Johnny America, our glorious make believe creator of all we perceive religiously, self realized. He's a genius!

-

No evidence against an accused is US being truly abused

http://melbourne.indymedia.org/uploads/johnny-rocks.mp3
http://alacant.indymedia.org/usermedia/audio/12/johnny-rocks.mp3

Help me gain access to speak freely for open challenge against Hannity, and of America's Coast to Coast Radio network hosts, who deliberately deny you to contend, we're really, one hell of a great bunch of People persons with rights God damn them.

Support Johnny's run for acknowledgment, and get US in the News why don't You. Let me be king for a day my American Kin. Make me a rich, near to dwell, well to do.

Get it done.

-

Like the NAZIS with jews. Zionist Holocaust Deniers that say otherwise, ('Fallujah never happened'), WE should just immediately put to death to save the lives of our remaining loved ones. Death to the murderous bushite LIAR thieves, death to all Satanic bushite traitor enemies of Justice for Man, proclaims I, King Johnny.

Dope Pushing Cop Killers

Support torture as a Zionist AIPAC Politician like demon McCain, and The surviving PEOPLE of the Messiah - will rise up to take you down as the ungodly enemy LIAR McCain clearly IS. As so is the Satanically practicing (with Molech and everything) repuglicons straight across the board, who, as a few demoncrates too, support the CRIMINAL escape of the bushmob through threats against the innocent LOVED by GOD ALMIGHTY. A REAL GOD with A REAL SON. McCain has got to go. Please, I, The Son of Man, the MAN of men, beg and plead again to all able bodied persons, see the thieving bushite zionist, kill it to defend Christ, kill it to defend America, kill it to defend any or all children of LIFE. Kill it with the honor and courage every REAL PATRIOT has to defend his own family my friend, lastly, kill it for me. These naked LIAR enemies who bank to thieve more from Iraq, Afghanistan and America, must be brought down by Humanity's ultimate triumph over tyranny through Law. A just law, where those accused without any evidence are Innocent, and WORTHY yOur defenses. Get to it.

Kill any bushite bomber and be loved by God's America.

Death to the zionist bushite enemy forces

/ / After it was revealed by the Plaid Cymru MP Adam Price that British trained policemen had tortured prisoners to death with drills, we discovered, through the New York Times (!!), that American intelligence officers had been working alongside them at the Jamiyat police station \ \

Death to the zionist bushite enemy forces, death to the ungodly enemies of Man who torture innocent people to death for fun - expecting Johnny's America will not raise a word in defense for the Human race, or our guns to defend our loyal brothers to the cause of Justice. Death to the bushite, death to God's enemies who lie cheat and steal from Humanity to assist in the escape of those responsible for 911.

BASELESS?

/ / Prime Minister Stephen Harper "We will conclude a formal agreement so that we never again face these baseless allegations," he said. Thirty Afghan detainees have claimed they were beaten, whipped, given electric shocks and denied food once they were transferred to Afghan security forces by the Canadian military \ \

These demons who war for ZIONIST censorship are a bunch a dope pushing cop killers, who murder innocent people they call 'Taliban' better known as in Arabic - students.

-

Proudly kill the bushite who would drop from the sky,SEVEN MILLION landmines on our cities to kill our children for decades indiscriminately, while offering our Humanity to God no apologies. Proudly kill the bushite savages all to desperately survive ourselves creating a better world through fair, free market communications. To warring for Liberty as true Freedom wills, is for Justice understood as measured, not just made up out of nowhere for the pleasures of those truly Satanic. So spoke the King of being the wisdom we here revealed by statement of timeless fact. Good will triumph over evil. That's that.

-

Tenent "Lets everybody tell the truth."

It seems Tenent wants to inform us he actually meant when saying "slam dunk" - that, selling the war to the American Joe, without establishing any real facts would be easier than anything against the powerless as media unrepresented!

-

/ / Rep. Dennis Kucinich, who has called for a withdrawal of all U.S. contractors from Iraq. "They charge whatever they want with impunity. There's no accountability as to how many people they have, as to what their activities are." \ \

Kucinich for President!

Bushite War LIFE Itself - and - They Couldn't Care Less

'Alpha company patrols the poppy fields.'
20070420_taliban28.mp3 (pbs broadcast)

"About the poppy harvest, currently gathering pace all around them, they couldn't care less." Instead they kill unarmed innocent people indiscriminately as enemies to ALL HUMAN LIFE.

They Couldn't Care Less

The 82 Airborne, in assisting in defending the world wide distribution and production of heroin, tells of murdering innocent farmers, that would never raise a gun in anger, are those they openly confess to target for first degree murder as labeled the, second tier Taliban. That's when not defending American Pension thiever ENRON'S pipeline managed under their extremist Muslim fundamentalist regime of intolerance for public communications, as the continuing thieving of 80 percent the Humanitarian Aid given by Canada to feed the STARVING, and school our children of the impoverished Afghanistan, as so reported. Eighty percent. 80. 80 percent stolen. I'm telling YOU: CBC couldn't care less about what Canadian soldiers are actually dying as COWARDS for: "Al-Qaida" =3D "General Mahmoud Ahmad" =3D "bush's ungodly partners in crime" CBC national radio management needs to be arrested in Canada for high TREASON. Please, be a Patriot, and demand these zionists allow open communication with the facts to save the lives of Canadians soldiers they hold in contempt to die as the bad guys committed to no better good.

/ / [...] the [New York Times] piece details the torture of [Innocent People] Sunni prisoners at one of the new American-Iraqi "security stations" \ \ Kill the bushite for America, for Justice is Freedom. Lawless mercenaries are not granted by our will to survive truly. A "lawless" enemy granted "immunity" by bushite evil phonies, is that of which, holds ourselves in their confessed contempt for Justice. Receive thanks from everyone, GOD included, by rightly destroying such inexcusable treasonous ungodly enemies of all human life.

Torture is a crime against God and Humanity. So, likewise, joyously, with pride, destroy the neocon traitors of Justice - for the true Love you have as Freedom willed - is as granted. Don't buy their demon lies by blind blanket false assertions, against YOUR Humanity's Innocence in tyrannical bondage, all done in to fool you believing, we have no rights to be heard in our presence - here existing freely. Therefore, to survive US all for something better, halt the 'escaping' murderous bushite thieves for God and America. SOLDIERS: Instead of dying for nothing, my wannabe Patriot Brothers, try joining Liberty's cause, which is our cause truly. Is it because corporate TV zionist money whores, are cowardly and ignorant, as evil hypno muggers, in MY dying for real America, that YOU refuse to speak Now in your Humanity's begging further defense?, on evidence being the only requirement to establish a person's guilt or innocence? for ungodly terrorist activities committed in our name by bushite bombers from the neo-conned AIR FORCE, who, as rotted juveniles, cheeringly bomb us People indiscriminately leaving a Church as something TRULY SATANIC? To dare, in our presence, continue threatening harm against an innocent child of wonder, not yet even born to God's suffering world? Bushites war LIFE itself. So then pleads I again the Son to God, as Man to Men: war to kill the enemy bushite nazi savage thieves, for real Freedom is waged truly by Just causes. The mute, pro-censorship/tyranny THIEVING bushite savaged nation, has NO EXCUSE for the crimes they have committed in our dying names. I demand our voices heard internationally for Justice as Freedom is Godly.

War and the Police State: Complicity of the American People
http://www.globalresearch.ca/index.php?context=3DviewArticle&code=3DTHO2007=
0421&articleId=3D5454

/ / On September 11, 2001, corporate media and the government elite launched an aggressive political and media campaign upon and against the American people. \ \

-

SATANIC AMERICA

/ / After playing a tape of Cheney's statement, Russert asked Daschle, "Did the vice president call you and urge you not to investigate the events of Sept. 11?" \ \

911 "truthers" don't want to address the hard evidence like the clear as day video of steel running like water from the WTC towers, for, as Humanity witnesses, they'd rather watch silently, children murdered indiscriminately, before, acknowledging wise godly men from our communities who speak ONLY facts on America's derision for real, open market Free communications - freedom fighters who ACTUALLY defend the innocent from the neocon bushmob traitors. Each day we hear of near hundreds of US murdered by the godless Satanic THEIVING "American" forces in Iraq. without near a peep of concern by "America". Lawless bushite mercenaries torture rape and murder, paid to do so by the WILLING American tax payer, and near 300 million "People" (the NAZIS) can't find the effort to pick up a princely phone and call the ENEMY pro child killer George Norry, (who broadcasts every day across America nationally for the IRRATIONAL neocons,) to air any real concern for our Lives. True, the demon enemy censors OUR calls, and contrives WE a buyer without questions, but he doesn't censor You always forever. So, get to it fukhead, JOHN is growing angry with americans of EVIL ignoramuses escaping the bushmob for crimes against MY HUMANITY. The Son of Man States: Death to the bushite, death to our MURDEROUS enemies, who lie cheat and steal to assist in the further criminal escape of the ungodly bushmob for 911 as TRAITORS.

Loyal bushie McCain as bona-fide nazi savage "Bomb bomb bomb Iran.."

Reporter 'Mr. McCain, you demon liar nazi fu-ker, don't you think your being insensitive to innocent god loving Iranians?'

Pro-Torture of INNOCENT PEOPLE McCain "Insensitive to what? The Iranians? My response is lighten up and get a life."

Johnny America Lyrics: "Can't an American PROUDLY kill TRAITOR pro-torture Zionist McCain for the Love of living Life Justly, as Freedom was Country?"

Investigating the Investigation
http://www.alternet.org/story.html?StoryID=3D17816

/ / After playing a tape of Cheney's statement, Russert asked Daschle, "Did the vice president call you and urge you not to investigate the events of Sept. 11?" \ \

PRO-TORTURE Gonzales "I quite frankly don't like the idea of the Judiciary deciding who is on my staff." [at Justice]

PRO-TORTURE Gonzales "I did not make decisions about who should or should not be asked to resign." [in mid-term]

As US State Attorneys?, whom have the most serious of American Justice Department Motions of Defense for REAL Freedom?, he's not concerned directly with?, nor would "like" democratic Peoples to be allowed to care either?. IF he gets HIS way he says - as minding for the criminal master. True, Americans are generally, extremely cowardly as Bush's freely giving PAYERS, led for more ungodly sacrifices in fascistic silence, but this continuing charade of incompetence gathering against our entire Humanity, is going way beyond acceptable to everyone concerning. Johnny Wizard conceivers and otherwise non-believers state together:

The Iraq war against Christ has no true justifiable cause.
Torture is against the law warranting immediate death sentences
The Zionist AIR FORCE bomb people indiscriminately as Satanic
The bushmob stole all the Development Funds for Iraq
The bushmob are stealing ALL of Iraq's oil
The bushmob stole 100s of billions from censored AMERICANS,
while George W. Bush personally stole 50 billion from America
in the first four months of stealing the initial election.

/ / "I grabbed her little sister and put her in front of me . . as the bullets began to fly, the blood sprayed from between her eyes, and then I laughed maniacally." [, then were heard the cheers of godless bushite dumfuk traitors obscening to God and Man as the unholy enemy.]

What ever happened to butterfly kisses after evening prayers?

Are you telling me, an American Father, wouldn't gloriously kill this lawless bushite enemy and his demonic ilk, for our love of girls everywhere? Or, how about the UNARRESTED soldiers we witnessed on video beat shoeless children pratically to death while laughing and cheering? Or like those that speak zero defenses for Haditha's confessed MASS MURDERING irrational women and child killers? The REAL demons CONFESS to going into a house, WITHOUT reasoned approach, and slaughtering an entire INNOCENT family.. for nothing but their lifeless SATANIC pleasures. The 'cause'? "The [mass murdered unarmed innocent neighbor's] back door was open.." To, for God, gloriously, with love, kill these unarrested murderous continuing ungodly bushite nazis, is to war the TRUE enemies of Humanity to save the lives of our precious loved ones.

The Pentagon's Power to Jail Americans Indefinitely
http://www.jonesreport.com/articles/270307_pentagon_power_jail.html

Look, demon enemies of Christ torture innocent people for fun, paid for by the silent American tax payer. Americans refuses to bother making a simple phone call to Coast to Coast to raise some concern. THEY don't. They refuse to hunt bushite down in their streets for death to defend the innocent held indefinitely against GOD'S will. Death to the bushite, death to Johnny's godless, lawless, fascist enemies of FREEDOM.

Look, CNN, CBC, and FOx News know the bushmob did 911, but will smile while watching your son or daughter sent out to die CONNED by their demonic hatred for US freely communicated. How do I know this? I made the effort of making the phone calls.

"Al-Qaida" =3D "General Mahmoud Ahmad"

Defend freedom, and the FBI, by demanding Coast to Coast radio hosts allow free communications, absent their personal contempt for preserving freedom to be our America. George Norry WILL kill Your American child for the contempt he truly holds for our lives here. He says he only supports murdering Arab children for the neocon, but when your not looking in his 'shadows', he'll kill your child too, don't doubt it for a second.

"Al-Qaida" =3D "General Mahmoud Ahmad"

-

pleasure of the president

US Attorneys don't serve "the pleasure of the president", they serve freedom lovers dedicated to defending America from willful criminality. But, americans are too stupidly weak to demand Coast to Coast hosts allow open communications on America's highest of concerns. Bushite america would rather, in silence, thieve from God as our Humanity, than serve the protections of Justice as ourselves.

/ / According to the Islamic understanding of power, the Mujahideen don't compete for the positions in the leadership. \ \

"Those who negotiate in the name of the Taliban will be killed," he [the bushite nazi dumfuk 'Taliban' 2nd in command] said. He did not elaborate.

Hmmm. Allah is all, and negotiating for freedom from naked bushite tyranny is won EASILY through communicating understanding. The tribal strategy of Afghan fighters, where Allah is Oonerroh, seems to be not the only thing missing from the statements of this "Taliban" RELIGIOUS FUNDEMENTALIST top top top leader. Only "second" to Omar the Just. (Apparently an individual this current bushite incantation of "Dadullah" is totally un-familiar of.) Omar, the Just, whom Dadullah claims he receives his Top Secret nobody can see'im orders. In other winds: Bill a bushite for God and America, an all day long you'll have good faith in a world freeing ourselves of godless dumfuk tyranny implemented by the horribly foolish, as deeply ignorant of Allah, bushite demon liars for the traitor neocon. TRAITORS!

"Those who negotiate in the name of the Taliban will be killed," he [the bushite nazi dumfuk 'Taliban' 2nd in command] said. He did not elaborate.

Allah is all, and negotiating for freedom from naked bushite tyranny is won EASILY through communicating understanding. Omar the Just knew this to say so, as do I. And this is why corporate news professionals forbid me to speak openly without nazi censorship, ON OUR AIR-WAVES, because I am honorable, right, and true as believable. While America's fun guy, zionist George Norry, states to support PUBLICLY, the ungodly murder of innocent Arabic children for nothing but his personal contempt of YOUR DYING LIFE, while further wanting to invite thoughtlessly nuking places on Earth all for his secret hatred of US freely commutating. Typical bushite. Ending with to tell US again 'convincingly', that bin Laden did do 911 as a terror-ist bad guy in G's World!!?! How so? EH? How so? he don't care man, he don't care. He and his family have millions of dollars to sell you out, so why care for your struggle to survive in bushville soldiering? Frankly, George Norry is a total dickhead. True, he has lots of money in America, but he's still a dickhead nevertheless.

Alex Jones and me aren't on the best of speaking terms, but I will state, a desire to address every same challenge he has adroitly addressed as publicly lacking. And when I am addressed 'officially', I will campaign to put US in the space to realize, we are the government, we are the people. We don't need to run to the hills and encamp ourselves away to defend ourselves to the max from the man, we are the man. I'm telling yeh, I know this to be so as the sea is we magically. Equal rights for all in God's name is self evident. Self evident to ME anyway... but well.. who am i?, right - I'll tell you as I have for more than a decade as a living fiction forsaken for lack of anybody anywhere understanding in totality what I am here on Earth as true Son to Man - a 'understandable' timeless stand in for G to gain recognition through as honest broker. [I've been everywhere around forever, and.. blahblah.. I know people really don't care to know of ancient wisdoms, truths that guide the order to the Universe, cause often they think I'm beyond their comprehension as a 'better than', when all power is in equal respect for others as our hurting brothers and sisters suffering with tyranny by our collective willful ignorance on Justice.[God's bestest is Just for every reason being thus]] I am one serious genius by no accident in words you have as much right to contend for yourself being, if you'd only believe we have some good ideas here to really defend ourselves with.

Please my American friend, help US speak out freely Coast to Coast. So we together can start, on demanding Justice for all, as innocence in serious jeopardy. Dadullah is most likely an individual who holds at least some control over official military functions of NATO in the region. So, we're going to seed loyalties of the rare Patriots in the force to recognize our need to isolate who supports, not talking FREELY for peace easily in Afghanistan without question. No evidence was brought against Laden, therefore, the Taliban were True Patriots, and bushite traitors are pure racist nazi filth ridden, toxic, as being cowardly dishonorable as despicably evil, enemies to us all. Put US in Command.

Question the bushite, question to anyone who mumbles disagreement in the godly fact, that WE, as Humanity, will spend the better part of this next generation, hunting every last war profiteering nazi war criminal down for our real Freedom from their, so errorred "endless" tyranny of big money terror. Lawlessness with be outlawed, and ANY corporate american who mumbles otherwise, as an enemy totalitarianist, the clear ungodly, (as should be criminal,) will be put to challenge by their very own children, or parents, or bleeding dead brothers. Hannity must be tried for death as lying that the holocaust never happened from Iran. DEATH to the demon liar nazi fu-ker I say, DEATH to the demon liar nazi fu-ker.

"Al-Qaida" =3D "General Mahmoud Ahmad" =3D "bush's ungodly partners in crime"

Who IS running this bushite nazi liar show, where they, our elite corporate media masters, kill our stupid kids with their flagrant naked monster lies, while refusing all calls for clarity, Johnny America really wants to know. Like immediately. Help us out here some man, don't be evil.

/ / "Those who negotiate in the name of the Taliban will be killed," he said. He did not elaborate. \ \ He's either with the proven cowards of JTF2, or the two or three "CIA" guys secretly hunting bin Laden in caves out there with tens of billions of dollars. SPENT EACH YEAR 'unknowingly'. (No reason why, but, they just can't tell You, as the paying for it really while DYING) Put US in Command.

/ / The Mujahideen aren't students of power and don't compete for power like others do. We are students of truth and work for establishing this truth and for this cause we sacrifice our power \ \

-

http://www.godlikeproductions.com/bbs/message.php?messageid=3D355789

/ / Timothy Griffin, Karl Rove's assistant, the President's pick as US Attorney for the Eastern District of Arkansas. Griffin, according to BBC Television, was the hidden hand behind a scheme to wipe out the voting rights of 70,000 citizens prior to the 2004 election. \ \ Timothy needs to be arrested for high treason, for fixing an election, or instead, what? we'll make him a State US Attorney in bushville?

kill all of them

/ / In his testimony on Wednesday, Pfc. Bradley Mason of Company C said that on May 8, the night before the raid, Colonel Steele told soldiers to ``kill all of them.'' Three other soldiers gave similar testimony. \ \

I would offer rewards for more soldiers to come forward. Why?

because there truly is, no honor among thieves. Every bushite soldier in Iraq for the liar neocon is minimum, a purposeless dumfuked cowardly thief. See? if you offer a reward, and they don't take it, their 'fellow' bushite, kill'em for it, right? why take the risk it'll cash in over your worthless life? For, who can trust a lying bushite nazi savage? certainly not a lying bushite nazi savage. In other words: speak against committing war criminal acts of lawless aggression in Iraq for Bush, as CLEARLY un-American, and I'll try to forgive you as human. Or, I guess you'll kill yourselves in mutually muted total contempt for this universal life as actually worth something.

When you see and hear on video, sexually dysfunctional, as sadistically satanic grunt puke pro-bush soldiers moaning, while deliberately killing innocent defenseless Family People running for our dying lives from a holy church, or as just simply anyone standing near the side of the road, then, my friend, you'll begin to understand what evil actually is. And, what needs to be done to seriously save ourselves. Seriously. Justice must be won sooner than later.

Five Star American General Johnny Wizard will train American Soldiers to recognize such demonic behaviors in combat as worthy of immediate frag to defend the lives of truly fellow honorable soldiers. Soldiers ACTually, committed to freedom from godless satanic dumfuk tyranny of the antichrist demon, Mr. evil personified, the UN-ELECTED 911 TERRORIST, George Walker Bush and CO..

/ / "He realized that they had killed these three [innocent] detainees, and in that moment, yes, he decided to help his [ungodly murderously nazi fascist] squad members, [escape Freedom through Law wisely practiced]" Gorecki said. \ \

There is much self evident truth hovering above the realities of such statements. For the exampled fact, that he did actually use a weapon against 'his' troops, 'to save them punishment', says a great deal more than they contend we hear. Now really, how ''we be dying as godless war criminals for demon LIAR Bush'' dumb is that? (and how does such an evil thing steal our military command in an un-defended Johnny's America? as a dying for bushite tyranny, irrational neocon war wanker? like holy fu-k..) Remember: evil is real.

The time is now.

Let Johnny Wizard on Coast to Coast everywhere god damn them man, get US on the PUBLIC radio to make something better of ourselves by communicating freely. Do it!

Praise Jesus, and pass the ammo forthrightly. I'm a hungry man.

-

US officer "upset" Iraqi suspects taken alive, court hears
http://www.telegraph.co.uk/news/main.jhtml?xml=3D/news/2007/03/14/wsoldier1=14.xml

/ / A US military officer sounded "pretty mad and upset" that a group of soldiers had taken suspected Iraqi insurgents alive during a raid in which they had been told to kill all military-aged males, a court was told Tuesday. \ \

Come on now, who wouldn't take great joy in destroying any and all such ungodly bushite hatred for Humanity in this light of day, eh? In fact,why don't American Congessmen, who believe in defending Liberty, campaign JUST that? Why not??? Is it because they're LIARS?

Like Coast to Coast's fun guy, he ain't taking our screams, George "pro Arab child Killer" Norry??

Rapists and torturers must not be allowed to rule our pirated authority through defending the further 'escape' of the bushmob for 911.

/ / As a result, the Defense Department put up a Web site in 2005 designed to clarify [to the dumfuk bushite demon liars] that sexual assault is illegal [...] \ \

Let's save some lives, what do you say guys?

Or, are we going to go further with this: George W. Bush:
"If the absence of violence is victory, no one will ever win."

YOU

"If the absence of violence is victory, no one will ever win."
http://cleveland.indymedia.org/news/2007/03/24652.php

I know, it's seems odd that I am, at the same time, offering answers to any question on the science of God as is pertains to Justice measured, but this is just who I am to be conscious man. So, if we can get over the shock of me being so especially normal, maybe we can then realize, I have some simple good old ideas that transcend through time by rational understanding communicable between any two people. I am not a "miracle worker" to all those I advise to not eat Aspartame because it's a poison that also makes your body crave un-needed carbs, that will likely convert to more unless fat. So, it slowly kills you, while making you fatter than you need be along the dead end journey faithing in "the system". So, why do some do it religiously? Who cares (for now) but to say, our governments are failing US miserably. I spoke personally with one of the head scientists in Canada at "Health Food and Safety", and he told me the scientific analysis done by reputable scientists I found freely available repeatedly on the internet years ago, was completely true. (It breaks down to formaldehyde, and methanol (a slow lethal poison), among other shockers. Poison. P-o-i-s-o-n-s in our food stuffs. Poisons.) However, he could take no action to defend Canadians "officially" because we, Canadians, have our corporate interest news departments completely refusing to defend ourselves from corporate exploitation anywhere, and as natural consequence, we, as the dying world, would together unrepresented, probably lose a law suit from mutant Monsanto through the self inflicted bounds of OUR censored WTO program. - instituted through the top secretly mastered puppet people persons of the 'unseen' NWO I guess.

I'm telling you, we need me as King.

Look: Aegis's workforce, for American PAYING profit, has been publicly disclosed through CNN to be shooting people in Iraq indiscriminately for your money, and when the Pentagon was contacted by Nick Roberts about what would be done, they responded, nothing would be done by Johnny's America but to increase the multi-hundred-million dollar contract with demon enemy Tim Spicer to continue. Now... why you ask? Because the neocon liars, steal money by lying to cowardly American kids about what they mindlessly, without thought, give their souls for. Tim Spicer openly hires South African goons to commit hardships for American GIs to die without end for, in lawless tyranny. Peace sells less money for the neocon war profiteers to murder the innocent American as. (Iraqis, along with the rest of Humanity's Men, WILL eventually learn this truth, or life for you will end.) As an Arab hating bushite, (like what you'd find as a publicly proud practiced hatred for all Humanity, by an Amerkan dumfuk soldier in Google's alt.religion.islam), they say nothing for Freedom by Justice, but root themselves to Spicer's monsters who like killing black guys, as world renown mass murdering racist nazi filth. That's why zionist Israel loves them so much.

Look: Somebody stole four trillion dollars out of the Pentagon.

Look: Greenspan STOLE four trillion American dollars for his international billionaire banker friends before 'leaving'. [Asian market chaos SCAM]

Look: Lotteries everywhere in North America are running the same PROVEN criminal scams that cost US ALL billions and billions of public dollars that, without question, (as MATHEMATICAL FACT), regressively destroy our dying communities. CRIMINAL. [Solution: 100 percent cash payouts.]

Look: corporate magic TV people couldn't care less for US if they tried. Ahmad funded Atta. bin Laden claimed he played no part in 911. And video of iron running like water moments before the first tower fell is freely available for download all over the place. CBC, CNN, FOXnews et al. know the Bushmob did 911 in other words. I've spoken to most of those 'in control', and I'm telling you, they're losers, and they know it. Remember: they'll censor my voice to send YOUR child to die for no better good, or reason understood, while entertaining. Weekend TV in North America totally sucks. Now, why do YOU think that is brother? The more powerless they make US, the more money the neocon zionists can murder Humanity for, thinking they might just get away from this if we continue to take no action in defense of anyone as God would will. Let me be Your servant King, by backing me up some here. We need some dollars to eat, and I need it now before we starve to deaths.

Look: Barbra Bodine did the Cole bombing. [the Cole whose crew has been completely overhauled. Where are the many who served there NOW eh?]

Look: America has kidnapped countless thousands without evidence to be held against OUR will indefinitely. [Like the NOT Jewish Israel]

Look: innocent people are being tortured to death by those who hide OPENLY in America's uniform. [let US hunt them down for GOD, despite what demon lies they argue give them as Satanic to avoid "The Law".]

Look: the bushmob war profiteers STOLE the Iraqi Development fund

Look: the more than 100,000 security contractors for Bush are officially deemed lawlessly unaccountable to anyone - THINK ABOUT IT

Look: Negroponte PERSONALLY stole the Iraqi emergency water provision money

Look: Sattler OPENLY committed the worst war crimes of all Humanity's history

Look: I am a guy that is regularly denied public access to our national radio programs because I speak documented truths consistently on behalf of real honorable soldiers and police officers. I agree with most, if not all facts Alex Jones importantly brings to our attention, however, I almost as often, disagree with his conclusions.

Support my cause, which is your cause.

King Johnny Wizard
President and CEO

-

Senior Military analyst, Rob Riggle "In the field John, the soldiers are out there, every day, risking their lives, for a common Ideal: that none of the President's decisions be questioned."

This is more true than a bushite would admit before murdering a honorable father to rape his young child, like Lcpl Boudreaux freely confesses. Boudreaux will tell you, openly, you have to murder the Arab father of the Arab child your planning to rape, because if you don't, that Father will spend the rest of this life, hunting you down in the streets to rip you limb from limb for it.

Let US, me and the few, proud, and the brave, bring that Father's intent to bare on lancing Boudreaux, and any other who would sing in it's ungodly defense.

Zionist american media celebs do tell, everyday, soldiers for the neocon are all Heroes. (True Hero worship has long gone dead, and simple common respect for the starving man of Johnny Wizard is almost entirely illusionary, but for the love of God has for me, the Son, to never stop caring religiously.) While McCainites advocate imprisoning any (chosen) man in America (with our familiar "Exploitation Units"), who has a picture anywhere on their computer of a fully clothed teen, while denying this following censored video of children being beat to death for fun and profit is real. When I watch only thirty seconds, my rage as a god increases beyond anything anyone of Humanity can even contemplate, and i start crushing bricks in my hands with fury, twist iron bars into pretzels, all as a foolishly feeble attempt to personally have killed those present in this video. Then I cry. I cried for these children present in this video the first time I watched it, and I cried last night briefly, before stopping it.

Please, my brothers, join me in hunting each and every bushite present in this video down for death. For a Love of God that will never end, until we have seen each and every responsible child killing bushite present brought to true Justice extreme.

/ / British Soldiers beat unarmed Children
 watch?v=3Dl2zZkbhc77M>
.
Even after they plead them to stop they continue and
the cameraman seems to be having an orgasm.

news_of_the_world_uk_iraqi_beating_video.wmv \ \

Did you know Blair had arrested the reporters who reported this initially? Didn't think of defending children, no sir. For, the commentator, who gives the play by play, while masturbating, has been given forgivence because it's an heroic "Christian". Not publicly executed. This must change for the better. Here is where I will make my final stand, and where heaven shall part from hell in America.

9/11 WTC Molten Metal

Men pick military as sentence
http://www.centredaily.com/118/story/29432.html

Great, more criminal heros to victimize Humanity for.

-

ARE YOU TALKING TO ME?

George W. Bush:

"If the absence of violence is victory, no one will ever win."

But for those of us who would believe protection to be a heavenly good thing actually he means? What the. does he mean?? Find out!, in the new candid, let's talk politics interview, with no other than, PRESIDENT GEORGE W. BUSH.

Giuliani told ABC's Peter Jennings on September 11, 2001

'=2E.and I was operating in there [75 Barkley St.], when I was told that the World Trade Center Towers were going to collapse.'

WTC TOWERS? "WERE"?

Did you know that the international Johnny Wizard comic book is out there? Don't miss out on picking up a copy for yourself, or your loved ones. And did you know, I'm trying to get on international radio without a censor to thunder my audience back into submission. I HATE HANNITY. All I want is free open debate to resolve this crisis, that doesn't have to be so ruining our dying worlds without questions forwarded by the dumfuks. Justice is Paramount through reason to be so. The Bush Administration have been up to no good, escaping for 911, that New York City should sue for. Hire me on as legal consultant buddies, cause I'm like near starving broke here, with supreme court challenges failing my cost factor, and hunger pangs slowing our progress on fighting unjust incarceration. I desperately need money, like now, as a gift, or an advance on a industry paid private consultant gig. Or, instead, maybe you'll idly watch some innocent person willfully be sent to prison by liars in your demonized name, to defend the ungodly evils of war criminal traitor, our Mr. Bush Jr. in foolish disguises. Your call Bud.

be Wiser,

Johnny Wizard - Patriot Liberator of Eternal Destiny
(i.e. REAL sustainability as self sufficiency)

(i.e. nothing is separate from existence ourselves, not even time, and Justice is binding to defend our lives if practiced fairly with it's elemental divisions through reason. Example: a person accused of a criminal offence, without any evidence, is INNOCENT. Those who say otherwise, are the actual terror-ists. Civilization's ancient Founder Hammurabi, suggested just to openly publicly have executed those who lay capital allegations without any evidence, while working to close outstanding criminal investigations. A made CRIME within ourselves Hammurabi claimed, and by thinking such ways, brought birth of 'Civilized' to an untamed till then, chaotic confusion. Old becomes again anew, because Americans are weak as polluted, and too cowardly to defend the rights of US innocent. Let's change that. Support my climb to international controversy, with my unchallenged claims of direct accountability being sought, for the 911's neocon war terror plot.

'A military judge ruled last week that Watada cannot base his defense on the war's legality.'

Telling US what?, that it is a crime to not commit a crime? It isn't only high treason against America the ungodly bushite are guilty of, but of a madness held by those truly Satanic..

/ / 'Why are you taking pictures? You don't have permission."' [=2E..] the [bush whore] American, speaking through a translator, warned him that he did not want to see any AP photos published anywhere.\ \

No bushite was found gloriously killed for country, yet, they, the godless bushite enemy, continued to shoot innocent People indiscriminately for a distance of six miles, while likely, secretly masturbating each other as bushite liars do always.

The pro-bush irrational military said only eight innocent un-armed Afghans were counted as murdered deliberately, by those who believe our Mankind, can not ever find themselves accountable, without zionist controlled, corporate news permission. See? The military counts mankind as zionist, but I am a man of real men, committed to defend our world from all enemies, foreign, or domestic. Unlike a bushite traitor to God and America, who's word, as Oath, means as much to them, as we do. Ungodly as they are loveless, the bushite, is Life's enemy.

See my friends, this is why I, as the Son of Man beg and plead for all able bodied men, to kill treasonous bushite on sight, for every time you love God by defending the innocent from murder, (the innocent whom any pro-bush corporate professional hold in total self contempt,) you save REAL peoples lives, and you defend God's good name to love God as ourselves committed to true Liberty. Bushites are enemies of freedom, enemies of God, and worthy of death, before allowed to further bomb people indiscriminately like the commanders of NATO order day after day without risking instant frag because, bushites are blind cowardly thieving nazi fascist savages, brain damaged, who believe as satanic demon whores of Molech, they can con all of US including me forever, just like dare dubya. Dumfuks.

God is Great!

-

WHERE IS YOUR NATIONAL NEWS TO DEFEND OUR PRIVATE INTERESTS?

Former FBI Director Calls For New OKC Bombing Investigation

/ / The FBI man in charge of collecting evidence from the government building destroyed by the Oklahoma bomb has called for the case to be reopened. \ \

WHERE IS YOUR NATIONAL NEWS TO DEFEND OUR PRIVATE INTERESTS?

Support Johnny Wizard's personal challenge against thieving LIAR traitor Hannity, and his corporate nazi bush whores who lore our stolen values by how much they can deny US privilege. Coast to Coast radio hosts need to be publicly challenged for debate they deny US knowing of together naturally speaking. Great example of our Problem: CBC National Radio, in Canada. When a caller phones during the very rare moments we're taking public words, have a pre-broadcast rig-a-ma-role question session, you'll have with not only the OFF-AIR screener, where he'll probe you for controversy, but after the first process of noting in book form your disclosed intel, will notify you that; IF your independent thought is granted by the "Producer" (- who reviews everyone - rules are rules -) Our national station will phone you back this afternoon, so stay tooned, to line you up with your baking gingerbread creds. They never ever dido! The more Brilliant you are, (like the highly charged as extremely charismatically charming, wild man ruler, Johnny America - the media phenomenoner) the higher probability they'll find POSSIBLE concern, on their do nothing for your taxed attitudes..!. Why take chances someone might show a greater living responsibility to a real suffering God as our left corporately forsaken Country?.?.?. A dying Humanity.

Look, seriously, my friends, we have all the answers to our problems.

Support Johnny Wizard's personal challenge against thieving LIAR traitor Hannity, and his corporate nazi bush whores who lore our stolen values by how much they can deny US privilege of equal standing.

Get it done brother.

-

/ / Corporate TV News people are part of a death cult that doesn't rely US on evidence for proof they say we believe them unbiasedly without question. While forbidding ourselves to hear OUR calls for real Justice. \ \

-

Help me gain access to speak freely for open challenge against Hannity, and of America's Coast to Coast Radio network hosts, who deliberately deny you to contend, we're really, one hell of a great bunch of People persons with rights God damn them.

Let's do this.

-

http://xml.nfowars.net/Alex.rss

Use this address in Firefox to get daily News podcast of Alex Jones.

/ / If you don't have an instinct, to stand up for women and children, your not a man. That's what men are supposed to do, it's not anything *special*. I'm nothing special. \ \

-

/ / KBR's Tiger Team stayed at the five-star Kuwait Kempinski Hotel, where its members ran up a bill of more than $1 million. This outraged the army, whose troops were sleeping in tents at a cost of $1.39 a day. The army asked the Tiger Team to move into tents. It refused. \ \

See? KBR is now privately running hospital care for the dumfuk grunts, so, what would you expect but rat infestations? Oh, you never truly thought... what being a "Liberal" or "Conservative" victim is. Are you pro Liberty, or pro tyranny is the question riddled really.

-

"For every fatal shooting, there were roughly three non-fatal shootings. And, folks, this is unacceptable in America. It's just unacceptable. And we're going to do something about it."

- President George W. Bush

Kill a bushite and God will love you for defending US,
the innocent in war time.

GOD PLEADS: KILL the lawlessly thieving demonic bushite ENEMY of Life.

http://mediamatters.org/items/200702260008

/ / Wash. Post parroted White House claim that Iraq war was authorized by U.N. Security Council \ \

Seriously, the propagandists responsible, need to REALLY, be put to death after found out through US public court proceeding. NO ONE would disagree that Iraq is a war crime, where more than a MILLION INNOCENT PEOPLE have been raped, tortured, or murdered by dumfuk bushite grunts. If YOU actually think about it, all of everyone would gladly kill an unholy bushite terrorist, before allowing it to murder families running for our lives as loving Church goers.

-

/ / 7 Clandestine operations against Iran and Syria, as well as the Hizbullah movement in Lebanon - even to the extent of bolstering Sunni extremist groups that are sympathetic to al-Qaida \ \

Look dummies, by Bush funding bin Laden forces, he is undermining the troops to DIE. Lawless American can not be allowed to accept this from the actual demon anti-Christ, can it?

-

Death to our Enemies

My friends, People are dying because the, Israel=3DJew, magic radio and TV crews, wont broadcast THE TRUTHS of our publicly available findings. Police findings. People are dying needlessly, illegally, irrationally like meaning really stupidly on Bush's behalf, for they claim, we don't want to be 'embarrassing ourselves' with MY wisdom, You people seem to not be there for God when the chips are way down, and truth is plain to see.. 911 was an inside job, and CBC with CNN don't want to tell us about it, but will watch our LOVED children lied to, to go out and die further for a causeless war of criminality unparalleled in it's wickedness.

promoted through the tyranny of censorship

Corporate News America's Terror Expert, Gaffney, who publicly advocates the rape and murder of the innocent in Iraq to thieve from for the 'escaping' neocons, (as the truly UNGODLY,) stated these words about why American Soldiers continue to lawlessly DIE sacrificed for no better good or reason understood, as total willing dumfuks under deep hypnosis:

"It is not George Bush, it is not the Neocons"

"," =3D swinging pocket watch

Don't let these neocon zionist bastards doe this to US.

Any Commander that doesn't support the arrest of those responsible for 911 and the subseqent neocon war crimes of Iraq, is a traitor to God and Country.

How much much God take as taken, before you people get on over this criminally empowered war monger Congress of an unelected lawless dictator demon, and call them out on the turning talk commercial radios, all to finally truly defend ourselves with a good media plan for results.

Make the call, be a man.

-

Sir Ken, head of the Crown Prosecution Service

"The fight against terrorism on the streets of [..] is not a war. It is the prevention of crime, the enforcement of our laws and the winning of justice for those damaged by their infringement."

You got that right. So, join US in demanding the quick trials, and public executions of known bushite enemies who murdered Americans on 911 with general Ahmad, and who with Peter Powers, murdered the innocent in Britain for more stolen goods against God. And anyone in the air force as bushite bombers should be a great joy for US all to hunt for prosecuting too. The bushite dumfuk is an enemy to our lives, with it's blatant naked contempt for the innocent, who like the demon liar THEIVES at CJOB, George Norry, or Hannity, will forbid ANY human defenses of the lawless dictate of the IRRATIONAL tyrannical demon antichrist, all so to victimize more of You as the censored forsaken.

REPENT. [from the Greek, meaning to think.]

The TRUE Son of Man Johnny Wizard Exists Born to this Eternal World to end permanently demonic bushite enemies of Creation. Help Life out by destroying cowardly America's greatest threat to the Species, the greatest threat against Humanity's Freedom to be Loved by God. Corporate nazi zionist bushlores at CBC, CNN, and criminal thieving from the desperately poor in Winnipeg CJOBers forbid open communications, and I can't 'take over', because then I'd be defeating my own, power to the Peoples argument. So, it really is up to YOU, yes you there... reader. Who.. really..? YOU, here, now. Life begs, takes a stand for your fellow man, and demand our voices heard for the defense of the entire human race. And be quick about it. Repuglicons don't want freedom from endless war where they kill your forsaken kids, for we all know, bushites would be publicly tried, then spend the rest of their treasonous lives behind bars broke, or dead from lethal injections made popular in America. Again, officer Bowman is responsible for letting 'escape' those from Fort Detrick, who attempted to murder the American Congressmen who thought going into lawless tyranny, !makes no sense! Where is corporate America on our issues when OUR free speech is ruled by the irrational evil minds of Limbaugh, Bell, and Norry?!?!! Back to Bowman: Bowman, also is responsible for sabotaging the Moussaoui warrant. And, how much you wanna bet, he's probably the same bushite who found Atta's passport, and likely had all 19 names of the high-jackers to give CNN, CBC, and FoxNews just like the neocon's "bin Laden" would have too. Take the publicly prancing bushite enemy out for questions by yourself, if he doesn't plead his defense publicly on Coast to Coast by tomorrow. Remember, there ain't an "Intelligence" group worth their salt on the face of our Earth, that doesn't know exactly what I'm doing here honorably for a real Justice made through careful thought. So, support Johnny Wizard speaking for public challenges internationally, and with the 23 plus co-operating for life 'Intel' agencies, along with, anyone else who can join in on the call. as a growing number of Patriot Soldiers, who trust yourself to see, this wanting of Justice isn't complicated. A person accused of a terrorist event without any evidence, has our accuser a bushite, who should be watched carefully until verifiable conclusions are done by the understanding of fact. Not faith. With George W. Bush making real decisions in faith, expecting us to believe as corporately broadcasted unabashedly unbiased, that he is not a deliberate incompetent monster war criminal of unfathomable evil?, who is just too 'stupid' to understand why we are innocent until proven otherwise?, is really something we all need to scream about to save our dying lives.

"[..] just like the neocon's "bin Laden" would have too."

However, the real Laden, on video taped confession, claimed he played no part whatsoever in 911, then later, offered himself for arrest, confident he would be acquitted. Not corporately newsworthy though, so, few even know why their American child was later died in the terrorists act of corporate contempt for US living Freedom with something greater as real Justice wills

Yours again,

King Johnny Wizard

-

CONTACT

/ / IDEA: Let's get our show up and running, by allowing open public investigations To be conducted internationally, with open line challenges, so we can publicly isolate each and every bushmobster personally responsible for 911, and then, all of everything else still left outstanding murdering ourselves. Whatdoyahsay?? \ \

Art Bell, the zionist enemy of Life, wont allow free communications with the established facts though,

What do you think? Are you truly all alone on this?

Again, more than half of the money being spent on demon Bush's wars against life's reason for being, is completely left un-accounted for thieving. Not spent to offer dumfuk cowardly soldiers help hunt to kill bushite rapists and torturers. Stolen American values Just like the bushite soldier on the ground, who after gunning down innocent people in the street, go through our pockets to steal the spared change. Kill a bushite for the love of God why don't you my American Patriot brother and sisters?, today!

Again, my friends, Art Bell and George Norry have thousands of bushite dumfuk in America that will phone them to tell US how greatly they are to have no care for dying freedoms in America. While when the humans call, Art Bell for example, between breaks, when privately screening his calls, just hangs up on anyone he fears might articulate things like Ahmad funded 911's Atta, according to the FBI, in defense of America. I say, we at LEAST, talk about putting them both to death for treasons against Your Life dying teen soldier, wannabe Patriot. Make sense?

Again, corporate nazi america states 30 percent of America supports the ungodly George W. Bush's demon antichrist action, when in truth, it's less than one in a thousand. it's just CBC, CNN, CJOB, and Art Bell the liars ain't taking our calls for enlightenment. just like they treat the innocent in Palestine for zionism's encouraged racist in-action. For what does a fan of 'we're the best' Coast to Coast radio network family know about nothing after we witness them froth at the thoughts of nuking countries, or calling for enemies, none of us here in North America have any real problems with?

People of Earth, know, these bushite soldiers war Creation proudly with repeatedly committing aggravated felons, and South African death squad goons, all to war Love for the neocon god haters. Who, as peenacking atheists, as their very own documents stress, would murder anyone of US for a stolen nickel.

Unhinged and unfit for office

Wuterich "shoot first and ask questions later"

Wuterich "shoot [defenseless innocent women and children] first and ask questions [from the corporate zionist pro-kill anyone for a stolen nickel propagandists like demon enemy AIPAC Hannity, George Norry, or, censors his calls for neocon war criminals traitor Art Bell] later"

http://www.globalpolicy.org/security/issues/iraq/occupation/report/atrociti=

es.htm

/ / commanders may give orders to ``shoot first and ask questions later.'' \ \

This is why the Son of Man through God begs the Peoples of Humanity to kill on sight, the enemy bushite betrayers to Life. Ourselves, the innocent. These soulless grunts don't destroy such deserving commanders, Like Blount, Sattler, Russell, Wuterich, Pantano or even Kimmitt, and instead, as in Fallujah, murder every woman and child present, while stealing all our given monies for desperate life saving help. Anyone in the Air Force deserves to be justly put down, for, I've NEVER seen any legitimate bombing campaign, but for to kill People indiscriminately like NATO regularly does with radio-active toxic waste, while then sending in the dumfuk Marines, or the 'from the coast' Canadians, who of course, rightly get killed on the ground in retaliation for such blind evil stupidity. Please, I beg, help Iraqis, and kill the bushite thieves to defend our forsaken God. American children, help me my loves. Please don't allow the bushmob to escape for the treasons against America on 911, for, bushites are OPENLY traitors, as the TRUE enemies of evidenced Justice, as the Freedom to do our own things loving God on our own. Besides, most bushites aren't even registered American citizens. Bushites need to be hunted down for destruction - by the Loyal Christian American Patriot Soldier, the ones who war to win against those who torture US innocent to death as the ungodly Satanic LIAR enemies. Save the Humans, kill a bushite false accusing traitor of American Freedom To-day, and become a real Man in the presence of Johnny America, an actual Man of Men, Lord of Lords, and King of Kings.

McCain is insane
http://www.codemonkeyramblings.com/2007/02/they_say_that_insanity_is.php

Alert the USER! not tyrannical leaderless dumfuk thievers, for it is the expresser who, if any, that is guilty of a determined illegal expression. In 'The' Canadian case, they, (once proud IRRATIONAL bushiter THEIVES [pro Afghan child killers determined to help the ungodly demon Bush's 'escape' for 911]), want/HAVE to put MEN is prison for beautiful pictures of girls in panties, or bubble bathtubs being. IT IS demonization. Leaving twenty year olds to look like they could be tens in a singled out of context womanly derriere, that our Jurys nations-wide, are generally, denied to perceive normally, if at all. McCain knows he is an enemy to God's children everywhere. McCain speaks NOTHING to demand the execution of hiding as 'British' soldiers who on prized video tape, beat to death young barefoot children for erotic fun, nor on mercury vaccines not banned minus "The President" in name. BANNED.

Sorry everybody, but that's the way it's gotta be for my Life to have meaning terms.] Long story short: Females Rule, and wiseguy Johnny is Freedom King for this moment Being.

Please help God.

We have to overhaul how all our national news Podcasts are assimilated through corporate nazi zionist censorship. Art Bell and George Norry are enemies to ALL american teen troops put in harms way to die as bad guy irrationally for the neocon God betrayers. Why? because they purposefully lie to have YOU die as innocent murder victim. Death to the bushite, death to God's enemies.

Be a friend if not an enemy,
Your buddy,

King Johnny

-

How is a Zionist Jewish?, I, the King of the Jews Messiah ask my fellow brothers and sisters everywhere. How? FOUR million land mines in Lebanon a godly act is it? Jew only roads not Aparthied, nor stealing a Christian's Home I suppose..? How?

An Oath Every Soldier Swears To God With

/ / she told The Nation. "If I contribute to the Army's prosecution of Lieutenant Watada on speech-related charges, I will have colluded in suppression of speech. What could be more hostile to the ideas of a free press than that?" \ \

Again a Patriot Soldier whose only crime is that he refuses to commit a crime in Your name. Do something about it. You defend this Patriot American Citizen as if Your America depends upon it. The "Judge" who publicly forbids to hear Watada's freedom defense, an Oath every Soldier swears to God with, is a "Judge" who needs to be privately arrested for treason against YOURSELF. Support my call to demand our voices heard for Just causes, or go die silently to the grave prisonized in a military dictatorship your 'neighbor' will say quietly of, (under his bushite breath,) good riddance to caring where my pusher's overdue payment goes to??. who the kcuf are you?? ... Eiiiaaahh! Jesus kills bushite for breakfast.

- On yet another, praise be with US, Alex Jones News Podcast -

Bob Watada: "He did his own research, and he found that there was not only deception, but clearly lying by the commander.

Now if YOUR boss lied to you, and put YOU out on the line, so that you can get KILLED, what would you do?"

The Fight for Survival slog match between, Johnny 'just tying his shoes' America, and Warmonger Liar, Sean Hannity - televised World-Wide!!! With Cheerleaders, beer, pizza, and beer! YEAH WAY!!!

Who's with Me?

-

A Public Letter to the "American" Coast to Coast Radio Network:

1=2E We, as the People, demand you allow US, the human species to openly discuss the public evidence on who funded the terrorist acts of 911 according to the FBI. And full disclosure on the science of building Seven.

2=2E That the Iraq war never had, nor ever will have a justification.

3=2E Also, that mercury tainted vaccines are deadly stupid. Mercury is scientifically understood, without question, (no doubt) to be a neural-toxin

You must wake up to life's demand for you to defend our dying lives my friend. Please? Make the call, be a man to defend our women. Be a man to protect our children.

Support our call to be heard my brother.

That's all.

-

Iran prepares first nuke strike
http://www.menewsline.com/stories/2007/january/01_15_2.html

See?, demons exist!

More settlers videos: "We killed Jesus, we are proud of it!"
http://www.uruknet.de/?p=3Dm30420&hd=3D&size=3D1&l=3De

Remind the Son of Man to hunt them down for better good
as we together are, why don't You see? I'm Your brother!

-

/ / State Department spokesman on 24 January, "that Iranian agents are involved in these networks and that they are working with individuals and groups in Iraq and are being sent there by the Iranian government." \ \

We all know Iran has been trying to help Iraqis openly, so then, what does such willful contempt for your life grant this 'spokesman'? Or, how about when Bush stated Iranians in Iraq deserved to be murdered? (Later, the demon re-worded himself in attempt to conceal HIS true evil identity.)

Remember the Bathists actually warred to kill and won against al-CIA-duh forces that were caught hiding in Kurdish territory. Killed "bin Laden"/bushite forces! Now, bushite tell US Sunni is in kahoots with Laden. (In otherwords, Kill a cowardly enemy of Life bushite for America to defend Iraqis as a godly act.) Death to the bushite, death to our enemies.

/ / Tariq Aziz, the Christian Iraqi Deputy Prime Minister said in mid September that Baghdad had provided assistance to America's Kurdish allies, the Patriotic Union of Kurdistan (PUK), when forces supported by al Qaeda attacked them. He said, ``We gave [Jalal] Talibani [leader of the PUK] weapons and ammunition, we helped as much as we could. We are not allowed of course to go into what is called the semi-autonomous region of Kurdistan physically, but the help we gave helped Talibani in his fight for it.'' In fact, added Aziz, ``Talibani was among the opposition leaders who went to Washington and spoke to Dick Cheney [US Vice-President] and Rumsfeld. He told them what had happened, so they [US government officials] must know.'' [Independent 9/23/02] \ \

Light and Shadow

We need to publicly devise some real-world strategies to defeat the ungodly enemy, the bushite neocon zionist traitors to Life.

-

Great words from the lawyer of the thieving bushite child killers of Haditha

/ / "There were Harriers dropping 500lb bombs on buildings. If they're dropping 500lb bombs without knocking on the door first, how can you argue the troops on the ground did anything wrong?" \ \

5000lbs of radio-active toxic waste that will murder for years more like, while after, then striking again to get the god helpers and screaming children, then even, as in Fallujah, going house to house to murder every one, young and old as the truly Satanic. Just obeying lawless orders to thieve from Humanity as bushite for neocon zionist traitors of G-D doesn't fly in the big book. When anyone kills a bushite, all humanity benefits truly from the defense. You defend a real suffering God by ending a soulless bushite threat against our species.

Bill Sattler.

-

http://www.informationliberation.com/?id=3D19646

/ / to think that these could have been just dumb ideas or incompetence. \ \

Bushite TRAITORS got rid of the ORHA plan.

-

Exit strategy to save the lives of dying Americans:

War bushite LIAR zionist repuglicons who did God wrong on 911

War bushite who LIE to American Sons and Daughters to not hunt those who stole billions with ear-marks, Social Security, no-bid contracts, Iraqi oil, ect.

War those who stole the Iraq Development Fund, and the emergency monies left to save the lives of our dying children

War bushite who feed soldiers radio-active toxic waste as harmless

War bushite who support torturing the innocent to death

War bushite who sing about the joys of murdering Iraqi children

War bushite who beat to death barefoot Iraqi children

War bushite who jokingly beat lamed dogs for fun

War bushite who claim they are lawlessly un-accountable as liars.

War bushite in the air force who target bombing innocent People
like in Fallujah or Somalia with land mines and mini nukes

The godless as lawless bushite is the enemy to America, kill
it proudly for freedom, as an undying love for a real God and
Humanity.

-

-

/ / she told The Nation. "If I contribute to the Army's
prosecution of Lieutenant Watada on speech-related charges, I
will have colluded in suppression of speech. What could be
more hostile to the ideas of a free press than that?" \ \

Again, a Patriot Soldier whos only crime is that he refuses
to commit a crime in Your name. Do something about it.

-

Real Americans are those of US as humanity that believe
in liberty as Justice for all. Demon bushite nazi
whores, don't like those principles of freedom through
evidentiary findings though, for their false deity,
George W. bush Jr, wouldn't be stealing from the honest
hard working blokes who live for a better day that way.

-

/ / Four US oil companies, namely Conoco, Chevron, Amoco and
Philips have concessions in nearly two thirds of Somalia.
This quartet of oil conglomerates was granted these contracts
in the final days of Somalia's deposed dictator, Siad Barre.

The US first military engagement in Somalia was fully
supported by Conoco. \ \

In the new world, these soulless bomber bushite of the air
force, responsible for blatant first degree acts of murder
against the innocent, would be hunted down by Humans, tried,
then executed gloriously in the defense of our living justly.

-

/ / Al-Maliki has promised he will no longer block action against the Mahdi Army militia \ \

So, is the block head saying American soldiers so far have died for lawless tyranny? Kill a bushite, to protect the lives of us as innocent victims in other words, right?

-

How Bush misled the world

http://www.theage.com.au/handheld/articles/2004/02/05/1075853996640.html

/ / Once the document was declassified after the war it became known that it contained 40 caveats - including 15 uses of "probably", all of which had been removed from the previously published version. Tenet further ingratiated himself by remaining silent about the OSP. "That's totally unacceptable for a CIA director," said Thielman. \ \

Thielman meant "totally unacceptable" as in HIGH TREASON. Could it be any higher? Deliberately caught misleading whore-dumb Congress to wage his immoral neocon 'escape' with a unjustified criminal brutality against God as all of our Humanity. A great deal more than a million innocent people have been victims to the 'targeted' Zionist killings of the irrational bushite enemy. Lawless enemies to Creation, spreading their toxic waste who thieve, rape and murder without reprimand from corporate news america, shall, I pray daily, die justly in vengeances by the will of a real undying Love for our victimized innocent family. Justice for Humanity.

Please, help US.

Let US demand open radio
communications on the mathimatical facts to save our own selves further victimhood to their personal contempt for the true value of YOUR life. Thanks.

Can you help us speak this outrage to your local media outlets?

thanks again bud.

A Soldier's Life Held in Contempt

The way I see it, is that I am completely documented correct on who was responsible for the terrorist crimes of 9/11.
snpd

The affidavit that starts "1. National Security Issues" was submitted in conjunction with my motion to request assistance from the Court. The additional paper "Stand Together or Don't", was an added part of the same affidavit.

The affidavit with 38 positions was submitted with the two motions, "Order of Production" and "for the Crown to Stay Proceedings". Duplicate copies of the same affidavit were submitted in each respect.

-

/ / In another characteristic incident, Bush asserted, as he has repeatedly, that any decision on withdrawal of American troops from Iraq "will be made by military commanders, not by politicians in Washington DC." \ \

Exactly. The demon enemy of life itself, Our Mr. bush Jnr., who publicly parades his contempt for freedom and God, must be stopped for all costs, that include for sure, your own as reader.

Realize, CNN and CBC have received this post, yet, continue to lie to dying soldiers for the benefit of the enemy neo-con.

-

AFFIDAVIT

AFFIDAVIT OF JOHNNY WIZARD

I, Johnny Wizard, in the city of Winnipeg, Province of Manitoba
MAKE OATH AND SAY:

1=2E

Pakistani ISI Director General Ahmad orders an aide to wire transfer about $100,000 to hijacker Atta. Ahmad later resigns after the transfer is disclosed in India and confirmed by the FBI. [Dawn, 10/8/01, Times of India, 10/9/01, Wall Street Journal, 10/10/01, AFP, 10/10/01]

2=2E

On March 3, 2002, MSNBC's Jim Miklaszewski reported that he had received anonymously, top secret presidential war strategy documents dated September 9th, 2001, originating from Condolezza's office, outlining a strategy to invade Afghanistan premised on blaming bin Laden a terrorist, but providing no evidence to back up the allegations, thereby guaranteeing criminal invasion. Only workable if Laden pleads innocence to a crime that hadn't yet taken place, a crime serious enough to "justify" sacrificing American GIs truly for a liquefied natural gas pipe line for pension thieving Enron. ["The Dahbol Working Group" and Bridas] Any evidence for any offense would have been sufficient to have Muslim fundamentalists hand Laden immediately over, as they had offered [as others of other nations had also] repeatedly during the Clinton years.

CBC and CNN have still, to this day, consciously refused to do any follow up on the intelligence, deciding instead on behalf of dying people everywhere, our public devolvement of a just society.

3=2E

RTI News - US rejects Taliban bin Laden evidence calls
21 September 2001 17:41

The White House has rejected requests from Afghanistan's ruling Taliban for proof that Osama bin Laden was responsible for last week's attacks.

The US Government said there would be no negotiations.

4=2E

[This following document was the official damning account]

Responsibility for the terrorist atrocities in the United States
4 October 2001
http://www.pm.gov.uk/output/page3554.asp

[This Internet Domain is Britain's Prime Minister's]

"This document does not purport to provide a prosecutable case against Usama Bin Laden in a court of law."

The document doesn't hold ANY case, as that was the strategy.... See?

5=2E

Investigating the Investigation

http://www.alternet.org/story.html?StoryID=3D17816

After playing a tape of Cheney's statement, Russert asked Daschle, "Did the vice president call you and urge you not to investigate the events of Sept. 11?" Daschle flatly contradicted Cheney: "Yes, he did, Tim,"

6=2E

ABCNEWS.com : FBI Called off Terror Investigations
http://abcnews.go.com/sections/primetime/DailyNews/FBI_whistleblowers021219=
.html

Two veteran FBI investigators say they were ordered to stop investigations into a suspected terror cell linked to Osama bin Laden's al Qaeda network and the Sept. 11 attacks...

`You Will Not Open Criminal Investigations'

7=2E

October 9 2001 - The Times of India

"While the Pakistani Inter Services Public Relations claimed

that former ISI [the "Pakistani CIA"] director-general Lt-Gen

Mahmud Ahmad sought retirement after being superseded on Monday, the truth is more shocking.

8=2E

No evidence was brought against Laden for nine eleven, none. [So according to Bush's official top secret Presidential directives] While Laden himself claimed he played no part in 911. Still, to save the lives of third worlders on the brink of starvation,

9=2E

former FBI deputy director and murder victim John O'Neill

"the main obstacles to investigating Islamic terrorism were

U=2ES. oil corporate interests and the role played by Saudi Arabia."

10.

Alex Jones interviewing Former German Defense Minister Andreas Von Buelow

"Bush signed W199I months before 911 ordering the FBI not to stop Al-Qaeda. They threatened to arrest FBI agent Robert Wright if he tells us what he knows."

11.

Mr. Bush was quoted somewhere regarding Mr. Laden's guilt of complete innocence with "We don't need any evidence, we know he's guilty."

12.

www.govexec.com/column/forwardTodaysColumn.cfm?sectionID=3D14

" [FBI's] Edmonds concluded that documents clearly showed that the Sept. 11 hijackers were in the country and plotting to use airplanes as missiles. She said documents also included information relating to their financial activities. "

13.

The honorable Argentinean oil company Bridas' relationship can not be understated as the Bush Administration's primary motive on criminal invasion of Afghanistan to save his biggest corporate backers, the American pension thieving Enron.

[snpd]

33.

Blix nor Elbaradei, nor Kofi, suggested, implied, or stated, that Iraq had failed to comply with the newest U.N. resolution: 1441.

HANS BLIX: "And at this juncture, we are able to perform professional no-notice inspections all over Iraq and to increase aerial surveillance..."

With complete, one hundred percent access to go where ever the Bush Administration pleased without delay, left a situation of an unjust war only detrimental to an ability to bring about any good or better thing. American soldiers are being sacrificed for no better good or reason understood, for if progress will ever be made, it will be when they work to bring about a political situation that was there in Iraq before the Bush Administration starting murdering innocent people for nothing . Well, not completely, for Bremer shipped 19 billion to Greenspan early on, then, hundreds of millions were sent back.

34.

Professor Steven E. Jones, a tenured BYU professor, went public several weeks ago after releasing a 19 page academic paper, essentially showing how the laws of physics do not support the WTC's freefall[...]

35.

"To be truthful about it, there was no way we could have got the public consent to have suddenly launched a campaign on Afghanistan but for what happened on September 11..."

Tony Blair Speaking To House of Commons Liaison Committee

36.

The Washington Post, 23 September 2001.

At American urging, Ahmed traveled ... to Kandahar, Afghanistan.

I have a RS PRO-83 scanner - I have very little knowledge but have managed
to program the frequencies I want to monitor and have it set to scan those
and the skywarn channel.

I'm hoping someone can either tell me this happens to everyone or can tell
me how to stop it - when I'm listening to a transmission, every 3rd or 4th

word seems to be dropped. It's very frustrating, like "911 call from --- --- Road. Caller says --- ---- three times today."

Is it me, my settings or just how it is? I do have a delay setting and the 'DLY' only shows on the readout when a transmission is happening and disappears when scanning. I've tried turning delay on and off and this happens either way.

Any help - thanks!

Mary

As Evan wrote, it is probably the prioroty setting. It looks at the prioroty channel every 3-5 seconds.

Anyone know of a decent frequency site on the net?

I found this one:
```

http://www.radioreference.com/

Don't know their reputation and/or accuracy with their lists but it would be
better to have other sites to compare with.

Thanks for any and all help.

Hi all.
George is serving the remaining time that is due to Volusia County, FL
from his original arrest back in November.
It is in his Probation Judgment in January 2007 that he serves more
time. He was to report on August 1, 2007
He will be in for hopefully 20 days or so.

His old website (SlotCrap101.scam and Licensed4fun.CON), is updating
the "Buy Now By *DATE*" because of a HTML routine he coded way in the

past.
None of the Payment links are working and haven't for a long time.

MILAIRCON hasn't been updated since his judgment either.

I guess there are still some fools out there that sent him a check by
mail. That is their problem.
Again... No business on the Internet for George and he goes to jail
for a long time.

So long....

I have found that site to be the most helpful.
It is only as accurate as the people who contribute to it.
Some areas are better than others.

Dave

the use of the phrase insane homosexaul is the key Ole woger insists
homosexaul or bisexauls like myslef lack any rights at all including
the right to breath itself

>trying to promote his homosexual agenda on ham radio groups.

I never bring up my sex life on here woger with men aor with women I
do respond to you from time to time yes

but if you stoped insisting on mention I was bisexaul nobody but you
(and anyone who who has been suffering through your years of flaming)
would know

"one useless man is disgrace 2 become a law firm 3 or more become a congress"
adams

woger you are a Congress all in your own head

No, you flood and spam.
You outed you and your shemale wife's sexual proclivities numerous
times on this ng and other places.
```

> but if you stoped

You and your shemale wife are responsible for those shodily made
potholders.

http://www.upmadeartistmarket.4t.com/catalog_20.html

```

Hi!

Just bought an old external WR-1550e receiver, but there was no serial cable
with it. I thought usual modem or null-modem cable would do fine, but the
gear seems to be not willing to co-operate... Anyone having an idea how the
cable should be wired? I tried to google with no luck.

Regards,

- Jukka Pappinen, oh6mwq

TrunkPCR version 0.87.225 Now Available for Downloading from homepage:
http://members.cox.net/fiftyone.50/TrunkPcr/TrunkPcr.html

This update has a few fixes, changes and additionss:

July 03,2007 - -----: PCR Type Selection Menu is back in use (Mainly for
```

Debugging).
July 07,2007 - Fixed: RR Web Import - Comparing Group ID's when a different Bank is Selected.
July 10,2007 - Added: Importing CSV files from Optoelectronics Digital Scout.
July 13,2007 - Fixed: Sort by Frequency in Channel Organizer.
July 14,2007 - -----: 9600 Baud Selection now Disabled for Moto.
July 16,2007 - Fixed: Displaying Active Trunk Banks and resetting Last Active one.
July 17,2007 - -----: Removed Moto "Digital ID Range" selection. Some systems have multiple ranges.
July 17,2007 - -----: Group ID's now have a flag for Digital or Analog and saved in ".Tnk" file.
July 19,2007 - Fixed: Blocking Astro Calls.
July 28,2007 - Added: Radio Watch - Up to 8 different Radios' activity can now be monitored/logged.
Aug 04,2007 - Fixed: Volume, Squelch & I.F Shift values saved if only these were changed.
Aug 05,2007 - Fixed: Old Bug when Squelch Condition constantly changes, while monitoring the Control Channel.
Aug 05,2007 - Fixed: Direct Entry of Frequencies using keypad/keyboard when Freq Button Depressed.
Aug 05,2007 - -----: Removed SQ LED. Background of Squelch Label now changed to display Squelch Status.
Aug 05,2007 - Fixed: Using Up/Down keys on keyboard to change Frequency when Freq Button Depressed.
Aug 06,2007 - -----: When Freq Button is Depressed, you can now change Frequency by double-clicking Frequency Text.
Aug 06,2007 - -----: Loaded BandScopeSpan value now makes sure it's atleast 4 higher than the BandScopeStep value.
Aug 08,2007 - -----: Restructured Edacs code and removed un-needed code.
Aug 08,2007 - -----: Edacs now reports Alternate/Neighbor Sites.
Aug 09,2007 - Added: Diagnostic/Test Messages now shown in a separate display list in System Info.
Aug 10,2007 - -----: Added more error checking to Sound Recorder

Version 0.86.225 Released 08/10/2007

I have a Pro - 95 scanner - which - by way of a jack on its side - you can hook up to another Pro-95 to duplicate the programing. I come across a Pro-97 which "appears" to have the same capability - by virtue of a similar jack on the side of it.

I don't have any info on the Pro-97. Does anyone know - if you could conceivably - program a Pro-97 by way of a Pro-95? Yeah, I could try it, but don't want to risk damaging either - or deprogramming either as they currently stand. Also, if it is possible to duplicate the 95 onto the 97 - what on the Pro-97 - would be the commands to do so? I can't recall off the top of my head the Pro-95 commands - but have the book here for it - to look up as needed. Are they the same - or?

Thanks!

I am selling a Uniden BC 396 hand held TrunkTracker IV digital scanner.
The scanner is new in box with manual and all included accessories.
Still has protective covering over the display. Also includes the soft
leather case and the Butel software for the 396.

$450.00 plus $15.00 shipping and insurance fees.

PAYPAL, Postal money order of personal checks accepted.
(Personal check will delay shipment until it clears).

I will ship either UPS ground or Priority Mail, INSURED.

eBay feedback under OFFDAN and I am well reviewed on RR as well.

E-mail with questions or if interested...

dconti@nj.rr.com

Dan

The answer is NO, you cannot clone a PRO-95 to a PRO-97.

These scanners "clone" from one to another by sending the memory map of one to the other. The formats of the memory maps in the two models are different, and the cloning process will not work.

That - is why I asked! I kinda thought it would be "too" easy! I have no book or anything for the Pro 97, so you know how that goes! Time to start letting my fingers get accustomed to the key pad.

Thanks! Much appreciated.

You can copy the settings/ channel from one to the other using external software: for example Win97 and Win95 from Starrsoft <<http://www.starrsoft.com/>>. As far as I know you'd need to have both programs on your computer, however both programs are available for a 30-day trial period. You'd download the pro-95 settings to Win95, then you can easily copy-and-paste them into the Win97 file and upload the resulting file to the Pro-97.

I'll bet if you explain what you want to do on the RadioReference software forum: <http://www.radioreference.com/forums/forumdisplay.php?f=89>

you'll get all the help you need.

Actually, it's no big deal. I got the scanner - and seen the jack on the
side of it - wondered if the clone could be done from the PRO 95-97 -
instead of programming in all the freqs by hand. My PRO - 95 is programmed
already - was just looking to maybe save some time.

Thanks!

It looks like he no longer has domain name service, among his less
important problems.

Firefox can't find the server at www.slot-machines-101.com

That's always a good way to go to jail - sign an agreement to get out
of jail or avoid jail and then go back on it. That has worked for
quite a number of people. It tends to raise the judge's blood
pressure.

I might give our local shack a call tomorrow to see if they have anything
going on to make this job a tad quicker. Programming a 1000 freqs, gets a
bit tiresome.

Thanks

I've been putting up with this situation for about the past year - so THANK
YOU so much for the advice. This WAS the issue :)

Thanks, thanks, thanks!

:

The guys at my RS connected a cloning cable between the Pro 97 and Pro 96. I don't know if they used any software such as the Win 96/97 software to do the files transfer. I have both the Win 96 and 97 programs and they are well worth the price of both.

Here's an online manual for the Pro97 which is far better than the one that came with the scanner.

Yeah that may be his best option.   Plus the Win 95 program is now
freeware so he'd only be out the cost of for Win 97 which is $25 and
in my opinion a bargin at the price.

:>> I'll bet if you explain what you want to do on the RadioReference software

:>
:>Actually, it's no big deal. I got the scanner - and seen the jack on the
:>side of it - wondered if the clone could be done from the PRO 95-97 -
:>instead of programming in all the freqs by hand. My PRO - 95 is programmed
:>already - was just looking to maybe save some time.
:>
:>Thanks!

Check out the link http://www.starrsoft.com/ that "Northe" provided.
It may be your best and easist option to go with downloading the free
Win95 software and then getting the trial Win 97 and transfering your
date that way.

Good luck.   :)

Sarah,

Thanks for all your replies. I appreciate the help. I'm going to attempt to get this thing going......... The "manual" will come in handy, the software, I'll look into.

Lou

I do now! Thanks!

Actually, I've not visited "Radio Shack's" web site in a while - the last
time I looked for info - I couldn't find it - so - I just tend to look
elsewhere.

Thanks again!

Hello to all

I guess this is a plug to let members here know that I've put together
a new scanner/shortwave monitoring forum.
It's new with only a few members but I think it will slowly pick up
speed.

Check it out at http://aurfscan.com

also some feedback to see where I could improve it would be
appreciated .

Thanks

Darren

Yeah I assumed they used some sort of software.  I'm curious what it
was and I'll ask on my next visit to the store .   :)

Hello all,

I found some freq. for Gloucester City, NJ, but it is silence 100% of the time.

Anyone have the lastest up to date freqs for gloucester city, NJ??

Thanks

Ray

PHONES 2 CELL LIMITED
252 APAPA EXPRESS WAY, OSHODI,
LAGOS, 01234
E-Mail: communicatemobile@doramail.com

Mr Richard Coleman

PHONES 2 CELL LIMITED is a Telecommunication Equipment Company Dedicated to the service of the public in Dispensing and Selling Quality Goods and services to the Entire Public at large. We operate much kind of services and other benefits depending on the rate at which we receive patronage from our buyers and thus this makes us one of the best in the Telecommunication distribution sector.

We were established in the year 2003 as a corporate company in the Telecom distributorship
industry, We have branches and drop shippers worldwide. We have achieved alot of goals due to the high quality that we provide to the public.
We ship Internationally! All items provided by us are Brand New, Boxed and with Full Warranty. We offer a 1 Year Return Policy for defective items from the date of arrival (DOA) at your location. Any item lost in the mail will be responsible by Tele Mactoob Inc, We will not be responsible for any product that becomes defective beyond the 1 Year of receipt. The customer will have to contact the Manufacturer for further assistance.
All return items MUST be Brand New, Factory Sealed,Unused.
Tele Mactoob Inc will be responsible for return shipping charges.This also Applies to defective items. All returns, for any reason, must be packaged with instruction booklets and all other supplied accessories when it was first delivered to you.
Kindly Contact Us at communicatemobile@doramail.com for More Information About Our Return Policy.

PCR Remote - version 0.65.33 Beta is Now Available for downloading from the homepage:
http://members.cox.net/5150soft/PcrRemote/PcrRemote.html

The Server and Remote software allows you to control your Icom PCR-100, PCR-1000, PCR-1500 and PCR-2500 over the internet.
Using Audio Brodcast software such as SHOUTcast, Pirate Radio Broadcaster or Windows Media Encoder will enable you to hear your radio from a remote location over the internet...

This update only has a few changes:
May   12,2007 - -----: Changed I.F. Filter / Mode Buttons Font.
May   12,2007 - Added: ToolTips to Stereo and Frequency Error Indicators.
May   12,2007 - Added: ToolTips to DSP Buttons/Indicators.
May   12,2007 - Added: ToolTips to all Knob Controls.
May   12,2007 - Added: ToolTips in Chat Window and Tone Squelch Setting.
June 21,2007 - Added: ToolTips to Bank Buttons.
June 21,2007 - Fixed: ToolTips for AFC, AGC, ATT, DTMF, NB, TSQ & VSQ displays.
Version 0.65.033 Released 06/21/2007

Regards,
Jay

*** Welcome to rec.radio.info! ***

Welcome to rec.radio.info, a group that aims to provide a noise-free source of information and news for the entire rec.radio hierarchy.

Two introductory articles about rec.radio.info are posted to the group every month. You are now reading the first article, which explains what rec.radio.info is, and answers some Frequently Asked Questions. The second article is titled Posting Guidelines, and you only need to read it if you want to submit an article to rec.radio.info.

You can skip to the next section of this article by searching for the next " -- " string. The sections available are:

- What is the purpose of rec.radio.info?
- Why are messages almost always cross posted to rec.radio.info?
- What is a 'follow-up', and what does 'moderated' mean?
- OK, so now I know what 'moderated' means. Tell me more.
- What type of material is considered inappropriate?
- I do not have access to news, how can I get the information posted to rec.radio.info?
- Will the material appearing in rec.radio.info be archived somewhere?
- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

-- What is the purpose of rec.radio.info?

The purpose or charter of rec.radio.info is to provide the Usenet community with a resource for information, news, and facts about any and all things radio.

All the other rec.radio groups are intended for discussions and general chit chat about radio. Rec.radio.info will contain informational, factual articles only. Follow-ups are redirected to an appropriate other group, and further discussion (if any) will not take place in rec.radio.info.

In order to ensure that rec.radio.info contains only appropriate articles, it was decided to create the group as a moderated newsgroup.

-- Why are messages almost always cross posted to rec.radio.info?

It provides a "tag" for each article to be assembled into a filtered presentation in rec.radio.info (even with cross-posting, only one message, with a unique Message-ID, is propagated across the net). This tag also facilitates a pre-existing method of dropping or canceling the articles locally within the discussion groups if you don't want to see them. This accommodates individuals who want to separate the bulletins from the discussions, discussions from the bulletins, as well as those who are adamant about not reading another newsgroup and wanted to see everything all in one basket.

With the total size of Usenet (in number of newsgroups and total traffic) doubling every year or so, this is no insignificant contribution to reducing information noise and chaos. Making the discussion groups a catch-all, and making extra newsgroups filters on that catch-all, is also the most realistic way to implement such a scheme (It's not intuitively obvious what the charter, contents, and general appropriate topics for each and every newsgroup are. Seeing FAQ's and charter/intro postings in the home newsgroup is beneficial for new readers).

By cross-posting one only is adding a few tens of bytes to each bulletin (to specify the extra group on the Newsgroups line), but are adding the capability for very powerful filtering features available on most news servers, listservers and readers. Your local news guru could probably explain these features in more detail.

In rn, for example, according to Leanne Phillips in her rn kill-file FAQ, add a line of the form:

```
/Newsgroups:.*[ ,]rec\.radio\.info/h:j
```

either in ~/News/KILL (if you don't want to see rec.radio.info articles anywhere) or ~/News/rec/radio/amateur/misc/KILL (if you don't want to see them just in rec.radio.amateur.misc). The latter method means your kill file will only be consulted during rec.radio.amateur.misc (and hence runs more efficiently), and will probably work for most people.

In nn, according to Bill Wohler in his nn FAQ, add a line of the form:

```
rec.radio.info:!s/:^
```

in ~/.nn/kill (if you don't want to see rec.radio.info articles anywhere), or put the following lines:

```
sequence
rec.radio.info
rec.radio.
```

at the end of ~/.nn/init in order to see all the rec.radio.info bulletins first, then read the remaining rec.radio.* without the bulletins.

-- What is a 'follow-up', and what does 'moderated' mean?

If you are new to Usenet and are not familiar with the terminology, you might want to read the general introductory articles found in the newsgroup news.announce.newusers. Doing so will make your life on the net much easier, and will probably save you from making silly beginner's mistakes.

If you think that at this moment you are reading an echo, a conference, or a bulletin board, I'd also strongly suggest a trip over to news.announce.newusers.

For the rest of this article, we will assume you have a basic knowledge of Usenet terminology and mechanics.

A moderated group means that any article that needs to be posted to the group has to be accepted by the moderator of the group. Since we need to ensure that followups to an article (discussion) do not show up in the rec.radio.info newsgroup, the `Followup-To:' header line contains a newsgroup that is appropriate for discussions about the specific article.

-- OK, so now I know what 'moderated' means. Tell me more.

Rec.radio.info is a moderated newsgroup, which means that all articles submitted to the group will have to be approved by the moderator first.

The current moderator of the group is the rec.radio.amateur.moderated Moderation Team. Submissions to rec.radio.info can be posted, or e-mailed to:

rec-radio-info@panix.com

Comments, criticisms, suggestions or questions about the group can be e-mailed to:

rec-radio-info-request@panix.com

But before you do so, please be sure to check out the "Posting Guidelines" article.

The influence of the moderator should be minimal and of an administrative nature, consisting chiefly of weeding out obviously inappropriate articles, while making sure correct headers etc. are used for the appropriate ones.

-- What type of material is considered inappropriate?

There are three broad categories of articles which will be rejected by the moderator:

1) Requests for information: rec.radio.info is strictly a one-way street. We receive information in our mailbox; we then post it to rec.radio.info. Requests for specific information belong in the normal discussion newsgroups. If your request gets answered, you might consider passing the answer on to rec.radio.info, though. Especially if you can edit it into a informational, rather than a discussion, format.

2) Obvious discussion articles, or articles that appear unsubstantiated.

3) Commercial stuff: a relatively unbiased test of a radio product would be accepted, but any hint of for-profit might be reason for rejection. For three reasons: This is not the purpose of the list, for-profit is a controversial topic, and this list may be passed onto

Amateur Packet Radio (where for-profit is prohibited except under certain provisos).

rec.radio.swap may be more deserving of the posting in any matter.

Similarly, copyrighted material generally cannot be used. If it's TRULY worthwhile to the net, We would recommend obtaining permission from the copyright holder. Please note the source, and if permission was given. We reserve the right to make the final decision concerning appropriateness in all situations. In most cases, a brief summary of, or pointer to, the copyrighted information may be all we can allow.

-- I do not have access to news, how can I get the information posted to rec.radio.info?

Google has an excellent web interface to Usenet newsgroups. It is available at:

http://groups.google.com

It supports both reading and posting.

-- Will the material appearing in rec.radio.info be archived somewhere?

Yes. See Google Groups above.

Effectively this means that anything you post to rec.radio.info will be permanently stored, so your work will not be lost.

-- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as time critical.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires co-operation and goodwill to be beneficial to the community in the rec.radio hierarchy.

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

(Adapted, with permission, from the original article written by Mark Salyzyn, AG4YD, ex-VE6MGS.)

*** rec.radio.info - Posting Guidelines and Etiquette ***

Two introductory articles about rec.radio.info are posted to this group and to rec.answers/news.answers every month. You are now reading the second article, which explains how to submit something to rec.radio.info, and which answers some Frequently Asked Questions about the submission process. The first article is titled "Welcome to rec.radio.info", and it might be a good idea to check it out as well.

-- How do I submit something to rec.radio.info?

Two possibilities. You can use your newsreading software to just post the article to rec.radio.info, as you would do with any other newsgroup. The difference is that the software recognizes the special status of rec.radio.info as a moderated group, and will e-mail your article to us, the moderation team, instead of posting it to the group.

Alternatively, you can mail your article directly to us at the following address:

rec-radio-info@panix.com

Mailing us directly is probably (a wee bit) faster, but using the transparency offered by the newsreading software is probably more convenient.

If you have any questions, or wish to deal with some administrivia with the moderation team, we suggest mailing to the following address:

rec-radio-info-request@panix.com

-- How soon will I see my article appear?

It depends on how busy we are. Your article reaches us as mail, we have to read it first, give it the stamp of approval, and finally send it on to the group. We will attempt to read and decide on all submissions within 72 hours at the very least, though we will probably be able to process submissions much faster in actual practice.

The site from which we moderate this newsgroup, "Public Access Internet and Unix, NYC" (Panix), is directly connected to the Internet, and articles posted at that site should appear at most major news sites, including Google Groups, the same day. The principal delay, therefore, will be the wait in the moderator's submission queue.

If you post a periodic article, and have shown to be trustworthy, we may allow you to post directly if the article is of a timely nature. See the section below on direct posting.

-- Should my article be in a specific format?

No. If it is not totally illegible, we will accept it, and if it does not have a correct subject-line we will correct it with your permission -- that's what a moderator is for.

However.

You could do us a big favor by making sure your article conforms to these simple requirements:

1) The article must present information, not discussion or requests, We will reject the article or require you to change the wording if it is worth it.
2) A good, descriptive Subject line.
3) Always mention what source you got the information from.
4) Don't forget to include a Followup-To header, at least if you don't want further discussion to automatically be forwarded to you, the poster, which is the default if the article is only posted to rec.radio.info.

As we said: if your article is appropriate we will post it even if you don't follow these guidelines, but then don't blame us for not processing it immediately. 'Perfect' articles we can send on with a couple of keystrokes. Stuff that needs minor editing is going to have to wait until we have time to do so.

Please do not waste both our and your time by posting requests, as this is an information only news group.

-- What about crossposting?

If you send something to rec.radio.info, just name any group you'd like to cross-post to in the Newsgroups field. Then, when we approve the article for rec.radio.info it will get automatically cross-posted to any other groups mentioned. This will also override the default Followup-To: poster, replacing it with the groups you cross posted to.

We would prefer if the group be cross-posted to the various discussion groups in the rec.radio.* hierarchy that are appropriate:

rec.radio.amateur.misc	Amateur (ham) radio and related matters
rec.radio.amateur.packet	Amateur Packet Radio discussions
rec.radio.amateur.policy	Amateur Radio practices, rules, etc.
rec.radio.noncomm	Non commercial radio discussions
rec.radio.shortwave	International broadcasting on the 'HF' bands
rec.radio.cb	Citizens Band (27 MHz) discussion
rec.radio.scanner	Scanner discussions (unsupported group)

or in one of the moderated groups:

rec.radio.amateur.moderated	Amateur radio practices, rules, etc.
rec.radio.broadcasting	Discussion of *domestic* radio broadcasting

We will leave it up to the poster to decide which group(s) are appropriate, but reserve the right to add groups if we feel it has broader interest. We will consult with the poster first.

Notes on crossposting:

- rec.radio.broadcasting is also a moderated group. The rec.radio.broadcasting moderator prefers to review all articles himself before posting. Placing rec.radio.broadcasting before rec.radio.info on the Newsgroups line should accomplish this. We will typically abide by the rec.radio.broadcasting moderator's decision whether the article is appropriate for rec.radio.info.

- rec.radio.amateur.moderated is also a moderated group. As the rec.radio.amateur.moderated Moderation Team manages both rec.radio.amateur.moderated and rec.radio.info, we can manage crossposting and approvals for both newsgroups. The rec.radio.amateur.moderated group does not allow crossposting to other discussion newsgroups, whether moderated or unmoderated. However, we would like to manage rec.radio.info as consistently as possible with how it was done by previous moderators, including the grandfathering of existing regular postings. Therefore, the submitter can choose rec.radio.amateur.moderated or the other unmoderated rec.radio.amateur.* discussion newsgroups for crossposting, but not both.

- Any FAQ or informational posting approved by the rec.answers/news.answers moderation team that is also crossposted to any rec.radio.* newsgroup (besides just rec.radio.info) is also automatically pre-approved for rec.radio.info. See below for more information.

If you post to another moderated group, it may be better to make special arrangements with both moderators before posting by contacting us at our administrivia addresses.

In addition, cross-posts do not take up extra space; modern newsreaders can be configured to show you cross-posted articles only once anyway; not everybody reads rec.radio.info; and rec.radio.info was never meant to reduce the volume of the regular discussion newsgroups. But keep in mind that some of the mail gateways may filter out the informational postings (at request of the subscribers) to keep the load down.

You decide.

-- I have a regular posting with timely information, can I make arrangements to help speed up delivery by posting directly from my site?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as timely.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires cooperation and good will to be beneficial to the community in the rec.radio.* hierarchy.

If you are currently maintaining (or plan to maintain) a radio-related periodic information posting, you may wish to consider crossposting it to rec.answers/news.answers. Postings that are approved by the rec.answers/news.answers moderators for this treatment are automatically pre-approved for crossposting to rec.radio.info (as the news.answers requirements are far more rigorous than the requirements this newsgroup ever plans to use). For more information about this option, consult the appropriate information articles and posting guidelines in rec.answers/news.answers.

Realize also, that even if your post is not approved for rec.answers/news.answers, it can still be approved for rec.radio.info. The intention is not so much to get every last bit of radio-related information on rec.answers/news.answers, but rather to provide an alternative avenue of approval (as well as grandfather existing maintainers of radio-related information and spare them additional bureaucratic hurdles). Again, crossposting to either rec.radio.info or rec.answers/news.answers, both, or neither, is at the discretion of the poster (subject to the approval of the moderators). You decide what is most appropriate for your article.

Please remember that as an information maintainer, you are not alone. There are many others on the net who maintain and post periodic information postings, using various intermediate-to-advanced features of Usenet (usually via automated tools). Various degrees of technical support and general hand-holding are available from many Usenet veterans. Send us some E-mail describing your needs to our administrative address below, and we'll try to help, or at least refer you to the right knowledgeable individual(s).

-- And Follow-ups?

If the only newsgroup you have specified is rec.radio.info, then the Followup-To: field will always be set to poster. If you do not want this, you must supply a Followup-To line of your own, and we will honor that one, as long as it is a subset of the original Newsgroups line.

If you specify newsgroups to cross-post to, then the Followup-To field will be set to include all the cross-posted groups, excepting rec.radio.info itself. Again, if you do not wish this behavior, supply your own Followup-To line.

We maintain other standards on the various RFC-1036 (news transport) header lines. For example, if the article is appropriate for passing into the Packet Radio Information Network, we encapsulate the Packet Bulletin Identifier (BID) in the Message-ID: news header line indicating the machine of origin as the ampr.org domain:

```
 Message-ID: <$opa.55.1994@ampr.org>
```

where the Packet Radio BID, in this example, is `$OPA.55', and it was posted in the year 1994, because some of the Bid numbers are cycled yearly. Hopefully, this can be used as a key to re-introduce the articles for the Packet Radio network. Also, if the article is a repost of an already existing information article in the rec.radio heirarchy, we ensure that the References: header line is linked to that previously posted article. This also helps to tag articles, and may be used for additional filtering if needed.

Since the articles are archived, please use the Summary and Keywords header lines to help one search for your article.

-- Why have I received no reply from you?

We never reject anything in silence, and we make a point of it to answer all our mail. However, E-mail, like a brain cell, can and does get lost, every now and again.

So, if you send us something, and you don't see it appear it rec.radio.info, and you still have not heard from us in reply after say, five days, you can be pretty sure that either your mail never reached us, or that our answer has never reached you. In that case, please try again (We will filter out duplicates).

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

If someone could point me to some possible scanners that combine 900 MHz
coverage with a signal level indicator of some kind, I'd appreciate it.
My PRO-97 covers 806 to 960 but, of course, doesn't provide any signal
level indication.

Thanks!

I wouldn't recommend the PRO-2055 to anyone because of the well-known problem with the display going blank after a few months. Radio Shack claims to have fixed the display problem on the newer models, but reading the reviews of the PRO-2055 at Radio Shack's website seems to indicate otherwise. Also, take a look at the listings for PRO-2055's on eBay and see how many are advertised as having display problems. The PRO-433 is a better bet. I've had mine for at least six months now, and the display still works perfectly.

73,

David

According to radioreference.com it looks like Contra Costa county sheriff (on VHF, not UHF) provides services to Baypoint and uses the East dispatch channel. Try 155.19 with PL of 136.5.

155.19000 155.64000 KMA371 MR 136.5 PL 3 East FM

Given where you live for listening to public safety you don't need a digital scanner or even a trunking radio (although I would recommend you get a radio capable of trunking in case you want to listen to a trunked system in the future). I second the suggestion that you visit Scanners Unlimited in San Carlos and talk to a knowledgeable salesperson about the equipment that would work well for you. For fixed station use consider the Uniden BCT-8 or BCT-15, plus a good quality discone antenna. Hopefully Scanners Unlimited has a better antenna selection than they show on their web site. If not, go elsewhere. Don't spend more than about $250 for the radio and another $50 or so for the antenna and 50' feedline.

I new to all this and I have a Motorola MaxTrac 800 and I want to know if it can be converted to be just an emergency scanner. I was told it could be but I can't even find a users guide for it. Motorola's web site dosen't even have one. If it can be converted could I do it? The model # is   D35MWA5GB6AK

I also have 2 Moto MTX 810's and 1 Moto MTX, it has no numbers just mtx on the front. Can any one tell me anything about these radios? I looked around the website before posting but I couldn't deside where to post my questions so I'm sorry if there in the wrong place.

TrunkPCR version 0.86.223 Now Available for Downloading from homepage:
http://members.cox.net/fiftyone.50/TrunkPcr/TrunkPcr.html

This update has a few Additions and fixes:

May 31,2007 - Fixed: Tune-to-Group when "Hunt on Data Loss" is selected in Single Rcvr Mode.
May 31,2007 - Fixed: Tune-to-Group now selects propper Mode for Digital Groups for PCR-2500 w/P25 Card.
June 04,2007 - Added: Display of Known Frequencies during Conventional Searching.
June 05,2007 - -----: Scan Speed Knob now usable in a Trunking Bank when Searching in Conventional mode.

June 06,2007 - Added: Report of New Found Frequencies during Conventional Searching (After Clicking HOLD).
June 07,2007 - Added: "Select All" Button on Search Results Display.
June 10,2007 - Fixed: RR Import of Edacs Frequency Plan (caused Program to crash).
June 11,2007 - Added: Compare GroupIDs with RR Import.
June 12,2007 - Fixed: Saving User Status and Radio Message files for Current Bank only
June 16,2007 - Fixed: Color Display of Edacs Private and Data calls in CC Activity.
June 17,2007 - Added: Display of Rejected Users in CC Activity for Edacs.
June 18,2007 - Added: Display of User Status in CC Activity for Edacs.
June 18,2007 - Added: Display of Adjacent Sites in CC Activity for Edacs.
June 19,2007 - Added: MessageBox is displayed when Export to Excel has been completed.
June 20,2007 - -----: Increased size of Trunk ID Editor.
June 20,2007 - Added: DTMF functions for PCR-2500's Dual Receiver.
June 22,2007 - Fixed: Scan/Search starting when Editing Bank/Channel Descriptions.
June 24,2007 - -----: Selected COM Port is now closed after initial check if radio wasn't previously on.
June 24,2007 - Fixed: Changed ToolTips for Strero, WX Alert and Frequency Error indicators.

Version 0.86.223 Released 06/24/2007

Regards,
Jay

Anyone here with "in-depth" knowledge of the Bearcat 250 Scanner and repairs? I am way out of tune with these things. Haven't seen one - let alone worked on one for close to 10 years if not much longer. I have a model here just came in the door for repair. I've had a manual from days gone by. There appears to be some differences - not shown in the manual. I'm wondering if I can pick someone's brains about this model or it's differences.

1. Was there more than one version of service manual? At the time I purchased this, I don't believe I was told of anymore than the one - I usually ask about revisions.

2. Did the updates in this model produce differences in circuitry (I'm sure they probably did) - and how?

3. The issue I "currently" see - is I have "low level" audio, no squelch action, no receive, no display, no dot. I started troubleshooting it and this book has a Q206 listed in it as providing a particular voltage to the circuit (can't recall which part of the circuit - without the book in front of me). THIS unit shows NO Q206 where the book shows it to be. I can be more specific in parts layout in that area if someone asks - but for now - I'm missing some voltage and need to find out why Q206 is not there OR whatever. The "Q204" is putting out like 4 - 6 volts less than it should. I'm not sure that is the "only" issue here - but the first I found thus far. I'm just trying to clear up the mystery of Q206 for the moment. The book shows it "supposedly" on the "Features" board. Along with that issue, there is in the same leg of circuit - according to my manual - a 47K ohm resistor there tied to Q204 and a wire coming from the 18V supply - with an 9v Zener in that area also. This model has a 1xxxx ohm resistor there OR at least it appears to. It is burned in the center from heat - but the first band is clearly "brown" - so this isn't the 47K as called for in my manual. Basically, the circuit leg is all there - minus Q206! There's not even a place for it "to" be, from what I'm seeing.

IF I'm in error of voltages/values specified - its' only I'm going from memory - the book is in the shop - but I"m not off in my description otherwise.

I can provide more specific info such as Serial Number, Board numbers and/or revisions, whatever - if requested, I just don't have it in front of me at the moment.

I realize some parts of this radio are impossible to get now-days - so - I want to make sure I can trace this down to something repairable and get it done OR find out quick it isn't possible and hand it back without wasting much more time.

Any info? Please answer here - my address is a spam catcher only.

Thanks,

Lou

Lou,

Not wishing to appear rude, but if you have to spend this much time on a 10 year old model is it worth repairing or should it be written off as beyond economical repair.

Dave

Dave,

You're not being rude..... Trust me, the thought crossed my mind........ but it is for a good friend of mine - as a favor. I did tell them that "some" parts are no longer available and it might be time to toss it. But, I didn't want to just toss it without the ole "college try". Any time I ever needed any help - they were quick to jump to my aid, so I'd like to try to return the favor - especially now that they are blind - due to diabetes. Were it not for that - it would have probably been handed back immediately - with an I"m sorry. I waste valuable time on misadventures of my own - so I can't be too much for the wear and tear for the little time I've spent on this to date. I would much rather do this for a good friend than to lift a finger for half of my idiotic relatives. I'm sure you know how that works out.

Thanks just the same for your reply.

Lou

Convert a conventional MaxTrac 800 trunking HT to a scanner? I suppose it is possible with the right software and an external device to drive it (like a PC) but it certainly isn't part of the standard functionality of that transceiver.

If you want a trunking scanner, just buy one. It will be cheaper and more functional than whatever you might dream of doing with a Motorola-only HT solution.

Lou -

http://www.notpurfect.com/main/bearcat.html

I assume that you have gone through these repair FAQ steps? (complied by Bob Parnass from 1999)
http://www.repairfaq.org/REPAIR/F_BC_Repair.html
http://www.scancat.com/newbscn.html

BTW, I always start with the power supply section ---
looking closely at electrolytic capacitors, diodes, etc.

- Bearcat 250 heat problem. Kit includes power transformer, regulator, and instructions to cure overheating problems.

G&G COMMUNICATIONS
Gerry Oliver - Owner
7825 Black Street Rd., LeRoy, N.Y. 14482
Phone: 585-768-8151 / Fax: 585-768-7175
http://www.iinc.com/ggcomm/mods.html

http://www.scannermaster.com/ProductDetails.asp?ProductCode=01-550787

The Electra/Bearcat BC350, BC300, BC250, BC220, BC20/20, BC211, BC210, and BC210XL models were hand assembled, and every one I've serviced had several connections that were either soldered poorly, or not soldered at all.

Resoldering joints on the ribbon cable connecting the RF
and keyboard logic circuit boards in a BC250 attenuated the
microprocessor/synthesizer hash noise noticeably.

> Anyone here with "in-depth" knowledge of the Bearcat 250 Scanner and repairs?

The service manual you have is the only one I know of. Scanner manufacturers never update the manuals until there is a catalog number or model number change.

During the life of a product there are changes made in production. I have an Electra schematic (engineering drawing) for the BC300 and it went through a dozen changes at the time the drawing was made. Finding a drawing like this for the 250 would be nearly impossible now.

Electra often tack-soldered parts to the back of the boards. Maybe Q206 is on the back in your 250.

Q206 serves as an amplifier to reduce the current in the Zener and improve regulation. If the voltage at the emitter of Q204 is much less than 8.4 volts, a good portion of the circuitry in the radio will not operate. You can try replacing the Q204 regulator with a 9 volt three terminal regulator feeding into a 1 amp diode. That should give you about 8.4 volts and has the bonus of overcurrent and thermal protection. The original design ran Q204 way too hot and it is a common failure point. Adding a heatsink and drilling a few vent holes helps.

Many of the IC's in the radio are custom and very hard to find if one needs to be replaced. When I had a 250, I recall it being very sensitive to disturbances on the AC line, often hanging the scan cycle or corrupting the programming.

With all the negatives about the 250, I'd look for a more recent model on Ebay to replace it. Something simple with 50 or 100 channels should be available cheap and it will perform better than the 250 ever did.

Therein lays "part" of the problem... Q204's voltage is ok at input but
significantly slacks off on output. MY issue at the moment is - the book
"shows" a Q206 - but there is not one there! IF you have the manual - refer
to it - you'll see the 9v zener etc, there. ALL is there but Q206. It is
weird.......
It doesn't appear to have been "placed" there to begin with.

I was shooting for trying to figure that out - then finish troubleshooting.
As for someone's posting of starting with the power supply, that is exactly
what I've been doing til I ran into parts not there - as shown. That is
usually where I start - with ANY issues I have unless directed otherwise by
symptoms.
I was eliminating all the parts as the book lists as suspects. I believe I'm
in a definate problem area with the voltages - but still - where the hell
did Q206 disappear to? IF there is no other info to be had, I'll take a nice

LONG look at it in the morning and see if there is something else I can work out. I'm 99.9% sure I have a new Q204 to pop in if this one is weak. I just stopped where I was to try to figure out what the heck was going on.

I've researched most of the info - if not all - available by Parness(sp?) - that I could find. I'll just take a good close look tomorrow and see what is what. Was just hanging back to see what replies I might get to help out.

THANK YOU FOLKS for your input.

Lou

Hi,

I have "I believe" - all of his info downloaded and have reviewed it. I'm going to check your links to be sure I have all. I "usually" do start with the power supply in any case - unless symptoms guide me elsewhere. In this case in particular - being "almost" dead - that was the "first" place I headed. Situation is - I am at a component which is producing less than it should - and I look to changing it, but in the manual - there is a transistor shown in the same circuit along with a zener. The zener is there - the other transistor Q206 "appears" to not have been placed there.

Was just trying to find out what is with that. I'll look again - but it didn't appear to be on the bottom of the board - and "all" (as I can see them) traces of the parts shown interconnect on top <minus> Q206.
So - was wondering of any changes, etc. And then too - the resistor which was burned in the center is showing with the first band (not discolored) to not be as listed in the book. Well anyway, I'll replace the transistor which isn't pumping out enough and see what it does for me. I can't make out the resistor other than the first band, so I'll stick one in which the book called for - and see what goes on. I'll study the thing to see what was in their mind - then I'll go from there. I've wasted better time on my own so - trying to help a friend - won't bother me. If I"m not doing this, I'll be playing taxi driver for family. Would rather play at the bench!

Seems like you might have a very early production radio that just doesn't have Q206. The date code on the back of the radio might confirm this.

The circuit is just an amplified Zener regulator and it isn't extremely critical if the amplifier is one transistor or two. The service manual shows a 8.2V Zener and you mentioned having a 9.1V Zener in the radio so they evidently didn't intend to put Q206 in the circuit. Replace Q204 and add a small heatsink to keep it from burning out again. The resistor may look like band one is brown, but heat can change an orange band to brown over time. Try a 470 Ohm resistor initially. If the output voltage is too far below 8.4V, the Zener is being starved and the resistor will have to be reduced. In that case try 330 Ohms and measure the output again.

THANK YOU - very much................ I'll look at the band again, you may
be right - it "was" late! Yeah, I've seen this before - quite a bit in other
radios. But the rest was as stated. As to the Zener - I may be in error -
the book "shows" an 8.2 vdc. I seen the schematic was calling for 9.1 vdc
off one leg of one of the transistors and that stuck in my head. I'll have
to remeasure that too as it seems to me I may just have gotten 9.1 +/- vdc.

I didn't make notes as I usually do.

I'll give this a whirl since I know definately the voltage is "way" off on the transistor. But as I said - I simply stopped there to try to find out what the heck was going on with the missing transistor.

I definately have to make notes on this one - regardless if it is fixed or not - JUST in case!

Thanks again..........

Lou

I just threw two Bearcat 250s in my garbage can this morning. I had purchased them as defective units years ago. I assumed I could use parts from each to make a good one, but they both had repairwork damage on the circuitboard under the keyboard.

That was a wonderful scanner because of the feature that would search a section of band and record a list of hits through the day. You could then program the hit frequencies into a bank, or two, and find something interesting.

Yes, the MaxTrac and the MTX can "Scan" 800 Mhz only. Take the battery off
the MTX and see what the serial number is.
It will be H01??? the 4th character will be a "U" for 800Mhz and a "W" for
900Mhz.
The MTX can be configured as a16/32/48 channel radio and it will scan 16
channels. You need Motorola RSS software to do
this and a SLOW DOS computer.

DUDE!...you are a "HAM" figure out how to read "limiter" or AGC
voltages.....
Get a book on it...all scanners sold by radio shack are made by either
Uniden or GRE.

Yes I am......... in the USA. I'm aware of G & G - Thanks! I was just checking the thing out for a friend - found an issue and at the same time the puzzling item and stopped to see if anyone had info regarding it. Aside from information - I doubt my friend will want to "invest" much into it. I"m merely doing it as a favor to him short of telling him to scrap it. Been kind of busy since getting these e-mails - so haven't had a chance to get back to it. I'm going to be free after tomorrow afternoon - so I can take another "closer" look at it and make a decision - one way or another.

Hello,

Trying to learn a bit more about antennas. New at this.
A very confusing subject.

Here's a very basic question.

For the 2m band, and the VHF bands in general, it is possible to find vertical whips that are omni
and offer, apparently, 3 db gain (or more). Do receiving only.

It is also possible to find other omni antenna types over this range, and wider, that offer the same Gain numbers, or lower.

Also, there are Yagis (directional) for these ranges, again with the same types of gain numbers.

So, seeing the convenience of a vertical whip of a few feet or so, what advantage would most any other configuration or type that also offers, e.g., 3 db of gain, offer ?   Why not use a vertical whip for most (all) VHF receiving ?

I'm sure that I'm missing something basic here.

Thanks,

B.

First of all we need to define some terms here. 1. Some antenna manufactures will list their antenna using the term DBi,, the i stands for isotropic. The isotropic antenna is a theoretical antenna that doesnt really exist. It is an antenna that supposedly radiates in all directions equally, much as a free standing light bulb radiates light in a spherical pattern. No antenna like that really exists. Manufacturers like to use that term because they can use a higher number for gain than the old standard which is DBd, which stands for dipole. A dipole is a real antenna, but it does have a radiation pattern kind of doughnut shaped. (A vertical dipole) Now we get into gain numbers. Real vertical type antennas are either a 1/4 wave which realistically has a gain of 1. Sometimes they call this unity gain. A 1/2 wave vertical will have a DBd gain of 2.7, most everybody rounds this up to 3. A 5/8 wave vertical will have a DBd gain of somewhere between 3.5-4. The gain comes from flattening of the radiation pattern from a round doughnut to a more flat or a squashed doughnut shape. A Yagi is a beam antenna that focuses the radiated field moreso than an omni directional. The no. of elements of the Yagi determines the gain, i.e. the more directional. I had a 2 meter 12 element beam that had a gain of somewhere around 9-10. For every 3 db you are doubling the signal. And yes antennas tend to work on receive as they do on transmit. BTW that 12 element Yagi I had was a BIG antenna, most people dont want a monster like that on their house, unless you really have a need for it. Unless you live in a remote area you dont need a beam. A vertical will work fine in most cases. A discone antenna is a very good compromise for scanner use because it is so widebanded, and you can use the discone to transmit on 2 meters and 440 if you want, I use to do it all the time.

Hi,

Much thanks for such a clear explanation.
Appreciate all the time you took to write it.

Have a much better understanding of it now.

Regards,
Bob (Sudbury, Mass.)

Anyone have a broken MR8100 that might be repaired.
Some repair shops were telling some customers that the vco were broke, but they were easley fixed. Looking for one that we could fix up to use around here. If so let me know.

Just take the jr off the first letters on the e-mail

Hate to be a nit-picker, Dan, but that looks like a $200 increase in the
price. :)

Can anyone recommend an inexpensive spectrum analyzer. $500 - $1000.
Something just for sniffing around. Not for bench work.

Randy

Toss a few of your lame threats at him too Eric!

MUAHAHAHAHAHA!

.

N7ZZT - Eric Oyen <n7zzt@127.0.0.1> wrote:
I've reported there until I am blue in the face. it would be more
apprpriate if they would just forward me his IP info so I can go after his
ISP instead (much more effective).

N7ZZT - Eric Oyen <n7zzt@127.0.0.1> wrote:
We'll see what your ISP says about your off charter trolling.

N7ZZT - Eric Oyen <n7zzt@127.0.0.1> wrote:
they said they will be forwarding my information and their data off to the
offending ISP.

N7ZZT - Eric Oyen <n7zzt@127.0.0.1> wrote:
considering I just got off the phone with them... They were very
accommodating. These folks would rather lose one troublesome user than
attract a whole lot of unwanted attention from the feds. so, thats the way
it is.

N7ZZT - Eric Oyen <n7zzt@127.0.0.1> wrote:
just a word of advice, your ISP is now aware of your intent. should you
carry it out, I am fairly certain that they will take action against you for
failing to abide by the Terms of Service agreement you have, as well as

the Acceptable Use Policy you agreed to.
do it and you'd better find yourself another ISP.

N7ZZT - Eric Oyen <n7zzt@127.0.0.1> wrote:
your words in this public forum can be considered actionable.

N7ZZT - Eric Oyen <n7zzt@127.0.0.1> wrote:
your words here (like all others) can be considered actionable.

N7ZZT - Eric Oyen <n7zzt@127.0.0.1> wrote:
mark these words well, your words are actionable. continue and you will have
to defend your position, and you will not like where you have to defend it.

N7ZZT - Eric Oyen <n7zzt@127.0.0.1> wrote:
btw, your ip is showing I hope you look good in stripes

N7ZZT - Eric Oyen <n7zzt@127.0.0.1> wrote:
a case of libel and you are it

N7ZZT - Eric Oyen <n7zzt@127.0.0.1> wrote:
my warning still stands: you fuck with me at your own peril.

N7ZZT - Eric Oyen <n7zzt@127.0.0.1> wrote:
any attempt by you to start an arguement with a fellow @home user
will be reported to the @home abuse dept. Basically, right now, you are
violating TOS here.

N7ZZT - Eric Oyen <n7zzt@127.0.0.1> wrote:
Should I just take all your
postings of late (they are easily accessible from deja) and forward them
as a digest to @home? Abusing behavior like your will not be tolerated.

N7ZZT - Eric Oyen <n7zzt@127.0.0.1> wrote:
now, start telling the truth or you might as well leave the net.

N7ZZT - Eric Oyen <n7zzt@127.0.0.1> wrote:
So, I'll leave you to it and let yourself be TOS'd for
gross violation of the AUP of your provider.

N7ZZT - Eric Oyen <n7zzt@127.0.0.1> wrote:
you were terminated from the @home network for abusive behavior.

N7ZZT - Eric Oyen <n7zzt@127.0.0.1> wrote:
Continued harassssment on this point will result in many emails
to whatever provider you are currently using.

N7ZZT - Eric Oyen <n7zzt@127.0.0.1> wrote:
With a few tools, it can be determined if there is a machine
on that IP currently, and with a little more digging, exactly WHO
is on that machine.

N7ZZT - Eric Oyen <n7zzt@127.0.0.1> wrote:
You have no clue who you are dealing with here.

N7ZZT - Eric Oyen <n7zzt@127.0.0.1> wrote:
take a good look at your TOS and tell me that again

whats the matter little 'boy'? got a burr under your bridle because you
don't like what I have to say?

tough shit. get used to it.

besides, I find your attempt at 'humor' falls flat.

Looking for good clean, fully working Realistic PRO-2004. Must have bright
backlight. Willing to spend around $75.00. Let me know what you have!

Frank

FA Pro-2010 on E-bay for "Parts" or "maybe" repair - if you have (or want to buy) the parts for it. The unit is complete - still looks almost like brand new - but has "receive" issues. I don't normally list FAs in news groups (3x a year at most if lucky) - but if someone has need for the parts or wants to try to refurbish this unit, here ya go. Maybe you have one, the antenna got lost/broke, knob lost, the cabinet all scratched, cracked, keypad not working well, etc. This unit is excellent for parts of that sort. I realize how sometimes, someone wants to bring back an older unit and parts are either hard to find or expensive. Otherwise, my advance apologies for this particular intrusion.

Test - I seen a ton of posts on here like 2 weeks ago or so -myself participating in a thread. Now I see none. Is this thing working or what?

```

For many years I've kept a scanner at work to listen to the air-ambulance helicopters come and go--I just find the choppers interesting.

Moved to a new job last month in Louisville, KY. Just out of curiosity, I added the listed frequency (464.1375) for the excursion boat _The Belle of Louisville_ to my scanner. (I took the two-hour ride this weekend and it was a lot of fun.)

So I do hear activity from the _Belle_, but there's a warbling sort of audio tone on all their transmissions. Sounds like someone blowing a slide-whistle while working the slide up and down. Don't know that I've ever heard that before.

Is this something designed to discourage listening? (In my case, sometimes the warbling isn't very loud in the audio stream, and at other times it's loud enough to make it difficult to hear what they're saying--I have no idea why it varies like this.) Or is the warbling for some other reason?   TIA.

```

This story on Channel 7 says the Motorola Astro radios that the Los Angeles Police Dept. uses are 14 years old, out of production, and becoming unreliable. The LAPD has its eye on a new radio, but it costs $3400. Replacing 10,000 Astros will be expensive. No decision has been made yet.

http://abclocal.go.com/kabc/story?section=local&id=5529090

Years ago I used to carry an Astro on the job. When it replaced our old MX350 and Sabre radios it was about the trickest thing we'd seen, with features like scanning multiple talkgroups and private calling to an individual radio over the trunked system.

$3400 for a basic APCO-25 radio? I don't think so. Buy a P-25 radio from Kenwood or one of the other competitors and save $2K each.

Thats what happens when you get overzealous salesmen and uninformed
politicians (or others) footing the bill. They take for granted - the
Sellers/Installers first price. I've seen it happen here far too often.

Oops - sorry, wrong band -- should have been 470, not 800 Mhz.

Try Icom's IC-F80DT for the same price:

crap radio or maybe even crap generator onboard producing rubbish AC waves.
else its hetrodyning with another local transmitter.
why dont you bung up an mp3 of it somewhere and we could listen to it.
might even be a birdie in you scanner IF.

Hello,

I have a Uniden BC245XLT 300 Channel 12 Band Trunk Tracker II radio.

I also have the Bearcat E-scanner computer program for storing and inserting the information into the radio.

My problem is knowing how to BEST setup the frequencies for the area Police, Fire, and Rescue departments. Is there anyone who can help me to figure this out?

Thanks ahead of time,

Ron

```

Hi everyone,

I have a Radio Shack Pro-97 scanner, a Radio Shack 800MHz antenna, and a Diamond RH77CA antenna. I have been getting more and more into scanning as I have learned how to more efficiently operate my scanner to find broadcasts and discovered what I can receive with it.

I am looking to extend my scanner's capability with either an antenna mountable on a car or the roof of my house, or both. Its difficult to know which antennas will work well and which ones are a good value for the price, so I thought I would post here to get some of your opinions.

As far as a car antenna goes, I do not want to drill any holes anywhere, and I am not sure I want a magnetic mount, since that might scratch the car. From what I have been reading, many people recommend magnetic mounts because of their superior reception quality, despite their potential to damage the car. I do like the idea of an antenna like the ProComm JBC290WC found at universal-radio.com: http://www.universal-radio.com/catalog/scanants/0466.html This antenna has a clip that mounts on the window by clipping on the top of the window and then closing the window. I don't see how a magnetic mount antenna could be superior to this since it has a solid connection. However, the antenna is not very big, and maybe a magnetic mount would be superior due to its size. I would appreciate it if anyone could share their opinions about car antennas in general, their experiences with the ProComm mentioned above, and any recommendations they have on specific models of car-mountable antennas.

As for a rooftop mountable antenna, I have been interested in possibly getting a discone mast-mountable antenna. I have not really found a model that I would definitely consider buying, so I would like to see some recommendations from other users as to which antennas work well and don't cost too much. I wouldn't mind spending under $100 for the antenna (not including any other parts necessary for mounting, additional cable, or connectors), but would have to seriously consider anything that costs more than that.

I greatly appreciate any one's comments, suggestions and
recommendations on these types of antennas. Thanks!

```

Kevin,

I use a Larsen NMO style magnet mount that allows me to use a variety of scanner and ham antennas on the same base. So far I have an Austin Spectra and a Larsen 150/450/800 and find good performance from both. A variety of manufacturers make products with this type of mount so it would be easy to find antennas dedicated to specific bands if your interest eventually went in that direction. A final benefit is that should I ever want to drill into the car I could get a permanent NMO mount and still use all of the same antennas. They easily screw on/off so that the same freedom of choice is preserved. Larsen sells rain caps and spare gaskets, etc., so that you could remove the antenna and leave the mount in place. Look at Ham Radio Outlet, www.hamradio.com.

What a magnet mount accomplishes technically is a coupling to the car for an RF ground that will probably perform better than the roll-up window mount. Not to knock the Procomm, but it's not tuned to the public service bands like both the Larsen, Austin and others. Depending on your listening desires and geography it may provide adequate performance, none the less, but you sound like a serious listener interested in high performance.

As for a home antenna, look at the Diamond discone with an "N" style connector ($99). I don't own one but reports I've read are good without exception. The Radio Shack discone ($72) is a similar design but I've read mixed reports of its durability. N connectors have lower loss at high frequencies. Consider RG-6 coax for the same reason. By all means avoid the thin RG58; it's losses at higher freqs are too great.

Good luck and let us know what you choose and how it works out.

> Hi everyone,
>
> I have a Radio Shack Pro-97 scanner, a Radio Shack 800MHz antenna, and a Diamond RH77CA antenna. I have been getting more and more into scanning as I have learned how to more efficiently operate my scanner to find broadcasts and discovered what I can receive with it.
>
> I am looking to extend my scanner's capability with either an antenna mountable on a car or the roof of my house, or both. Its difficult to know which antennas will work well and which ones are a good value for the price, so I thought I would post here to get some of your opinions.
>
> As far as a car antenna goes, I do not want to drill any holes anywhere, and I am not sure I want a magnetic mount, since that might scratch the car. From what I have been reading, many people recommend magnetic mounts because of their superior reception quality, despite their potential to damage the car. I do like the idea of an antenna like the ProComm JBC290WC found at universal-radio.com: http://www.universal-radio.com/catalog/scanants/0466.html This antenna has a clip that mounts on the window by clipping on the top of the window and then closing the window. I don't see how a magnetic mount antenna could be superior to this since it has a solid connection. However, the antenna is not very big, and maybe a magnetic mount would be superior due to its size. I would appreciate it if anyone could share their opinions about car antennas in general, their experiences with the ProComm mentioned above, and any recommendations they have on specific models of car-mountable antennas.
>
> As for a rooftop mountable antenna, I have been interested in possibly getting a discone mast-mountable antenna. I have not really found a model that I would definitely consider buying, so I would like to see some recommendations from other users as to which antennas work well and don't cost too much. I wouldn't mind spending under $100 for the antenna (not including any other parts necessary for mounting, additional cable, or connectors), but would have to seriously consider anything that costs more than that.
>
> I greatly appreciate any one's comments, suggestions and recommendations on these types of antennas. Thanks!
>

What I need is the following, if possible.

1. Easily programmable. No hard to understand ways to add take away counties.
2. s.a.m.e. radio, noaa approved
3. Hand held, portable [prefer rechargeable but not necessary]
4. Would like to stay in $50-$99 range if possible.
5. Would like to only buy from 'well-known' companies and directly from their website not some third-party like amazon.com.
6. Also would need one that is SUPER LOUD when an alarm is transmitted.

Can one of you help me find a radio like this?
Or at least one that is CLOSE?

Thank you very much,

I've been using one of these discones for many years and have been very satisfied with the results. Don't have snow & ice in my area, but this antenna is subjected to substantial winds almost every day and so far hasn't lost a single element. At $40 including shipping and handling, you'll be hard pressed to find a better deal on a broad band scanner antenna. Use a quality coax feedline such as RG-213 and keep it as short as possible for best results.

http://www.antennawarehouse.com/Scanner/Discone.htm

The main advantage of a mag mount mobil antenna is that it uses the car body as a ground plane. (ie. the other half of the antenna.)
The 30" Radio Shack classic with two loading coils works especially well for the vhf frequencies used by many highway patrol services.

Hi all, I have a radio shack pro 20-43 scanner. Does anyone remember how to wipe the frequencies out? I am blind and can't remember what keys you hold down to do this. I know you could hold a key down, then turn the scanner back on and it would take it back to factory defaults. Thanks for any help anyone can give on this. Have a nice weekend from Griffin, Georgia.

Not the best discone to try to put on a car.  I use this one that works very
well which which was designed for mobile use and makes a good desktop one
also
http://www.rfparts.com/diamond/d220.html
It runs about $100 though.

All righty, I will try holding 2 and 9 down at the same time and see if
that clears out the frequencies out, thanks.

See if it has a place in the back that says reset. Should be a small hole
that you would need to insert a pointed object like a straitened paper clip
in. If it's there try holding clear and push reset at the same time.

1. I've 'gotten' about 4 replies, 2 were for the same radio the other
2 were radios not being made right now.

2. I know of no rule on posting.

Carry on, do as you wish Sir..[tipping cap to you like a baseball

Fetter in jail again.
`````````````````````

According to an Email I just received, George Fetter is back in jail:
"Custody File was last updated 08/05/2007 @ 02.55.21
FETTER,GEORGE W W M 01/16/65 WS680882 BRANCH JAIL"

The link is:
  http://volusia.org/corrections/search_page.htm
You enter the person's name as LastName,FirstName with no space.

Most of you know Fetter as the owner of several radio-related sites, including http://www.MilAirComms.com. He had been arrested by the Feds for fraud related to electronics equipment sales.

I wonder if this is from the old fraud arrest or a new one.
Radio buyers beware.

He is still selling the Insider Slot Secrets system, he is court
ordered not to sell anything on the Internet.

You must order before Tuesday, August 7, 2007 to take advantage of
this incredible offer, before I raise the price of "Insider Slot
Secrets" and it goes back to its original price of $67 without the

bonuses. So ACT NOW and ORDER for the incredible price of only $17!
Here are the FREE bonuses that you will get in addition to my fabulous system.

Includes the Sky Scan Discone Antenna that is brand new. Have all the acces. that came with the scanner. Paid $90 USD for the antenna alone.
Will take $450 obo for all of it, plus shipping. I will not ship outside of U.S. 48. If you want to know the shipping costs, figure it to wherever you want it shipped from So Ca.
thanks..

It is Mon, 0204am EDT (0604z).
  US Coast Guard "Rescue 6033" is working w CG Sector Jacksonville on
157.15.  The nature of the mission is unknown to me at the moment, but
use of the callsign "Rescue" by the chopper connotes a SAR mission.
  Rescue 6033 is an HH-60J helo out of CG Air Station Clearwater.

The US Coast Guard "Sector Jacksonville" is now broadcasting a notice that it has received reports of a 121.5 MHz signal approximately 40 miles offshore. It appears that the signal source is the target of the SAR operation.

I was sad the first time around, I thought he was a friend. We had emailed
from time to time and he had sent me so information I asked about setting up
my scanner and stuff.
I had a hard time believing it then but I guess it was so.

Why/how did he get out after all that???

Burr

"FAST" F-16s coming and going
``````````````````````````````

This morning, "Fast 61," a flight of four NY-ANG F-16s that had been TDY at MacDill, RTBd to Syracuse. While up on Miami Ctr's 319.0 they passed their routing which included an air-air refueling on AR-600 and then a routing: "SBV-MRB-CFB-SYR destination." They said they had another flight of F-16s in trail.

I then heard them handed off to Jax Ctr's 346.25, then to Jax Ctr @ Savannah's 285.65.

Another flight of Syracuse F-16s, "Fast 71," later worked at Avon Park Range, used 138.175 for air-air, and RTBd to MacDill a short while ago. I believe this "Fast 71" flight was coming in from Syracuse, because I heard them arriving at Avon via Jax Ctr's 346.25 and not from MacDill.

Lou, maybe this info will help.

In looking through my Bearcat info, I found a schematic for a "250A". The
feature board is constructed a little differently than what they show in the
250 service manual and I have seen both boards used in 250s. The red wire
still goes to the collector of Q204 (NPN). The emitter of Q204 should have
8.4 Volts there. The base circuit of Q204 is a little different on the "A"
version. A 9.1 Volt 1 watt zener runs from the base of Q204 to ground.
(Cathode connects to the base of Q204). Now, the collector of Q206 (PNP)

connects to the base of Q204 through R239, a 150 ohm 1/2 watt resistor. That's the only connection on the collector of Q206.  Q206's base has R220, a 100 ohm 1/2 watt resistor that is connected to the cathode of D212, a 10 Volt 1 watt zener.

Hope this info helps you out.  Keep us posted on your progress.

Sorry, I forgot to mention in my first response that the emitter of Q206
connects to the collector of Q204 (the red wire - 16 volts).  Meanwhile, I
found another schematic for the 250 that shows the same circuit I described,
but also adds one resistor on Q206, between the emitter and base.  The
resistor is labeled R242 and is a 1K 5% (wattage is not indicated).

Do you have the correct voltages at the output of the switching power
supply? (plus and minus 25 volts).  If not, you probably need to diagnose
that problem first.  Depending on what has failed there may determine

whether or not the scanner is repairable. If it's just a capacitor failure (common) or a failure with IC-8 (it happens) then it is probably repairable, but if the problem goes on back to IC-9, IC-7, or IC-6, the prognosis is not so good.

Good luck!
Mac

Mike,

read all your replies to date.. since this is a "side" project to help a
friend - have gotten busy - didn't get back to it just yet. This is my first
week of free time.
Please take note - where Q204 is, in the book - it "shows" a Q206 and the
schematic shows parts going between Q204/206. In "this" model - there
appears to be NO Q206 OR even a place for one. I can elaborate more - but my
previous posts pretty much spell it out.

Thanks,

Lou

I already have a Radio Shack [Cat # 12-254] which sucks and does not
recharge.

What I need is one that has a nice bright display, easy to program
FIPS codes and I'd also like one that is rechargeable.

I've searched and found EVERY online store has Oregan Scientific
radios but every place is out-of-order.

Can someone help me find a SAME Weather radio on the web that meets my
needs and is not 'out-of-stock' ??

I sure would appreciate your help on this.

thanks,

Hi A friend of mine has a Uniden Bearcat UBC280XLT which has been
working well for 18 months. He now has the following problem. When you
switch the power on it will scan as well as allow you to enter a
manual frequency but after anything from 10 seconds to 30 seconds the
unit shuts down. The charger has been checked as has the battery, both
are working ok. It will do the same thing even if you try to run it
while charging. Is there a hidden key command or is it a bin job.
Regards
Tony

>

I was needing a Portable/hand held unit that I could carry around the house or carry when out of the house like in stores, work, etc.

WR103 looks nice but all places say out.of.stock.

Not YOU, but seems their are some scam radios on ebay right now. How can it be sold if Oregon Scientific told me in an EMAIL that  unite WR103 is not going to be for sale until AUGUST??

If anyone can help, read my original message, then thanks a lot.

is it holding memory channels etc when all power is removed [batteries too]?
have tried a factory reset?

mike

Hi Mike Yes it is holding mem channels wehen power is removed. There
is nothing in the manual about how to do a factory reset do you know
how this is done.
Regards
Tony

well.....
thatsa bit of a tough one. a good (or at least decent) spectrum analyzer can
run you $1,000 and up. the "el-cheapo" ones are less, but don't perform
well or have a lack of useful "features"

basically, its "you get what you pay for).

you might check the ebay and craigslist.com sites for possibilities.

Randy True wrote:

USS HST acft
````````````
   Another hugely busy day, with USS Harry Truman aircraft pounding
targets at the ranges.
   Among the freqs in use:
225.350
227.250
~~~

235.550
245.325
255.225
259.175
267.500
283.650
284.500
289.200
343.000
377.300

E-2Cs directing the fighters include BICEPs and CLOSEOUTs.
FACs "Falcon" and "GammaRay" are at the ranges.
BULLETs and HEARTLESSs are some of the fighters, among many many others.
BOLTs, tankers out of MacDill AFB, are handling the air-air refuelings.

Xref: g2news1.google.com rec.radio.scanner:12364

Hello, i am very interested in the SBS-1 virtual radar.

I have been using ACARS for a number of years now and this new SBS-1 seems to be fantastic. I have searched on the net about it, but was wondering if you could fill in some of the blanks for me.

I live in valley and listen to airband and seem to get quite a good range East and West, and fair range North and South of me. Probable 150 miles E-W and 80 miles N-S.

A) If i put the aerial for this SBS-1 in the loft, what kind of range could i expect (very roughly) ?,

B) It says it picks up S/ADS-B equipped aircraft, now i'm mainly only interested in civil aircraft on approach to my local airport (Newcastle), when i see the aircraft pass over my house (around 4000ft to 8000ft) i want to be able to use the SBS-1 to "see" them and find out the registration of them, also to predict if a plane is going to pass over my house by looking at the route it is taking. Also high-level overflights over my house on their way to NEW (Newcastle VOR Beacon). Would this SBS-1 be able to do that ?, would it pick up most civil airliners over my house at those heights (KLM, Ryanair, EasyJet, BA, Thomson, MyTravel etc etc) ?

Sorry for all the questions, but if i'm going to be paying nearly �400 i need to know it is going to live up to my expectations (as i'm sure it will).

Best Regards,
Andrew

I'm in need of a portable, prefer one that also has the cradle that recharges it, SAME weather radio.

I especially need one that is very easy to program the FIPS codes into the radio. I would need one that also allowed about 7-10 counties to monitor, also a VERY LOUD alarm sound.

It would also be nice to have one that would visually display the Warning/Watch and also allow you to disable certain warnings; like be able to disable warnings for floods but allow the storm/tornado warnings/watches.

I tried oregon scientific and they seem to have fantastic SAME radios but I e-mailed them and they said they wouldn't have products available until August!

I've also tried E-Bay but few have good ones and most are $25+ overpriced.

Can one of you help me find a good quality radio like this?

My budget would be just under $100

thanks a bunch...

I received a Sirius Stiletto 100 for a present and am not going to use it. It is a new in the box model SL100-PK1R and retails for $250.00. I would like to trade it for a Kenwood R-1000 in good shape or any digital readout SW radio of this nature. My ebay account name is monty55 if you need a reference. I prefer to trade instead of using ebay. Thanks

Hello,

I am looking for a copy of the installation instructions for the RSC-1 Remote Head for the BC-780XLT that shows the wiring of a speaker jack on the remote head. I hope that someone may have the instructions available as a jpeg or PDF.

Thanks,
Ian

That one is  a desktop model and not rechargeable.
I needed hand-held.

thanks though

I have found these scanners in my price range:
http://tinyurl.com/ywbv78

http://tinyurl.com/ypxd9a
http://tinyurl.com/2xktbs
http://tinyurl.com/2hssgv

Just found another one I might be able to stretch to!
http://tinyurl.com/35bono

Can anyone tell me which would be the best deal? I live about 5m from Dublin airport as well as being in between a few different areas of the local emergency services. I would like to listen to anything 'interesting' if you know what I mean?!

*** Welcome to rec.radio.info! ***

Welcome to rec.radio.info, a group that aims to provide a noise-free source of information and news for the entire rec.radio hierarchy.

Two introductory articles about rec.radio.info are posted to the group every month. You are now reading the first article, which explains what rec.radio.info is, and answers some Frequently Asked Questions.  The second article is titled Posting Guidelines, and you only need to read it if you want to submit an article to rec.radio.info.

You can skip to the next section of this article by searching for the next " -- " string. The sections available are:

- What is the purpose of rec.radio.info?
- Why are messages almost always cross posted to rec.radio.info?
- What is a 'follow-up', and what does 'moderated' mean?
- OK, so now I know what 'moderated' means. Tell me more.
- What type of material is considered inappropriate?
- I do not have access to news, how can I get the information posted to rec.radio.info?
- Will the material appearing in rec.radio.info be archived somewhere?
- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

-- What is the purpose of rec.radio.info?

The purpose or charter of rec.radio.info is to provide the Usenet community with a resource for information, news, and facts about any and all things radio.

All the other rec.radio groups are intended for discussions and general chit chat about radio. Rec.radio.info will contain informational, factual articles only. Follow-ups are redirected to an appropriate other group, and further discussion (if any) will not take place in rec.radio.info.

In order to ensure that rec.radio.info contains only appropriate articles, it was decided to create the group as a moderated newsgroup.

-- Why are messages almost always cross posted to rec.radio.info?

It provides a "tag" for each article to be assembled into a filtered presentation in rec.radio.info (even with cross-posting, only one message, with a unique Message-ID, is propagated across the net). This tag also facilitates a pre-existing method of dropping or canceling the articles locally within the discussion groups if you don't want to see them. This accommodates individuals who want to separate the bulletins from the discussions, discussions from the bulletins, as well as those who are adamant about not reading another newsgroup and wanted to see everything all in one basket.

With the total size of Usenet (in number of newsgroups and total traffic) doubling every year or so, this is no insignificant contribution to reducing information noise and chaos. Making the discussion groups a catch-all, and making extra newsgroups filters on that catch-all, is also the most realistic way to implement such a scheme (It's not intuitively obvious what the charter, contents, and general appropriate topics for each and every newsgroup are. Seeing FAQ's and charter/intro postings in the home newsgroup is beneficial for new readers).

By cross-posting one only is adding a few tens of bytes to each bulletin (to specify the extra group on the Newsgroups line), but are adding the capability for very powerful filtering features available on most news servers, listservers and readers. Your local news guru could probably explain these features in more detail.

In rn, for example, according to Leanne Phillips in her rn kill-file FAQ, add a line of the form:

```
/Newsgroups:.*[ ,]rec\.radio\.info/h:j
```

either in ~/News/KILL (if you don't want to see rec.radio.info articles anywhere) or ~/News/rec/radio/amateur/misc/KILL (if you don't want to see them just in rec.radio.amateur.misc). The latter method means your kill file will only be consulted during rec.radio.amateur.misc (and hence runs more efficiently), and will probably work for most people.

In nn, according to Bill Wohler in his nn FAQ, add a line of the form:

```
rec.radio.info:!s/:^
```

in ~/.nn/kill (if you don't want to see rec.radio.info articles anywhere), or put the following lines:

```
sequence
rec.radio.info
rec.radio.
```

at the end of ~/.nn/init in order to see all the rec.radio.info bulletins first, then read the remaining rec.radio.* without the bulletins.

More information about kill files may be obtained from Dave Fawthrop's Killfile FAQ at:

http://www.hyphenologist.co.uk/killfile/

-- What is a 'follow-up', and what does 'moderated' mean?

If you are new to Usenet and are not familiar with the terminology, you might want to read the general introductory articles found in the newsgroup news.announce.newusers. Doing so will make your life on the net much easier, and will probably save you from making silly beginner's mistakes.

If you think that at this moment you are reading an echo, a conference, or a bulletin board, I'd also strongly suggest a trip over to news.announce.newusers.

For the rest of this article, we will assume you have a basic knowledge of Usenet terminology and mechanics.

A moderated group means that any article that needs to be posted to the group has to be accepted by the moderator of the group. Since we need to ensure that followups to an article (discussion) do not show up in the rec.radio.info newsgroup, the `Followup-To:' header line contains a newsgroup that is appropriate for discussions about the specific article.

-- OK, so now I know what 'moderated' means. Tell me more.

Rec.radio.info is a moderated newsgroup, which means that all articles submitted to the group will have to be approved by the moderator first.

The current moderator of the group is the rec.radio.amateur.moderated Moderation Team.  Submissions to rec.radio.info can be posted, or e-mailed to:

rec-radio-info@panix.com

Comments, criticisms, suggestions or questions about the group can be e-mailed to:

rec-radio-info-request@panix.com

But before you do so, please be sure to check out the "Posting Guidelines" article.

The influence of the moderator should be minimal and of an administrative nature, consisting chiefly of weeding out obviously inappropriate articles, while making sure correct headers etc. are used for the appropriate ones.

-- What type of material is considered inappropriate?

There are three broad categories of articles which will be rejected by the moderator:

1) Requests for information: rec.radio.info is strictly a one-way street. We receive information in our mailbox; we then post it to rec.radio.info. Requests for specific information belong in the normal discussion newsgroups. If your request gets answered, you might consider passing the answer on to rec.radio.info, though. Especially if you can edit it into a informational, rather than a discussion, format.

2) Obvious discussion articles, or articles that appear unsubstantiated.

3) Commercial stuff: a relatively unbiased test of a radio product would be accepted, but any hint of for-profit might be reason for rejection. For three reasons: This is not the purpose of the list, for-profit is a controversial topic, and this list may be passed onto Amateur Packet Radio (where for-profit is prohibited except under certain provisos).

   rec.radio.swap may be more deserving of the posting in any matter.

   Similarly, copyrighted material generally cannot be used. If it's TRULY worthwhile to the net, We would recommend obtaining permission from the copyright holder. Please note the source, and if permission was given. We reserve the right to make the final decision concerning appropriateness in all situations. In most cases, a brief summary of, or pointer to, the copyrighted information may be all we can allow.

-- I do not have access to news, how can I get the information posted to rec.radio.info?

Google has an excellent web interface to Usenet newsgroups. It is available at:

http://groups.google.com

It supports both reading and posting.

-- Will the material appearing in rec.radio.info be archived somewhere?

Yes. See Google Groups above.

Effectively this means that anything you post to rec.radio.info will be permanently stored, so your work will not be lost.

-- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as time critical.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires co-operation and goodwill to be beneficial to the community in the rec.radio hierarchy.

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

(Adapted, with permission, from the original article written by Mark Salyzyn, AG4YD, ex-VE6MGS.)

*** rec.radio.info - Posting Guidelines and Etiquette ***

Two introductory articles about rec.radio.info are posted to this group and to rec.answers/news.answers every month. You are now reading the second article, which explains how to submit something to rec.radio.info, and which answers some Frequently Asked Questions about the submission process. The first article is titled "Welcome to rec.radio.info", and it might be a good idea to check it out as well.

-- How do I submit something to rec.radio.info?

Two possibilities. You can use your newsreading software to just post the article to rec.radio.info, as you would do with any other newsgroup. The difference is that the software recognizes the special status of rec.radio.info as a moderated group, and will e-mail your article to us, the moderation team, instead of posting it to the group.

Alternatively, you can mail your article directly to us at the following address:

rec-radio-info@panix.com

Mailing us directly is probably (a wee bit) faster, but using the transparency offered by the newsreading software is probably more convenient.

If you have any questions, or wish to deal with some administrivia with the moderation team, we suggest mailing to the following address:

rec-radio-info-request@panix.com

-- How soon will I see my article appear?

It depends on how busy we are. Your article reaches us as mail, we have to read it first, give it the stamp of approval, and finally send it on to the group.  We will attempt to read and decide on all submissions within 72 hours at the very least, though we will probably be able to process submissions much faster in actual practice.

The site from which we moderate this newsgroup, "Public Access Internet and Unix, NYC" (Panix), is directly connected to the Internet, and articles posted at that site should appear at most major news sites, including Google Groups, the same day.  The principal delay, therefore, will be the wait in the moderator's submission queue.

If you post a periodic article, and have shown to be trustworthy, we may allow you to post directly if the article is of a timely nature. See the section below on direct posting.

-- Should my article be in a specific format?

No. If it is not totally illegible, we will accept it, and if it does not have a correct subject-line we will correct it with your permission -- that's what a moderator is for.

However.

You could do us a big favor by making sure your article conforms to these simple requirements:

1) The article must present information, not discussion or requests, We will reject the article or require you to change the wording if it is worth it.
2) A good, descriptive Subject line.
3) Always mention what source you got the information from.
4) Don't forget to include a Followup-To header, at least if you don't want further discussion to automatically be forwarded to you, the poster, which is the default if the article is only posted to rec.radio.info.

As we said: if your article is appropriate we will post it even if you don't follow these guidelines, but then don't blame us for not processing it immediately. 'Perfect' articles we can send on with a couple of keystrokes.  Stuff that needs minor editing is going to have to wait until we have time to do so.

Please do not waste both our and your time by posting requests, as this is an information only news group.

-- What about crossposting?

If you send something to rec.radio.info, just name any group you'd like to cross-post to in the Newsgroups field. Then, when we approve the article for rec.radio.info it will get automatically cross-posted to any other groups mentioned. This will also override the default Followup-To: poster, replacing it with the groups you cross posted to.

We would prefer if the group be cross-posted to the various discussion groups in the rec.radio.* hierarchy that are appropriate:

| | |
|---|---|
| rec.radio.amateur.misc | Amateur (ham) radio and related matters |
| rec.radio.amateur.packet | Amateur Packet Radio discussions |
| rec.radio.amateur.policy | Amateur Radio practices, rules, etc. |
| rec.radio.noncomm | Non commercial radio discussions |
| rec.radio.shortwave | International broadcasting on the 'HF' bands |
| rec.radio.cb | Citizens Band (27 MHz) discussion |
| rec.radio.scanner | Scanner discussions (unsupported group) |

or in one of the moderated groups:

| | |
|---|---|
| rec.radio.amateur.moderated | Amateur radio practices, rules, etc. |
| rec.radio.broadcasting | Discussion of *domestic* radio broadcasting |

We will leave it up to the poster to decide which group(s) are appropriate, but reserve the right to add groups if we feel it has broader interest. We will consult with the poster first.

Notes on crossposting:

- rec.radio.broadcasting is also a moderated group. The rec.radio.broadcasting moderator prefers to review all articles himself before posting. Placing rec.radio.broadcasting before rec.radio.info on the Newsgroups line should accomplish this. We will typically abide by the rec.radio.broadcasting moderator's decision whether the article is appropriate for rec.radio.info.

- rec.radio.amateur.moderated is also a moderated group. As the rec.radio.amateur.moderated Moderation Team manages both rec.radio.amateur.moderated and rec.radio.info, we can manage crossposting and approvals for both newsgroups. The rec.radio.amateur.moderated group does not allow crossposting to other discussion newsgroups, whether moderated or unmoderated. However, we would like to manage rec.radio.info as consistently as possible with how it was done by previous moderators, including the grandfathering of existing regular postings. Therefore, the submitter can choose rec.radio.amateur.moderated or the other unmoderated rec.radio.amateur.* discussion newsgroups for crossposting, but not both.

- Any FAQ or informational posting approved by the rec.answers/news.answers moderation team that is also crossposted to any rec.radio.* newsgroup (besides just rec.radio.info) is also automatically pre-approved for rec.radio.info. See below for more information.

If you post to another moderated group, it may be better to make special arrangements with both moderators before posting by contacting us at our administrivia addresses.

In addition, cross-posts do not take up extra space; modern newsreaders can be configured to show you cross-posted articles only once anyway; not everybody reads rec.radio.info; and rec.radio.info was never meant to reduce the volume of the regular discussion newsgroups. But keep in mind that some of the mail gateways may filter out the informational postings (at request of the subscribers) to keep the load down.

You decide.

-- I have a regular posting with timely information, can I make arrangements to help speed up delivery by posting directly from my site?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as timely.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires cooperation and good will to be beneficial to the community in the rec.radio.* hierarchy.

If you are currently maintaining (or plan to maintain) a radio-related periodic information posting, you may wish to consider crossposting it to rec.answers/news.answers. Postings that are approved by the rec.answers/news.answers moderators for this treatment are automatically pre-approved for crossposting to rec.radio.info (as the news.answers requirements are far more rigorous than the requirements this newsgroup ever plans to use). For more information about this option, consult the appropriate information articles and posting guidelines in rec.answers/news.answers.

Realize also, that even if your post is not approved for rec.answers/news.answers, it can still be approved for rec.radio.info. The intention is not so much to get every last bit of radio-related information on rec.answers/news.answers, but rather to provide an alternative avenue of approval (as well as grandfather existing maintainers of radio-related information and spare them additional bureaucratic hurdles). Again, crossposting to either rec.radio.info or rec.answers/news.answers, both, or neither, is at the discretion of the poster (subject to the approval of the moderators). You decide what is most appropriate for your article.

Please remember that as an information maintainer, you are not alone. There are many others on the net who maintain and post periodic information postings, using various intermediate-to-advanced features of Usenet (usually via automated tools). Various degrees of technical support and general hand-holding are available from many Usenet veterans. Send us some E-mail describing your needs to our administrative address below, and we'll try to help, or at least refer you to the right knowledgeable individual(s).

-- And Follow-ups?

If the only newsgroup you have specified is rec.radio.info, then the Followup-To: field will always be set to poster. If you do not want this, you must supply a Followup-To line of your own, and we will honor that one, as long as it is a subset of the original Newsgroups line.

If you specify newsgroups to cross-post to, then the Followup-To field will be set to include all the cross-posted groups, excepting rec.radio.info itself. Again, if you do not wish this behavior, supply your own Followup-To line.

We maintain other standards on the various RFC-1036 (news transport) header lines. For example, if the article is appropriate for passing into the Packet Radio Information Network, we encapsulate the Packet Bulletin Identifier (BID) in the Message-ID: news header line indicating the machine of origin as the ampr.org domain:

Message-ID: <$opa.55.1994@ampr.org>

where the Packet Radio BID, in this example, is `$OPA.55', and it was posted in the year 1994, because some of the Bid numbers are cycled yearly. Hopefully, this can be used as a key to re-introduce the articles for the Packet Radio network. Also, if the article is a repost of an already existing information article in the rec.radio heirarchy, we ensure that the References: header line is linked to that previously posted article. This also helps to tag articles, and may be used for additional filtering if needed.

Since the articles are archived, please use the Summary and Keywords header lines to help one search for your article.

-- Why have I received no reply from you?

We never reject anything in silence, and we make a point of it to answer all our mail. However, E-mail, like a brain cell, can and does get lost, every now and again.

So, if you send us something, and you don't see it appear it rec.radio.info, and you still have not heard from us in reply after say, five days, you can be pretty sure that either your mail never reached us, or that our answer has never reached you. In that case, please try again (We will filter out duplicates).

Please direct any comments, questions, or criticisms about this article
to rec-radio-info-request@panix.com.

I am selling a Kenwood TK 805-D 25 channel UHF mobile transceiver. This radio is a 25 watt, compact UHF radio that does the 440 amateur band just fine. It is in excellent condition and works perfectly.

This radio is field programmable from the front panel, no rib boxes, cables or software required to program the radio. This is the later version of this radio allowing for additional features, and off - hook scanning.

$140.00 plus $15.00 shipping and insurance fees.

PAYPAL, Postal money order of personal checks accepted.
(Personal check will delay shipment until it clears).

I will ship either UPS ground or Priority Mail, INSURED.

eBay feedback under OFFDAN.

E-mail with questions or if interested...

XDFilt is a Windows application program for filtering and removing noise from audio signals. The audio source can be saved .wav files, external live input as from a radio receiver, or external prerecorded material as from audio tapes, phonograph records, etc.

XDFilt's features include:

- Adaptive removal of uncorrelated (random) noise.
- Adaptive removal of correlated (whistle/heterodyne) noise.
- "XD" adaptive removal of random noise.
- Point-and-click graphical user-defined filter.
- "Waterfall" spectrographic display.
- 'Live' input from radio receiver, cassette player, turntable, etc. to standard PC sound interface.
- 'Canned' input from saved .wav files.
- 16 bit sampling. 8 k-sample/s sampling rate.
- Signal strength meter.

The distribution package includes examples of noisy signals in .wav files.

And it's free.

Thanks, I am copying occasional traffic on that freq.  What is
the stated use of that freq? Is it solely MARS?

Regards,

Michael

Coast Guard Helo "CG 6008," an MH-60J out of CGAS Clearwater, is operating offshore Patrick AFB in a SAR.  The object of the SAR is a missing diver. The search area is about 5 miles offshore.

Patrick AFB HH-60G "Jolly" is also participating in the search.  The Patrick AFB HH-60s participating in the Search and Rescue (SAR) are:
Air Force Rescue 1 and
Air Force Rescue 2.

The helos are maintaining comms on 157.15 and on the Patrick tower freq 133.75.

Is there anyway to adjust the sensitivy of the squelch? The "Auto" function
will not receive any channels. I have the "Squelch" knob adjusted to just
above the lowest threshold and receive local stations OK. I was wondering if
there is a way to adjust this with one of the pots inside the radio. Any
help is appreciated.

A "Registered Monitor" how can anyone be that stupid to pay $15 for a bogus
"callsign".
Why don't you ask the dolts that issued that stupid "callsign" to assist
```

you???

If you are in the Metropolitan DC area, I have one that you can have.
Last time I played with it, it gave me the low batt beep even with a
new backup batt, so I just put it on top of my headboard where it's
been collecting dust for the last 4 or 5 years.  Has the cell & 400
channel mod.

I'm completely new to scanners, want to scan emergency traffic
(police, firefighter etc). As far as I understand this scanner can
scan
all those frequencies--as a matter of fact all the sub-shortwave freqs
besides the cellphone. Am I correct? I'm in a very large metropolitan
area(NYC) and wondering if I'm ok in a setting like this. Also heard
that
some police departments use some kind of scrambling or some such
thing. Can I still listen in to the good stuff with this device.

Here is a link at amazon.com
http://www.amazon.com/UNIDEN-BC-246T-Compact-Hand-Scanner/dp/B0002QIAP4/
ref=pd_bbs_sr_1/002-9449417-8266413?ie=UTF8&s=electronics&qid=1181271202&sr=1-1

Also, several years back I've bought my first shortwave from some
place on the internet (NOT universal-radio)
and they were really nice to me and so I would like to give them my
business again but for the life of me can't
remember who they were other than they were one of the major
resellers. Website had alot of red colors
and there weren't any pictures just links to the product descriptions.
Any ideas who that was.

thanks a bunch for all the help.

>>> ##: witness were repeating things that had been said by and about
>>> ##: me at around that time.

When, where and by whom ?  Let's have some details
that can be checked.

I'm not going to repeat them. They're hurtful to me because they contained abuse that was
directed against me by someone else at the time and which got picked up and thrown again
in the trial. It is a matter of record but I won't repeat it here.

>>> PM: >Who's character is being assassinated? It isn't clear from the post.
>>> PM: >Are we talking about Grenville Janner? I thought he was a spook
>>> PM: >himself? He's certainly able to hold his own on the issue you cite.

>>> ##: at the Beck trial - they simultaneously put words into the mouth
>>> ##: of their invented "witness" to smear Janner, and repeated exactly,
>>> ##: word-for-word, stuff which had been said by and about me.

Why would "they" wish to assassinate your character?

Well, let's put it this way - just because this is the first time it's happened in this way,
from these people, on this scale, doesn't mean that it hasn't happened before, on a lesser
scale. At university there were people who quite overtly hated me and would have wished
something nasty to happen to me. Because of where I went making the wrong sort of

enemies
is pretty deadly.

"They" would wish to assassinate my character because it had all been done before, and
because they knew I would not be able to react in any other way than I'd reacted previously.

>>> ##: They invaded my home with their bugs, they repeated what I
>>> ##: was saying in the privacy of my home, and they laughed that it
>>> ##: was "so funny", that I was impotent and could not even communicate
>>> ##: what was going on. Who did this? Our friends on BBC television,
>>> ##: our friends in ITN, last but not least our friends in Capital
>>> ##: Radio in London and on Radio 1.

Please give details of when, where and by whom these
comments were made, so that they can be checked.

This was four, five years ago... sorry, I don't remember. I can remember individual incidents,
words which were repeated by different people at different times in different locations.

Around the end of 1992 Private Eye rtan a front-cover with John and Norma Major, with
the title "Major's support lowest ever" and John saying to Norma "Come back norma" on the
front cover. What can you read in to that? Not a lot, seems like standard fare for PE.
The first time I saw it I was in the pub with some people from work. One was expressing doubts
to the other (let's call the first one Simon, shall we? and the second one Phil?) about
whether what was going on was right. Phil's answer was that if Private Eye was doing it
then it must be ok, "they're usually right".

A few days later, again near work, there were some students laughing in the street,
"Were you COMING BACK later? But I thought you said you were COMING BACK ha ha ha?"
Play on words, you see. Not very nice, either. I had start medication soon afterwards.
Clever people, these chaps who think up PE titles. Just slightly lacking in any sense of morality.

>>> ##: How did they do this? I'll give you an example. About a year ago,
>>> ##: I was listening to Chris Tarrant (Capital Radio DJ among other
>>> ##: pursuits) on his radio morning show, when he said, talking about
>>> ##: someone he didn't identify, "you know this bloke? he says we're
>>> ##: trying to kill him. We should be done for attempted manslaughter"
>>> ##: which mirrored something I had said a day or two before.
>>> ##: Now that got broadcast to the whole of London - if any recordings

>>> ##: are kept of the shows then it'll be there.

What was the date of the broadcast ?
Out of 2 million plus listeners, why should you be
the only one that Tarrant was allegedly referring to ?

Sometyime in spring 1994. I can't remember the date, I heard the broadcast in the car - I was going into the office from London that day and just happened to snap on the radio, and hey presto! Mr Tarrant gives us the benefit of his excellent understanding.

>>> ##: That's exactly what we did. We went to a competent, professional
>>> ##: detective agency in London, paid them over 400 quid to debug our house.
>>> ##: They found nothing.

What was the name of the detective agency and their
address ?

I don't see why I should tell you that, but they're in Yellow Pages; they're a well-established outfit.

>>> PM: >What? Spend a quarter mil. a year to amuse themselves? And why not
>>> PM: >change every now and again? Why keep watching you? (Unless you _are_
>>> PM: >doing something, and I don't think you are, though you may have some
>>> PM: >deep, dark secret in your past.)
>>>
>>> ##: See the above.

Is there a deep dark secret in your past ?

Apart from "it's all happened before in a different way", no.

>>> ##: In a couple of cases people have even known my name - when I was in
>>> ##: London over Easter somebody (no idea who they were, just some bloke with

>>> ##: his girlfriend) called me by name  - quite clearly, and my name is
>>> ##: distinctive.

Is your name truly Mike Corley, or are you using it as
an alias ?

It's an alias. I'm not English by ethnic origin. If someone manages to pronounce my name as well as that guy did then they must have been really trying.

>>> ##: There's a little story behind this. First of all, in 1992 I worked
>>> ##: for a company where the people made clear they knew what was going on,
>>> ##: first of all directly (the very first evening I was there I went out to
>>> ##: the pub with them and the Technical Director said to another guy,
>>> ##: "is this the bloke who's been on TV?" "yeah, I think so")

Have you appeared, or been reported by name on TV ?
When, where and by whom ?

No. Never. Not directly.

>>> ##: Also, in summer 1992 I went on a trip abroad to Europe by coach,

What was the name of the coach company and your date
of departure ?

It was a national express coach. At dover we boarded a ferry for Holland
somewhere.
The company that organized the trip went out of business some time ago, so they
won't
have records of passengers - so we can't get any corroboration from anyone else
that way. We tried all that last summer, ran into a brick wall.

The other thing is in summer 1992 I was visibly ill, so other people in the
party might remember that more than anyone getting at me on the coach trip.

>>> ##: >>Yes, this gets me. I think the answer is that I was set up by
>>> ##: >>someone. I was very aware when this started back in 1990 that I
>>> ##: >>was being painted as a "threat" to which people had to "react"

Why were you being painted as a "threat"; is this related
to a "deep,dark, secret" ?

Aaaarrrrgh. I think I should make clear that that's their created justification
rather than the real reason. They started harassing first and then came up with
the
reasons for it.

>>>
>>> ##: I think I know who set me up.

Who ?

Someone who knew me some time ago. Someone who would have been able to talk this
little campaign into existence.

>>> ##: The bloke can't even control his own mind without medicine.

Is this true ?  What is the medication and dosage ?

Yes, I'm afraid so. Sulpiride, 200mg a day. It's designed to stop people
coming up with the sort of ideas you've heard here for the last few weeks.
Give him a higher dose!!

In the long term it causes tardive dyskinesia, tardive dementia and general
nasty stuff to your brain. So it's three years of sulpiride talking to you here.

In a real catastrophe or disaster, it is unknown how a society's
infrastructure will be damaged.  Who knows -- maybe transportation, maybe
communications, maybe government, maybe something else, will collapse.
That's part of why you have redundant backup systems (like HAM radio) in the
event of an emergency.  True, HAM radio is not the most efficient available
today, but like in a situation like hurricane Katrina, when government,
communications, transportation, etc., have collapsed, it is a handy backup
system.

This is ridiculous.  Once again, police have a double standard.  A nice
cover, too, in case they break the law.  Sure, use the "in the name of
terrorism"-excuse, and they can do anything.
Arrgh!

I am looking at buying a Uniden 396. Has anyone heard of a replacement
coming out soon?

Thnks.

>Arrgh!
>

well you're right on the level of experience that you probably interact with the public and the police ...... but look at it from their perspective. day in and day out , the police only have the opportunity to interact with the bottom feeders, scum suckers , and dregs of humanity. they hardly ever associate with or interact with the average John Q Public .... to the police , nearly all people ( that aren't wearing blue ) that they see are human waste. people are shooting them in the face for a traffic ticket stop , they are ducking bullets or fists around every corner and up every block. sad as it is, that's what this world has come to. neighborhoods are riddled with registered sex offenders ( never mind the ones that haven't been caught yet ) , cars are stolen by the 1000s from all neighborhoods , car chases are rampant , bank robberies happen all the time , murders are a daily thing ( more than one a day in this part of the country ) and THATS only a small part of the story !

If I was a cop, I wouldn't want the possibility of the " perps " having any " inside " information or radio tip offs any more than possible. if that hacked off some general citizens or made them start talking " police conspiracy " then I'd be tempted to say " bring that hacked off citizen down here on the beat with the boys in blue and duck a few bullets , chase a few bank robbers or sex offenders and see what they thought about it all afterwards.

do you want the sex offenders to be able to monitor MDT and police communications ? ...... what about the drug dealers and pimps , or maybe the gang bangers while they invade your home or rape your wife ?? if YOU do it, you gotta let everyone do it as well ....... forget about the terrorists , homeland security is a WHOLE lot more in jeopardy from home grown crime right here , all around us. think it's so important for YOU to listen in that " all the perps " should be able to as well ??

I wanna listen in , but I know it's for the best if NO ONE does. it's like a lot of things in this world that the actions of a few have screwed up things for the rest of us ..... trouble is there is WAY more than a few bangers, rapists, murders, car thieves, and robbers lurking out there these days .... WAY more than a few.

do cops screw up ?? .... sure they do ..... everyone does from time to time ..... but think what your world would be like without them ....... think long and hard . they aren't perfect , but they work 24 hours a day to make our lives a little bit better and most do a pretty go job in the process.

You make some valid points there.  I'll give you the benefit of the doubt
that you live in a city where police are actually fighting crime.
Unfortunately, in my city, the police are rather corrupt, partially not
their own fault, but because of my town's city council.  I can't walk to
work without bumping into a drug dealer downtown begging me for
money/cigarettes/etc., but if I take a stroll in the ritzi white upper class
district, it is crawling with cops (the excuse is that they are doing "radar
training").  If you don't want people to talk "police conspiracy", show your
hand to the public, and don't hide.

ha ah a ..... it's kinda opposite what you see around here.   I admit
that I do live in the north side ( upscale ) part of my town , but
this town is nationally famous for having the 2nd highest national
poverty rate  ( 2nd to Cleveland , Ohio and this is California ) , it
has the highest  car theft rate in the west , and the highest amount
of people out of work and not looking for employment ( about  237,000
people  unemployed and not looking for work ) .  more than 57% of the

town is latino and 17% asian , the rest mixed including whites. it has an estimated 170,000 illegal immigrants living here as well.

the cops are thick as flies down in the  less fortunate parts of town but nearly invisible up here in the north side.  I will say that I'm impressed with them tho .... as I called them about someone in a neighbor's yard a few weeks ago  ( my neighbor that had lost his keys and was trying to break into his own house ) ... and in less than  3 minutes there were 3 patrol cars and a helicopter here on scene. people in the less fortunate parts of town complain they can't get a cop to come for 1 to 2 hours and that ' we " get special treatment ..... perhaps I'm inclined to agree with those complaints as I certainly got fast service when I called.  this town has over 16,000 registered gang bangers and thousands more " associates " .... and the local cops have waged " war  " on gangs with full out efforts to get rid of them.

cops get shot and killed around here quite frequently ( usually by bank robbers and gang bangers )  and they have a very messy job in these parts of the country.  I wouldn't  trade places with one of them , no matter what the pay they receive. they earn every penny of it ....... the hard way.

I live in the upscale part of town, too, but even then, I can't get a cop
even when I need one, unless they are raising funds.  I had a pair of cops
come TO MY DOOR with the "fraternal order of police"-crap.  I once waited
FOUR HOURS for a stray dog call, and finally brought the dog to the local
park ranger on foot (I can't drive).  My friend had his van broken into, and
the answer from the police was "we're too busy".
Where do you live?  I live in Asheville, NC.

2 events that are hardly 911 calls. Stray dog, you should have called animal
control. If the robbers weren't there tearing the van open when you called.
it's just a cold case.

Who said we called 911?

Hi,

Bought a bcd396t last weekend and was really excited about scanning. Never owned one or new anything about it. I turned it on and cleared all memory first, since my area didn't seem to be pre-programmed. I live in Bay Point CA, 94565. Sat outside my house to see what was going on on a Saturday night. I  did an automatic search for police activity and had one or two frequencies that gave me some messages every once in a while. Was hard to understand too by the way

Is this all there is to it, or should it be more exciting? I expected more action on a Saturday night, especially in my area, but all I got was a message every once in a while. Or should I not use the automatic search, because it doesn't work properly?

Is the automatic search able to find all different frequencies, like trunking, conventional, etc...?

I guess I'm confused because it didn't give me the action I was hoping for.

I returned the unit on sunday...very disappointed, but maybe someone could tell me I'm wrong and I need to do certain things to get this unit to work.

thanks

I lived  in Spring Lake  for about a year  (  82nd airborne ) but that
was a long time ago.   it always seems like places back east are
" enormously " different than  living out here. seemingly   nicer and
much quieter   in many ways.  NC has also grown a lot since I lived
there as well.

I live in a smallish ( agricultural )  town for this state , only a
little over a million people  here   ( legal ones ,  maybe another
300K total illegals  in the county ) . many people live here
for the ( hahahah ) lower relative living costs and commute to the
mega metros for work  ( 10's of millions  ) .  I  think the S.F. metro
is about the same size as the entire population of NC and the L.A.
metro probably about  2  1/2 times the S.F. metro.  of course add
another  28 to 36 % on top of those values for the illegals.
   we have WAY too many people and WAY too much over crowding
here and as a result we have the typical policing issues that go with
all those people.

here in my town we have  " traffic " task forces that set up road
checks in different parts of town every weekend and during the week as
well.  during  an average traffic check point , they get around 10 -
12 drunk drivers and  tow about 150 cars.  one out of every 4 and
sometimes one out of every 3 cars they check  have insurance, D.L.
or registration issues and they ticket the driver and impound their
car  until they fix the problem.  this and they only stop every 4th or
5th car because of the traffic backing up .  h aha hah aha
I've noticed that they do seem to  " wave through "  older drivers in
expensive cars most of the time and don't mess with those types of
vehicles, but if you've got an older , beat , car ...... look out jack
!!    the city does have " swarms " of motorcycle ( 10, 15, 20 at a

time ) cops that will blanket parts of town and hammer drivers.
our part of town seems like a favorite place for them to " hang " too ! ya yahahah a we need it tho, drivers out here have become increasingly " psycho " and people blatantly and intentionally pull out in front of you, run red lights , and run stop signs ( to mention a few ) to such a degree that I can't explain how bad it's gotten.
if I told you, you wouldn't believe me , but it's totally shocking how driving quality has degenerated here. it's far worse , too, here than in the larger metros for some reason. just too many of the " ME , get the hell out of my way " people in these parts.

think about this too .........

where you live there are lush wild forests and beautiful fauna.
a nice , natural, outdoors type place at the edge of the local forested mountains.

where I live is a little bit different. it's filled with lush green as well. palm trees, citrus, pit fruit, grapes, and towns filled with every imaginable fragrant flower and plant , this ....all year around .... also at the edge of lush mountain giant redwood forests ....

nearly a paradise of color and fragrance. the most beautiful place man can " imagine " to live in ..... this is the place. kewl huh ???..... WELL maybe not ........

if " man " didn't live here and irrigate the place , it's natural state is a wide deep ( 14,600' mountains on the east side, 1,800' mountains and ocean on the west side ) TOTALLY
barren desert with almost no plants of any kind. maybe a few tumbleweeds and scraggly oak trees in the few wet spots.

" the most beautiful place man can " imagine " to live in " is the key part of this. this entire place is TOTALLY synthetic. NONE of these exotic plants would be here if man didn't bring them here and plant them. NONE of these plants ( for the most part ) would grow together in the wild , anywhere on the planet. man imagines this place and creates it from their desire to be surrounded by fragrance and lush tropical plants. every where you look , everything you see is a totally manmade , " created " , imaginary environment. perfect lush green little golf course type yards, places filled with massive palm trees, fragrant coastal juniper, magnolia, dozens of kinds of eucalyptus, loquat and giant fern trees cover the landscape. a complete " synthetic " paradise !!! when I sit out back on my veranda in my jacuzzi ( hah aha ) every day and look out at the neighborhood , I see quite a different environment than people back east see. it's beautiful for sure, the flower and tree fragrances are fantastic ... BUT ....
it's " all that " ... except when you think about it , there is a slightly ODD tilt to it all ....... it's a little bit twisted if you allow your mind go there , isn't it ! yayayay ahah ah ah a

California  IS different for sure  ...... but is that necessarily a
good thing  ???  hummmmmmm ...

You called someone on both cases. Your words. plus the reference 911 =
urgent. Of which neither one was a 911 call.
The van, only thing you'd do is fill out a stolen property report [at the
station].
Both cases you expected more than what the police are paid to do. And if as
you say they're stretched to breaking with a high crime area, the answers
make perfect sense.

Your misintepretation.  Their website even gives a number to call in the
event of stray animals.  Get over it, you misread the post.

You had a very powerful scanner in your hands.  I blame the person you bought it from for not showing you how to use it or at least program local agencies in it.

Scanning is a great hobby but it's not a turn it on and listen kind of thing.  You have to do some research of your area.  A great place to start is www.radioreference.com  .  They have the most extensive database for police/fire/rescue .  I looked up Bay Point, CA and see it's in Contra Costa County.  Here's a listing for that county:
http://www.radioreference.com/modules.php?name=RR&ctid=189 .

As you were scanning you were probably picking up bits and pieces of a "trunked" system.  You can listen to it but it's hard to follow if you don't have your scanner set properly to listen to a trunked system.    Here are the basics of a "trunked" system.
http://wiki.radioreference.com/index.php/Trunking

Hope you reconsider.
Dave

I bought it at Fry's, but nobody there who knew anything about it.
When  bought it, I had already looked at the website you mentioned,
and entered the frequencies for police for my city. Every once in a
while I could here someone talking for 1 or two seconds, but it seems
that I should have heard much more than just a dispatcher going back
and force only a few times an hour. Also, I found only 2 channels when
I did the automatic search . I would expect to find much more. This
was around 11 PM. I would still expect airplaines, Fire department,
etc...I'm in the middle between two cities here(less than 2 miles), so
there should be lots of stuff going on.

How would one be able to program a trunking system then if the search
is only for Convetional? also, I'm not sure if my PD uses digital or
not. Is the search able to auto-detect digital as well?

The user's manual that came with it is probably the worst manual I've
ever read. Only today I found out about squelch. The manual said to

set the squelch, but it didn't explain what squelch was and what to
set it to. So, I put it in the middle when I tried the scanner and
left it there.

I would love to give it another try, but I am very sceptical now
unless I can see somebody show it to me in my area...

I understand that the police uses codes. It's just weird I pick up
only one or two dispatcher calls with a single reply in about half an
hour or so.

Maybe I should ask someone to show me exactly how to program it. Does
the software that you can buy for it program it for you (i.e. arc396)?

Best thing I can tell you is to check the forum for California
http://www.radioreference.com/forums/forumdisplay.php?f=37 and place a
request for help.
I'm positive you will find someone close to your area who would be willing
to give you a hand..

Dave

thank you guys for all the info.

I think the california forum will be usefull. I went back to Fry's tonight, and I also went to RadioShack. Nobody there was of any help and couldn't tell me anything I didn't know yet. What I would really like to know is:
1) What can one expect to find when one does an automatic search (How do I know the thing works)
2) How do you listen to a trunking channel (i.e., do you just program 1 frequency. I thought multiple sources share the same frequency)
3) How can you tell if a Police Department uses digital technology (is this mentioned on the frequencies website on radioreference.com)
4) How do I know my antenna is good enough. Is the stock antenna for the 396T good enough. I live in the hills, so I though I have best reception. It seems there's a tower almost in my backyard).

5) I read somewhere that you need a special antenna (800 Mz). Not sure what it is for. There's also 400Mhz antenna;s. Do they all fit?

As you can see. I'm really a novice. I think I expect too much to be done for me. It's just I don't feel like spending the $600 for something I might not be able to use.

Thanks,

Michel

If you did a search and only picked up a few random transmissions, there was something wrong with the radio, or, you had the squelch turned up way too high. I wouldn't be surprised if you would have opened it up, to see the antenna lead wasn't soldered, or some other problem. Uniden's QC is not the greatest, but seems to have improved lately. The 396 is a very complex radio, and I personally like the Radio Shack Pro-96 better, for it's audio quality alone. It's also simpler to use, and cheaper too. It's supposed to be on closeout soon, to be replaced by a new model, with more features. When it does close out, it should be 399.95 or less.

>
> How would one be able to program a trunking system then if the search

www.radioreference.com tells you everything you need to know about that.

The conventional trunked freqs can be listened to, but it's very annoying to do so when there is heavy traffic. On digital stuff, all you'll hear is a grinding noise, but you should hear something.

>

> left it there.

You want it as low as possible, just so it doesn't open (You hear something) when it's not supposed to. If you had it set way too high, it would explain almost all your problems. I've never seen the 396 manual, but I've never seen ANY scanner manual that doesn't explain how the squelch works. On some radios, if the squelch is set "halfway" you won't hear much, if anything. I've been using scanners for almost 40 years, and still occasionally accidentally set the squelch up really high. I

still hear a lot, since I am right across the river from a local Police
transmitter, and it will make it through about any squelch setting.

>

From your location, you should be able to hear Martinez, Concord,
Antioch, Oakley, and more, without any problem. Since it's not all that
far away for you, go here, they can explain anything you need to know,
and sell you a radio too.

http://www.scannersunlimited.com/

And I would bet they either know about, or are members of a scanner
group for your area.

> do I know the thing works)

You should hear a lot of traffic. Some freqs should be very busy, like local police, and the airband 118-138mhz AM mode should have a lot of San Francisco traffic on it. You won't, or probably won't hear the towers very well, if at all, but the planes can be heard from a long ways away, because of the height they are at.

> 2) How do you listen to a trunking channel (i.e., do you just program
> 1 frequency. I thought multiple sources share the same frequency)

You have to put the radio into trunking mode to do it right, but you can listen to a NON digital one just by putting the freqs in and scanning them. When it gets busy, it's annoying to listen to that way, and following a conversation, or chase (like I did last night) is nearly impossible.

> 3) How can you tell if a Police Department uses digital technology (is
> this mentioned on the frequencies website on radioreference.com)

Yes, it is on radioreference.

> 4) How do I know my antenna is good enough. Is the stock antenna for

> reception. It seems there's a tower almost in my backyard).

You should be ok with the stock one. Too much antenna on a handheld is sometimes a problem (It overloads the radio). You can always get one later on.

> 5) I read somewhere that you need a special antenna (800 Mz). Not sure
> what it is for. There's also 400Mhz antenna;s. Do they all fit?

You probably don't need it, and don't worry about it for now.

>

> something I might not be able to use.

$600 is too much. About $520 is the going price:

http://www.scannerworld.com/

http://www.usascan.com/files/bcd396T.cfm

I would make the drive to scanners unlimited, in San Carlos, and get info and a radio from them. They can probably program it for you, or tell you who to talk to in your area to get the right freqs. The local scanner group (There has to be one) members will know about everything there is to know about your local area.

I'm a customer, not connected in any way:

Hi,

I have a Uniden 996 scanner and would really like to pick up some marine traffic from Boston Harbor.
Live about 20 miles due west of the harbor.

Have a Scantenna antenna which I think is "pretty good".  It's up in my attic.

It's omni directional, and broadband over the typical scanner ranges (supposedly).

I can often pick up coast guard conversations, but very rarely (but ooccassionally) ship traffic
Do you think a dedicated, very directional, and tuned to the marine freq's would help, or am I just too far away.

Any thoughts on, or antenna suggestions would be most appreciated.
No idea what to buy, if you feel it's worth a try ?

Very interested in the AIS data being transmitted by ships at around 162 MHz, as well as general marine stuff.

BTW:  really surprised that I hear the CG at all.  I would have thought that their antennas would be "focused" out to sea, with any propagation going the other way (towards me) minimized to maximize the effectiveness of their radiated power in the direction that it's needed.

Thoughts ?

Thanks,
Bob

Think antenna system, rather than just antenna..

how good is your mounting location, antenna, coax, is the coax real long ? using cheap coax or better stuff. Are you blocked by hills , buildings ? trees ? Do you need directional antenna and rotor ?

Xref: g2news1.google.com rec.radio.scanner:12269

The radio I bought had been used. It was $580. I looked up the prices on the links mentioned, what a difference. I thought it was nice to buy it in the store so I could get some help, but that was a mistake. It could be the radio wasn't working correctly, or my squelch was too high. I had to look up this term, since it wasn't explained in the manual. You can look i nthe online manual and see it wasn't explained. Only mentioned to set the squelch, but nowhere it explains what it was. I know now... thanks.

You're right, I should be able to hear Martinez, Concord, Antioch, Oakley.... I'm wondering. Should I be able to hear a lot of frequencies on the conventional system? And if squelch was too high, I would have heard nothing?

Also, maybe the frequency I was listening to was trunked. How would I know. I entered the following frequencies in my scanner but heard nothing:

| Frequency | Input | License | Type | Tone | CH | Description | Mode |
|---|---|---|---|---|---|---|---|
| 460.15000 | 465.15000 | KLP745 | BMRF | 127.3 PL | 1 | Dispatch | FM |
| 460.25000 | 465.25000 | KLP745 | BMRF | 127.3 PL | 2 | Secondary | FM |

```
460.55000  465.55000  WPKV955  BMRF  127.3 PL  3   Tactical     FM
154.71000  155.67000  KMC308   F     123.0 PL      CLERS Diablo FM
```

How can I tell from this data if it is digital, trunked, or conventional? I couldn't find a chart on radioreference that explains these codes.

Last night I was listening to a live scanner feed on the web from Sacramento, CA and I heard non-stop conversations going on. I know I was doing something wrong, just don't know what.

I will keep reading guides until I understand and then probably buy another scanner again and give it another try.

Thanks so much for the advice and guidance. You've all been a really great help and encouraged me to go on solving this.

Michel

I just was able to find out if my PD or FD uses conventional or not. It seems they use conventional. When I clicked on the license link that is shown in the frequency table it tells me what kind of system it is I believe. So, going back to the original question, why I couldn't hear anything still makes me wonder. I thought I had set the squelch somewhere in the middle, maybe around 4 or 6 or so. probably more on the lower end. I did an automatic search and throughout the whole scanning range it only stopped once or twice. Maybe the scanner was bad.

Maybe you should have ASKED how to use it BEFORE
returning it ...... seems pointless to ask things now.

next time, try reading the manual ( completely), look up
frequency information ( on line or in books ), experiment
a little ( if you program something wrong, you didn't really
do any damage ), and then ASK questions BEFORE you
return it.

These new scanners are not plug and play, they are getting
quite sofisticated, and you actually have to learn about all
the new technology ( being used in the scanner and about
the systems they are trying to receive )

As I mentioned, nobody knew anything about it at Fry's. I asked the whole department, but nobody who knew anything. If I knew the unit was good I would have put more time and effort in it. The manual doesn't provide any basic setup steps. Goes rimmediately into describing the systems: trunking, digital, etc...  I did experiment for almost half a day. No luck. I did read the manual from the beginning, but very vague. No explanations except for the simple things like volume control and how to charge it. All preprogrammed systems where pretty much useless to my area..

I understand now. I'll give it another try.

Thanks.

Well duh for you.

You are supposed to figure out how to operate a high tech unit before taking it back.
If you are the type that can't even program a VCR timer then yeah, I'd say you made the right move.

I had to look up this term, since it wasn't explained in the manual. You can look i nthe online manual and see it wasn't explained. Only mentioned to set the squelch, but nowhere it explains what it was. I know now... thanks.

You are right! They really don't explain squelch at all. But then again, since it's hardly a "beginner's" type radio, being probably the most complex handheld ever made, they probably figured you knew all about squelch. If you want to go with a digital capable scanner, I would recommend the PRO-96 from RS when it goes on sale for the last time. It's much easier to use than the 396T, and has better audio, IMO.

>
> You're right, I should be able to hear Martinez, Concord, Antioch, Oakley.... I'm wondering. Should I be able to hear a lot of frequencies on the conventional system? And if squelch was too high, I would have heard nothing?

Yeah, the airbands, Railroads, VHF low, VHF high, and UHF are nearly almost always conventional, or analog trunked, and you should hear all kinds of stuff. The air bands alone should be busy as hell with an airport the size of the SF one.

>
> Also, maybe the frequency I was listening to was trunked. How would I know. I entered the following frequencies in my scanner but heard nothing:
>
> | Frequency | Input | License | Type | Tone | CH | Description | Mode |
> |---|---|---|---|---|---|---|---|
> | 460.15000 | 465.15000 | KLP745 | BMRF | 127.3 PL | 1 | Dispatch | FM |
> | 460.25000 | 465.25000 | KLP745 | BMRF | 127.3 PL | 2 | Secondary | FM |
> | 460.55000 | 465.55000 | WPKV955 | BMRF | 127.3 PL | 3 | Tactical | FM |
> | 154.71000 | 155.67000 | KMC308 | F | 123.0 PL | | CLERS Diablo | FM |

You just want the ones under "frequency" to start with, the others are sometimes monitored, for various reasons, but the input side won't be heard very far away.

>
> How can I tell from this data if it is digital, trunked, or conventional? I couldn't find a chart on radioreference that explains these codes.

It's just plain old FM! The mode tells you what it is. You're making this harder than it needs to be.

>
> Last night I was listening to a live scanner feed on the web from Sacramento, CA and I heard non-stop conversations going on. I know I was doing something wrong, just don't know what.

I think the radio was a dud. That's probably why it was brought back.

You still might have had the squelch set way too high, sometimes it's not a linear progression, like level 2 is twice times one and 3 is 3 times one, it might be 2 is 2 times one, and 3 is 2 times 2, so halfways might make the radio nearly deaf.

> I will keep reading guides until I understand and then probably buy
> another scanner again and give it another try.

Really, it will make more sense to you if you have the radio in your hands when you try to figure this stuff out.

>
> Thanks so much for the advice and guidance. You've all been a really
> great help and encouraged me to go on solving this.

Good luck, BDK

As a matter of fact, I do know how to program. I program in more than
10 languages, I speak 4 languages, I have AS, BS, MS degrees in
computer science and AI, and I don't consider myself a novice when it
comes to technology. In addition, I also program everything that comes
```

with a good manual. How would I know the unit I bought operates as it should if the manual cannot describe a basic test to perform to see the unit is working properly. I expected to hear some basic frequencies when I did a search, but I could not hear anything. That's my problem. The documentation assumes one knows all the tweaks of the unit. I just didn't want to get in knee-deep before I know the basics are working. I think I do understand the basics, but somehow cannot make it work.

So here's what I did:
1) First I scanned the preprogrammed frequencies, but scanner didn't stop at any frequency.
2) Then I played with the squelch (didn't know what it was for, neither  wasn't explained anywhere, neither wasn't pointed out what level to sit it to), so I put is in the middle
3) then did scan again, didn't matter. No conversations anywhere.
4) Then I reset the scanner.
5) then I did a search for frequencies. Found 1 or 2 frequencys, one was probably a PD, which only tracked a dispatch every few minutes, no real conversations going on. The other one I found during a search was a boater or so.
6) I live in the middle of the action, but wasn't able to find anything
7) I drove around, tried close calls, etc...nothing ...
8) I did try the FM radio, that seemed to work
9) I assumed either the unit was not working properly or the whole scanning thing must be really boring since I only here a dispatcher once every 5 minutes talking for 2 seconds,
10) I also entered some of my area's frequencies found on radioreference.com, but they were dead as well.

So, obviously I am missing something

Maybe the squelch wasn't set correctly. Still don't know what it does exactly. I read most people set it to either 1 or 2. If there's 15 settings for it, why would most people set it to either 1 or 2? shouldn't be somehwere average around 7, so one can go both ways?

Thanks :)

Quick suggestion ......

IF you go back and buy another one, get on Uniden's site
and download any firmware updates ( and the program to
update the scanner ) and also grab the FREE ( good price )
software they have for the radio, setup is pretty easy and straight
forward .....   as long as you have a TRUE serial port on your
computer, USB to serial convertors some (most) times DO NOT WORK
right.

You'll spend a day or so just figuring out what to do within the software,
but it makes programming the radio MUCH easier, since you don't have
TONS of putton presses, and you can see what your doing in a "spread
sheet" type enviroment.

There are numerous sites that have frequency and trunking information,
( talk groups, Logical Channel Numbers, etc ) on them. The software
ALLOWS you to copy & paste from web pages, which makes it even easier.

Join Yahoo's "BCD396T" Group, and there is dozens of files in there, of
programmed systems you can download and use. ( If the system you WANT
is not there, down load a few anyway and load them in to see what the other
people have done ( give you an idea how to set up systems )

The BCD396T & BCD996T ( same radio different package - handheld/mobile)
are GREAT radios, I am always finding something new to do with mine, or
how to use a feature I didn't know what to do with the first time around.

Be patient, it does get frustrating because the radio does SO much its
overwhelming
at first. Litle by little however it all starts to make sense.

Guess that wasn't such a 'quick' suggestion    :o)

Spend the extra money and buy the BUTEL software for the 396.

You can then download systems directly from Radio Reference along with
conventional frequencies now as well, right into the 296.  No fuss, no muss.

It's a breeze, and well worth the $$$...

I turn the squelch down on mine to where I hear static.  Then turn it up slightly where you don't hear the static.  At this setting you should hear any sounds above the static level.  If you don't want to hear weak signals from far away turn the squelch up more and you will only pick up the stronger signals.

I have the Pro-96 handeld from Radio Shack and I am thoroughly happy with it.  The base station is the Pro-2096.  If you get one of these I recommend getting Don Starr's Win96 software to program these guys: http://www.starrsoft.com/ .  This, with a programming cable from RS helps programming the radio a breeze.

You should start seeing the Pro-96 going on sale because there is an updated radio coming out soon to replace it.  I suspect that radios will be selling for around $350-$400 to get rid of stock.

I did indeed look at the software beforehand and it looks nice. I just wanted to make sure I could do some basics things, just to enjoy the evening, without spending hours gettings the software connection to work on the computer. I would definitely not get frustrated from being too overwhelmed. :)  I just got frustrated because the basic simple thing didn't work.

And yes, I did pay $580 for a used one. I know now I got ripped off big time! I didn't think the firmware would solve my problem. It rarely ever does, normally only fixes some rarely used features or improves a little here or there. But it would have been worth a try.

So, right now I'm thinking about getting a new one instead of used and probably pay much less and maybe get a bundle with the software you guys mentioned.

Thanks so much, I'm really hopefull this time.

Michel

You can't expect the people at a big box electronics store to be knowledgeable about scanners. These are not like computers. They're a tiny part of the market. You aren't likely to find a knowledgeable geek at the store or living a few houses down the street.

The Radio Shack and Bearcat scanner manuals I've seen are dreadful. They're fairly complete, but the information is badly organized. It's fortunate that I have a background in electronics. I feel sorry for newbies who don't have that advantage.

It just happens that I have the BCD396T manual on my computer, since I've been thinking about buying one. Reading that manual is no walk in the park, even for somebody with experience in the hobby. The 396 is a marvelously advanced scanner, but when you combine its sophistication, and the poor manual, and a scanning novice, the result will probably be trouble. With a good deal of determination, I believe you could eventually learn it, though.

The web is a good resource, but take the info with a grain of salt. For example, I just went to the radioreference.com site and looked up my county. Maybe a third of the listed freqs are any good at all where I live.

Some of the info is outdated, but much of it's probably correct. Just because a freq is used *somewhere* in the county, doesn't mean it's audible *everywhere* in county.

When your search did pick some traffic, did you stop, monitor that frequency for awhile, and (if it was interesting) put that frequency in a channel? Once you have some channels loaded, switch from search mode to scan mode. Now the scanner checks only those channels. You get a lot more action because the scanner isn't wasting time checking all possible frequencies.

What part of the frequency spectrum did you search? If you simply search the full range of the scanner, it'll spend a lot of time tediously plowing through freqs where there's little to be found. Most of the good stuff is in the 148-174 and 450-512 MHz bands (or maybe 450-470, since I think 470-512 has TV in some areas).

> Dan
>

You got that right.

People buy shit all the time for insane prices. I've had friends buy Icom, Kenwood, and Yaesu, etc "OEM" batteries for 2 or 4 times what a replacement should and does cost without the name on it. Where I work they bought telephone headsets for twice what I found them for online.

Even now, they still buy stuff for insane prices without checking first. I told the big boss I could save a ton of money if he made me the online buying agent. I would make the actual purchases, and would get a salary, or a base plus 10% of what I saved off the prices from the place they buy everything now. If I had that base plus 10%, I would have made 100 grand last year, easy.

I don't know why they never took me up on it!

They still buy almost everything from some really high priced place online, or a local place that's just as bad, if they need it right away. Yet they cry about the electric bills no end. I really don't get it.

The best thing to do is just connect the antenna to the one you are
using at the time.
second best would be to use a switch not a spliter.
THe spliter will cut your signal to both scanners by more than 50% if
you use both or not.
Larry

better than losing nothing , that mca204a model has a IP3 intercept
point of  +31 db ....... this will improve the front end overload
performance of ANY  consumer  quality scanner  ( as opposed to $20,000
pro models )  by a whole bunch ...... a WHOLE bunch.   that and the
unit boosts the front end gain just a little  and has a nice
low noise figure to boot. ..... this can  make up for connector and
maybe " some " line loss.  this unit can add some " serious "
performance enhancements for nearly all current home scanners.

*** Welcome to rec.radio.info! ***

Welcome to rec.radio.info, a group that aims to provide a noise-free source of information and news for the entire rec.radio hierarchy.

Two introductory articles about rec.radio.info are posted to the group every month. You are now reading the first article, which explains what rec.radio.info is, and answers some Frequently Asked Questions.  The second article is titled Posting Guidelines, and you only need to read it if you want to submit an article to rec.radio.info.

You can skip to the next section of this article by searching for the next
next
" -- " string. The sections available are:

- What is the purpose of rec.radio.info?
- Why are messages almost always cross posted to rec.radio.info?
- What is a 'follow-up', and what does 'moderated' mean?
- OK, so now I know what 'moderated' means. Tell me more.
- What type of material is considered inappropriate?
- I do not have access to news, how can I get the information posted to rec.radio.info?
- Will the material appearing in rec.radio.info be archived somewhere?
- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

-- What is the purpose of rec.radio.info?

The purpose or charter of rec.radio.info is to provide the Usenet community with a resource for information, news, and facts about any and all things radio.

All the other rec.radio groups are intended for discussions and general chit chat about radio. Rec.radio.info will contain informational, factual articles only. Follow-ups are redirected to an appropriate other group, and further discussion (if any) will not take place in rec.radio.info.

In order to ensure that rec.radio.info contains only appropriate articles, it was decided to create the group as a moderated newsgroup.

-- Why are messages almost always cross posted to rec.radio.info?

It provides a "tag" for each article to be assembled into a filtered presentation in rec.radio.info (even with cross-posting, only one message, with a unique Message-ID, is propagated across the net). This tag also facilitates a pre-existing method of dropping or canceling the articles locally within the discussion groups if you don't want to see them. This accommodates individuals who want to separate the bulletins from the discussions, discussions from the bulletins, as well as those who are adamant about not reading another newsgroup and wanted to see everything all in one basket.

With the total size of Usenet (in number of newsgroups and total traffic) doubling every year or so, this is no insignificant contribution to reducing information noise and chaos. Making the discussion groups a catch-all, and making extra newsgroups filters on that catch-all, is also the most realistic way to implement such a scheme (It's not intuitively obvious what the charter, contents, and general appropriate topics for each and every newsgroup are. Seeing FAQ's and charter/intro postings in the home newsgroup is beneficial for new readers).

By cross-posting one only is adding a few tens of bytes to each bulletin (to specify the extra group on the Newsgroups line), but are adding the capability for very powerful filtering features available on most news servers, listservers and readers. Your local news guru could probably explain these features in more detail.

In rn, for example, according to Leanne Phillips in her rn kill-file FAQ, add a line of the form:

```
/Newsgroups:.*[ ,]rec\.radio\.info/h:j
```

either in ~/News/KILL (if you don't want to see rec.radio.info articles anywhere) or ~/News/rec/radio/amateur/misc/KILL (if you don't want to see them just in rec.radio.amateur.misc). The latter method means your kill file will only be consulted during rec.radio.amateur.misc (and hence runs more efficiently), and will probably work for most people.

In nn, according to Bill Wohler in his nn FAQ, add a line of the form:

```
rec.radio.info:!s/:^
```

in ~/.nn/kill (if you don't want to see rec.radio.info articles anywhere), or put the following lines:

```
sequence
rec.radio.info
rec.radio.
```

at the end of ~/.nn/init in order to see all the rec.radio.info bulletins first, then read the remaining rec.radio.* without the bulletins.

-- What is a 'follow-up', and what does 'moderated' mean?

If you are new to Usenet and are not familiar with the terminology, you might want to read the general introductory articles found in the newsgroup news.announce.newusers. Doing so will make your life on the net much easier, and will probably save you from making silly beginner's mistakes.

If you think that at this moment you are reading an echo, a conference, or a bulletin board, I'd also strongly suggest a trip over to news.announce.newusers.

For the rest of this article, we will assume you have a basic knowledge of Usenet terminology and mechanics.

A moderated group means that any article that needs to be posted to the group has to be accepted by the moderator of the group. Since we need to ensure that followups to an article (discussion) do not show up in the rec.radio.info newsgroup, the `Followup-To:' header line contains a newsgroup that is appropriate for discussions about the specific article.

-- OK, so now I know what 'moderated' means. Tell me more.

Rec.radio.info is a moderated newsgroup, which means that all articles submitted to the group will have to be approved by the moderator first.

The current moderator of the group is the rec.radio.amateur.moderated Moderation Team.  Submissions to rec.radio.info can be posted, or e-mailed to:

rec-radio-info@panix.com

Comments, criticisms, suggestions or questions about the group can be e-mailed to:

rec-radio-info-request@panix.com

But before you do so, please be sure to check out the "Posting Guidelines" article.

The influence of the moderator should be minimal and of an administrative nature, consisting chiefly of weeding out obviously inappropriate articles, while making sure correct headers etc. are used for the appropriate ones.

-- What type of material is considered inappropriate?

There are three broad categories of articles which will be rejected by the moderator:

1) Requests for information: rec.radio.info is strictly a one-way street. We receive information in our mailbox; we then post it to rec.radio.info. Requests for specific information belong in the normal discussion newsgroups. If your request gets answered, you might consider passing the answer on to rec.radio.info, though. Especially if you can edit it into a informational, rather than a discussion, format.

2) Obvious discussion articles, or articles that appear unsubstantiated.

3) Commercial stuff: a relatively unbiased test of a radio product would be accepted, but any hint of for-profit might be reason for rejection. For three reasons: This is not the purpose of the list, for-profit is a controversial topic, and this list may be passed onto Amateur Packet Radio (where for-profit is prohibited except under certain provisos).

   rec.radio.swap may be more deserving of the posting in any matter.

   Similarly, copyrighted material generally cannot be used. If it's TRULY worthwhile to the net, We would recommend obtaining permission from the copyright holder. Please note the source, and if permission was given. We reserve the right to make the final decision concerning appropriateness in all situations. In most cases, a brief summary of, or pointer to, the copyrighted information may be all we can allow.

-- I do not have access to news, how can I get the information posted to rec.radio.info?

Google has an excellent web interface to Usenet newsgroups. It is available at:

http://groups.google.com

It supports both reading and posting.

-- Will the material appearing in rec.radio.info be archived somewhere?

Yes. See Google Groups above.

Effectively this means that anything you post to rec.radio.info will be permanently stored, so your work will not be lost.

-- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as time critical.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires co-operation and goodwill to be beneficial to the community in the rec.radio hierarchy.

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

*** rec.radio.info - Posting Guidelines and Etiquette ***

Two introductory articles about rec.radio.info are posted to this group and to rec.answers/news.answers every month. You are now reading the second article, which explains how to submit something to rec.radio.info, and which answers some Frequently Asked Questions about the submission process. The first article is titled "Welcome to rec.radio.info", and it might be a good idea to check it out as well.

-- How do I submit something to rec.radio.info?

Two possibilities. You can use your newsreading software to just post the article to rec.radio.info, as you would do with any other newsgroup. The difference is that the software recognizes the special status of rec.radio.info as a moderated group, and will e-mail your article to us, the moderation team, instead of posting it to the group.

Alternatively, you can mail your article directly to us at the following address:

rec-radio-info@panix.com

Mailing us directly is probably (a wee bit) faster, but using the transparency offered by the newsreading software is probably more convenient.

If you have any questions, or wish to deal with some administrivia with the moderation team, we suggest mailing to the following address:

rec-radio-info-request@panix.com

-- How soon will I see my article appear?

It depends on how busy we are. Your article reaches us as mail, we have to read it first, give it the stamp of approval, and finally send it on to the group. We will attempt to read and decide on all submissions within 72 hours at the very least, though we will probably be able to process submissions much faster in actual practice.

The site from which we moderate this newsgroup, "Public Access Internet and Unix, NYC" (Panix), is directly connected to the Internet, and articles posted at that site should appear at most major news sites, including Google Groups, the same day. The principal delay, therefore, will be the wait in the moderator's submission queue.

If you post a periodic article, and have shown to be trustworthy, we may allow you to post directly if the article is of a timely nature. See the section below on direct posting.

-- Should my article be in a specific format?

No. If it is not totally illegible, we will accept it, and if it does not have a correct subject-line we will correct it with your permission -- that's what a moderator is for.

However.

You could do us a big favor by making sure your article conforms to these simple requirements:

1) The article must present information, not discussion or requests, We will reject the article or require you to change the wording if it is worth it.
2) A good, descriptive Subject line.
3) Always mention what source you got the information from.
4) Don't forget to include a Followup-To header, at least if you don't want further discussion to automatically be forwarded to you, the poster, which is the default if the article is only posted to rec.radio.info.

As we said: if your article is appropriate we will post it even if you don't follow these guidelines, but then don't blame us for not processing it immediately. 'Perfect' articles we can send on with a couple of keystrokes. Stuff that needs minor editing is going to have to wait until we have time to do so.

Please do not waste both our and your time by posting requests, as this is an information only news group.

-- What about crossposting?

If you send something to rec.radio.info, just name any group you'd like to cross-post to in the Newsgroups field. Then, when we approve the article for rec.radio.info it will get automatically cross-posted to any other groups mentioned. This will also override the default Followup-To: poster, replacing it with the groups you cross posted to.

We would prefer if the group be cross-posted to the various discussion groups in the rec.radio.* hierarchy that are appropriate:

| | |
|---|---|
| rec.radio.amateur.misc | Amateur (ham) radio and related matters |
| rec.radio.amateur.packet | Amateur Packet Radio discussions |
| rec.radio.amateur.policy | Amateur Radio practices, rules, etc. |
| rec.radio.noncomm | Non commercial radio discussions |
| rec.radio.shortwave | International broadcasting on the 'HF' bands |
| rec.radio.cb | Citizens Band (27 MHz) discussion |
| rec.radio.scanner | Scanner discussions (unsupported group) |

or in one of the moderated groups:

| | |
|---|---|
| rec.radio.amateur.moderated | Amateur radio practices, rules, etc. |
| rec.radio.broadcasting | Discussion of *domestic* radio broadcasting |

We will leave it up to the poster to decide which group(s) are appropriate, but reserve the right to add groups if we feel it has broader interest. We will consult with the poster first.

Notes on crossposting:

- rec.radio.broadcasting is also a moderated group. The rec.radio.broadcasting moderator prefers to review all articles himself before posting. Placing rec.radio.broadcasting before rec.radio.info on the Newsgroups line should accomplish this. We will typically abide by the rec.radio.broadcasting moderator's decision whether the article is appropriate for rec.radio.info.

- rec.radio.amateur.moderated is also a moderated group. As the rec.radio.amateur.moderated Moderation Team manages both rec.radio.amateur.moderated and rec.radio.info, we can manage crossposting and approvals for both newsgroups. The rec.radio.amateur.moderated group does not allow crossposting to other discussion newsgroups, whether moderated or unmoderated. However, we would like to manage rec.radio.info as consistently as possible with how it was done by previous moderators, including the grandfathering of existing regular postings. Therefore, the submitter can choose rec.radio.amateur.moderated or the other unmoderated rec.radio.amateur.* discussion newsgroups for crossposting, but not both.

- Any FAQ or informational posting approved by the rec.answers/news.answers moderation team that is also crossposted to any rec.radio.* newsgroup (besides just rec.radio.info) is also automatically pre-approved for rec.radio.info. See below for more information.

If you post to another moderated group, it may be better to make special arrangements with both moderators before posting by contacting us at our administrivia addresses.

In addition, cross-posts do not take up extra space; modern newsreaders can be configured to show you cross-posted articles only once anyway; not everybody reads rec.radio.info; and rec.radio.info was never meant to reduce the volume of the regular discussion newsgroups. But keep in mind that some of the mail gateways may filter out the informational postings (at request of the subscribers) to keep the load down.

You decide.

-- I have a regular posting with timely information, can I make arrangements to help speed up delivery by posting directly from my site?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as timely.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires cooperation and good will to be beneficial to the community in the rec.radio.* hierarchy.

If you are currently maintaining (or plan to maintain) a radio-related periodic information posting, you may wish to consider crossposting it to rec.answers/news.answers. Postings that are approved by the rec.answers/news.answers moderators for this treatment are automatically pre-approved for crossposting to rec.radio.info (as the news.answers requirements are far more rigorous than the requirements this newsgroup ever plans to use). For more information about this option, consult the appropriate information articles and posting guidelines in rec.answers/news.answers.

Realize also, that even if your post is not approved for rec.answers/news.answers, it can still be approved for rec.radio.info. The intention is not so much to get every last bit of radio-related information on rec.answers/news.answers, but rather to provide an alternative avenue of approval (as well as grandfather existing maintainers of radio-related information and spare them additional bureaucratic hurdles). Again, crossposting to either rec.radio.info or rec.answers/news.answers, both, or neither, is at the discretion of the poster (subject to the approval of the moderators). You decide what is most appropriate for your article.

Please remember that as an information maintainer, you are not alone.

There are many others on the net who maintain and post periodic information postings, using various intermediate-to-advanced features of Usenet (usually via automated tools). Various degrees of technical support and general hand-holding are available from many Usenet veterans. Send us some E-mail describing your needs to our administrative address below, and we'll try to help, or at least refer you to the right knowledgeable individual(s).

 -- And Follow-ups?

If the only newsgroup you have specified is rec.radio.info, then the Followup-To: field will always be set to poster. If you do not want this, you must supply a Followup-To line of your own, and we will honor that one, as long as it is a subset of the original Newsgroups line.

If you specify newsgroups to cross-post to, then the Followup-To field will be set to include all the cross-posted groups, excepting rec.radio.info itself. Again, if you do not wish this behavior, supply your own Followup-To line.

We maintain other standards on the various RFC-1036 (news transport) header lines. For example, if the article is appropriate for passing into the Packet Radio Information Network, we encapsulate the Packet Bulletin Identifier (BID) in the Message-ID: news header line indicating the machine of origin as the ampr.org domain:

```
 Message-ID: <$opa.55.1994@ampr.org>
```

where the Packet Radio BID, in this example, is `$OPA.55', and it was posted in the year 1994, because some of the Bid numbers are cycled yearly. Hopefully, this can be used as a key to re-introduce the articles for the Packet Radio network. Also, if the article is a repost of an already existing information article in the rec.radio heirarchy, we ensure that the References: header line is linked to that previously posted article. This also helps to tag articles, and may be used for additional filtering if needed.

Since the articles are archived, please use the Summary and Keywords header lines to help one search for your article.

 -- Why have I received no reply from you?

We never reject anything in silence, and we make a point of it to answer all our mail. However, E-mail, like a brain cell, can and does get lost, every now and again.

So, if you send us something, and you don't see it appear it rec.radio.info, and you still have not heard from us in reply after say, five days, you can be pretty sure that either your mail never reached us, or that our answer has never reached you. In that case, please try again (We will filter out duplicates).

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

TrunkPCR version 0.85.221 Now Available for Downloading from homepage:
http://members.cox.net/fiftyone.50/TrunkPcr/TrunkPcr.html

This update has a few Additions and fixes

Apr 17,2007 - Added: Column Widths in CC Activity Lists are now saved.
Apr 24,2007 - Added: CC Activity Window position now saved.
Apr 24,2007 - Added: User/Radio Messages now displayed in User Status Tab.
Apr 25,2007 - Added: User/Radio Messages can now be edited by clicking on "#" or "Description" item in List.
Apr 27,2007 - -----: Mode & I.F. Filter Buttons now usable while trunking.
May 03,2007 - Added: Moto VHF/UHF Calls can now determine if they are Astro or Analog.
May 05,2007 - -----: Font, Color & User Pic Applied to Radios from Group Affiliation now Selectable in Group ID Edit.
May 06,2007 - Fixed: User Status File name now changed when renaming a Bank Description.
May 06,2007 - Added: Pocket Beep test function for PCR-1500/2500 Radios.
May 19,2007 - Fixed: Saving Bank order when just using "Sort by Desc" in Bank Organizer.
May 19,2007 - Fixed: Selecting propper Bank when the above is completed.
May 19,2007 - -----: Splash Screen will now close 2 seconds after program is finished loading.
May 19,2007 - Added: You can now Set the Program Speed / CPU Usage.
May 20,2007 - -----: Made a small change in the decoder to catch when a Group changes frequency earlier.
May 23,2007 - -----: Boolean values saved in TrunkPcr.ini and Bank files now Read "True" or "False" for all Languages.

Version 0.85.221 Released 05/23/2007

Regards,
Jay

Get your Amateur Radio License from the FCC, then you'll have access to the majority of radio traffic.  Go to www.qrz.com for more info!!

He has 'access' to the ham bands WITHOUT becoming an Amateur Radio operator,
just like everyone else. Since he mentioned 'scanning' ( listening), anyone
can do that.
I have many radios, some shortwave, some scanners, some wide band receivers
that do both.
I enjoy listening, but have NO desire to become a ham radio operator.

Mississauga (Toronto), Canada. 401/Mavis area.

Scanner ICOM IC-R10 handheld receiver, freqency range of .5-1300MHz.
With  SIG NAVI function and separate rotary controls for squelch,
volume, and VFO. SSB, CW, AM, FM, and wideband FM. Cellular blocked
but even unblocked receivers cannot hear cellular due to them being
digital nowadays. Cable for computer control, software, 4 rechargeable
batteries, and manual.

I haven't used the computer control but its a simple cable. Software
is included, but I read that newer software is available, see these
links for more information.  http://uk.geocities.com/blakkekatte/
http://groups.yahoo.com/group/Icom_R-10/

Four NiMH rechargeable batteries are included, which are more valuable
than the AC adapter. I have misplaced the AC adapter since I only used
it with batteries. Lightly used since I rarely go outdoors and mostly
use a PCR-1000 base scanner. $350 CAD obo.

Hi

Anyone here know their way around AcarsD?
In particular how acarsd handles icons/thumbnails of aircraft.

> can be configured to show you cross-posted articles only once anyway; not everybody reads rec.radio.info; and rec.radio.info was never meant to reduce the volume of the regular discussion newsgroups. But keep in mind that some of the mail gateways may filter out the informational postings (at request of the subscribers) to keep the load down.
>
> You decide.
>
> -- I have a regular posting with timely information, can I make arrangements to help speed up delivery by posting directly from my site?
>
> Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as timely.
>
> We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires cooperation and good will to be beneficial to the community in the rec.radio.* hierarchy.
>
> If you are currently maintaining (or plan to maintain) a radio-related periodic information posting, you may wish to consider crossposting it to rec.answers/news.answers. Postings that are approved by the rec.answers/news.answers moderators for this treatment are automatically pre-approved for crossposting to rec.radio.info (as the news.answers requirements are far more rigorous than the requirements this newsgroup ever plans to use). For more information about this option, consult the appropriate information articles and posting guidelines in rec.answers/news.answers.
>
> Realize also, that even if your post is not approved for rec.answers/news.answers, it can still be approved for rec.radio.info. The intention is not so much to get every last bit of radio-related information on rec.answers/news.answers, but rather to provide an alternative avenue of approval (as well as grandfather existing maintainers of radio-related information and spare them additional bureaucratic hurdles). Again, crossposting to either rec.radio.info or rec.answers/news.answers, both, or neither, is at the discretion of the poster (subject to the approval of the moderators). You decide what is most appropriate for your article.
>
> Please remember that as an information maintainer, you are not alone. There are many others on the net who maintain and post periodic information postings, using various intermediate-to-advanced features of Usenet (usually via automated tools). Various degrees of technical support and general hand-holding are available from many Usenet veterans. Send us some E-mail describing your needs to our administrative address below, and we'll try to help, or at least refer you to the right knowledgeable individual(s).

>
> -- And Follow-ups?
>
> If the only newsgroup you have specified is rec.radio.info, then the Followup-To: field will always be set to poster. If you do not want this, you must supply a Followup-To line of your own, and we will honor that one, as long as it is a subset of the original Newsgroups line.
>
> If you specify newsgroups to cross-post to, then the Followup-To field will be set to include all the cross-posted groups, excepting rec.radio.info itself. Again, if you do not wish this behavior, supply your own Followup-To line.
>
> We maintain other standards on the various RFC-1036 (news transport) header lines. For example, if the article is appropriate for passing into the Packet Radio Information Network, we encapsulate the Packet Bulletin Identifier (BID) in the Message-ID: news header line indicating the machine of origin as the ampr.org domain:
>
> Message-ID: <$opa.55.1...@ampr.org>
>
> where the Packet Radio BID, in this example, is `$OPA.55', and it was posted in the year 1994, because some of the Bid numbers are cycled yearly. Hopefully, this can be used as a key to re-introduce the articles for the Packet Radio network. Also, if the article is a repost of an already existing information article in the rec.radio heirarchy, we ensure that the References: header line is linked to that previously posted article. This also helps to tag articles, and may be used for additional filtering if needed.
>
> Since the articles are archived, please use the Summary and Keywords header lines to help one search for your article.
>
> -- Why have I received no reply from you?
>
> We never reject anything in silence, and we make a point of it to answer all our mail. However, E-mail, like a brain cell, can and does get lost, every now and again.
>
> So, if you send us something, and you don't see it appear it rec.radio.info, and you still have not heard from us in reply after say, five days, you can be pretty sure that either your mail never reached us, or that our answer has never reached you. In that case, please try again (We will filter out duplicates).
>
> Please direct any comments, questions, or criticisms about this article to rec-radio-info-requ...@panix.com.

I have new in box the following:

Pro 94 scanner Dual Trunking

Pro 97 Scanner Triple Trunking

Pro 528 Scanner Triple Trunking

These scanners have never been out of the box. I would like to trade for analog SW receivers. All offers will be considered.

Looking for Yaesu FRG 7, any Hallicrafters, Allied, Lafayette, Realistic 160's, Zenith Transoceanics, etc. Let me know what you have to offer and we can talk. If you have any sitting around and they are in good working condition contact me. Not looking for any fixer uppers.

Will sell these scanners if I have to, but I love to trade and would like this to be first option.

Thanks,
Tom

Hi,

I have two scanners, which I would like them to share a single (Scantenna)
antenna in my attic.

Only one scanner will ever be on at any time.
But, I would like to "permanently" have both scanners attached to the single
antenna.

What would you recommend as a reasonably low cost splitter for this ?  (is
Splitter the right term ?)

What type of losses would I expect ?

Just out of curiosity, would the losses be the same if I was actually to use
both scanners at the same time compared to just one of them ?

Thanks,
Bob

Ham radio is an old hobby, with mostly older people using it. Older people slow down as they age. Trying to tap out ANY speed code with arthritis or carpal tunnel syndrome isn't going to work for that majority.
I re-considered renewing my license about 5 years ago. Today I know I can't tap out 5 wpm. Forcing this outmoded relic of communication on an aging generation is nonsense.
--

Well now you cant take a propper Morse test even if you wanted to in the UK. Now the amateur radio licence is free to renew online.  If you want to play with digital communication using very low bandwith how about PSK31?  Anyway I thought this old troll would be best posted in uk.radio.amateur

Andy

I believe 'ham' radio is dying, because there is only so many times you can give radio checks and tell others what kind of equipment you have. If I tune to a ham repeater on my scanner, I hear the same conversations I heard 10 years ago, one guy telling another one what type of radio he has connected to what kinda antenna. Every once in a while you'll hear someone announce the monthy meeting, or some one telling his wife he's caught in traffic and will be late getting home ( which he could have done on a cell phone at 1/100th the cost, and not everyone would know he wasn't home)

Ham radio is dying because its outdated, yes you can 'call across the counrty' to another 'ham' for mere pennies ( once you buy the expensive equipment, put up a god awful ugly antenna, as big as your garage, and pass all the tests to allow you to do it )  I can do the same thing using a cell phone with No Test, No Huge antenna, and can call ANYONE that happens to have a phone and as a bonus... the whole world can't listen.

As far as being a hobby and 'fun', well  maybe, but I hear more people on ham radio talking about the time they have in doing antenna swaps and maintance, that I just can't even imagine that being 'fun'.

Ham radio is much like the mail service, who actually sends a friend or family a written letter anymore ?  you may get a birthday or christmas card with a 'note', you'll get 'bills' and junk mail, but when is the last time you either got or sent a long letter to a friend or family?  Newer technology has rendered 'mail' obsolete, you have telephones, e-mail, instant messangers, and FAX if you really have to send a piece of paper, like a copy of a document.

Perhaps if they had dropped the 'code' requirements 30 years ago, they would have picked up a lot of new users, but as far as I can tell, most of the new HF class users have just upgraded from their 'tech' status with very few NEW members actually jumping on the band wagon.

Back in 2001, Seattle had an earthquake (a small biggie- lots of damage) and guess what, the cell phone system went down (up to 4 to 5 hours) and landline phone system was trashed since everyone was calling either 911 or their relatives, or what not.

BUT

Ham radio was alive and well, and we at the Western Washington Medical Services group were able to maintain contact with the regions hospitals, and blood banks, as well as other emergency services.

So, yes ham radio is maybe dying, but it is also a true and able way to comminicate.  Also note: when San Francisco had its earthquake, it was again ham radio that got the word out to the world, since their cell phone systems went down, and their landline system was in the same shape!

Ok  this makes me laugh,   cell phones were down 4 to 5 hours .....
so WHAT ?   and regular land lines were trashed since people were
USING them ( I thought thats what they were for ... to be USED )

> Ham radio was alive and well, and we at the Western Washington Medical
> Services group were able to maintain contact with the regions hospitals, and
> blood banks, as well as other emergency services.

And WHAT EXACTLY were the emergencies that 'HAM' radio handled for
these hospitals and blood banks ( that the red cross radio services couldn't
have handled) ?

> So, yes ham radio is maybe dying, but it is also a true and able way to

OK   again laughable .....     'hams' got the word out 'That San Fransisco had
an earthquake' ?   What  CNN, ABC, NBC, etc   weren't there ?  sending
out live feeds via satellite ? ( Hams probably used slow scan TV to send
out images .... again to other hams )   And where was FEMA and the local police
and fire ( probably using there radios 'to get the word out'  )  And lets not
forget local radio & TV stations ....  I'm sure they sat and waited for the
HAM radio operators to do their work for them.

And  WHO exactly did you get the word out to ?   Other hams, who were
miles away and couldn't do anything to help anyway ?  If the power was out
MOST people tune to an AM or FM radio station on a battery powered radio.
So I'm sure that was a BIG help.

I've heard this crap about 'in case of disaster HAM radio is there', what exactly
can a HAM do that someone with a CB, cell phone, or smoke signals can't ?
If hams want to be helpful why don't they fill sand bags during a flood ? or

```
take
boats out looking for people ?  No ....  they want to sit at home or car and
press
the 'push to talk' button ( which I think the Red Cross, Fema, and numerous
other
agencies already have covered )

> I've heard this crap about 'in case of disaster HAM radio is there', what
> exactly
> can a HAM do that someone with a CB, cell phone, or smoke signals can't ?

A few years ago there was a hurricane that disrupted the area around Louisiana and Mississippi called Katrina. Amateur radio did a pretty good job of helping out there:

http://www.msnbc.msn.com/id/9228945/

http://www.computerworld.com/securitytopics/security/recovery/story/0,10801,104418,00.html

http://radio.about.com/od/amateurshortwave/a/aa090405a.htm http://technocrat.net/d/2006/2/28/985

I'm sure you could have handled it better with your CB radio and cell phone
that had no service.

Quoted from one of your articles:

"On Monday, Aug. 29, a call for help involving a combination of cell telephone calls and amateur radio led
to the rescue of 15 people stranded by floodwaters on the roof of a house in New Orleans.
Unable to get through an overloaded 911 system, one of those stranded called a relative in Baton Rouge.
That person called another relative, who called the local American Red Cross."

Sounds like they had 'CELL SERVICE' to me ......

yeah, I've already 'heard' about that one, they were down for 4 or 5 hours,
hardly a big deal. Usually when they are going to be out longer than that,
they bring in portable cell sites ( generator powered ), and can cover the
majority of the effected area.

Don't think it really hurt anyone to wait for the few hours to call
relatives,
and tell them they were OK.

And from what I understand, the Red Cross and some other agencies had
'hams' operating their ( the agencies ) radio equipment since they were
short
handed, and assumed that the hams already knew how to operate a radio.
( which is a really HARD job, considering, you just push a button and talk,
then release the button and listen ) Its not like the old days when HAMS
really knew how to build, work on, and actually OPERATE a radio
( which years ago was actually some what complicated ). As it is now,
90+% of hams BUY a radio, take it out of the box, and if it needs service,
they take it to the service tech.

Amature radio contributed alot, in years past, many new radio designs were
credited to ham's, when there was JUST land lines ( and they were poor ),
if they went down, hams could call to the next city, county, or state.

But like I posted earlier, its like the mail service .....  its outdated.

Not at all- especially if you need medical aid.

>Usually when they are going to be out longer than that,
> they bring in portable cell sites ( generator powered ), and can cover the
> majority of the effected area.

Good point- You should invest in one of those to pull behind your fiero.

> Don't think it really hurt anyone to wait for the few hours to call
> relatives,
> and tell them they were OK.

Who cares about those calls? Emergency communications dude- reporting
critical shit. Telling mom you are alive is not emergency comms.

> As it is now,
> 90+% of hams BUY a radio, take it out of the box, and if it needs service,
> they take it to the service tech.

Fine by me.

> But like I posted earlier, its like the mail service .....  its outdated.

No doubt- but it still has a role- especially when all the non-outdated equipment fails when the shit hits the fan.

The Pro 96 has had several DSP modifications released for it by Radio Shack.  These modifications make the Pro-96 and its tabletop brother the 2096 into excellent scanners for monitoring the Detroit towers. The Uniden scanners are vastly inferior and have not had any DSP modifications made by Uniden in order to improve their performance with systems such as the Detroit (Tower 701) MPSCS system.

chances of a ham radio operator being 'at hand' at that time,
is about the same as flagging down a squad or a police car.

The Fiero is getting a new exhaust system, but the Corvette is running fine,
thanks I'll bear that in mind. (2 seater plastic cars, you gotta love them )

I'm sure you have the statistics to back that up. It's obvious you see no value in the ham radio system as it is today- that's fine with me. I think redundant, reliable 2 way communications can only help when things go to hell.

Actaually no I don't have statistics, to back that up, (The number of sworn
officers of local agencies in USA is 1.5 per 1,000 of population.) that
means
that there would be at least 450,000 police alone, but there are well over
1 million police and fire personel in the USA, somehow I don't believe
ham radio carries quite that number, last I heard.(   the ARRL reports
150,000-members )  So actually finding a police or EMS/Fire person,
should be easier.

in 2000 there were almost 700,000 licensed hams in the US.

Ok so we argree that the chances are roughly ( give or take a few
percentages)
that a ham on a scene is about as good as finding an 'emergency' (
police/fire)

person.

And I never said there wasn't a 'place' for ham radio, as a hobby its great, if thats what you enjoy, ( same as me restoring 20 year old cars and listening to my shortwave ( talk about a dying hobby ), or my scanners, ( also evolving, to digital and a pain in the butt )
I even own a couple Yeasu  FT767 GX+ rigs, 1 with filtered speaker, and the other with the phone patch speaker
Both have the 6m, 2m, 70cm modules ( both came that way),
They make FANTASTIC shortwave radios.

Don't get me wrong, I love radio, radios, and radio equipment ( I've spent thousands of dollars on radios ) The one I cherrish the most, is probably my 1938 Zenith 9 tube Walton tombstone tube radio.

Justifying HAM radio by its  NEED in a emergercy, just isn't as true as it was 30, 40 or 50 years ago. As a hobby, I say go for it, but don't expect people to believe that ham radio is NEEDED.

What annoys me, is the jackass's that clung to CW like it was the very heart of ham radio. Its outdated ( a relic from before the civil war ) Had these people changed the rules 30 years ago and got more and younger people interested, ham radio might not be where it is today.

Another thing that annoys me about HAM radio ( or should I say its users ) is, well read this and you figure it out :

"Thumper2u" <info@bettersearchsolutions.com> wrote in message news:1175475856.960765.59820@l77g2000hsb.googlegroups.com...

> I'm new in here. Looks like this might be a good group for me to ask some questions. I used to enjoy scanners back in the day when they were all analog, and before police, fire and EMS went to trunked, digital radios. I don't know much about scanning in todays world.
>
> I am interested in learning about pc radio scanning software. I have heard of software/hardware you can use in conjunction with your desk top pc that allows you to use the computer to scan radio freq's. I live in an apartment condo so having a 60 foot antennae is out of the question. Does anyone know about this software for pc that can advise me where to look for it, how good is it, etc?
>
> I am interested in monitoring police, fire, EMS, military, little green men from Alpha Centauri :-) just about anything that would be interesting. I could really use some guidance from people who are experienced in radio scanning so I can figure out what I need, how to use it, and what to expect.

MY REPLY:

He has 'access' to the ham bands WITHOUT becoming an Amateur Radio operator,
just like everyone else. Since he mentioned 'scanning' ( listening), anyone
can do that.
I have many radios, some shortwave, some scanners, some wide band receivers
that do both.
I enjoy listening, but have NO desire to become a ham radio operator.

Hello,

I have decided to clean out some items sitting around that I don't use anymore.

I have a like new and working perfect Radio Shack PRO-2042 1000 Channel Scanner that tops my list.

I bought it new and have hardly used it.  Still have manual too.

Seems like I paid about $500.00 dollars for it when it was purchased.

My question is what is it worth now?

Thanks, Mike SW FL

Not much since it does not pick up digital. Try ebay.

Contrary to what was told to you, digital is still only a small
percentage of transmissions that your scanner will receive.
Granted they will continue to grow, as mandated by the FCC,
but it will take many years to happen, so your scanner still
has some worth.

It was a good suggestion to 'check' ebay and see what they are going
for, average the price of several if you can find that many and ask
about 20% less on a newsgroup ( you'll still get about the same for it
you just won't have to pay e-bay their cut for listing it )

The 2042 was a good scanner in its day, as was the 2035
the 2042 is an improved version of the 2035.

I have 9 friends using them- one with 4 units. On the waterfall, we can see 1296 MHz EME (through a transverter) that we cannot even hear audibly.

Thanks for the responses and emails concerning the current value.

Any interest in the newsgroup for my RS Pro-2042 at $135.00

delivered before I list it on eBay?  Includes orig antenna and manual.

   Can be picked up in SW Florida for face to face deal.

   Thanks Again, Mike

Good luck...they seem pretty hard to find.

This model was my first scanner.  In fact, I owned two of them at one time.
They were pretty easy to mod.  Unfortunately, I sold them both to co-workers
who were interested in getting into scanners.  In case you didn't already
know about it, there is a method for opening up the tuning range to include
shortwave.

 - Doug

I will be traveling from Sacramento, CA to Denver, CO on June 16th.
Using I80 to Cheyenne, then I25 south to Denver.

Does anyone know what freqs i should put in to monitor the various
state highway patrol, county sherriffs, even possibly local pd?

I have several scanners that do the VHF (lo and hi) as well as uhf.  I
do have one 800 mhz unit, howevr it is not trunking, but if I put in
all the freqs in an area, I can monitor everything.

Thanks in advance for any advice anyone can give.

John

FYI...."CB" in Australia/UK is on 476Mhz....
Their FRS radios are called PMR's and are on 446Mhz....what a mess

Best place to go for frequencies is Radio Reference.
http://www.radioreference.com/modules.php?name=RR

Many locations are switching over to digital so be aware if your Mom has an analog scanner she may not be able to hear some locations.

Subject says it all, almost. I'm getting conflicting info- some say no, some say always has been, some say soon. I got an unexpectedly large tax refund, and was considering blowing part of it on a 800 digital trunk scanner, next time Rat Shack or one of the mail order places has a sale. But if they are already encrypting, or soon plan to, I'll spend the 400-500 or so on some other toy. (I already have several vanilla scanners.)

aem sends....

Try Radio reference first. It may have some help. They seem to be several years behind in some places though, so if your area has changed in the last many years the info may not be right. Good place to try first though.

My guess is that it was responding to some high-voltage blip sent down the network by the phone company for maintenance tasks or something.
> Cecil Adams covered this topic in his column "The Straight Dope."

Re telephones (old time dial type).

When your phone was 'on the hook' (no calls in progress) there was typically a steady negative 48 volts on one side of the line pair and zero volts on the other side of the line from either a balanced or unbalanced 'line' relay. When you picked up the phone to make a call the relay/s would spring into action and connect you dial tone etc.

When someone called YOU the line relay/s were disconnected and another circuit set up by the person who dialled your number, prepared to supply AC ringing to your line to ring the phone. However that supply also had a DC component so that when you answered DC current would flow, cut off the ringing and energise the microphone in your phone.

many different step-by-step systems, panel systems and crossbar but the basic 'line' conditions were somewhat as described. In North America the ringing was/is typically a 2 second burst followed by a 4 second break, at frequency of around 20 hertz. In other countries it was often a sort of double burst of ringing followed by 4 second break. So each 'cycle' of rings takes about 6 seconds. Something remember if you are sitting on the can etc. when it rings!

So if the ringer bell or the ring-chirper was sensitive to small changes in voltage (aka cheap or maladjusted phone) there was definitely a possibility of a slight change of voltage on the line as the dial office equipment set up and prepared to ring your phone.

Some of those el-cheapo phones were horrible; in one case they damped down a fireman's line so badly that he didn't get emergency calls. The cause was two cheap phones supplied with magazine subscriptions to his two sons, who unwittingly hooked them up and stopped his main phone from ringing. Cost our telephone company several hours/days of effort to find out why an essential fireman's phone didn't work when every other phone around his area was OK. But we did so cos his service was important. Not so sure these days of competition anyone would bother; it might be a case of 'Service OK leaving here. YOU have a problem'!

Oh; another radio related el-cheapo phone item! When we built our first house the only service available in the area was one party on a

four party line! One of the other parties had a cheap phone on an unsteady cheap metal stand and its handset kept falling off. One Sunday trying to make a call and very frustrated I eventually played a religious broadcast (of another denomination than theirs) as loud as possible down the telephone line. Listening occasionally between burst of loud hymn music one could hear "Where's that music coming from ................ " comments and, ultimately the phone put back on hook. Finally I could make my work related call!
Make sure you have fun out there!

And oh yes; some telephone systems had 'Routiners' or 'Line Insulation
Testers' that would typically test through all the lines often late at
night when there are/were few calls and identify any leakage due to
wet cables and other non-normal conditions etc. two such incidents
were when a member of a telephone company vice president's family left
a phone outside in the rain and another when someone washed their
telephone set in the kitchen sink and put it aside to  dry, without
unplugging it!
Keep looking for the ironic and the humorous.

You might want to read this:
http://www.radioreference.com/modules.php?name=RR&sid=100

It's long, but skimming it shows that some agencies are in fact
encrypting to "protect against terrorists".  Will the agencies you're
interested in encrypt?  Who knows.

I have a Uniden BC 780 XLT base scanner for
sale.  It is in the box with manual and accessories.
In very good condition, some scratching on the display.
Works flawlessly.

$200.00  Plus $10.00 shipping via UPS ground, insured.

PAYPAL, or US Postal money order.  eBay feedback under  OFFDAN

E-mail to     dconti@nj.rr.com          if interested.

Very, seldom is it encrypted.  Some of the obvious agencies that are dealing with very sensitive, life threatening situations do use encryption on occasion, but not full time.  I think there are a couple counties in the entire state that use encryption full time, from what I've heard.

I'm in S.E. lower Michigan, Tri-County area and most of it is in the clear.

Bill

It's been in operation for a while now......still doing testing but it
is operational. It is a DIGITAL system also in case you didn't know
that. The systems is called STARS. You'll still here plenty on the
conventional channels.....these I mean

Virginia State Police

```

- Added a "Time Window Search" to the audio playback screen.

I have not updated the help file yet because I am debating on the final form this function will take. I wanted to get it out there for people to play with over the weekend and possibly provide feedback.

Basically, the function allows you to search for recorded audio during a specified time window. You enter the date, time and the amount of time before and after the specified time to search. If any entries are found, you can then use the left and right arrows to move through and play the selected segments.

The reason I came up with this is because when attempting to identify new talkgroups I would hear something like "go to TAC". I then I would have to search through all the other unidentified groups to see if I could find the "TAC" channel. This new functionally allows me to quickly search through those groups that occured within the same time frame.

It is P25 trunking and the APCO P25 voice can be copied with APCO P25 capable scanners even when the conventional stuff goes away.  Some of the sites have already been active for some time.

every so often all gsm phones communicate with the tower. Thats when the rf interferes with stuff or when its about to ring. Just keep a little farther away from other appliances.

Thanks, but you basically just re-stated the problem. I was hoping to get a more technical explanation of the mechanism by which the noise is coupled with the goal of using that information to determine what techniques might be used to prevent it. Keeping it a little farther away isn't usually an option because the owner keeps it clipped on his belt, and it isn't practical for him to remove it when he is at his workstation since he comes and goes all day. I'm figuring that use of a ferrite on the amplified speaker power cord is likely to be the most effective solution.

For sale:  Regency Informant INF-3 scanner.  This is pre- programmed by state and I believe it can be switched (it is currently set to the state of Oregon) but I do not own manual to figure out how.  In good cosmetic condition and works great.  Removable antenna intact.  Here is a link to a closed Ebay auction to get a better idea of the functions and features:

http://cgi.ebay.com/Regency-INF-3-Police-Fire-Marine-EMS-Weather-Scanner_W0QQitemZ220088384096QQihZ012QQcategoryZ14956QQcmdZViewItem

I do not have the manual but I am sure it is not too hard to figure out.  $8 shipping within the US.  Please contact me with questions or offer.

thanks,
CTV

It's not great.  Some people have better results than others, depending on location.

I'll reduce the price on this one to $150.00 plus the shipping.

E-mail if interested.

GSM is your problem.  Find a cell company that doesn't use the GSM standard, and you problems will go away; and just maybe the honey bees will survive...

GSM is junk, and should have never seen the light-of-day.  The wife's phone uses GSM, and it interferes with EVERYTHING.  Any speaker in the house buzzes, doesn't matter what it's connected to, screws up the picture on the TV, computer monitor, etc.  Causes all kinds of interference to nearly every radio in the house (communication or otherwise).

Thankfully my cell carrier uses CDMA, and I don't have ANY of these types of issues, or any others for that matter.  To top it off, I can use my phone in MANY locations that hers will not work.

But why is this?  I'd like to understand what GSM does that the other
systems don't do.  Is a higher transmit power needed from the handset for
some reason?  Guess I need to do some more background research.

GSM uses Time division multiple access a.k.a TDMA with a 30kc wide signal.
The carrier freq it uses hops around with in a band near 1.9Ghz as CW
packet bursts.

Unshielded speaker components act as diodes, which in turn acts a AM
radio detector,
and turn your speaker into a receivers of the AM resulting signal.
That is the noise you hear.

I hope that helps.

    <blockquote type="cite">
      <pre wrap="">In my office we often experience instances of a "galloping"
sort of buzz
periodically coming from the PC speakers near co-workers who have
Cingular GSM cell phones. A preliminary Web search turns up many
instances of this problem. My understanding is that these phones
periodically communicate with the network, and during these brief bursts
the carrier is modulated at around 200 Hz resulting is a clear,
repeatable buzz pattern. How is this buzz getting into the PC speaker
amplifier, and, more importantly, how can it be prevented?
      </pre>
    </blockquote>
    <pre wrap="">GSM is your problem.  Find a cell company that doesn't use the
GSM
standard, and you problems will go away; and just maybe the honey bees
will survive...

GSM is junk, and should have never seen the light-of-day.  The wife's
phone uses GSM, and it interferes with EVERYTHING.  Any speaker in the
house buzzes, doesn't matter what it's connected to, screws up the picture
on the TV, computer monitor, etc.  Causes all kinds of interference to
nearly every radio in the house (communication or otherwise).

    </pre>
  </blockquote>
  <pre wrap=""><!---->
But why is this?  I'd like to understand what GSM does that the other
systems don't do.  Is a higher transmit power needed from the handset for
some reason?  Guess I need to do some more background research.

 - Doug

  </pre>

Well guess I'll have to dive into the digital world one of these days, not
much going on on analog in my location [Detroit suburbs]
Whats the choices, just RS and Bearcat ?

JD, you asked this question on the shortwave group where it belongs, This is
a scanner group using other freq.'s.

Didn't you like the answers you got there? You were also ref to the "numbers
group", did you go there and ask them?
```

Anyone catch the model number of the scanner Peter Parker / Spider-Man
had in Spider-Man 3? I caught the Realistic logo and it had 16 lights
representing each channel and the active channel would light up. It
looked like something from the 80s and I doubt it'd be able to track
NYPD's current system.

That's a crystal controlled scanner, definitely not the 1980s
state-of-the-art.

It cannot negotiate trunk systems.  It would work well here in L.A. County.

I doubt that...  I do recall Patrolman, but don't ever recall seeing an actual model #.  I'll have a look this coming weekend, if I remember to...

THIS REALLY CAN MAKE YOU EASY MONEY! IT WORKS!
BUT YOU HAVE TO FOLLOW IT CAREFULLY FOR IT TO WORK!
A little while back, I was looking on the web for easy ways to make money and I kept thinking that all of the ways I was reading would never work and were just scams, but not this one!  The article that I had found said that I could make thousands of dollars easily in a matter of weeks with only an initial small payment of $6.00.  I thought, "Yeah, right, this must be a scam like most of the rest", but like most of us, I was curious, so I kept reading.  Anyway, it said that if I sent $1.00 to each of the 6 names and addresses listed at the bottom of the article that I would make great money but only if I followed the following steps.  After sending the $1.00 to each person you were then instructed to rewrite the list by taking the 1st person off of the list then moving the 2nd person to the 1st spot, and the 3rd person to the 2nd spot, etc, etc.  Finally you should be left with the number 6 spot empty and this is where you place your name and address.  After reconfiguring the list you then must post it on about 200 newsgroups (doesn't matter but the more places you post the more money you make!).  There are thousands and thousands of newsgroups from around the world so this task is easy and that was it when I was done!  No catch.  So after thinking it over, I thought about trying it. I figured, what have I got to lose except 6 stamps and $6.00, right?  Like most of us I was a little skeptical because it seemed so easy and I was a little worried about the legal aspects of it all. So I checked it out with the U.S. Post Office (1-800-725-2161) and they confirmed that it is indeed legal!  (U.S. Postal and Lottery Laws Title 18, Section 1302 and 1341 and Code of Federal Regulations, Volume 16, Sections 255 and 436)  After reviewing the pros and cons of the investment I decided to carry out with it.  I invested the measly $6.00 and guess what? Within 7 days, I started getting money in the mail!!  I was very shocked!  I figured it would end soon, but the money just kept coming in.  In my first week, I made about $25.00. By the end of the second week I had made a total of over $1,000.00!  In the third week I had over $6,000.00 and it's still growing.  This is

now my fourth week and I have made a total of just over $21,000.00 and it's still coming in rapidly. It's certainly worth $6.00, and 6 stamps. Now let me explain to you how this works and most importantly, why it works. Also, make sure you print a copy of this article NOW, so you can get the information off of it as you need it.

STEP 1: Get 6 separate pieces of paper and write the following on each piece of paper "PLEASE PUT ME ON YOUR MAILING LIST." Now get 6 US $1.00 bills and place ONE inside EACH of the 6 pieces of paper so the bill will not be seen through the envelope to prevent thievery. Next, place one paper in each of the 6 envelopes and seal them. You should now have 6 sealed envelopes, each with a piece of paper stating the above phrase (PLEASE PUT ME ON YOUR MAILING LIST), your name and address, and a $1.00 bill. What you are doing with this letter is creating a service. THIS IS ABSOLUTELY LEGAL!

Now mail the 6 envelopes to the following addresses:

1. LORRAINE HUTCHINSON (P.O. BOX 23951 LONDON ENGLAND E12 5YP)
2. GEAN SAPP (1768 OLD HICKORY STREET, DECATUR, GA 30032)
3. TAMEKA HILL (P.O. BOX 188 JAMESVILLE, NC 27846)
4. DAN BELL (1519 CAMERON LANDING DRIVE, STOCKBRIDGE, GA 30281)
5. ERIC PORAT (2345 EAST 64 STREET, BROOKLYN, NY 11234)
6. MATT SANTIAMAGRO (1120 SUNSET AVE, KELLEY, IA 50134)

STEP 2: After you have mailed out your letters creating a service and making this legal, take the #1 name off the list that you see above, move the other names up (6 becomes 5, 5 becomes 4, etc...) and add YOUR NAME & ADDRESS as number 6 on the list.

STEP 3: Change anything you need to in this article, but try to keep this article as close to original as possible. Now, post your amended article to at least 200 newsgroups. (I believe there are close to 24,000 groups in USA alone). All you need is 200, but remember, the more you post- the more money you make!

DIRECTIONS --HOW TO POST TO NEWSGROUPS

Step a) You do not need to re-type this entire letter to do your own posting. Simply put your cursor at the beginning of this letter and drag your cursor to the bottom of this document, and select 'copy' from the edit menu. This will copy the entire letter into the computers memory.

Step b) Open a blank "notepad" file under accessories in windows and place your cursor at the top of the blank page. From the 'edit' menu select 'paste'. This will paste a copy of the letter into notepad so that you can add your name to the list.

Step c) Save your new notepad file as a .txt file. If you want to do your postings in different sittings, you'll always have this file to go back to.

Step d) Use the Internet to search for various newsgroups (on-line forums, message boards, chat sites, discussions.)

Step e) Visit these message boards and post this article as a new message by highlighting the text of this letter and selecting paste from the edit menu. Fill in the Subject, this will be the header that

everyone sees as they scroll through the list of postings in a particular group, click the post message button. After you have completed these steps you are done with your first posting. Congratulations! You are that much closer to easy money!  THAT'S IT! All you have to do is jump to different newsgroups and post away, after you get the hang of it, it will take about 30 seconds for each newsgroup!  That's it! You will begin receiving money from around the world within days! You may eventually want to rent a P.O.Box due to the large amount of mail you will receive.  If you wish to stay anonymous, you can invent a name to use, as long as the postman will deliver it. *JUST MAKE SURE ALL THE ADDRESSES ARE CORRECT AND REMEMBER, THE MORE NEWSGROUPS YOU POST IN, THE MORE MONEY YOU WILL MAKE!! BUT YOU HAVE TO POST A MINIMUM OF 200*
WHY it works:  Out of 200 postings, say I receive only 5 replies (a very low example). So then I made $5.00 with my name at #6 on the letter. Now, each of the 5 persons who just sent me $1.00 make the MINIMUM 200 postings, each with my name at #5 and only 5 persons respond to each of the original 5, that is another $25.00 for me, now those 25 each make 200 MINIMUM posts with my name at #4 and only 5 replies each, I will bring in an additional $125.00! Now, those 125 persons turn around and post the MINIMUM 200 with my name at #3 and only receive 5 replies each, I will make an additional $626.00! OK, now here is the fun part, each of those 625 persons post a MINIMUM 200 letters with my name at #2 and they each only receive 5 replies, that just made me $3,125.00! Those 3,125 persons will all deliver this message to 200 newsgroups with my name at #1 and if still 5 persons per 200 newsgroups react I will receive $15,625,00! With an original investment of only $6.00! AMAZING! When your name is no longer on the list, you just take the latest posting in the newsgroups, and send out another $6.00 to names on the list, putting your name at number 6 again. And start posting again. The thing to remember is, do you realize that thousands of people all over the world are joining the internet and reading these articles everyday. Remember play FAIRLY and HONESTLY and this will work.

No, looked a LOT closer to this.  I'm not 100% positive, but I'm going to
say this was the unit.

http://www.rigpix.com/rs-realistic/realistic_pro48a.htm

In light of this little search, I stumbled upon a VAST WEALTH of Operators
and Service Manuals for scanners of all types.  Might want to check it out!

Tell me more! I want to make lots of money. Do you want my bank
account #?, or how about my credit card and pin number. Go fuck
yourself you prymid scammer.

Here in UK Radio shack went under the guise "Tandy" and most equipment sold
went under the name of  "Realistic" which most were called Patrolman. Just
Radio shacks as you know them with a different name but same number e.g
radio shack pro-43= Realistic patrolman Pro-43

I'm going to have to get a good look at it again...  I could have sworn it
looked more like the unit I had posted a link for (Pro 48a) , but then
again, I really wasn't looking all that close when I was watching the
movie...

Yea, I was right...  They have a discussion going on over at the
RadioReference forum.  They have posted screen-shots from the movie.  It is
clearly the Pro 47, 48 or 48a.

I'm using Scancat-Lite PLUS version 1.2.9 on a Pro-97.

Haven't heard a thing while using the Signal Stalker function.  Most recently at an airshow the fellow next to me was finding signals where as mine didn't.  We were also using the same model antenna.

Curious whether the Scancat-Lite might have a setting that either needs to be turned on or turned off?

Did you have the correct band segment(s) turned on?  If the Pro 97's Signal Stalker is anything like that of the Pro 83, the band is divided up into segments.  You can enable or disable the different segments based upon the frequency range you are interested in capturing from...

Manually on the receiver?  Yes.  Within the software?  Unknown, that is
the basis of my question.

Got ya.  I'm not familiar with the software, so hopefully someone else will be able to answer that one for you.

I have a Icom R5 and was wondering how it compares to the Alinco dj-x10. I was thinking I might sell my R5 in favour of the x10. I like the features of the X10 but wondering if its overall performance is better, worst, or the same as the R5.

Thanks
Greg

It obviously works if she is stuck spamming this scheme to try and get her money back from the last 30 times she tried it.

I wouldn't be surprised, people like to prank places like McDonald's with
their radios.  Just look it up on YouTube.

If the police can encrypt, then private citizens should be able to encrypt
with HAM radio, too.  Oh?  Oh?  Don't like that, police?  Then don't encrypt
your radio.  There is something called "public records".

Any Radioshacks that still have the Pro 94's are closing them out at
79.99 minus another 30% making them only $55.99.     The stock number
is 200-0524....

HORSE-SHIT!!!
There are times that law enforcement NEED encrypted radios.
*YOU* are not entitled to their traffic. You do not have a need to know or a right to know what is going on over police radio.If you are that interested, the PD's "PIO" will disclose it to you when it's Ok to do so.
APCO-25 and GE's EDACS systems are NOT encrypted (they can order that feature) but it's used to get more "Channels" or talk groups for an entire city, makes for a more efficient system than having a frequency/repeater for each dept.
Ma/Com's "OpenSky" system is ALL digital and you CAN NOT listen on that one.

Bottom line....if you can hear what is going on...chances are YOU DON'T NEED TO!

I have a Pro version of the 330T software that I can't use.
I need the ARC396 version of the software, or just the registration key.

If anyone would like to swap, please e-mail me.

Thanks

Bill

Has anyone had any luck putting an all band antenna in their attic and
getting good reception? I put one of Grove's dipoles in my attic and get
poorer reception than with the back of the set antennas. These antennas
do a great job when mounted outside, which I can no longer do.

If you used the same antenna with success outside, then I would suspect there's a problem with the feed line in your new installation. Is it much longer or a different type of line? Which antenna is it? A dipole wouldn't normally work well as an all-band antenna, would it?

You would get better responses if you learned how to CROSS-POST instead of
making separate posts in multiple newsgroups.  I replied to this post in
another group...

No, this is NOT normal.  This is stupidity on the part of whom ever came up
with the GSM standard...  Any NORMAL person, business, corporation, etc.,
would have properly tested for interference potential prior to releasing or
even accepting such a standard.

Sigmira is a Windows application program for decoding various "Ham"
radio signals. Its features include:

-Selectable demodulation of PSK31, RTTY, and CW "digital" modes.
-"Waterfall" spectrographic display.
-Point and click signal selection/tuning.
-'Live' input from a shortwave receiver to a standard PC sound interface
   or canned input from saved .wav files.
-16 bit sampling. 8 k-sample/s sampling rate.
-Signal strength meter.
-Adjustable squelch.
-Clock display with UTC and local time.

The distribution package includes examples of PSK31, RTTY, and CW
signals in .wav files.

And it's free.

Yes, it is normal.  The PC speakers are not bypassed for the RF the phones
generate.  They save a few cents by not doing this.  There is nothing wrong
with the phones.

I agree, this is normal, and FCC rules say it's the speakers
responsibility/fault to protect themselves from the RF.  Not the phones
responsibility for the speakers being unprotected.

-Smile

Idiots and trolls cross-post. The rest of us adhere to commonly
accepted Usenet etiquette and avoid doing so.

>with HAM radio, too.  Oh?  Oh?  Don't like that, police?  Then don't encrypt
>your radio.  There is something called "public records".
>

the times have changed and so have  requirements for  public service
radio systems.  the FBI now requires ALL local police agencies that
use
NCIC (  all police departments nowadays )  to have their MDT style
systems  encrypted. it's not optional , it's federal law.  homeland
defense  wants ALL police agency radios to be compatible with their
own encrypted national radio systems , in all  departments nationwide.
it's not law yet, but it's in the works. they strongly feel that local
police should be encrypted to keep terrorists from eavesdropping.
their work is compromised if  a  local unencrypted  police department
is  revealing all their activities in an coordinated  emergency
response event.  ( that's their excuse anyway )

my local police departments have used 150mhz and 450 mhz
repeaters ( not trunked ) for a couple of decades. ALL local police
departments are deep into the process of switching to their already up
and running city wide wifi network for BOTH mdt data AND voice.
there is NO way to eavesdrop on encrypted wifi at the present time.

get used to it ..... change happens all the time and this is a  strong
era of  change for the scanning hobbyist.  you will have to learn to
adapt to the change or just plain give up the hobby ( or what's left
of it ) ........ no one in the federal government and especially local
police departments cares if you think you have rights to listen in on
them  or not.  they never liked it in the old days and they are
gleeful that the time is coming that no one will be able to eavesdrop.
more and more, the police think it's them ( the boys in blue ) against
all the rest of us. citizens shouldn't be allowed to own guns and
citizens shouldn't be privileged to the inner workings of police
activities out in the streets.  it's all for their own safety and
protection .   I love scanning, but  tell you the truth , they are
probably right ..........

k

I'm using the Grove Omni-II. I just replaced the feedline and moved the
antenna some, and it seems to be working better.

Looking for advice on what type of cable to use for a cable run from
an antenna on a 210-foot antenna. This is a marine band VHF antenna
that will be used for receiving only. Probably a 6-foot Shakespear
antenna.

I agree, there is nothing wrong with the phones, it's the GSM standard, like
I stated in my previous posting.  I still don't believe that there is
anything 'normal' about WILLFULLY causing interference.  It's not just

speakers, it's damn near everything.  While I DO agree that things should be shielded better, that's no excuse for adopting a standard that they KNEW cause all kinds of interference.  If it was something minor, sure, that happens everyday, but this standard is a MAJOR source of interference.

With replies like yours, I would guess that BPL is OK in your book too? It's not the fault of the internet service, it's the fault of the radio, etc. manufacturers for not having proper shielding or filtering.  Yeah right!  Sorry, your argument doesn't float with me...

If you had a decent newsreader, you wouldn't have to read cross-posts,
because the newsreader would mark any as already read or not even download
it all... Apparently you don't have one.

I'm not so sure that GSM would be any different than any other cell standard that allows communication with towers several miles away.  I'm pretty sure even an old AMPS phone would do interfere about as much, with a different.sound.  We just had less electronic junk back then to interfere with.

By the way, "... stupididy on the part of WHOever came up with the ..." would be more correct.

at vhf rg213 would not hurt.
or ldf if you are really worried.

just as another note:
why use a shakespear?
put up a 10 or 15ft dualband co lin while you can

that way if you want to run anything else or even passs the very easy ham
ticket, he presto aerial already done.
plus it will by far out perform the shakespear

I have for sale a RELM HS200 hand held scanner.
This unit is is excellent condition and includes manual
and stock antenna.

Extremely sensitive portable hand held with PL
tones.

$100.00 shipped to lower 48.

PAYPAL or US Postal money order.

eBay feedback under OFFDAN.

E-mail if interested

dconti@nj.rr.com

*** rec.radio.info - Posting Guidelines and Etiquette ***

Two introductory articles about rec.radio.info are posted to this group and to rec.answers/news.answers every month. You are now reading the second article, which explains how to submit something to rec.radio.info, and which answers some Frequently Asked Questions about the submission process. The first article is titled "Welcome to rec.radio.info", and it might be a good idea to check it out as well.

-- How do I submit something to rec.radio.info?

Two possibilities. You can use your newsreading software to just post the article to rec.radio.info, as you would do with any other newsgroup. The difference is that the software recognizes the special status of rec.radio.info as a moderated group, and will e-mail your article to us, the moderation team, instead of posting it to the group.

Alternatively, you can mail your article directly to us at the following address:

rec-radio-info@panix.com

Mailing us directly is probably (a wee bit) faster, but using the transparency offered by the newsreading software is probably more convenient.

If you have any questions, or wish to deal with some administrivia with the moderation team, we suggest mailing to the following address:

rec-radio-info-request@panix.com

-- How soon will I see my article appear?

It depends on how busy we are. Your article reaches us as mail, we have to read it first, give it the stamp of approval, and finally send it on to the group.  We will attempt to read and decide on all submissions within 72 hours at the very least, though we will probably be able to process submissions much faster in actual practice.

The site from which we moderate this newsgroup, "Public Access Internet and Unix, NYC" (Panix), is directly connected to the Internet, and articles posted at that site should appear at most major news sites, including Google Groups, the same day.  The principal delay, therefore, will be the wait in the moderator's submission queue.

If you post a periodic article, and have shown to be trustworthy, we may allow you to post directly if the article is of a timely nature. See the section below on direct posting.

-- Should my article be in a specific format?

No. If it is not totally illegible, we will accept it, and if it does not have a correct subject-line we will correct it with your permission -- that's what a moderator is for.

However.

You could do us a big favor by making sure your article conforms to these simple requirements:

1) The article must present information, not discussion or requests, We will reject the article or require you to change the wording if it is worth it.
2) A good, descriptive Subject line.
3) Always mention what source you got the information from.
4) Don't forget to include a Followup-To header, at least if you don't want further discussion to automatically be forwarded to you, the

poster, which is the default if the article is only posted to rec.radio.info.

As we said: if your article is appropriate we will post it even if you don't follow these guidelines, but then don't blame us for not processing it immediately. 'Perfect' articles we can send on with a couple of keystrokes. Stuff that needs minor editing is going to have to wait until we have time to do so.

Please do not waste both our and your time by posting requests, as this is an information only news group.

-- What about crossposting?

If you send something to rec.radio.info, just name any group you'd like to cross-post to in the Newsgroups field. Then, when we approve the article for rec.radio.info it will get automatically cross-posted to any other groups mentioned. This will also override the default Followup-To: poster, replacing it with the groups you cross posted to.

We would prefer if the group be cross-posted to the various discussion groups in the rec.radio.* hierarchy that are appropriate:

rec.radio.amateur.misc  Amateur (ham) radio and related matters
rec.radio.amateur.packet  Amateur Packet Radio discussions
rec.radio.amateur.policy  Amateur Radio practices, rules, etc.
rec.radio.noncomm  Non commercial radio discussions
rec.radio.shortwave  International broadcasting on the 'HF' bands
rec.radio.cb  Citizens Band (27 MHz) discussion
rec.radio.scanner  Scanner discussions (unsupported group)

or in one of the moderated groups:

rec.radio.amateur.moderated  Amateur radio practices, rules, etc.
rec.radio.broadcasting  Discussion of *domestic* radio broadcasting

We will leave it up to the poster to decide which group(s) are appropriate, but reserve the right to add groups if we feel it has broader interest. We will consult with the poster first.

Notes on crossposting:

- rec.radio.broadcasting is also a moderated group. The rec.radio.broadcasting moderator prefers to review all articles himself before posting. Placing rec.radio.broadcasting before rec.radio.info on the Newsgroups line should accomplish this. We will typically abide by the rec.radio.broadcasting moderator's decision whether the article is appropriate for rec.radio.info.

- rec.radio.amateur.moderated is also a moderated group. As the rec.radio.amateur.moderated Moderation Team manages both rec.radio.amateur.moderated and rec.radio.info, we can manage crossposting and approvals for both newsgroups. The rec.radio.amateur.moderated group does not allow crossposting to other discussion newsgroups, whether moderated or unmoderated. However, we would like to manage rec.radio.info as consistently as possible with how it was done by previous moderators, including the grandfathering of existing regular postings. Therefore, the submitter can choose rec.radio.amateur.moderated or the other unmoderated rec.radio.amateur.* discussion newsgroups for crossposting, but not both.

- Any FAQ or informational posting approved by the rec.answers/news.answers moderation team that is also crossposted to any rec.radio.* newsgroup (besides just rec.radio.info) is also automatically pre-approved for rec.radio.info. See below for more information.

If you post to another moderated group, it may be better to make special arrangements with both moderators before posting by contacting us at our administrivia addresses.

In addition, cross-posts do not take up extra space; modern newsreaders can be configured to show you cross-posted articles only once anyway; not everybody reads rec.radio.info; and rec.radio.info was never meant to reduce the volume of the regular discussion newsgroups. But keep in mind that some of the mail gateways may filter out the informational postings (at request of the subscribers) to keep the load down.

You decide.

-- I have a regular posting with timely information, can I make arrangements to help speed up delivery by posting directly from my site?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as timely.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires cooperation and good will to be beneficial to the community in the rec.radio.* hierarchy.

If you are currently maintaining (or plan to maintain) a radio-related periodic information posting, you may wish to consider crossposting it to rec.answers/news.answers. Postings that are approved by the rec.answers/news.answers moderators for this treatment are automatically pre-approved for crossposting to rec.radio.info (as the news.answers requirements are far more rigorous than the requirements this newsgroup ever plans to use). For more information about this option, consult the appropriate information articles and posting guidelines in rec.answers/news.answers.

Realize also, that even if your post is not approved for rec.answers/news.answers, it can still be approved for rec.radio.info. The intention is not so much to get every last bit of radio-related information on rec.answers/news.answers, but rather to provide an alternative avenue of approval (as well as grandfather existing maintainers of radio-related information and spare them additional bureaucratic hurdles). Again, crossposting to either rec.radio.info or rec.answers/news.answers, both, or neither, is at the discretion of the poster (subject to the approval of the moderators). You decide what is most appropriate for your article.

Please remember that as an information maintainer, you are not alone. There are many others on the net who maintain and post periodic information postings, using various intermediate-to-advanced features of Usenet (usually via automated tools). Various degrees of technical support and general hand-holding are available from many Usenet veterans. Send us some E-mail describing your needs to our administrative address below, and we'll try to help, or at least refer you to the right knowledgeable individual(s).

-- And Follow-ups?

If the only newsgroup you have specified is rec.radio.info, then the Followup-To: field will always be set to poster. If you do not want this, you must supply a Followup-To line of your own, and we will honor that one, as long as it is a subset of the original Newsgroups line.

If you specify newsgroups to cross-post to, then the Followup-To field will be set to include all the cross-posted groups, excepting rec.radio.info itself. Again, if you do not wish this behavior, supply your own Followup-To line.

We maintain other standards on the various RFC-1036 (news transport) header lines. For example, if the article is appropriate for passing into the Packet Radio Information Network, we encapsulate the Packet Bulletin Identifier (BID) in the Message-ID: news header line indicating the machine of origin as the ampr.org domain:

```
 Message-ID: <$opa.55.1994@ampr.org>
```

where the Packet Radio BID, in this example, is `$OPA.55', and it was posted in the year 1994, because some of the Bid numbers are cycled yearly. Hopefully, this can be used as a key to re-introduce the articles for the Packet Radio network. Also, if the article is a repost of an already existing information article in the rec.radio heirarchy, we ensure that the References: header line is linked to that previously posted article. This also helps to tag articles, and may be used for additional filtering if needed.

Since the articles are archived, please use the Summary and Keywords header lines to help one search for your article.

-- Why have I received no reply from you?

We never reject anything in silence, and we make a point of it to answer all our mail. However, E-mail, like a brain cell, can and does get lost, every now and again.

So, if you send us something, and you don't see it appear it rec.radio.info, and you still have not heard from us in reply after say, five days, you can be pretty sure that either your mail never reached us, or that our answer has never reached you. In that case, please try again (We will filter out duplicates).

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

(Adapted, with permission, from the original article written by Mark Salyzyn, AG4YD, ex-VE6MGS.)

well surely you need one connector one end and another the other.

i would look under the connector name ie BNC to SMA lead

sounds sensible to me

bit like using a seach engine to find the info yourself rather than asking
others...
lots of lazy people around now-a-days;')

mike

In my office we often experience instances of a "galloping" sort of buzz periodically coming from the PC speakers near co-workers who have Cingular GSM cell phones. A preliminary Web search turns up many instances of this problem. My understanding is that these phones periodically communicate with the network, and during these brief bursts the carrier is modulated at around 200 Hz resulting is a clear, repeatable buzz pattern. How is this buzz getting into the PC speaker amplifier, and, more importantly, how can it be prevented?

Thanks,
Doug

You could;

1) Try different makes of speakers until you find some that are not as susceptible to the interference. Ones with metal cases might be better shielded.
2) Move the speakers to a location further from the phones. Like placing them on the floor under the desks.

3) Buy snap-on ferrite chokes from Radio Shack and put them on the audio
and power cables going into the speaker amplifiers.

The latest theory on the disappearing bee populations is that
electro-magnetic cell phone emissions are disorienting the bees. Makes
you kind of wonder doesn't it?

"DougSlug" <dougslug@hotmail.com> wrote in message
news:qSxXh.61$8K3.37@newsfe12.lga...

> In my office we often experience instances of a "galloping" sort of buzz periodically coming from the PC speakers near co-workers who have Cingular GSM cell phones. A preliminary Web search turns up many instances of this problem. My understanding is that these phones periodically communicate with the network, and during these brief bursts the carrier is modulated at around 200 Hz resulting is a clear, repeatable buzz pattern. How is this buzz getting into the PC speaker amplifier, and, more importantly, how can it be prevented?

The phones do communicate regularly with the network.  The network must be constantly updated with whose phones are switched on and which cell tower is providing service.  (It would be impractical to ring you for an incoming call if the network had to query every tower in the world, "Hey, I have a call for DougSlug.  Who has him???")

This is a surprisingly common form of Electromagnetic Interference (EMI). The RF is being coupled into the wiring and changing the conduction of the small transistor amplifier inside one of the speakers, the one with the light and switches.

At work, I usually know when my co-workers cell phone will ring, because MY speakers emit a bup-bup-bup-buzz right before the ring.  See, he usually keeps his phone next to the cubicle panel on his side, but by chance just inches away from my speakers.  I have heard the same thing on TV, when a performer is wearing both a wireless mike and a cell phone.

Rerouting the wires or relocating the phone is the obvious solution, as distance is your friend in these cases.  Otherwise, adding a few ferrites to the speaker lines may work. They present a high impedance to RF traveling along the wires, but have negligible effect on the audio signal.  (You probably already own ferrites pre-installed in some of your wiring -- you just didn't know it.  The various connecting cords for your camcorder have those fat lumps in them.  Those are ferrites.

Ferrites are available for purchase in many radio and electronic stores in a form which closes, clamshell-style around the wire.  You put two or three along the wire and *presto* no more buzz.  Wrapping the wire multiple times around a ferrite before snapping it closed can help immensely.  (This assumes you have some available slack in the speaker wires.)

Some theory here: http://en.wikipedia.org/wiki/Choke_(electronics)

http://www.radioshack.com/sm-snap-together-ferrite-choke-core--pi-2103222.html  has them, but overpriced compared to the $1.00 apiece I pay for them at the San Diego-area ham radio swap meet.

Also around a dollar here:
http://www.mouser.com/search/Refine.aspx?Msid=59710000&Ns=P_MfrPartNumber%7C0%7C%7CP_SField

I cannot advise you what to buy, but If you spring for a few of each at the $1.00 level, I really think you'll find something that works.  Shipping is extra but Mouser will sell in small quantities.  Thanks, Mouser.

Good luck.  If you go this route, please let us know what worked and how many.  TKS.

In this day and age of 0's & 1's, I wonder if analog scanners are
still made.  I came across Kaito KA007 (covers VHF Hi 143-174 MHz)
according to amazon.com selling in US for $34.95.

I wonder tuning analog scanner fun.  Anyone here scanning analog way?

Regards,
=CE=B2ish

I never fully understood why Hosstraders was on Friday and Saturday rather
than on Saturday and Sunday, since lots and lots of people can't get out
of work on Friday.

So now, I guess my question is, why is NEARfest doing the same thing?

(Looking forward to it in any case...)   :-)

Turning off the phones, the PC speakers, the computers or removing the electrical supply to the building or city would work if there are no provisions for backup power...But I have a suspicion that this was not the answer you seek   :)

You will notice that various noise is generated by any electronics network utilising microprocessors, such as cell phones ( or any transceivers ), phone switches/PBX, computer/FAX devices, and security equipment, all of which emit or generate RF signals ,whether they are super-imposed with audio frequencies or not. This usually includes most micro-processor-controlled electronics...harmonics will bleed through into your regular phones, TVs, scanners, PCs, any amplifiers, and AM/FM/LW/SW radio equipment either internally or from being in close proximity to any other electronics devices too.

That's why you aren't allowed to use cell phones of any type on any network in hospitals where you might interfere with someone's pacemaker or diagnostic equipment, and testing has provided facts to back up the claims with viable statistics. The hospital administrations have decided that the best way to cure the possibility of interference from outside/inside/portable sources is to turn " OFF " the device which has the potential to cause it. Portable cell phones provide an ever changing source of interference with many variables involved as the carrier of the device moves about, and this can cause unpredictable consequences.

If you're computers are not losing or misinterpreting data input/output, then you might want to live with the slight noise problem and let the cell phone industry survive and thrive.

Jack

Jack, Rich Greene is the main troll around these parts. He has been trolling our group for years and has even claimed he owns it. He is a real nutcase. It was discovered through court martial records under FOIA that he was court martialed in service. He has admitted to the crimes he committed. He is a real sick bastard I will tell you that.

You won't find anyone around these parts that like him. He is a loner with no friends. His first wife will tell you allot more about the little pussy ass pissant.

He gets a kick out of threatening the families of veterans by postings messages pretending to have sent mail packages that will cause harm to whoever opens the package. The USPS inspectors got wind of what he was doing and substantiated the case against him. Since then he has stopped threatening the families of disabled veterans via the postal service. That is good news and proof the system does work and you know how to play it.

I am sure you heard of the money scams he tried to pull on AMR and AWV. He even used a work computer to solicit cash from veterans. I sure wouldn't ever buy anything from that creep after what he was caught doing. He is a nutcase, certified type.

>

I got my first cell phone about 8 months ago and it didn't take long for me to run into this.  At work I have headphones on most of the time, listening either to AM radio or to an audio cassette (both from the same Walkman-type unit).  Those brief digital bursts occur about every 10 minutes and if the headphone cord is close to my cell phone, the sounds can be very loud in the headphones.  I've even heard the bursts coming from the speakers connected to my home stereo, with the audio source not running (connected to CD player, but volume is still turned up), and the cell phone is lying on the table in the next room.

As you said, with a bit of practice I can tell if my cell phone is actually about to ring or is just checking in with the network. A couple of days ago the digital pattern was of a type I'd never heard before and when I looked down to look at my phone, I found that someone had sent me a text message (a feature I normally don't use).

I mentioned this recently to a friend of mine and he told me about a somewhat similar experience that happened to him when he was a kid, about 25 years ago. He lived in a house with somewhat ancient telephone wiring and, for some reason he never did figure out, the telephone would emit a very brief "ghost ring" right before it would ring for real. That is, it was an electromechanical phone (this was early 1970s) and before the first "genuine" ring, the phone would first put out one very brief "ping." Apparently there was something in the telephone network that would send out a very brief "pip" that would ding the bell just once (the actual ring is a constant string of pulses). As a boy in his early teens, my friend noticed this but said nothing about it to anyone else. Whenever he was in the house and heard that brief "ping," he knew that the telephone would ring a couple of seconds later. He had an aunt who was loud, obnoxious, stupid, five feet in all directions, and totally clueless about technology; whenever she'd come by the house for a visit, my friend would terrorize her by hollering "PHONE'S GONNA RING!!!!" about two seconds before it actually did. She never noticed the "ghost pings." She never did catch on and was totally convinced that he was possessed.

Some time later, the tables got turned on him, briefly. Whenever he was in the house alone, with total quiet, sometimes he could hear voices and couldn't figure out where they were coming from. It wasn't constant, either. Very faint whispers. Very strange. They seemed to be coming from the kitchen and he couldn't quite bring himself to believe that he was hearing ghosts. He finally got the clue he needed late one night when he raided the refrigerator and distinctly heard the '70s song "The Sound of Philadelphia" coming from nowhere. He couldn't picture a bunch of ghosts sitting around a kitchen playing disco music, so he poked around and finally discovered the source of all this: a flashlight! It was an old-style flashlight, with two batteries, an incandescent bulb, a metal case, and a big magnet so it would stick to the fridge. Apparently the spring inside the flashlight was forming a junction diode and was rectifying an AM radio station signal. The "voices" were apparently from a talk show during certain hours.

The BC780XLT is in excellent condition inside but outside has scratches due to it being mobile. The guy I got it from on a trade said he lost the power supply and antenna.

I checked out the unit with a compatible power supply but it will not go with unit.  Will NOT be DOA.

Price:  $225 obo plus shipping and Paypal fees.

Last time i tuned a band or 5 (2 minutes ago) 99% of the chatter was in analog. I would say there might be still 1 or 2 made for old analog...

:o)

Joe.

In this day and age of 0's & 1's, I wonder if analog scanners are still made.  I came across Kaito KA007 (covers VHF Hi 143-174 MHz) according to amazon.com selling in US for $34.95.

I wonder tuning analog scanner fun.  Anyone here scanning analog way?

Regards,
?ish

alot of this can also be caused by inductive coupling
to speaker or headphone coils.

mike

The old UHF CB Frequencies are what they use in GMRS radios.

I don't hear anything on cordless frequencies from 43-49 MHz but I
sometimes hear 5.9Ghz cordless in the 462-470 Mhz range.

I had an El Cheapo phone on my nightstand for years.  It was a one-piece
unit that I laid face-down to hang up.  It always gave out a chirp right
before the ring, which I imagine was related to the ghost ring your friend
heard.

In addition, that phone emitted an offbeat three chirp pattern every evening
about 10:45.  If my wife and I were there together, one of us would usually
wisecrack about the FBI and phone taps. I imagine it had something to do
with testing the line. I had forgetten all about that.

I recall during my teen years in Fort Worth, TX (Southwestern Bell) in the mid-80s, during the summer months I would stay up for most of the night.  I had one of those el-cheapo electronic handheld phones in my room and it always emitted a quick chirp at the same time each night: 2:10 a.m., without fail!  My guess is that it was responding to some high-voltage blip sent down the network by the phone company for maintenance tasks or something. Cecil Adams covered this topic in his column "The Straight Dope."

Actually, it *is* true.

The "UHF CB" frequencies were part of the old "Class A" CB.  Class A was
renamed GMRS.  A license is required now, just as it was back in the old
days.

Renamed and reorganized.  FRS is one of the Citizens Band radio services,
which uses UHF.  GMRS is the old "Class A" CB, just renamed; but still
remains one of the "Personal Radio Services"

We in the mvt7100 radio scanner group are fed up with spam.

The group was formed before spam like this was an issue and as
mvt9000 moderator I delete spammers membership every week
and make all new posts  go through me for 3 months.

I have emailed the moderator of the group mvt7100  for the last two
years and have received no replies  at all in that time.

So effectively one can assume they have ceased interest in the group.

For the last two years I have pleaded with yahoogroups to implement a scheme where new moderators can be appointed and have sent them copies of my emails to the mvt7100 moderator,  I told them that not one of them have been answered.

I sent my resume as a responsible appointee

They still say to make a NEW GROUP as there is no way Yahoo can help.

We have done that at mvt-7100  new group

Most like me have been group members for years .

WHY IN THE HECK SHOULD SPAMMERS KILL OUR HOBBY
GROUPS, MAKE YAHOO A MORE RESPONSIBLE HOST SITE.

If enough members of groups go and email yahoo to tell them to stop spam then maybe they will come up with an easy solution to use.

I can suggest an easy method for yahoogroups to use but they are a Multinational and have heaps of brain power.

Just tell them to use change it now ,not later when we have all changed to using other hosts for a spam free group messages.

Power is in the amount of emails yahoo gets.

Just copy and send this one

I have never been to either group, but it sounds to me like you have a slight ego problem. If enough people in the one group are bothered by spam, start another group where it will not be allowed. Post in the first group a link to your new spam free group. If there is not enough people interested to come to your new group, trying to get Yahoo to force you to be the moderator is not an answer. If not enough people are willing to leave the one group to come to yours, then it tells me, you need to see why people are not interested in your groups.

Some seem to be. I used to be able to hear my local McDonald's on my scanners, but can't anymore.  I couldn't pick them up in the 900 MHZ range either, even in wide fm mode.

Doing a search all the way up to the 2.4 GHZ range in am, fm, amd wide fm modes, I could no longer hear them.

They're either encrypted, digital, or wired.

I think only some are now, although they'll probably all eventually switch to where we can no longer hear them on regular scanners.

curious. Since Ebay allows legal scanners to be sold...

If you have a cell capable scanner bought in the U.S. before the law
outlawing manufacture of such scanners went into effect (which is
perfectly leggal to sell in the U.S.) and Ebay pulled your item
because you said "unblocked" or "cell capable", ........

then what ?

While it is perfectly legal to own, use or privately sell a pre-ban scanner in the U.S., there is not much to be done if ebay, a private venue [of which you have to agree to TOS to use] decides that they do not want people residing in the USA to sell unblocked scanners to other people living in the USA.
I think that is the case. Ebay decided that, rather than going on a case by case basis, to just issue a general blanket ban.

>

though under different ebay names ( his old ebay ID's were - are
permanently suspended ) ..... he's done this several times in the
past. if it goes as usual ..... several ( sock puppet ) bidders will
take the price up to between $500 - $700 and he'll appear to make
the sale.

if you message him and ask if he is insane , he'll retort that " you "
simply don't understand the ( implied ) value of this " special
abilities " scanner and people " in the know " will bid properly on
it ( as evidenced by the shocking sock puppet bids
that eventually ensue. ) because of their superior understanding of
it's value !!! ya yay ahaha ha ah a

he usually publishes the questions ( probably sock puppets as well )
and answers in his auction ....... all this , tho oddly bizarre,
eventually to be a kind of scam to try to get some other person /s to
bite into his ploy and bid some outrageous price for this tired old
scanner !

in the feedback section , he usually comments about the high bidder'
s superior knowledge and appreciation of this " special " scanner
.....
and the high bidder also raves about how great the $700 deal he got on
this beauty was !!!!! last time he did it , he screwed up and posted
the buyer's feedback before the buyer could have had time to get
possession of it ( think it was a few hours after the auction ended )

.ya ya yahh ah aha .   far  as I can tell, in his last several tries ,  no one outside his sock puppet crowd has bitten on the scam and bid on it ....... even so .. it still doesn't seem to stop him from trying .....  over and over again !  what a dip$hit !!!  ay ay yaah aha haa

makes you wonder how he can get so many sock puppet ebay I.Ds tho ....... not that large a selection of  services over there in Henderson .....  if that's where he really is !

maybe he fakes the sales to set up a  ( phony ) historical auction sales value of the scanner .. hoping to eventually get a phish to reel in  ..... dunno ..........

Good day,

Can anyone provide me with a link where I can find Scanner Frequencies for the April 29 Indy300 race at the Kansas City Speedway?

Thanks ahead of time,

Wes

What are the 30MHz to 512MHz bandplans for the NW part of the US (WA state especially)?

Anyone know?

I generally see most utility activity from 450MHz through 470MHz and 150MHz through 160MHz.

I own a Radio Shack Pro-38 (10 channel H/H), Pro-2030 and Pro-2040 base (60 and 100 channel), and a Pro-2024 (60 channel).

Actually I'd like having 250 channels all one one radio.

Basically I can cover:

29-54MHz, 108-136MHz, 136-174MHz, 380-512MHz, then 806 to 956MHz (in 3 segments).

Oh yeah, and I do like also listening to 2m and 70cm (140-148MHz and 440-448MHz).

My antenna is a set of stacked Antenex Yagi's on a tower 75' up in the air.

Greg

I have two nice big analog S-Meters for sale. They were never used. They measure about 1" by 1" and have 4 metal tabs on the back of each. I bought them awhile back for a project that was never done. I really don't know what they are worth, so I'll take offers.

Frank

Yes, you see them.
Alot get shit canned too, and alot are based in Canada/Asia, who are not
under the ridiculous restrictions of U.S. sellers.

```

I use the DIAMOND-RH771 Antenna on my receivers and it pulls in a lot
of signals and the only drawback its 30cm in height.

Regards Lino.

I'm mean the Sheriff's Department.  Good God, they were so huge they
couldn't fit into the tactical van.  Cops, as usual, overweight & way
too late.  They love to put all their gear on, they just hope it's all
over once they get there.....unfortunately for the public, it usually
is.

Did you see the "Buba" cop trying to run with a shotgun in one hand and the
other holding his pants up.
CNN #1 shot for two days

Burr

I recently acquired a Pro-2006 scanner with a modification I do not recognize.  The rear of the scanner has been modified to include a 2nd "BNC jack" labelled "Verifier."   inside the scanner I noticed that wires from this BNC connector goes to the volume and squelch controls in the scanner.

Does anyone know what mod this is?

Sounds bizzare, I thought I did every mod possible to mine, never heard of
this one.
Am 99% sure it was not in Cheeks mod books either.

Sounds like the 'discriminator" take off point.  This is for feeding audio
into a computer, maybe through an external device to decode the digital
signals.

This mod was professionally done and labeled also.  I wonder if this is
10.7mhz IF output mod.  I dont want to plug anything in there unless I
am sure.  I will keep checking this site.  Hopefully, someone will have
a clue.  Thanks for your info.

there was a time , back when ,  when a person could tune in the analog
cellfone band and listen to people using their phones.  the point
being that some vendors  at swap meets  and outdoor markets  used
their cellfones to  place and verify credit card purchases. in this
era , long ago, " other people  " might eavesdrop on these
transactions and steal people's credit card information.

all you had to do was tune in on the tower " input " end of the cellfone connection and hook up a credit card verifone unit to your scanner and " all " of the transaction would be printed out on that little thermal printer of the card verifier. these older portable credit card units connected to the audio output - input of the cellfone. discriminator - slicer outputs did not work well with any of the old early verifone transaction units as they expected - needed tailored audio output that replicated what you hear in your cellfone.

what you describe sounds a little bit like it might be related to something like that ! just a thought !

hacking early attempts at verifone systems  is old , old news.   first cellfone credit card authorizations at swap meets were strictly vocal . the merchant called his verifone ( or similar service )  number and gave all the info on the ( cellphone ) phone by voice.  THAT was taaooooo easy to rip off. next was a simplistic system of  manually dialing a number , giving them your merchant number, and the  machine ( hooked to the cellfone ) would send the info  in a non encrypted modem tone system and get the info back on a thermal printer. THAT too was easy to  rip  but way better than saying it out loud on a cellfone.   things have gotten a LOT more difficult since those  early days , and especially after the government instituted the EE3 requirements for cellular services !

the info is likely still in the alt.2600 historical files and look for Verifone Junior password lists as well.   none of it has been usable since  sometime in the '89 - '92 era ( depending upon where you lived , it lasted longer out in the country ).

try looking here
http://www.astalavista.com/index.php?section=docsys&cmd=details&id=65

same as it ever was .........

Hello, I have a Uniden BR330T scanner. I'd like to make a mobile antenna for it from an old whip antenna that will be cut down to about 16". The diameter at the base of the whip is no more than 1/16".

I'm looking for an adapter (the input on the scanner is of course female) that I can insert the base of the whip into, and connect it to the adapter. SMA is preferred, but I'll accept BNC if no such SMA adapter exists.

Looking at the pictures on websites, I can't tell which adapter would fit my needs. If anyone could suggest something that will do the job well, that would be excellent.

Thanks.

*** Welcome to rec.radio.info! ***

Welcome to rec.radio.info, a group that aims to provide a noise-free source of information and news for the entire rec.radio hierarchy.

Two introductory articles about rec.radio.info are posted to the group every month. You are now reading the first article, which explains what rec.radio.info is, and answers some Frequently Asked Questions. The second article is titled Posting Guidelines, and you only need to read it if you want to submit an article to rec.radio.info.

You can skip to the next section of this article by searching for the next
" -- " string. The sections available are:
- What is the purpose of rec.radio.info?
- Why are messages almost always cross posted to rec.radio.info?
- What is a 'follow-up', and what does 'moderated' mean?
- OK, so now I know what 'moderated' means. Tell me more.
- What type of material is considered inappropriate?
- I do not have access to news, how can I get the information posted to rec.radio.info?
- Will the material appearing in rec.radio.info be archived somewhere?
- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

-- What is the purpose of rec.radio.info?

The purpose or charter of rec.radio.info is to provide the Usenet community with a resource for information, news, and facts about any and all things radio.

All the other rec.radio groups are intended for discussions and general chit chat about radio. Rec.radio.info will contain informational, factual articles only. Follow-ups are redirected to an appropriate other group, and further discussion (if any) will not take place in rec.radio.info.

In order to ensure that rec.radio.info contains only appropriate articles, it was decided to create the group as a moderated newsgroup.

-- Why are messages almost always cross posted to rec.radio.info?

It provides a "tag" for each article to be assembled into a filtered presentation in rec.radio.info (even with cross-posting, only one message, with a unique Message-ID, is propagated across the net). This tag also facilitates a pre-existing method of dropping or canceling the articles locally within the discussion groups if you don't want to see them. This accommodates individuals who want to separate the bulletins from the discussions, discussions from the bulletins, as well as those who are adamant about not reading another newsgroup and wanted to see everything all in one basket.

With the total size of Usenet (in number of newsgroups and total traffic) doubling every year or so, this is no insignificant contribution to reducing information noise and chaos. Making the discussion groups a catch-all, and making extra newsgroups filters on that catch-all, is also the most realistic way to implement such a scheme (It's not intuitively obvious what the charter, contents, and general appropriate topics for each and every newsgroup are. Seeing FAQ's and charter/intro postings in the home newsgroup is beneficial for new readers).

By cross-posting one only is adding a few tens of bytes to each bulletin (to specify the extra group on the Newsgroups line), but are adding the capability for very powerful filtering features available on most news servers, listservers and readers. Your local news guru could probably explain these features in more detail.

In rn, for example, according to Leanne Phillips in her rn kill-file FAQ, add a line of the form:

```
/Newsgroups:.*[ ,]rec\.radio\.info/h:j
```

either in ~/News/KILL (if you don't want to see rec.radio.info articles anywhere) or ~/News/rec/radio/amateur/misc/KILL (if you don't want to see them just in rec.radio.amateur.misc). The latter method means your kill file will only be consulted during rec.radio.amateur.misc (and hence runs more efficiently), and will probably work for most people.

In nn, according to Bill Wohler in his nn FAQ, add a line of the form:

```
rec.radio.info:!s/:^
```

in ~/.nn/kill (if you don't want to see rec.radio.info articles anywhere), or put the following lines:

```
sequence
```

rec.radio.info
rec.radio.

at the end of ~/.nn/init in order to see all the rec.radio.info bulletins first, then read the remaining rec.radio.* without the bulletins.

-- What is a 'follow-up', and what does 'moderated' mean?

If you are new to Usenet and are not familiar with the terminology, you might want to read the general introductory articles found in the newsgroup news.announce.newusers. Doing so will make your life on the net much easier, and will probably save you from making silly beginner's mistakes.

If you think that at this moment you are reading an echo, a conference, or a bulletin board, I'd also strongly suggest a trip over to news.announce.newusers.

For the rest of this article, we will assume you have a basic knowledge of Usenet terminology and mechanics.

A moderated group means that any article that needs to be posted to the group has to be accepted by the moderator of the group. Since we need to ensure that followups to an article (discussion) do not show up in the rec.radio.info newsgroup, the `Followup-To:' header line contains a newsgroup that is appropriate for discussions about the specific article.

-- OK, so now I know what 'moderated' means. Tell me more.

Rec.radio.info is a moderated newsgroup, which means that all articles submitted to the group will have to be approved by the moderator first.

The current moderator of the group is the rec.radio.amateur.moderated Moderation Team.  Submissions to rec.radio.info can be posted, or e-mailed to:

rec-radio-info@panix.com

Comments, criticisms, suggestions or questions about the group can be e-mailed to:

rec-radio-info-request@panix.com

But before you do so, please be sure to check out the "Posting Guidelines" article.

The influence of the moderator should be minimal and of an administrative nature, consisting chiefly of weeding out obviously inappropriate articles, while making sure correct headers etc. are used for the appropriate ones.

-- What type of material is considered inappropriate?

There are three broad categories of articles which will be rejected by the moderator:

1) Requests for information: rec.radio.info is strictly a one-way street. We receive information in our mailbox; we then post it to rec.radio.info. Requests for specific information belong in the normal discussion newsgroups. If your request gets answered, you might consider passing the answer on to rec.radio.info, though. Especially if you can edit it into a informational, rather than a discussion, format.

2) Obvious discussion articles, or articles that appear unsubstantiated.

3) Commercial stuff: a relatively unbiased test of a radio product would be accepted, but any hint of for-profit might be reason for rejection. For three reasons: This is not the purpose of the list, for-profit is a controversial topic, and this list may be passed onto Amateur Packet Radio (where for-profit is prohibited except under certain provisos).

   rec.radio.swap may be more deserving of the posting in any matter.

   Similarly, copyrighted material generally cannot be used. If it's TRULY worthwhile to the net, We would recommend obtaining permission from the copyright holder. Please note the source, and if permission was given. We reserve the right to make the final decision concerning appropriateness in all situations. In most cases, a brief summary of, or pointer to, the copyrighted information may be all we can allow.

-- I do not have access to news, how can I get the information posted to rec.radio.info?

Google has an excellent web interface to Usenet newsgroups. It is available at:

http://groups.google.com

It supports both reading and posting.

-- Will the material appearing in rec.radio.info be archived somewhere?

Yes. See Google Groups above.

Effectively this means that anything you post to rec.radio.info will be permanently stored, so your work will not be lost.

-- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as time critical.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires co-operation and goodwill to be beneficial to the community in the rec.radio hierarchy.

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

Back to DEERFIELD!!!!

W1RC, K1TWF and N1IWV invite ALL radio enthusiasts to attend the Spring 2007 NEAR-Fest at Deerfield on Friday May 4th and Saturday May 5th 2007!  The Deerfield (NH) Fairgrounds was the site of the legendary "Hosstraders Tailgate Swapfest" for fifteen years until the event was moved in 1993.  "Hosstraders" is just a memory now but NEAR-Fest is continuing the "Grand Tradition" and returning to the

```
magnificent Deerfield Fairgrounds.

Full details may be found at: www.near-fest.com

I got two of the FLEX-TENNA's   ANT45&46 from Grove.

I wonder if these are from the guy that made the "Tiny Tenna"? I think his name was Bill way up North-East

That's why I tell newbies to find a local scanner group. They know all
the stuff, a long time before it makes it to the public.

Most of the new scanners can be flash upgraded to support any rebanding.
just read the
'features' of a scanner before you buy. Not sure about ALL scanners
especially the cheaper
ones.

Are there any antennas that anyone just recommends is a "bad ass mofo"
type antenna. I have a portable scanner and I have local fire
frequencies at 33.xx and my scanner seems to hardly like to play them.
I found this

http://www.ccrane.com/antennas/scanner-antennas/gainer-scanner-antenna.aspx

but I can't find more info on it, and at least some reviews.
I have searched Google and Google's Froogle, and that's the only one I

can come up with. How can you tell what antenna is a "bad ass" or just good? I don't really understand how to know unless I buy it and try it.

Has anyone taken a scanner to Europe and if so other than the language barrier was it worthwhile? My wife and I are planning a vacation trip in the next few months and can't find anyone who will answer my question. We will be in Germany, Italy and Croatia.

Thanks for any reply.

Ron

Ron,
I'll reply, I have not taken a scanner to Europe but I have friends who scan over there.

The thing you need to ask is will they let you in country with a scanner???? I take my shortwave radio every where but have not taken a scanner yet.

Hope it helps a little.

Burr

I think you mean 800 MHz rebanding. And yes it is going on!

Germany is rather restrictive. First, the scanner needs to be approved. It needs to have one of the following markings: CE, BZT or BMPT. Second, so called 'BOS Kommunikation' (authorities, police, ambulances, fire brigade) may only be received by people with a 'BOS Genehmigung' (BOS licence).

If a scanner is found with non-licensed frequencies programmed, it is considered a violation of the law.

I`m not shure if that is correct. I think if the scanner doesn`t have any
freq band that is legal (e.g. fm radio) it is a violation. If you look at
all the places one can buy a scanner in Germany they all would be ilegal
since they all can receive stuff that isn`t meant for public listening.
Afaik it is legal to buy and own a scanner in Germany, but it is ilegal to
listen to everbody out there.

Hans from Germany

Not only do the channel numbers change, the scanner needs to now contain
and old and new channel table and be able to read the control flag that
dictates from which table to look up. Otherwise some systems that don't
get re-banded, IE the many interleaved systems, won't be able to be
received. It sounds trivial until you consider all the variables,

 The rebanding is occurring in the 800 MHz Band only. The only thing
 for Motorola systems is that the channel numbers will change so that
 is all that is needed to be updated in the scanner firmware.

Bout the only thing I can think of is try your local craigslist, scanners are
usually up there from time to time.
Besides ebay theres not much options unless you happen to run into one at a
flea market/garage sale or something.
Even then, for a decent old desktop like the pro 2005/06, plan on paying more
than $100 anyhow.

I live in Johnstown, PA, and sometimes travel to New York, NY and Atlantic City, NJ and was wondering if in any of those 3 places if there is a really really nice radio scanner type store. I like to look around at older scanners not just newer ones. I mean a store that would basically be a radio scanner enthusiast's wildest dream.

I'm new in here. Looks like this might be a good group for me to ask some questions. I used to enjoy scanners back in the day when they were all analog, and before police, fire and EMS went to trunked, digital radios. I don't know much about scanning in todays world.

I am interested in learning about pc radio scanning software. I have heard of software/hardware you can use in conjunction with your desk top pc that allows you to use the computer to scan radio freq's. I live in an apartment condo so having a 60 foot antennae is out of the question. Does anyone know about this software for pc that can advise me where to look for it, how good is it, etc?

I am interested in monitoring police, fire, EMS, military, little green men from Alpha Centauri :-) just about anything that would be interesting. I could really use some guidance from people who are experienced in radio scanning so I can figure out what I need, how to use it, and what to expect.

My wife says I need a hobby :-)

Thanks for any information you folks can pass along!

well....I am still looking for a new scanner....have come down to
three choices
pro2096
bc996t
bc15t

anyone had the chance to try these radios,

Is there really that much difference in em

I am kinda intrigued by the 3 mile feature on the uniden

thanks
bob

I have been using a 996T for about 5 weeks now and it works pretty good . I picked that one over the other two  you are  looking at , because  I wanted the close call feature and apco 25 decoding . you can adjust the decode threshold which is a good feature , here are the problems I have noticed . When in weather alert mode about every 5 seconds into a conversation you will get a 1 second audio cutout . That, I dont like and nothing you can do about that except turn off that feature. Close call works great but I have not figured out a way to disable or lockout the fm radio band (88-108). other than that be careful using the USAD software I accidently deleted all of the  programming in the unit and had to reload it. I found the arc 996 software more friendly.
The biggest problem I find is that its made in China , and we all know about chinese goods are !! time will tell and keep your receipt and warrenty card

In my experience the 2096 has better ears, especially on 800Mhz, but less
features. It also may be a better decoder for APCO25. That being said, you
can find a 2096 for around $300+, which is way cheaper than a 996T

I'm disabled and lay in bed most of the day. Looking for a new 'toy' to play with. And yes, I already know it's illegal, etc., So only flame if it's a funny one.

I'm in a large apartment complex and no outdoor antennas are allowed, but just this building would be interesting. I also want a scanner that has computer set up. And capable of listening in on regular phones and cell phones. Budget is around $500.

I'm in San Diego CA. USA and was wondering if anyone can tell me where to look and what I want. Or if a guy wants to build one, or I have to buy it in another country, or whatever.

Thanks, Bob

The days of listening to cell phones is long past. Almost no analog left.
There are still some old style cordless phones you could hear, but they
would be getting rare now. The digital ones keep getting cheaper, so as
people replace old phones they often end up with one you can't hear with a
scanner.

About 6 years agoI lived in an apartment complex and was able to listen to many phone conversations.  I used a telescoping whip on my scanner (about $10 from RS).

Scan 46-47 mhz,   49-50mhz,  & 900-920mhz

Good luck!  (I lost interest in listening to cordless calls when they became mostly foreign languages), but I did hear some nice phone sex conversations.

Since you say you live in a complex, I would use headphones.

hey bob .......

it's what the other posts said about cellfones and most cordless
phones. the era of scanners and listening to all that stuff is
pretty much history, especially there on the west coast.

instead try wardriving for wireless wi-fi APs from your apartment
( instead of scanners ) or FTA / pay satellite channel hacking.

you can probably have as much or more fun doing those things
from your apartment as you would have been able to do using a scanner.
you'd probably be " stunned " at what you'll see when using a
lan packet sniffer on your neighbors wi-fi APs ..... prolly way better
than listening to cellfones because most people think they
have privacy during their web access adventures ah aha ha hah a
!! trippy ..........

look up " hacking wi-fi public access APs " in google .....
type FTA satellites into google or check
out alt.satellite.expressview for more info on these subjects.
plenty of " slightly naughty " technical entertainment remains,
it's just in new and different areas .........

http://www.cs.wright.edu/~pmateti/InternetSecurity/Lectures/WirelessHacks/Mateti-WirelessHacks.htm

Got a old (pre 90s) VCR that can manually tune to VHF-Lo, VHF-Hi, and UHF TV frequencies.  It has 16 preset channels.  I swear one time I heard two-way radio from a local utility company while manually tuning.  I suspect it was a inter modulation signal.

That got me into thinking why not modify it to extend the frequency range from its default range of 174-216 MHz (VHF) and 470-698 MHz (UHF)?  I would imagine it might be possible to salvage the oscillator/tuner for this purpose.  Any thoughts?

Thanks in advance.
-Jim

(P.S.  I don't connect TV with this VCR; only use RCA jack for audio)

Sure. Check http://hem.passagen.se/communication/uv916rec.html and
http://hem.passagen.se/communication/supertuner.html for some ideas.

Rene

Just out of idle curiosity, when did the FCC discontinue UHF CB?
I haven't seen any reference to it for some years so I assume it must have
been discontinued.

I'm gonna disagree with that! Where I am there are always lots of analogue cordless phones on the go. I have turned it on now and there are active conversations on 3 of the 8 frequencies. And it's not unusual to get something on all 8.

I agree it's day will come but it's still alive at the moment. Not that it's great listening...

They haven't.... It was renamed the General Mobile Radio Service. (GMRS)
but it is essentially the old Class A Citizens Band from years ago.

They must do things differently in the UK I guess. The last time I looked for a new cordless phone here the cheapest ones they had at most of the stores were digital. Did not even see any of the old style at most places, and that was a while back. Guess they are a lot slower over there with changes.

Some years ago there was an extensive, maybe even multi-part, project in one of the magazines to convert one of those into a wide coverage spectrum analyzer. I even recall seeing kits being sold at a hamfest, once again some years ago.

Yes indeed.  I was hoping there is a simple mod that will allow extra coverage in the frequency.  It seems like an interesting project but I am not that advanced in soldering skill.

Thanks Rene for the link though.  This guy knows what he is doing.  He should start selling finished products.

Silly boy! Digital cordless phones have been on sale in the UK for years. We have them after our analogue one died. No doubt the reason that there are still plenty of analogue cordless phones around is that they are still working. Surely only a fool buys a new product simply because it is new rather than because they need it :)

Charlie.

www.devilfinder.com     How to listen in on cell phones

There is a bunch of information there.They say it is illegal to listen in on cell phone convesations,but that is a bunch of crap.If you have a receiver that can listen in on cell phones (governments and Military have such devices) then you have RIGHT to listen in on cell phones.

I don't own a receiver that can listen in on cell phone conversations,but if I did,I would listen in all I want to.

Well almost certainly a troll but just in case you're not....

We are talking about the UK now. And listening to anything that is not 'public service' (broadcast and CB basically) and that you're not the intended recipient of is an offence under section 48 of the wireless telepgraphy act 2006:

48 Interception and disclosure of messages

(1) A person commits an offence if, otherwise than under the authority of a designated person-

(a) he uses wireless telegraphy apparatus with intent to obtain information as to the contents, sender or addressee of a message (whether sent by means of wireless telegraphy or not) of which neither he nor a person on whose behalf he is acting is an intended recipient

Well yes and no....
Yes..it would work.....
NO....it will have POOR performance as the front end is damn near deaf and
not stable.The IF is set up for a wideband signal, what you want is a
narrowband IF.
YES...it will hear strong signals nearby....
NO...the recovered audio will be VERY low.
NO...if it has any AFC in the front end it will go all over the place..

GOOD thought, but poor platform choice....

Thanks for the reply!

I understand I will need trunking.  That's certainly understandable as is computer programmable.  I don't believe I will need anything REAL fancy as this is a very small town.  The airbase is Mountain Home AFB and I guess I was really wondering which frequency bands to look for.

most scanners have pretty much the same coverage 30-50 mhz, 144 -170 mhz,
420 - 512 mhz, 800 - 999 mhz
these are pretty standard.

check here for more information as to specific frequencies, look around at
the trunking area and aircraft / military
area    Mil-Air is located in the roughly 200 -388 mhz band ( quite large )
make sure the scanner you look at / for
has this band included.

Well that would put him in an area where "T band" Channel 14 is used for
LMR. And 476 MHz is T band. He is hearing a DRT from a system being
tested. Likely NYPD or FD.

*** Welcome to rec.radio.info! ***

Welcome to rec.radio.info, a group that aims to provide a noise-free source of information and news for the entire rec.radio hierarchy.

Two introductory articles about rec.radio.info are posted to the group every month. You are now reading the first article, which explains what rec.radio.info is, and answers some Frequently Asked Questions.  The second article is titled Posting Guidelines, and you only need to read it if you want to submit an article to rec.radio.info.

You can skip to the next section of this article by searching for the next
" -- " string. The sections available are:

- What is the purpose of rec.radio.info?
- Why are messages almost always cross posted to rec.radio.info?
- What is a 'follow-up', and what does 'moderated' mean?
- OK, so now I know what 'moderated' means. Tell me more.
- What type of material is considered inappropriate?
- I do not have access to news, how can I get the information posted to rec.radio.info?
- Will the material appearing in rec.radio.info be archived somewhere?
- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

-- What is the purpose of rec.radio.info?

The purpose or charter of rec.radio.info is to provide the Usenet community with a resource for information, news, and facts about any and all things radio.

All the other rec.radio groups are intended for discussions and general chit chat about radio.  Rec.radio.info will contain informational, factual articles only. Follow-ups are redirected to an appropriate other group, and further discussion (if any) will not take place in rec.radio.info.

In order to ensure that rec.radio.info contains only appropriate articles, it was decided to create the group as a moderated newsgroup.

-- Why are messages almost always cross posted to rec.radio.info?

It provides a "tag" for each article to be assembled into a filtered presentation in rec.radio.info (even with cross-posting, only one message, with a unique Message-ID, is propagated across the net).  This tag also facilitates a pre-existing method of dropping or canceling the articles locally within the discussion groups if you don't want to see them.  This accommodates individuals who want to separate the bulletins from the discussions, discussions from the bulletins, as well as those who are adamant about not reading another newsgroup and wanted to see everything all in one basket.

With the total size of Usenet (in number of newsgroups and total traffic) doubling every year or so, this is no insignificant contribution to reducing information noise and chaos.  Making the discussion groups a catch-all, and making extra newsgroups filters on that catch-all, is also the most realistic way to implement such a scheme (It's not intuitively obvious what the charter, contents, and general appropriate topics for each and every newsgroup are.  Seeing FAQ's and charter/intro postings in the home newsgroup is beneficial for new readers).

By cross-posting one only is adding a few tens of bytes to each bulletin (to specify the extra group on the Newsgroups line), but are adding the capability for very powerful filtering features available on most news servers, listservers and readers. Your local news guru could probably explain these features in more detail.

In rn, for example, according to Leanne Phillips in her rn kill-file FAQ, add a line of the form:

```
/Newsgroups:.*[ ,]rec\.radio\.info/h:j
```

either in ~/News/KILL (if you don't want to see rec.radio.info articles anywhere) or ~/News/rec/radio/amateur/misc/KILL (if you don't want to see them just in rec.radio.amateur.misc). The latter method means your kill file will only be consulted during rec.radio.amateur.misc (and hence runs more efficiently), and will probably work for most people.

In nn, according to Bill Wohler in his nn FAQ, add a line of the form:

```
rec.radio.info:!s/:^
```

in ~/.nn/kill (if you don't want to see rec.radio.info articles anywhere), or put the following lines:

```
sequence
rec.radio.info
rec.radio.
```

at the end of ~/.nn/init in order to see all the rec.radio.info bulletins first, then read the remaining rec.radio.* without the bulletins.

-- What is a 'follow-up', and what does 'moderated' mean?

If you are new to Usenet and are not familiar with the terminology, you might want to read the general introductory articles found in the newsgroup news.announce.newusers. Doing so will make your life on the net much easier, and will probably save you from making silly beginner's mistakes.

If you think that at this moment you are reading an echo, a conference, or a bulletin board, I'd also strongly suggest a trip over to news.announce.newusers.

For the rest of this article, we will assume you have a basic knowledge of Usenet terminology and mechanics.

A moderated group means that any article that needs to be posted to the group has to be accepted by the moderator of the group. Since we need to ensure that followups to an article (discussion) do not show up in the rec.radio.info newsgroup, the `Followup-To:' header line contains a newsgroup that is appropriate for discussions about the specific article.

-- OK, so now I know what 'moderated' means. Tell me more.

Rec.radio.info is a moderated newsgroup, which means that all articles submitted to the group will have to be approved by the moderator first.

The current moderator of the group is the rec.radio.amateur.moderated Moderation Team.  Submissions to rec.radio.info can be posted, or e-mailed to:

rec-radio-info@panix.com

Comments, criticisms, suggestions or questions about the group can be e-mailed to:

rec-radio-info-request@panix.com

But before you do so, please be sure to check out the "Posting Guidelines" article.

The influence of the moderator should be minimal and of an administrative nature, consisting chiefly of weeding out obviously inappropriate articles, while making sure correct headers etc. are used for the appropriate ones.

-- What type of material is considered inappropriate?

There are three broad categories of articles which will be rejected by the moderator:

1) Requests for information: rec.radio.info is strictly a one-way street.  We receive information in our mailbox; we then post it to rec.radio.info.  Requests for specific information belong in the normal discussion newsgroups.  If your request gets answered, you might consider passing the answer on to rec.radio.info, though. Especially if you can edit it into a informational, rather than a discussion, format.

2) Obvious discussion articles, or articles that appear unsubstantiated.

3) Commercial stuff: a relatively unbiased test of a radio product would be accepted, but any hint of for-profit might be reason for rejection. For three reasons: This is not the purpose of the list, for-profit is a controversial topic, and this list may be passed onto Amateur Packet Radio (where for-profit is prohibited except under certain provisos).

   rec.radio.swap may be more deserving of the posting in any matter.

   Similarly, copyrighted material generally cannot be used.  If it's TRULY worthwhile to the net, We would recommend obtaining permission from the copyright holder.  Please note the source, and if permission was given.  We reserve the right to make the final decision concerning appropriateness in all situations.  In most cases, a brief summary of, or pointer to, the copyrighted information may be all we can allow.

-- I do not have access to news, how can I get the information posted to rec.radio.info?

Google has an excellent web interface to Usenet newsgroups.  It is available at:

http://groups.google.com

It supports both reading and posting.

-- Will the material appearing in rec.radio.info be archived somewhere?

Yes. See Google Groups above.

Effectively this means that anything you post to rec.radio.info will be permanently stored, so your work will not be lost.

-- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as time critical.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires co-operation and goodwill to be beneficial to the community in the rec.radio hierarchy.

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

*** rec.radio.info - Posting Guidelines and Etiquette ***

Two introductory articles about rec.radio.info are posted to this group and to rec.answers/news.answers every month. You are now reading the second article, which explains how to submit something to rec.radio.info, and which answers some Frequently Asked Questions about the submission process. The first article is titled "Welcome to rec.radio.info", and it might be a good idea to check it out as well.

-- How do I submit something to rec.radio.info?

Two possibilities. You can use your newsreading software to just post the article to rec.radio.info, as you would do with any other newsgroup. The difference is that the software recognizes the special status of rec.radio.info as a moderated group, and will e-mail your article to us, the moderation team, instead of posting it to the group.

Alternatively, you can mail your article directly to us at the following address:

rec-radio-info@panix.com

Mailing us directly is probably (a wee bit) faster, but using the transparency offered by the newsreading software is probably more convenient.

If you have any questions, or wish to deal with some administrivia with the moderation team, we suggest mailing to the following address:

rec-radio-info-request@panix.com

-- How soon will I see my article appear?

It depends on how busy we are. Your article reaches us as mail, we have to read it first, give it the stamp of approval, and finally send it on to the group.  We will attempt to read and decide on all submissions within 72 hours at the very least, though we will probably be able to process submissions much faster in actual practice.

The site from which we moderate this newsgroup, "Public Access Internet and Unix, NYC" (Panix), is directly connected to the Internet, and articles posted at that site should appear at most major news sites, including Google Groups, the same day.  The principal delay, therefore, will be the wait in the moderator's submission queue.

If you post a periodic article, and have shown to be trustworthy, we may allow you to post directly if the article is of a timely nature. See the section below on direct posting.

-- Should my article be in a specific format?

No. If it is not totally illegible, we will accept it, and if it does not have a correct subject-line we will correct it with your permission -- that's what a moderator is for.

However.

You could do us a big favor by making sure your article conforms to these simple requirements:

1) The article must present information, not discussion or requests, We will reject the article or require you to change the wording if it is worth it.
2) A good, descriptive Subject line.
3) Always mention what source you got the information from.
4) Don't forget to include a Followup-To header, at least if you don't want further discussion to automatically be forwarded to you, the poster, which is the default if the article is only posted to rec.radio.info.

As we said: if your article is appropriate we will post it even if you don't follow these guidelines, but then don't blame us for not processing it immediately. 'Perfect' articles we can send on with a couple of keystrokes. Stuff that needs minor editing is going to have to wait until we have time to do so.

Please do not waste both our and your time by posting requests, as this is an information only news group.

-- What about crossposting?

If you send something to rec.radio.info, just name any group you'd like to cross-post to in the Newsgroups field. Then, when we approve the article for rec.radio.info it will get automatically cross-posted to any other groups mentioned. This will also override the default Followup-To: poster, replacing it with the groups you cross posted to.

We would prefer if the group be cross-posted to the various discussion groups in the rec.radio.* hierarchy that are appropriate:

| | |
|---|---|
| rec.radio.amateur.misc | Amateur (ham) radio and related matters |
| rec.radio.amateur.packet | Amateur Packet Radio discussions |
| rec.radio.amateur.policy | Amateur Radio practices, rules, etc. |
| rec.radio.noncomm | Non commercial radio discussions |
| rec.radio.shortwave | International broadcasting on the 'HF' bands |
| rec.radio.cb | Citizens Band (27 MHz) discussion |
| rec.radio.scanner | Scanner discussions (unsupported group) |

or in one of the moderated groups:

| | |
|---|---|
| rec.radio.amateur.moderated | Amateur radio practices, rules, etc. |
| rec.radio.broadcasting | Discussion of *domestic* radio broadcasting |

We will leave it up to the poster to decide which group(s) are appropriate, but reserve the right to add groups if we feel it has broader interest. We will consult with the poster first.

Notes on crossposting:

- rec.radio.broadcasting is also a moderated group. The rec.radio.broadcasting moderator prefers to review all articles himself before posting. Placing rec.radio.broadcasting before rec.radio.info on the Newsgroups line should accomplish this. We will typically abide by the rec.radio.broadcasting moderator's decision whether the article is appropriate for rec.radio.info.

- rec.radio.amateur.moderated is also a moderated group. As the rec.radio.amateur.moderated Moderation Team manages both rec.radio.amateur.moderated and rec.radio.info, we can manage crossposting and approvals for both newsgroups. The rec.radio.amateur.moderated group does not allow crossposting to other discussion newsgroups, whether moderated or unmoderated. However, we would like to manage rec.radio.info as consistently as possible with how it was done by previous moderators, including the grandfathering of existing regular postings. Therefore, the submitter can choose rec.radio.amateur.moderated or the other unmoderated rec.radio.amateur.* discussion newsgroups for crossposting, but not both.

- Any FAQ or informational posting approved by the rec.answers/news.answers moderation team that is also crossposted to any rec.radio.* newsgroup (besides just rec.radio.info) is also automatically pre-approved for rec.radio.info. See below for more information.

If you post to another moderated group, it may be better to make special arrangements with both moderators before posting by contacting us at our administrivia addresses.

In addition, cross-posts do not take up extra space; modern newsreaders can be configured to show you cross-posted articles only once anyway; not everybody reads rec.radio.info; and rec.radio.info was never meant to reduce the volume of the regular discussion newsgroups. But keep in mind that some of the mail gateways may filter out the informational postings (at request of the subscribers) to keep the load down.

You decide.

-- I have a regular posting with timely information, can I make arrangements to help speed up delivery by posting directly from my site?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as timely.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires cooperation and good will to be beneficial to the community in the rec.radio.* hierarchy.

If you are currently maintaining (or plan to maintain) a radio-related periodic information posting, you may wish to consider crossposting it to rec.answers/news.answers. Postings that are approved by the rec.answers/news.answers moderators for this treatment are automatically pre-approved for crossposting to rec.radio.info (as the news.answers requirements are far more rigorous than the requirements this newsgroup ever plans to use). For more information about this option, consult the appropriate information articles and posting guidelines in rec.answers/news.answers.

Realize also, that even if your post is not approved for rec.answers/news.answers, it can still be approved for rec.radio.info. The intention is not so much to get every last bit of radio-related information on rec.answers/news.answers, but rather to provide an alternative avenue of approval (as well as grandfather existing maintainers of radio-related information and spare them additional bureaucratic hurdles). Again, crossposting to either rec.radio.info or rec.answers/news.answers, both, or neither, is at the discretion of the poster (subject to the approval of the moderators). You decide what is most appropriate for your article.

Please remember that as an information maintainer, you are not alone. There are many others on the net who maintain and post periodic information postings, using various intermediate-to-advanced features of Usenet (usually via automated tools). Various degrees of technical support and general hand-holding are available from many Usenet veterans. Send us some E-mail describing your needs to our administrative address below, and we'll try to help, or at least refer you to the right knowledgeable individual(s).

-- And Follow-ups?

If the only newsgroup you have specified is rec.radio.info, then the Followup-To: field will always be set to poster. If you do not want this, you must supply a Followup-To line of your own, and we will honor that one, as long as it is a subset of the original Newsgroups line.

If you specify newsgroups to cross-post to, then the Followup-To field will be set to include all the cross-posted groups, excepting rec.radio.info itself. Again, if you do not wish this behavior, supply your own Followup-To line.

We maintain other standards on the various RFC-1036 (news transport) header lines. For example, if the article is appropriate for passing into the Packet Radio Information Network, we encapsulate the Packet Bulletin Identifier (BID) in the Message-ID: news header line indicating the machine of origin as the ampr.org domain:

```
Message-ID: <$opa.55.1994@ampr.org>
```

where the Packet Radio BID, in this example, is `$OPA.55', and it was posted in the year 1994, because some of the Bid numbers are cycled yearly. Hopefully, this can be used as a key to re-introduce the articles for the Packet Radio network. Also, if the article is a repost of an already existing information article in the rec.radio heirarchy, we ensure that the References: header line is linked to that previously posted article. This also helps to tag articles, and may be used for additional filtering if needed.

Since the articles are archived, please use the Summary and Keywords header lines to help one search for your article.

-- Why have I received no reply from you?

We never reject anything in silence, and we make a point of it to answer all our mail. However, E-mail, like a brain cell, can and does get lost, every now and again.

So, if you send us something, and you don't see it appear it rec.radio.info, and you still have not heard from us in reply after say, five days, you can be pretty sure that either your mail never reached us, or that our answer has never reached you. In that case, please try again (We will filter out duplicates).

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

(Adapted, with permission, from the original article written by Mark Salyzyn, AG4YD, ex-VE6MGS.)

Hmmm.  When a scanner lists frequencies like "25-54, 108-174, 216-225, 400-512, 806-956, 1240-1300 MHz Coverage" does that mean it will not receive frequencies in the 250-388mhz range?  The range I'm looking for?

It seems most handhelds have this particular gap.

Thats why your 'LIST' will shrink.

usually only the higher end scanners, have 'full coverage" ( all legal frequencies).

Uniden BR330T
# .1MHz - 1.3GHz Coverage* - *Excluding Cellular

# TrunkTracker III - EDACS, MOTOROLA, E.F. JOHNSON

# 2500 Dynamically Allocated Channels

But no digital.

i have it now!  New, $70 on ebay.  What are some good freqs for Austin?  Most of the lists online that I've seen are very old or difficult to understand.

What are some freqs that you could recommend for Travis County/Austin Police and EMS?

Are these "trunked" if so, do I need to put them in my scanner a special way?

Thx from the newbie.  :)

I just got a Bearcat BC250D with digital card from Ebay. Thought I was
getting the most modern equipment but with rebanding (just heard about it)
now I'm not so sure. I also thought that being computer programmable setup
would be simple..wrong...not for me anyway. I've tried the radio reference
site(seems to be most up to date) and I've tried the bearcat sites to
download files to program in. I'm trying to get Apopka PD(digital) and I get
nothing. I have no idea what DEC or HEX means or what to do with that info.
I also have no idea how to "Import" the .pdf files into either E-Scanner
Plus or ARC250 Basic. I'm getting very discouraged, I don't know whether
it's my lack of progrramming skills or if the radio is obsolete.
Can anyone help me or better yet send a ready made file for the Central
Florida Area or even a link to "Scanner Programming for the Inept" ?
Thanks In Advance,
Helpless In Apopka

Find a local scanner group and take your radio to the meeting. You have to know something, the 250D will not decode all the currently used digital baud rates. That's one of the reasons it's been discontinued for some time now.

What you should have done is find the group or local expert first, and then buy the right radio. You can always ebay the 250D, if you have to.

We all screw up in the beginning. Live and learn.

There are only two digital handhelds worth buying right now, used or new, the RS Pro-96, and the Uniden 396T. That's my opinion, and they are the only models currently available. I went with the PRO-96 for several reasons, better audio, easier programming, and an intimate knowledge of past Uniden quality control issues on previous models. Some of them amazingly poorly put together. I fixed a lot of Unidens with speaker wires not soldered, and a few had major soldering issues. I got all but one going, and used several parts from it to fix other ones.

I just want him to avoid what some friends of mine went through when starting out. They had no idea what they needed, and a couple of them went out and bought used scanners without 800MHZ, right before the city switched over, so they had to sell them, and then buy the only trunk tracking handhelds at the time, the Uniden BC235 and it's RS clone, the Pro-90 (I think that was the model number), and start over. I was able to help them out, after the frustration kicked in and one guy, without telling me, just listened in normal untrunked mode for years until the radio fell down the stairs and he had to buy a new one. He was amazed when his new Pro-95 was up and trunking in about 10 minutes, after I cloned it over to my PC, added a few things I didn't have, and loaded it up. He's pretty much an expert now. He has a Pro-96, a Uniden 396, and two Pro-2096's, one for home and one for work. His wife, who thought scanners were "stupid" got hooked after a couple of big chases came over the radio, and that was that, she's a ham now.

Same goes for shortwave radio. I had gotten into it again in the mid 80's and had moved up to pretty high end stuff at that point. A friend I don't see often had bought junky portable after portable over the years, and never really was happy with them. They didn't last long, so he kept buying them, never with SSB (he didn't understand it at all), and then one day he comes over for help with a mike for his CB he bought and couldn't get wired up. He sees my stuff and is mesmerized. Next thing you know, he's buying all kinds of receivers, decoders (Fax and RTTY, not much out there to decode anymore)antennas, etc. He went from a junk portable to a 1100 buck receiver in one day, and soon had an entire room full of nice stuff. All it takes is being in the right place at the right time. I got hooked at Universal Radio in 1984. Before that, I had a series of fair to poor portables, never happy with them at all. I've had one of my SW radios for over 20 years now.

Thanks BD,
I guess I'll try re-listing my radio on Ebay. The way it was being bid on when I "won" it maybe I'll get most of my money back. I do feel a little guilty doing that but maybe whoever bids on it won't be bidding blindly like I was. I remember several years ago this radio was the hot new one to have. I guess the radio biz changes quickly, somewhat like computers. Would you happen to know where I might find a side by side comparison of the Pro96 & BCD396T? I really want to get back into listening to the scanner again but haven't done it since my old Pro-62 became obsolete. Radio Shack currently has the Pro96 on sale for $399 but now I'm leary of making another expensive mistake. You seem well informed about the radio biz. Do you happen to know if major changes are on the horizon for the Central Florida Area? Apopka(which is one I'm trying to receive) is the only city around that is digital other than Winter Park(Encrypted digital) But I'd like to be able to also hear Orange County S.O. and Seminole County S.O. Any help/info you could share would be greatly appreciated.
Thanks Again
PJT

Apopka, Fl.

Well, I've done a bit of driving around the area, ableit with the whip on the antenna. I think I've traced the source to a number of antennae on top of a nearby tower block. Parked underneath it there is very little signal, however within direct sight of these antennae there is a continuous high-pitched tone. As I move further away from this in any direction this gets weaker and eventually peters out. The broken sound I recorded still exists over most of the region when the continuous tone is unnoticeable.

I'm going to put the problems down to something on top of this block. There are mobile phone transmitters on there, that I know, and another long whip which could be UHF or VHF. I haven't looked into what effect this is having on FM or AM radio so I will have another trip up there soon. However it doesn't affect me from the flat. I also made a point of driving near a number of mobile transmitters and they don't have an effect on the scanner.

I've got an airband filter on order, hopefully this might clear up some of the noise but whatever it is I guess won't be completely legitimate...

I wonder if they have the same source then.

It's good to eliminate possibilities too.

If it it an image response by your receiver that should
work.

A dipole is a directional antenna.  Not as directional as some
but a dipole is easy to make.  At 130 MHz a half wave dipole
would be a little more than a meter long.
But I hope the filter works for you.

I am looking for a new hand held scanner,,
have a bearcat BC200XLT that stoped working.
when it worked, I think it was a really good radio.
want a good radio that I can pick up police/fire
and other things
Don't want to spend $500.00
can spend around $200 or a little more
any ideas what is a good radio out there.
Was looking at the bearcat BC246T or the
BR330T. But still looking.
can use any help you have
thanks
Sam

Well, you really need to talk to one of the local scanner groups, they will have all the info you need. I really can't tell you anymore about your area than what is in the database section of www.radioreference.com. Someone living 1000 miles away just can't have 25% of the info the locals have. There are people here that know what's going to happen years ahead of time.

I don't think there is a side by side 396T/Pro-96 review, but a search on Pro-96 reviews will probably come up with one. I think one guy tested them separately and didn't like either one, saying they were deaf. I haven't seen any problems with either radio being deaf at all.

I wish I had better answers for you but you'll do better looking locally for help..

BDK

I retired and moved from Ca. to the Philippines!

I have a great SW LW slopper with an "L" and it works great!

I am ready to work on the scanners (BC895/245) and need to think of some options for antennas.

The people around here think I am a spy now with the short wave antenna (for sure) if I put up a dipole they are going to go nuts for sure so I need to know what other antenna I can put up.

About the only thing I will be able to understand will be the planes coming into Manila and maybe a American ship with work radios or American aircraft carrier working in the area and maybe something from the US Embassy.

Will a Long Wire work on a scanner? you guys tell me what I can put up that doesn't look to wild!!!

No they will not. Many people there use a large antenna to get broadband. No
one would think twice about a huge antenna.

Abilene Reporter News

# Public has almost no access to new police radios

By Blanca Cantu / cantub@reporternews.com
March 27, 2007

A new police and fire communications system designed to help emergency crews stay in touch also means the news media has less access to information about incidents affecting the public.

Abilene police and fire departments recently ditched an 18-year-old dispatch system for a new $14 million system that has better encryption capabilities and keeps many of the conversations people using police scanners are accustomed to hearing off the air. Police and fire officials began using the new system this month.

New radios purchased by the Reporter-News, KTXS-TV, KRBC-TV and KTAB-TV that can pick up transmissions from the new system were programmed by the city's communication services department. Abilene media can listen to a police and fire dispatch channel and eight tactical fire channels.

Before the city upgraded its communication system, the media and the public could hear police and dispatchers chatter on multiple channels. Now, the media has limited access - but the public has almost none. Traditional police scanners cannot pick up transmissions on the new system, meaning it must rely more on the media to report police and fire news at a time when less information is available to the media on police radios.

Jim Berry, assistant chief of the Abilene Police Department, said the media no longer has access to the police service channels because the department decided ''it's best for operations.'' Service channels are used when officers in the field ask dispatchers to make a call for them or check a license plate number.

Berry said the media's inaccessibility to the service channels helps the department comply with an agreement the department has with the Texas Department of Public Safety.

Information transmitted over the service channel can contain information extracted from DPS' Texas Law Enforcement Telecommunication system - and that is not public information, he said.

''As a law enforcement officer, I cannot provide you with any information that comes out of the TLET system,'' Berry said. ''Due to the nature of police operations, there is information and communications that you should not have access to.''

Berry, representatives of the fire department and the media met last year to discuss radio accessibility. Berry said in the interest of maintaining a good relationship with the media, the police department granted the media access to the primary dispatch channel for patrol.

''We felt like that would meet your needs,'' Berry said. The agreement was more than media in Wichita Falls initially received (see below).

At last year's meeting in Abilene, Scott Martin, chief photographer for KTXS, said he asked for more access. But his request was denied.

News director Iain Munro said KTXS would like to have access to all channels so that his staff can hear everything and judge things more clearly.

''The last thing we want to do is get in the way of the police force doing their job,'' Munro said.

The news station's photographers were concerned they wouldn't hear certain things, he said. Not hearing chatter over the scanner forces more calls to dispatchers, further tying up the lines of communication.

''We want to be able to cover the story and do it so we're not interfering with the police officers' jobs,'' Munro said.

Tom Vodak, news director for KRBC and KTAB, said the change in access to police and fire communications hasn't affected the stations' news coverage.

Is there a basis for complaints?

Joe Larsen, board member of the Freedom of Information Foundation of Texas, said media outlets can't argue for more access to police chatter on the basis of the Texas Public Information Act.

''Access has to rest on a statute or the Constitution,'' Larsen said. ''There is no statute that gives you access to a police scanner.''

When the Wichita Falls Police Department in 2005 upgraded from traditional police radios that many people could hear with a police scanner to the same digital radio system Abilene is using, it left the media and the public in the dark and denied them access to all police communication.

Two months later, the police department and the media in Wichita Falls came to an agreement that allowed the media to listen to fire and general police traffic, according to the Times Record News. The Times Record News is owned by The E.W. Scripps Company, parent company of the Reporter-News.

Abilene Assistant Police Chief Jim Berry said the decision to allow the media to listen in on police dispatch calls would be in the best interests of both the department and the media so that the good relationship they have established with each other could be maintained.

How do police communicate?

Abilene Police Department officers use about 25 ''talk groups'' when they use their radios to talk to each other. A combination of digital and traditional analog transmissions can be heard on police scanners.

Each police radio is programmed with a particular ''personality.'' Radio personalities have access to specific talk groups. Each channel on the dial represents different talk groups. Talk groups are accessible by officers in particular departments. For example, detectives in the Criminal Investigation Division have multiple talk groups that are not available to every police officer. Detectives, patrol officers and other divisions have their own groups.

>
> Abilene police and fire departments recently ditched an 18-year-old
> dispatch system for a new $14 million system that has better
> encryption capabilities and keeps many of the conversations people
> using police scanners are accustomed to hearing off the air. Police
> and fire officials began using the new system this month.
>
> New radios purchased by the Reporter-News, KTXS-TV, KRBC-TV and KTAB-TV that can pick up transmissions from the new system were programmed
> by the city's communication services department. Abilene media can
> listen to a police and fire dispatch channel and eight tactical fire
> channels.
>
> Before the city upgraded its communication system, the media and the
> public could hear police and dispatchers chatter on multiple channels.
> Now, the media has limited access - but the public has almost none.
> Traditional police scanners cannot pick up transmissions on the new
> system, meaning it must rely more on the media to report police and
> fire news at a time when less information is available to the media on
> police radios.
>
> Jim Berry, assistant chief of the Abilene Police Department, said the
> media no longer has access to the police service channels because the
> department decided ''it's best for operations.'' Service channels are
> used when officers in the field ask dispatchers to make a call for
> them or check a license plate number.
>
> Berry said the media's inaccessibility to the service channels helps
> the department comply with an agreement the department has with the
> Texas Department of Public Safety.
>
> Information transmitted over the service channel can contain
> information extracted from DPS' Texas Law Enforcement
> Telecommunication system - and that is not public information, he
> said.
>
> ''As a law enforcement officer, I cannot provide you with any
> information that comes out of the TLET system,'' Berry said. ''Due to
> the nature of police operations, there is information and
> communications that you should not have access to.''
>
> Berry, representatives of the fire department and the media met last
> year to discuss radio accessibility. Berry said in the interest of
> maintaining a good relationship with the media, the police department
> granted the media access to the primary dispatch channel for patrol.
>

> ''We felt like that would meet your needs,'' Berry said. The agreement was more than media in Wichita Falls initially received (see below).
>
> At last year's meeting in Abilene, Scott Martin, chief photographer for KTXS, said he asked for more access. But his request was denied.
>
> News director Iain Munro said KTXS would like to have access to all channels so that his staff can hear everything and judge things more clearly.
>
> ''The last thing we want to do is get in the way of the police force doing their job,'' Munro said.
>
> The news station's photographers were concerned they wouldn't hear certain things, he said. Not hearing chatter over the scanner forces more calls to dispatchers, further tying up the lines of communication.
>
> ''We want to be able to cover the story and do it so we're not interfering with the police officers' jobs,'' Munro said.
>
> Tom Vodak, news director for KRBC and KTAB, said the change in access to police and fire communications hasn't affected the stations' news coverage.
>
> Is there a basis for complaints?
>
> Joe Larsen, board member of the Freedom of Information Foundation of Texas, said media outlets can't argue for more access to police chatter on the basis of the Texas Public Information Act.
>
> ''Access has to rest on a statute or the Constitution,'' Larsen said. ''There is no statute that gives you access to a police scanner.''
>
> When the Wichita Falls Police Department in 2005 upgraded from traditional police radios that many people could hear with a police scanner to the same digital radio system Abilene is using, it left the media and the public in the dark and denied them access to all police communication.
>
> Two months later, the police department and the media in Wichita Falls came to an agreement that allowed the media to listen to fire and general police traffic, according to the Times Record News. The Times Record News is owned by The E.W. Scripps Company, parent company of the Reporter-News.
>
> Abilene Assistant Police Chief Jim Berry said the decision to allow the media to listen in on police dispatch calls would be in the best interests of both the department and the media so that the good relationship they have established with each other could be maintained.
>
> How do police communicate?

>
> Abilene Police Department officers use about 25 ''talk groups'' when
> they use their radios to talk to each other. A combination of digital
> and traditional analog transmissions can be heard on police scanners.

Well it is not totally clear from the article- are they encrypting all but a few talkgroups? If that is the case it certainly is one of the more restrictive public safety radio systems around.

I read it a couple of times and I can't tell if they think digital is
encrypted, or it really is encrypted. www.radioreference.com would have
the info, if I could figure out what county Abilene is in.

I have a Uniden BR330T. I have the stock antenna, the Radio Shack 20-283  800MHZ Antenna, and the Radio Shack 20-034 Deluxe Antenna for Handheld Scanner. They all seem to give the same reception. Tons of working channels no not seem to be picking up, including local prisons. The weird part is, I don't know in this case if it's just the prison, but when I am down the street, from the prison, I can pick them up if the squelch is like 2 but it's like they are extremly far away but yet I can pick up an even further prison that comes in even clearer. How can that be?

Is there some other better mobile antenna for the Uniden BR330T? I don't really want to get the 20-006 Center-Loaded Telescoping Whip Antenna  because it's a monster to carry around especially if you carry a mobile scanner in your coat pocket. Tons of frequencies will not pick up unless the squelch is down to 2. If it's 0 or 1, every channel just starts coming through.

Thanks for any suggestions.

I know where Abilene is, but I can't seem to find the county, and
without the county, radioreference is pretty useless.

My best advise is to find a local scanner group in the area, they can get you all set up.

Looks like an EDACS Pro-voice system which needless to say there isn't a
scanner on the market to monitor that type of system.  They have that here
in Johnston County, NC.

Family there. Have pictures of it when they were putting up the mast for their broadband. Was quite a thing to see. Guy climbed up the mast made out of 1" pipe using his bare feet to climb. It did have all the people passing by watching, but not because of the antenna. The placing of the antenna is the fun part. If the original poster has not heard or seen this then they obviously do not live there.

RR is great for info but often is WAYYYY behind on changes. The system here changed a couple years ago and RR still does not have the info right. A couple people I know of tried to get them to update it, but it still shows the wrong info. So they may or may not have the right info.

Call To Arms, means, you will inspect your weaponry and prepare to do battle. Duty Stations, means, all men and women must assume their duty stations, weapons at the ready. Fire When Ready, means, man or woman your weapons, sight the target, finger the trigger, and fire when ready. Cease Fire Procola, means, continue fireing until the enemy targets are dispatched, and there is no sight of an enemy anywhere on the horizon. Procolas means, after ending all possiblities of any lingering survivors staying alive. It means to wipe them out, and leave no survivors.

This means, it is time to kill all Lesbianists, and all other enemies in my universe, the many groups of naughty kids in my universe, rascaleers and others, and we will continue this fight, untill they are all dead, and in my Epcot Centers, or untill they have surrendered. Rascaleers are evil people who wish only to harm others.

Updated: 18-01-07 Rev.a.00.a 02:50 PST

## Religious Practices

This is a little confusing, but hold on, and I'll try to explain it. There are many parts to my religion. We call them, parts, but we can also call them, practices, some of them, but not all of them.

We have the fundamental 'root' practice, which is sexaling. From the root practice, comes all other practices.

There are side practices, and there are derived practices. There are also, accompanying practices. There are many other types of practices, but I don't remember the names for them all, right now, as I'm still amnesiatic, and will be for a long time.

## Fistiker Practice

Bringing about orgasming in another person is a fistiker practice. A fistiker practice is a side practice, but it is also something a little different from a  side practice, depending on how you bring the orgasming about, and depending on how many people are involved, and depending on who is the primary person, the person whom we are working on, and who are the helping people, the people who are joined together, to help the primary person to orgasm. There are a number of other dependencies as well.

## What Is A Dependency?

A dependency is some thing that is needed that will help to define something else.

As in the case of an accident victim, we have a crutch to define one level of severity of an accident victim's situation. But we might also have a wheel chair to define another level of severity for the same, or other, accident victim. These objects help to determine how badly or miserably a person is injured.

A crutch can help define a level of severity in the injury. A wheel chair can help also to define a higher level of severity. These are both dependencies. They help us to define something, and they are used to help us to define an accident victim's level of severe injuries.

## When Sexaling

You can use your lips, for example, or your tounge to twiddle the toes of a woman, and the woman begins to orgasm. That twiddleing of your tounge on her toes to help her to erotem, and to experience erotistical orgasming, can be any number of things, depending on the involvement and complexities of dependencies.

Rubbing the vaginal face, the vaginal wall, or rubbing to either side of the vaginal crevice, the labial folds or felates, can help a woman to erotem and erotistically orgasm, and depending on the involvement and complexities of dependencies, the dependencies can be any number of things, if we try to define the sexaling activity more fully and completely.

We'll skip this for now, as it is a little too difficult to remember, right now. Just remember, the primary practice is sexaling, and that sexaling is like the roots of a tree. All other religious practices grow out of the 'roots' of the tree, sexaling, and can be defined in many different ways, such as a helping practice, a side practice, a subsidiary practice, a canceling out practice, an accompanying practice, and there are many many other terms for what kind of practice some thing is, depending on what dependencies are involved.

## Labia And Felate

What is the difference between a felate and a labia?

A felate is the skin tissue of the outer surface, and some of the tissue of the tips and edges of the labia. It does not include the inner side of the labia, but only the outer side, and the surrounding edges, as far as I can remember.

A verb, or action word, as I call it, is 'felate' as in 'Felate that woman's or girls' left felate'. That means to suckle on the left felate of the woman or girl.

Felate is a verb, but it is also a 'nominal' word, or naming word for objectifying an object.

Do we say 'Labialize that woman's felate!' To labialize something is to make something into a labia. We wouldn't, unless we were a doctor, say that about a felate. But we might say it if we were doctors, and we had a woman who met with a bear, and the bare clawed at her genitals, and the sharp claws ripped her labial skin up, then we might say in a surgeon's room 'Labialize that woman's ripped up labia.' That would mean to stitch it up, and make it nice and neat, and clean and well stitched up, and then useful to her, again, and it would involve a lot of surgery, as many nerves would need to be connected, as they had been ripped apart, and the wiring was all dislocated. But in the end, we would be able to fix her labia, and her genitals, if they were also hurt, and then we could dismiss the patient from the hospital, after the labia healed, and after she recovered from her trauma of having her labia shredded by an impolite, rude, mean, uncaring, and hungry bear.

## Genitals, Titties, The Labia, And The Many Sexaling Organs

The labia is not the genitals, but some people do consider them as a part of the genitals. The genitals are inside the woman's vagina, in my way of thinking. The vaginal wall is not part of the genitals. The vaginal orifice is part of the genitals of a woman. This seems odd, doesn't it. Well, that is how it works, in my brain, and I designed women, as well as men. If you notice, in my writings, I've talked about the draft table, and the throttle. These are major parts of a woman's genitals. They are inside the vagina, and you can reach them through the vaginal orifice. Before you get inside of the vaginal orifice, there are a few things outside, such as a pee tube, and an ejaculate tube, and the clitoris, as well as the labia. These are not part of the genitals, but are working parts of her sexaling organs. A woman's or girls' sexaling organs are not equal to her genitals. Genitals are for baby making, and for other purposes. Titties are not part of the genitals, but they are part of the womans' sexaling organs. This will require a long discussion to clear up, so I will save it for another day.

## Bears In The Woods

That's the way it happens some times, when women or girls go out into the woods, and sexal with their female friends. They can get hurt by bears, if they are not accompanied by men, who are tough, and strong, and who stay alert, to guard and watch out for dangerous animals, such as bears, wolves, cayotes, bobcats, puma, and even racoons. Racoons do attack humans, if they smell some thing that will taste good to the racoon. If a person has a skin tear, and is bleeding, even a tiny bit, the racoon will smell it, and come running, and then find the person, and so will panthers, and all kinds of animals will come, and it's just like a bunch of sharks and fishes of different kinds, and Moray Eels, they like the smell of blood, and they come and investigate, when they smell it.

Women and girls have periods, and it is not every twenty eight days, as I've explained about before, and blood runs down, out of their vagina, and they generally do not know it, as it is only a tiny drop of blood, or less, most of the time, and the blood is often wiped from the skin surface, when the woman or girl is on the potty, or toilet, and the woman or girl will not even see the tiny drop of blood that comes out of the vagina and drips down the labia, on the inside, and then falls or dribbles down to the felates, and then falls off the felates, while she is on the toilet into the toilet, or while she is out doors, and walking about, onto the earth, if the woman is walking on a park walkway, or bicycle path. If she is wearing underwear, it will not fall onto the earth, but it will dry up on the panties, or underwear, and the smell of the dried blood will attract wild animals if she is out doors, walking or jogging in a wooded or regional or rural area, where there are lots of, or even just a few, animals.

Pumas can smell the blood, from miles away, and so can tiny oselots, and bears, and many animals can. They can smell blood, because they know they need meat to survive. That is built into their brains, that are located throughout their bodies, and not only in the skull, and animals are very sensitive to the smell of blood, as well as to the smell of urine, and to the smell of poop. Some animals, such as racoons, will come up from behind a woman, and grasp at her panties, as the racoon may smell the odors of fecal matter, from her butthole. Men may be raked by the claws of raccoons from behind, as they smell the odors of fecal matter, and try to find out more about it, as the racoons know that there is something delicious hiding behind those odors from the buttholes of women, girls, men, and boys.

## Expecate

When women and girls go out hiking, it is best to wash out the vagina, first, and then use a fermented oil, as a douching agent. The oil will help to slow the flow of the blood down the inner walls of the vagina, and it may help to trap the blood, and make it difficult for it to leak out, unless the amount of the flow of blood, is very large. In that case, it is best to stay home, and not go out, when a large amount of blood is expecated from the vagina. Expecated means to expell outwardsly. Expectate can also be used, as it is generally the same word, that is, and it also has generally the same meaning, but perhaps it has a few more uses, maybe, but it is from a variant language of the English language, and is basically the same word.

You should expecate your fluids in your vagina, from your vagina, before you go out hiking. If you know when your period is, and there are ways to tell when you have a period, or when you know when you are about to have a period, than if you normally have a large amount of blood flow from your vagina, as that has been your experience, it is probably best to go and sunbath at the beach, far away from wild animals and their habitats, or by the pool side. Racoons sometimes come out of the woods, to the shores of beaches, and trumbel along, listening and watching, and sniffing the air, when they smell dried blood, or wet or moiste blood, inside of the swim suit lining in the groinal area.

## How Do You Tell When Your Period Is?

To learn when your period is, you need to look into the toilet bowl that you pee into, and then see if there is any red droplets. You can place a piece of toilet paper onto the surface of the water, and it might help to show the redish color mixing with the urine.

Another way is to take a piece of toilet tissue paper, and wipe your felates, in the morning, or during the day, or at night. Night is a good time, but during the day, it is just as good. Some women like night time because they feel the day is finished, and they are now going to make a final check. Well, it doesn't always happen the way we want things to happen. You might start leaking blood fluids, at two or three or four or five, a.m., or at six, or seven, or eight, or while you are in the shower, or in the bath tub, bathing, before you plan to go out for the day.

It may take you several years for you to find out when your period begins, and when it ends, by checking for blood flow. When you have determined the number of days between one period and the next, and you are absolutely certain of it, and you have confirmed it, many times, and you have checked to see if there might be something you didn't notice, at other times, when you checked, eventually, you'll learn when your blood flow begins, and how long it lasts, and when the next blood flow begins. Once you know, then you can time your excursions to the woods, or to the beach, with your friends, both women and men.

## Bears, Wild Animals, And People

Men are needed to help scare bears away, if they come to close, and pepper spray is a good way to get them to leave the area. Bears do not like the small of pepper spray, and you need a cannister of pepper spray that will fire fifty to eighty to one hundred and eighty five feet or more, to scare away a bear, safely.

Loud noises surprise bears, but hungry bears get angry and feel challenged by you, and may come at you at a fast pace, and not stop, once they are angered. If you are a good shot with a rifle, and you see a bear, from a few hundred feet away, and it is moving slowly, towards you, following you, you can shoot it with a good fifty calibur weapon, from that distance, and it will go down, in an instant, if you hit it square in the noggin, about one inch or less above the nose.

You need to be a good shot, and several people should aim, and fire at the same time, to kill the bear, to be sure some one hits it, and then puts it down, and kills it.

Do not think that because you have one rifle, or two handguns, and a rifle, that you are safe. If you do not know how to shoot, and if you are an inexperienced marks woman, or marks man, than your chances of hitting the bear are near zero, for all three of you, at three hundred feed.

You need years of practice to become a good marksmen, and you can start with the lower calbur weapons, to get a feel for weapons that fire projectiles, and that make loud noises.

There is no such thing as a friendly bear, and people think, 'Oh, look! Isn't she cute, that bear.' If they think that way, they might as well have left their last will and testament behind, and signed all their assets over to another person.

Bears are animals that need to eat just as humans do, and just as all animals do. If you are so foolish to think that bears are cute, you are a lame brained idiot. Bears are dangerous animals. And so are all wild animals. If you think a racoon is a cute animal, you get the lame brained award for the year award, and trophy to sit on your desk at home to remind you of how stupid you are.

## Brad Pitt, And Angelina Joline

Only idiots would think that wild animals, that eat people, are cute. They need remedial training, as they do not understand that their lives are in danger, every time they walk out the door of their home. Even in the cities, there are nasty people, who smile, and pretend they are your friends, and these same people, such as Hillary Clinton, Brad Pitt, Cheryl Davis, a friend of Brad's, but that's his current girl friend, Angelina Jo-line. She is not a Lesbianist, and Brad pretends to be her friend. He likes to watch her get eaten by bears, my abominant kids, when the Lesbianists feed humans, one at a time, to the bears, or to the crocodile abominant children of mine.

Abominant Elephant Kids

I have carniovorus, human being abominant elephant kids, and they are rude, mean, nasty, and really terrible. They scare people, and then they pick them up with their trunk, and place them on their head, and then they tell them not to move, or they will stample on them, or tromp downwards, and crunch them, painfully, from the foot, to the shin, to the thigh, to the pelvis, to the waiste, to the lower tummy, to the mid section, to the chest, and then the neck, and then the head, finally killing them. They will take a person, pull the person up and lift him or her up into the air with his or her trunk, and then pull the person into his or her mouth, and then crumple up the person, and then spit the person out, and the person is all broken up, and chewed up, with all the bones, broken, in the legs, and in the arms, and in the waiste, pelvis, torso, neck and shoulders, and head.

The Lesbianists use lots of these elephants. They are pretty to look at, but they are mean, and nasty. When strangers see them, they think, 'Oh, what a pretty elephant.' They don't know that the elephant is my abominant kid, and can speak English, as many people recently found out near Africa, in Sri Lanka, and then also in New Guinea.

They were very surprised at the talking elephant. But they didn't know that the Lesbianists had let the Elephant, my abominant kid, lose from the cages that they kept him sealed up in. There were one or two, or maybe eight of them, in Sri Lanka, and eight or nine in New Guinea. Lots of people got eaten up, and killed. The elephants are still lose in New Guinea, but in Sri Lanka, they herded them into the pens, and brought them to New Delhi, to then begin a rampage in New Delhi.

Well, the Lesbianists are doing this, daily, because they feel they have lost this battle, and that they are just wasting time, doing nothing, as they can not get to me. So they want to have a lot of fun. Now they are releasing lots of my abominant kids, in many places, and in New Delhi, Bombay, Sri Lanka, and New Guinea, many people have been hurt and killed by these idiot kids, these abominant elephant kids of mine. The Lesbianists have thousands of animals they want to release, out into the public, in England, in Switzerland, Georgia, South Carolina, Paris, and many other places.

The Lesbianists think they are going to have a lot of laughs watching the abomniant kids of mine, tear people up, and rip them to shreds. They also think that the animals, who are not abominant kids, but are just bizarre animals, that catch people in very large, nets, that have threads as thick as ropes, and that are very sticky, are going to do a lot of wierd and crazy things, no one here on this planet, other than them, have seen. They think they are going to get a lot of laughs when they see the mayhem and havoc, the disruption to society, and frustration on the faces of people who get caught in the nets, and then turned into living mummies sealed up in a type of pulpyish paper so the person can slowly disolve, but stay alive, for up to a year or more. Maybe as long as ten to thirty years, in some cases, and I'm not kidding.

You may think I'm kidding, but I'm not. This began a few days ago, and the Lesbianists are intent on continuing this, for the next few years. Isn't that surprising. I never expected that. They are very strange people, aren't they. They are real sicko's aren't they.

I think you should all go and meet my kids, with a day pass, and ask them about it. Other wise, you might find your self in a very large spider's web.

## Labiating A Labia

To labiate is to suckle the labia, and to take one or the other of the labia into the mouth, and tickle it with the tounge, or twist it gently with the lips.

'Labiate that woman's left labia!' 'Felate that womans left felate!' The difference is, labiating is to suckle the entire left labia, inside or under the edge of it, on the inner side, and the edge of it, and the outside of it.

Felateing the felate, is to suckle the edge of the labia, the upper exposed edge. It does not include the labia, in its entirety. Only the upper, protruding skywards, or in which ever direction it is pointing, that portion of it that is extending outwards. If you lift it up between your finger tips, you'll pull up on the entire structure revealing the underside, or the unexposed underside of the labia. There is also the outer side of the labia.

The Felate is the top tip edge of the labia, generally speaking, and it is itself an isolated system, and not part of the labia. It's connected to the labia, but it serves a different function. It droops downwards, to seal out the possiblity of any thing entering the vagina from below, in an upwards moving manner. Bugs can not fly up into the vagina, as the felates prevent them from flying up into it. Without the felates, the vagina would be unprotected. The labia would not protect the vagina, as the labia is merely the skin tissue mass that the felates are attached to, and in an instance of removing a felate from a cadaver, or dead body of a woman, or girl, once the felate is removed, the labia have no closure over the vagina, in most women and girls.

There are exceptions, as we've had many animals in our heritage line. There are many differences when we line up ten women, and inspect their vagina, their felates, and labia, their bumbey pack, as children are encouraged to call the lower hanging sexual organ of the vaginal cape, as it is also called by doctors.

On this planet, the bumbey pack may not be called a vaginal cape, with the inferior texts with unadvanced, primitive, witch doctor level sexual sciences that do not help any one along, such we find with the myth that women and girls have a period every twenty eight days.

That is total nonsense, as I've explained about it, before. The truth is, every few days, to every eight to fifteen days, to even eighteen days, or evern thirty two or fifty five days, depending on where the woman has grown up and where her ancestors have grown up, the number of days between one period and another period can be very dissimilar, from one woman to another woman. Some women have a period every two or three days, or even every day. There is no reason an ovary can not fall, every day, several times a day.

An ovary is so small, no one can see it, without special optical technologies, such as pass through see through technologies, and other optics, and other videoing technologies. A microscope is an out moded, ancient, and novel device, fit for only museum use on display shelfs. It's like an old car of the twenties, or there abouts, or even earlier, of course, depending on how sophisticated it gets. Micron microscopes, the so called, 'electron' microscopes, are a misnomer to begin with, as an 'electron' is not a fictious concept, but no one knows what an electron is, generally speaking except for the Lesbinists.

An electron is a small bit of electrically heated plasma, that you can heat, with the right technologies. It can fit on the tip of a pencil or pen. This is a big joke to the Lesbianists, as are also their jokes about protons, and neutrons, and nuclei, or the so called combined nucleus, as in 'nuclear' family. Nuclear family, is not a 'tight' organization of two persons, and their children.

A nuclear family is a family that has been nuclearized, that is, exposed to radiological salts kiddies, and their radiative or radiological energies. That's another one of the Lesbianists' jokes on all of the scientists who the Lesbianists could get to swallow it.

What Causes A So-Called "Nuclear' Explosion Or Detonation?

A vast number of children are making babies at a very high rate of speed, and the energies that they give off, as they make babies, and then peel off from the area where they made their babies, one after another, as they rocket away, is what causes a nuclear blast. The tummy mommies and tummy daddies are making babies at such a frantic pace, they make millions and billions, and trillions, and more, before you can even send a signal to your eye lid to blink, from your brain part that sends the signal out. The signal will travel just a very short distance across a crupture, not even half way, more like, one or two feet in distance, if we are to look at the size of a crupture as the same size as our current universe. It travels about not even one foot, not even one inch, and not even one millimeter, and not even one millionth of a millimeter, and far smaller than that still, before the parents are already through making babies, and they have retired, and passed on, and several kabillion generations of families, and multiply that by a very large number, and you'll get how many generations of families lived and died, and passed on their DNA to their sons and daughters.

It's a hail storm of erupting magnitude when the tummy mommies and tummy daddies begin making babies, and making their families larger.

It all happens so rapidly, with more than that number of successive generations of families, in less time than the energy pulse will travel down an optic nerve, across a crupture, that very minute or very tiny distance, as I stated above.

That kind of frenetic baby making activity, makes for a lot of heat, as well as, it generates a lot of stresses, and a lot of energies go flying off in all directions, as the sexaling couples experience many nice orgasms and eroticisims, together. Temperatures, their body temperatures, collectively, and the incredibly vast number of movements, which also generate temperatures, by the animals, the tummy mommies, tummy daddies, tummy babies, the relatives, and the many generations of families, go skyrocketing, and the magnitude of numbers, and the intensity of all the activities the animals are busy with, as they make tummy babies, simultaneously, or nearly simultaneously, is of phenomenal proportions. There are also types of animals that we are not familiar with, who are also busy making babies, and they help to account for the brilliance of the light that is generated, along with other types of animals, that also help to account for the brilliance and light, as they are busy baby making, too. There are energies kids of all kinds busy making babies, and that is also a major important factor in the overall sequences of activities, to successful birthing by all the tummy mommies, and it is also important to help to get them all 'gyrated' or motivated, and to wake every one up from their slumber, or their condition of deep sleep, or stagnassis, to get them feeling alive, ready, and able for making lots of babies.

If we slow them all down, to our pace, and then compare them to our pace of life, they would be just like us, and things would move slowly for them, and not much would change, for many kazillions plus years, and then many, many more years.

However, they are moving so much faster than we are, and the length of time they live, to them, it is a long time, four or five, or eight or nine hundred years, in our time, maybe, in some cases, depending on the type of radiological salts kiddies and other types of animals, including the energies animals, who are all making babies.

On their scale or pace of life, they live that long. But on our scale, the length of time they live, is so tiny, we can not measure it, unless we have a very high level of advanced mathmatics that can account for such a small time period, or span of life.

Anyway, the frenetic adventures of the colonies of radiological animals, when they start to make babies, after they are woken up, and prompted to make babies, with a detonating surge of heat energies, light wave energies, pressures energies, trampolining energies, zespertudial energies, castikilial energies kiddies, and other types of energies kiddies, as well, which help get them all started, with the right combination, of heat, light, atmospheric temperatures, atmospheric pressures, food sources avaiability, drinking water availablity, trampolining energies, and a number of other types of energies, that awaken them, and then get them turned on, and sexaly active, they will suddenly erupt into a frenetic, mass of baby making furor, to us, any way, and with that, we have our so called, 'nuclear' detonation.

## Cleansing Your Self With Your 'Built-In' And 'Attached', Cleansing And Washing, Clearifying And Erasing Energies Producing Genitals And Sexaling Systems, Eroteming And Orgasming Nervous Systems, And Baby Making Related Purifying Energies Generation Stations Aparati, Or Apparatuses, And Armatures

You women and girls, your vagina is your Holy instrument for assisting you to cleanse your self, and wash away the dirt and grime of daily living, the insults to you from strangers, the verbal abuse you experience in your arguments and conversations with friends and family, neighbors, relatives, work associates, and community acquaintances.

Your holy body, and your normal body are weapons to fight back against all the negativities you experience in your life, as you orgasm and erotem, showering off purifying energies, and lots of other beautiful other things and dings, as you vibrate your entire body concordially, in harmonic rythym, cadence, and rapture, while orgasming, in sequence and in timed rythym, with my GODLY Holy Body and many of its features, or parts, that are similar to your holy body and your holy body's parts and features. These are all activated while you are orgasming, and eroteming, and you become purer and holier, the longer you orgasm and erotem, and convulse, orgasmically.

Your breasts, your butty butt, your butty butt hole, your vaginal hole, your groin, your throes, your vaginal cleavage or labial folds as they are called here by these nitwittish doctors on this planet, who do not know any thing about the human body, your chest, your back, your legs, your arms, your hands and fingers, your ankles, feet, and toes, your ears, lips, mouth, tounge, cheek, your rectal cavity, your tummy button, your stomach, throat, your brains, and you have many more than just one in your body, but many millions and more of them in your body, and that is not an overstatement, and every part of your body, inside and out, your many nervous systems and all your organs, they are all set to orgasm and erotem, and generate purifying energies with the help of the power company, as I've explained about them, before.

Men and boys, and their bodies, both their normal bodies and their holy bodies work in the same way, and there is no disparity, when it comes to sexaling, orgasming, and eroteming, and showering off lots of wonderful energies, that purify men and boys, and the people who the men and boys are sexaling with.

## Ticklement Tuning Forks

You have ticklements, tuners, or pitch fork tuning forks, that chime, in every cubic millimeter to every cubic inch, and in even tinier places, you have tinier ticklements, or tuning forks, and in larger areas, you have larger ticklements, or tuning forks, and they are all set to vibrate in various patterns of sexual thrilling eroticisms, and orgasming ecstacies, as you pump up the levels of sexalating energies you have available to you, in you, and showering off from you, and those patterns and focal points change, slightly, minutely, as every micro second goes by, as we change our location in our universe, and our relative location or position to every thing else in our universe changes, from night to day, and from day to night, ongoingly, non-stopingly, never repeating the same set of tuning focal patterns. Focal patterns are frequencies.

## Focal Patterns

These frequencies, or harmonic consistencies, are harmonic displays or the 'in rythm' with GOD, consistencies that allow you to be united with GOD, me, my devine and holy body, and my devine and holy mind, and my being or GOD SELF and GOD BEING, every moment, as you are orgasming, and eroteming, and convulsing orgasmically.

Men and boys have the same kinds ticklements, or tuning forks, and they are located in every organ of their bodies, too, just as they are in women's bodies and in girls' bodies, in every single organ and cell, and they allow all of you children of mine to stay in frequency with me, as you sexalate, erotem, and orgasm, and convulse orgasmically, practicing my religion, and as you sexal together with each other, and go about living your daily lives.

These many ticklements and tuning forks are all connected to your brains and to your nervous systems, and each living being in your body, has them as well, and every living being, and animal, has them as well.

All my children, animals, living beings, and human beings, are all connected to me, through these tuning forks, and they are connected to me in many ways, such as through the holy bodies all of my children have inside of them, and also through a myriad of other mechanisms that I have functioning in your bodies, in your astral 'energy' bodies, and the many millions of energies bodies each of you have in you that help to keep you all connected to me and my Holy GODLYNESS existence. My animals children and living beings childrens have fewer connectivities and fewer energies bodies, as they do not need as many as my human being daughters and sons. This is because you, my human being children, need to be more connected to me, as you are the only ones who can actively sexal and practice my religion, with your own self determination, and desire to sexal and practice, to become closer to me, GOD, as you become purer, and holyer.

I'm connected to all of you, day and night, three hundred sixty five days a year, in countless many fold untold numbers of ways and manners, and with countless many fold untold numbers of mechanisms. All of my children are likewise connected to me, in similar ways and manners, and with similar mechanisms, though the numbers and types of mechanisms may be different among my living beings children, and my animals children, compared to my human being children.

As you women, girls, men, and boys sexually rapture, erotem, orgasm, convulse orgasmically, and reach sexual peaks, and then sustain them, you grow holyer, as you become purer, brillianter, and closer in GODLYNESS to ME, GOD.

Obviously, then, the primary means for you to grow pure and holy is to sexal together with each other as sexaling is the basic way to become pure and holy, and as you continue, over the days, and weeks, then months, years, decades, hundreds of years, thousands of years, millions of years, and more, you slowly grow more pure and holy, and closer to me, GOD.

Sexaling is my primary and most fundamental religious practice and your primary religious practice for you to become cleansing machines, washing machines, purifying and sanitizing machines, so that you can clearify and erase your karmic markups, and purify your lives, and purify the lives of those around you, with your selfless actions of grace and serenity, sexaling and showering purifying energies in all directions for the sake of your self, and for the sake of others.

You women and girls need men and boys to assist you to become the powerful cleansing and purifying machines that you are capable of becoming.

Men and boys used to be somewhat nearly as useful as purifying and cleansing machines, as women and girls, but men and boys have different jobs, and different priorities, and there fore, the burden of work to purify my universe, and to clearify the karmic markups of all my children rests on the shoulders of all women and girls, with men and boys assisting women and girls.

You men and boys need women and girls to lead you, and to help you to become more proficient, powerful, and more capable cleansing, washing, purifying, and sanitizing machines.

## Assistive Religious Practices

The practice of praying Nam Myeo Ho Ren Ge Kyeo is an assistive practice that allows you to become in touch with my GOD SELF, equally as well, but the time it takes, is much longer, as very little purifying energies are produced, merely by using your brain, muscles, ligaments, sinews, bones, mouths, tounges, and jaws, as energies sources.

There are many other assistive practices, from meditation, to breathing techniques, to yogic techniques, to ballet like techniques, to dance techniques, to body movements of various kinds, to help you to increase and or also store up your energies, and then for you to release them, for you to then become more firmly and closely connected to ME so that you can eventually begin to gain a higher appreciation of ME, GOD.

My many religions teach many ways to do this, and before my many religions were corrupted by the Lesbianists, they worked to varying degrees of success.

Therefore, sexaling is the primary fundamental religious practice, and all other practices in my religions that I've taught over time, spanning all of my previous teachings from the begining of our time together, since I, my GOD SELF, created you as my children, are assistive practices, of one kind or another.

Sexaling, eroteming, orgasming, phlumetting are important practices, and as you orgasm, you are purifying your self, and others by pushing out and spraying your self with purifying energies as your holy and sacred energies shoot out to cover you and emmerse you in full body coverage, from head to toe, showering and shattering energies every where around you. They then build up and cover over all others who are around you, as well, with your purifying erototistic and orgasotistic purifying energies, clearifying yours and their karmic markups.

Astral traveling is another type of practice, but we'll define it, another time. Experiencing hyper trance states of mind and being, and a nearness to GODLYNESS are also a practice, and we'll define it, when I can remember every thing I need to remember about it.

Participating in my religious ceremonies is an assistive religious practice you can enjoy, as you become purer and holyer, and after you recognize that I am your Mother and Father, and your CREATOR, and that you exist because of me, as I made you from pieces and parts of me, your CREATOR.

After you realize this, you can enjoy participation in ceremonies with me, as training priestesses and priests, and you can make your way up the purity ladder, the more you participate with me, GOD, in my religious prayer hand signaling ceremonies.

Praying Nam Myeo Ho Ren Ge Kyeo to my Holy Body, or to the Gurkian

Mandala, as I've explained about, is an assistive practice that will bring results.

It will not bring results as well and as effectively and as quickly, as sexaling, which is the most holy and virtuous practice, along with eroteming, orgasming, phlumetting, astral traveling, peaking, and so on.

I've spoken about peaking, before, and women and girls can peak, and experience wonderful feelings. Men and boys can peak and experience wonderful feelings, too, but I haven't discussed that, yet. We'll talk about that, another time.

In any case, do not confuse assistive practices, with the fundamental and primary practice of sexaling. We'll get back to all those other things, to define them, betterly, another time, after my brain heals, a little bit more, and after I erase more karmic markups that keep my brain karma from improving, fast enough for me.

## How To Make Prayer Statements

Remember to include a prayer statement, such as 'I pray to the holy ephemeral body of the Creator, John Francis Ayres, for the [ insert private prayer statement ]', such as, '... for the serenity of mind, and the gratefulness of heart, for all those around me, who have helped me to become the person I am, and can become.' or, '... for the peace of mind, and serenity of heart, for the love of all men and boys, and the cooperation of all women and girls.' These prayers said by a woman or girl. Men can pray, similarly, '... for the grace and deviness of the women and girls who surround me, I am greatful to them, and I pray for their continued good health, and prosperity'.

You can also say, 'I pray to the holy body of the Creator, John Francis Ayres, for the [ insert private prayer statement ]', but only when I am in the middle of a religious hand signaling prayer ceremony, i.e., while I am doing a prayer ceremony, and saying my prayers with religious holy hand prayer signals that my special kids who are religious kids, can pick up and then act on, in concert with other groups of kids of mine, who also are religious kids, most of them, I think, and who work together with my primary groups of religious kids.

I have lots of kids, and some are normal kids, who go about their jobs, as expected, for earnings, just as most people we know. But I also have lots of other groups of children, who are more, religiously oriented, to varying degrees, and who are very religious as their work is all for the sake of my religious self, my GOD SELF. My religous kids catch my hand signing, and then they pass the messages along to others of my groups of children, and with all of the different groups of children I have doing 'good' works for me, as well as groups of children who do 'religious' works for me, as well as groups of children doing normal work for me, but for the sake of my religion, nevertheless.

They all coordinate themselves, somehow, I have yet to figure out how they do it, but between them all, they get the jobs done, that I ask them to do, while I am religiously - and the prayer statements I am signing are very holy - hand prayer signaling, i.e., hand signing.

So, unless you know for a fact, by seeing me on a tv, such as during a live broadcast, once I get my religious conveyance set up, and built by my children, after all the conditions are met, for securing this world from the grasps of the Lesbianists, and after killing all the Lesbianists, and / or after making the remaining Lesbianists surrender, and then after all other conditions are met, as I don't know all the conditions, I've set, as my memories are still foggy, as I'm amnesiatic, as well as mentally retarded, but in any case, if you see me on tv, on a live broadcast, doing my hand signing, you'll know I'm in the middle of one of my prayers, and then you can say, 'I pray to the holy body of the Creator, John Francis Ayres, for the [ insert private prayer statement ]', and you can omit the 'ephemeral' if you like, as it will work better if you omit the word 'ephemeral' as while I'm praying, I'm my normal, GOD, self, though I may not look to you, on the surface, to be any different, over the video links, or even in person. It never the less works better if you use my recommended methods of making prayer statements, this way, for you to maximize your private prayer statements.

All of my groups of kids have lots of friends, and they do lots of work for me, and I do not remember how many groups of them there are, and how many children I"ve got, as yet, but in time, I'll be able to give you a better idea of how they work together to get the work done, that I ask them to do for me, with my religious hand prayer signals, or hand signals, as in hand signing, or signing.

My kids use signing for all their work assignments, so I use hand signing that they can catch, pick up and read, and it is all pretty much very religious in nature, and it is very solemn, as I am GOD, and when I'm signing, they know I'm GOD, and do not doubt it.

When I am not signing, they might now and then, doubt that I am GOD, but never the less, I am GOD, and my signing proves it to them - when I am saying my religous hand prayer statements, by hand signing - with out any room for doubts in their minds.

In other words, I'm a typical person, just a little mentally retarded, brain smattered, or brain damaged, after my many youthful and other brain bashings I recieved, the wiring is a little scrambled up, upstairs, and after many poisonings by the Lesbianists - from makeing coffee from kerosene, diesel fuel, gasoline, and motor oil contaminated coffee beans and then from drinking that coffee, without knowing it was contaminated with petrol fluids, as often happens to people - and with ill health karma that has me on disability, and I've been through a lot, life after life, and sometimes, my children may have had a thought or two, 'I wonder, if he is going to make it, like he said he would?'

Well, to dispel all doubts, I sign, and when I'm signing, I remind them of my old self, back in the old days, when I used to sign, religiously, and they know how serious a guy I was, so they do not harbor any doubts, so long as I am hand signing.

## What To Say, When You See Me Using My Dick Or Other Parts Of My Body To Purify Others, And So Forth

You can say, 'I pray to the holy body of the Creator, John Francis Ayres, for the [ insert private prayer statement ]', also while you see me praying, Nam Myeo Ho Ren Ge Kyeo, or also while you see me in a ceremony, using my dick and scrotum, or other parts of my Holy Body to purify others, during the middle of a prayer ceremony, and I need not be hand signing, or praying Nam Myeo Ho Ren Ge Kyeo, as I am in the middle of prayers and activities ceremony, which is just as good as a religious hand prayer signaling ceresony, any day.

My dick and scrotum package is very Holy, and it has a very useful function, and that is, it purifying others. My lips do, too, and my butt hole, does as well. They all purify others very effectively and efficiently during my religious ceremonies.

My entire body, during a religious ceremony, butt hole, mouthal hole, lips, tounge, cheeks, legs, knees, feet, toes, butt, chest, back, arms, elbows, hands, fingers, head, neck, throat, ears, nose, and so forth, is entirely the body of GOD, as I am GOD, and therefore, while I am useing my body, during my religious ceremonies, and for my religious ceremonies, and you see me on tv doing so, then after you have verified that I am in the middle of a prayer ceremony, you can say your private prayer, in the manner as I've explained, 'I pray to the holy body of the Creator, John Francis Ayres, for the [ insert private prayer statement ]'.

I only use my dick and scrotum package for prayer ceremonies, except when I need to pee, so if you see that I am using it, during a prayer ceremony, or if you see me using any other part of my Holy Body, during a live broadcast prayer ceremony, then you'll know right away, that I am in the middle of a prayer ceremony and it is okay to use the statement, 'I pray to the holy body of the Creator, John Francis Ayres, for the [ insert private prayer statement ]'.

The same is true, pretty much, for any priestess or priest, who practices with me, in my religious holy body prayer circle, their bodies become very Pure, Holy, and Devine, but only after many life periods, that is, after many, many aeons, as they do not attain the same level of purity for a while, the same level of purity as I am at by my good old self, or the same level of pureness that is of ME, GOD, since I'm GOD, and they are not.

That means, it takes priestesses and priests longer to become pure, holy, and devine. I happen to be pure, holy, and devine, but that's because I'm GOD, and it is only during my religious ceremonies that you can understand that as you make your prayer statements, and sexal, etc.

After a long, long while, priestesses and priests will also become pure, holy, and devine, as their holy bodies, energies bodies that are pure, holy, and devine, but on a lower scale than are MY energies bodies, since I'm GOD, and I'm in charge of keeping things tied together, here in my universe.

After many aeons plus years of practice in my holy body praryer circle, the priestesses and priests become pure, holy, and devine, and then their bodies, their normal bodies, become very purifying, just as mine is, now, when I am in a prayer ceremony. I am in a prayer ceremony, daily, a few times, to a number of times, a day.

I've gone eighteen hours straight, once, and no sooner than I go to sleep, and then wakup, right away, I begin again, and I've gone many days, straight, praying, continuously, non-stop.

This is nothing, though, and is all preparatory, as in the future, when I get my health back, as I haven't been too healthy, for quite some time, I will be praying around the clock, some days, and for many days at a time, taking a break only to eat, drink, poop, pee, and clean up.

When priestesses and priests join with me, we will go for years without stopping, and with the priestesses, and with the priests, the both of them there, present, doing the prayer ceremony on my behalf, they can represent me, while I take a nap, go and shower, get some food, nourish myself, drink some fluids, read a book or news paper, or watch the news, or a movie, game show, video, or play a video game, and so forth. I won't be taking long breaks, and that is very funny sounding, but anyway, it happens that priestesses and priests will lose their attention, and then get lost, somehow, and then go and watch tv in their bed room, or whatever, and then we have to go and look for them, and they will get a few markoffs, and with enough markoffs, they will be asked to leave the religious conveyance, and they will be put on a type of vrobatiton, or under survielance, to see if they are good or not. My kids do all my survielance work, and they keep track of every one, so 'you'd better be good, you'd better be nice, you'd better look smart I'm telling you why, Santa Clause is coming, to town'.

Who Was Kris Kringle?

Did you know that Kris Kringle got its start from me? What a coincidence. I don't think he was wearing anything, though, or rather, I don't think I was wearing any thing, but you never know, as tolerances have changed over the long aeons of time, as they pass.

When priests and priestesses become that pure, holy, and devine, as pure, holy, and devine as I am, after their many aeons of religious practice in my holy body prayer circle - pure and devine on the exact same level as I am at - then they can represent me, as Mr. mini-GOD, and Mrs. mini-GOD.

You can not represent me as Kris Kringle, and whoever my wife was, back then. I think I had a lot of guys on that team, and a lot of women and girls, too, since sexaling was a part of that religion, too. You can learn more about it, if you're interested, by getting a day pass, and checking in with my kids, and then, signing up and joining our country, and then by becomeing a citizen, as I've spoken about, before.

You can include any good prayer, that comes to mind, that you feel is needed by you, to improve your life, and to level up your life.

You are the only ones who can pray, and practice, you women, girls, men, and boys, and there fore you are connected to me in many more ways than other living beings, the animals, and the amoebes, cells, and other living beings.

There fore, you are, both genders, the ones who will clean up the mess you have made, and you will continue to keep my universe clean, as you sexal with your genitals, and with your bodies, and with all your gizmos, igniters, trigger mechanisms, love bumps, love patches, tuning forks or ticklements, and so forth, as you are sexaling beings, who I, GOD, created, and you will sexalate, erotem, orgasm, phlumett, astral travel, peak, hyper tranceate, and so forth, just as I intended you to, from now till forever.

You will become virtuous and worthyable beings, worthyable tummy mommies, and worthyable tummy daddies, with your practice of my religion, who will bring into my universe, my many children who will join with you, and assist you and me, in cleaning up our universe, and the mess you have all made of it.

Is that understood? The answer had better be, "YES SIR!".

## Lesbianists' Torment Campaign Under Way

Lesbianists are clearly releaseing wierd, ghastly, horrible, and dangerous preditorial animals, giant insects, giant spiders, giant lizards, snakes, and reptiles, ghastly, preditorial sea animals and sea mammals, winged, preditorial and horrific, aggressive scavenger and killer buzzard like creatures and other winged and destructive animals, and other horrible creatures, as well as my abominant kids to kill, maime, torture, and cause major disruptions and suffering to people, around the globe, in many locations.

Apparently, the whole world is now affected, or will be affected, by this dischordance and disharmonic display of defeated lunacy.

The peace has been shattered by the Lesbianists. It was not good before, the situation in the world, with the balooneying governments of the world, doing what they wanted to do, and torturing, and canabalizing people, and feeding people to my abominant cave bears kids, and to my crocodile people kids, and mistreating people, like Bill Gates, Steve Hawkins, Steve Irwin, many women, young girls, and men.

The war in Iraq, the phoney Saddam Hussein Trials, and all the bogus manipulation of the press and media, and the suppression of what is actually the case, with our being used and abused, poisoned, and maltreated by the Lesbianists, was a rotten situation. That was normal, or normality for us. Our karma is very poor, and we have the karma to suffer this abuse, and these torments, daily, unknowingly, in most if not nearly all cases.

But, it is becomeing really bad and there is need for serious concern, and action, to correct this situation. It has gotten out of hand, completely, and there is no stopping the Lesbianists in their wanton, and coldly miserable wish and lust for chaos and disturbances to others.

Now, more clearly than ever, as the Lesbianists rampage, the Lesbianists are causing major disruptions, suffering, anguish, and there is just an awful discordance of shock, dismay, and misery, that is growing, every moment. This is as real as the sunlight shining from the sun on a hot day in summer.

I don't have a clue what people are doing, and what is happening to them, as they are captured, tortured, and caused miserable sufferings, in many places. There must be horrible agony for many people, at this moment, and as each moment passes.

Our reality as it was has suddenly been shattered and torn up, and replaced with the lunacidal, Lesbianistic, mayhem and chaos.

Reuters reports a Lesbianists' joke for the Lesbianists, sarcastically and ironicly stateing, "New Perils Push Doomsday Clock Closer to Midnight" "(Reuters) Scientists have advanced the clock 2 minutes closer to midnight."

http://us.rd.yahoo.com/my/today/
new_perils_push_doomsday_clock_closer_to_midnight;_ylt=AmUXlewr5ev2kNK_SfOHDFAL1vA
I/*http://news.yahoo.com/s/nm/20070117/us_nm/doomsday_clock_dc_4

This is their private joke, to make this scenario more laugable than before for them. They could not care less, as they are manipulating every thing, and that statement is completely meaningless to them, as they are in control of every thing, in their conspiritorial lunacy to rule human beings, and to trash every one.

We'll see what the coming days, weeks, months, and years bring, and maybe there will be hope for change, when people begin to take action, to correct this situation, globally, united in spirit, permanently.

These are the most evil of evil people and abominant kids, in our immediate vicinity in our universe. We must begin our cleanup campaign here, as it begins where I am, and will continue from here on out, till we have rid my universe of all of these horrible people, and all others like them, and have made them surrender, or have sent them on to my Epcot Center.

I will establish my relgion in my universe, and begin my ministry, and they are not going to stop me, as my religion will bring positive change for all of us, forever.

I must establish myself outside the bounds of this Lesbianistic society, so your efforts and concern for our future, and your selfless giving of donations to my ministry, to allow me to set up my ministry, outside the bounds of this Lesbianistic society, non-dependent on Welfare, Supplemental Security Income or SSI, Medicaid, and non-reliant on the supported and financed Housing and Urban Developement or HUD subsidized apartment that I live in.

Once I receive in the mail, the 'Gift' donations to set up my ministry outside the bounds of this society, I believe things will gradually begin to positively change for us all, and the shift to positivity will begin, and a new universe for us all, will become for the first time, ever, a potential reality with the sincere religious practice by all of my followers, all of you, who are practicing my religion, diligently, and daily, or as much as your health and your time permits.

There in, with your efforts to practice, will bloom your flowers of dignity and hope, justice and freedom, willingness for sharing, cooperating, and participating with others in our new age of enlightenment, the Gurkian Age, and your new found respect for self and others.

Captain Off The Bridge.

John Francis Ayres
GOd
And Children

## It Is Now Time To Kill All Government Workers, Public Workers, Preachers, Islamic Clerics, Christian Bible Teachers, Bible Thumpers, And All Other Persons Who Support The Lesbianists And Their Lesbianistic Societies Around The World - 'Fivers' To Kill Lesbianists And All The Lesbianists' Supporters - Coma Patients - All Persons Who You Kill Will Transel To My Epcot Center - Japanese And List Keeping - Surrendering And Pledging To Serve All People In My Universe - What Does This Mean? Updated: 21-01-07 Rev.d.01.a 19:56 PST

It is now time to kill all police of every police department in every country in the world. It is now time to kill all jail and prison workers in every country in the world. It is now time to kill all zoo keepers who work in zoos and other related places around the world. It is also time to kill all pet store personel, and pet store owners. We do not need people housing and feeding potentially dangerous animals. You are further ordered to kill all pets in all pet stores, and elsewhere, even in private homes. You may then eat them, after you have cleaned out their guts and removed tummy foods and rectal feces, etc., that are decaying matter, that is harmful to your health, and after you have prepared them for eating by cooking, grilling, fire place cooking, barbecuing, smoke house fermenting, or by other safe and sanitary, healthful cooking methods.

It is also time to kill every fire department official or worker, no matter what capacity the person works in, as a fire truck driver, as an ambulance driver, as an assistant driver, as an attendant or support crew person, as a maintenance man of the fire or the police departement, it is now time to kill them all.

Further, it is time to kill all public bus drivers, who work on any metropolitan or local area or state or interstate, or national bus company. It is time to kill all ships' captains and their crew members. It is time to kill all railroad rail line workers. It is time to kill all subway drivers and subway line workers, no matter what their job is.

Further, it is now time to kill all military personel, SWAT team personel, all government personel, and all civilian, or trained military, national guard, state or federal militia, toy soldiers, the people who dress up in old time war regalia, and outfits pretending they are old time, earlier period, confederate soldiers, or old time earlier period, union soldiers, who act out old time North the 'Union' vs. South the 'Confederates' and who participate in city and town parades, across the United States.

It is now time to kill all retired military personel who support the deranged, crazed, insepient, and corrupted Lesbianistic societies we live in, around the world. It is also now time to kill all persons who in any way support the governments of the world, including but not limited to, all school, university, kindergarden, missionary, day care center workers, nursery school teachers, teachers aids or teachers assistants, United Nations workers, United Nations teachers, substitute teachers, catholic school teachers, Irish protestant school teachers, parochial school teachers, all religious denominations around the world school teachers and their school support workers, government funded school teachers, tuition assistance by the government school teachers, all personel who work for the United Nations, all civil service agents, all DEA agents, all FBI agents, all FDA agents, all EPA agents, and workers, BLM agents who are Lesbianists as well as those BLM agents' who are Lesbianists as well as those friends of theirs, who support the Lesbianists.

It is also time to kill all other federal, state, or local, or globally tasked organizations, such as the CIA workers, INTERPOL workers, the several groups of workers within the Canadian Mounties, NIC a spy department of the U.S. Navy, the Korean C.I.A., the United States Presidential Police agents the Secret Service Agents, National

Park Rangers, State Park Rangers, Forestry Service workers, Pentagon workers, National Library Of Congress workers, and all others who work in any capacity supporting any government organization, those listed above, and all others, as well as all persons who support the Lesbianists in any way at all.

It is now time to kill all judges, bailiffs, Supreme Court Justices, and the employees who work in their organizations, and all other judges, legal clerks, para legal workers, court stenographers, justices of the peace, lawyers, attorneys, state attornys, prosecuting attornys, defense attornys. It is time to kill all officials of all government organizations, and all the people who work for them and or even only support them, such as restaraunt workers who feed them lunch, coffee shop workers and owners who feed them coffee and food, bars and restaraunt personel and owners of bars and restaraunts who support and feed any and all persons connected to the governments of the world and who work for them in any capacity at all.

It is also time to kill all the money lenders who loan money to the Lesbianists, the mortgage company owners who provide the Lesbianists with house purchasing loans, and all the supermarket workers and supermarket owners, who supply food to the Lesbianists, as well as all of the druggists, the pharmacy workers, who supply medicines to the Lesbianists. It is time to kill all the taxi cab drivers who give rides to the Lesbianists, and to every person who supports the Lesbianists in any way, at all, unless those people surrender to my kids.

It is also now time to kill all civilian or civil servant or state civil servant worker who supports in any way, any Lesbianistic organization, such as the police departments, federal agencies, fire departments, libraries, schools, and so forth. It is also now time to kill all persons who maintain or provide services to any of the above listed organizations, and to all of the similar organizations in every country in the world.

This is my order to all of you, and you are all ordered, by me, GOd/GOD, to kill all of them, unless they surrender. People also call me, 'Allah'. I'm the same person. Just do as I tell you.

You are to take my fuels' bombs with chlorine plastics' explosives formulas, and all other explosives formulas I've explained about on my bulletin board and the fuels' bombs explosives formulas including but not limited to radiological 'fracturable' rocks that provide so-called 'nuclear' explosions, all of my bombs' formulas, and all other bombs' formulas derived in part or in whole from what we have learned as I've explained on my bulletin board and to take them, and make the bombs and explosives, and to then use them, and then destroy and kill all of the Lesbianists, and all of the Lesbianists military bases, buildings, and kill every last one of them, all of them, leaving no one alive.

'Fivers' To Kill Lesbianists And All The Lesbianists' Supporters

You are to then make certain they are all dead. If they are not dead, you are to kill them with a 'fiver'. A 'fiver' is a bullet with five lines drawn or scored with a knife or sharp instrument into the tip of the bullet, to form a 'five' line pattern, so that the bullet will fracture into 'five' parts.

You are to take three 'fivers' and shoot each person who has not stopped breathing, and who is not dead yet, and shoot the three fivers into the head of the person, to make certain the person dies.

Three 'fiver's will destroy enough brain material, to kill any person if the bullet is large enough, and the handgun, rifle, or weapon is powerful enough.

The handgun bullet size must be at least larger than a .22 calibur, and at a minimum, 7 millimeters. You may use .38 calibur, 9 millimeter, 10 millimeter, .45 calibur, or any other, large sized bullet to make certain they are dead. Buckshot, 8 guage to 10 guage, or any comparable rifle load or handgun load, or home made weapon load, will work equally as well, with three shots into the skull. A machete or similar instrument should then be used to chop the head off of the person at the neck line. If you have a machete or hatchet, or axe, and if you prefer to chop off the head of the person, then by all means, you are to do so. The point here is to kill the person one hundred (100) percent, and not leave the person in a coma.

## Coma Patients

A person in a coma is perfectly alive, and can hear every word you are saying, but can not respond. People in a coma after severe accidents, such as near fatal traffic accidents, where their limbs were broken into pieces, or war victims, who are on life support in Veterans' Hospitals, can be in agonizing pain, and no pain medications are given to the patient as the patient has no way of communicating with the doctors, nurses, or staff members to complain about the pain, in many or in most cases, if not nearly all cases. Some patients can write or scribble out a note about the severe pains, or make gestures with their hands, pointing at painful spots they are able to point to, and then making squeezing motions, to indicate as best as they can, that there is something wrong in the area. Some people may catch the meaning of the gestures, but others do not, and may just wonder what is going on with the patient and they may wonder what the patient means by the hand gestures. Others, doctors and nurses, and staff members will merely find it amusing that the patient is making the gestures. Some doctors and nurses, and possibly staff members, will figure out the patient is in pain, and then steps can be taken to alleviate the pain, but it is an ordeal for the patient, and it may take months, or in some cases, years, before staff, cleaning persons, food servers, orderlies or assistants, nurses, or doctors figure out what the hand gestures mean.

The coma patient, after healing from the injuries, may still have residual pains, such as residual spinal pains, or neck pains, or ligament pains where ligaments were twisted, or ruptured, or severed, partially or wholly, and the ligaments didn't grow back properly, or didn't grow back fully, or much, or perhaps, in some cases, not at all, which does happen a lot, and each time the patient is moved in her or his bed, the person experiences extreme pain as no medications for pain are given to the coma patient, unless the patient has been successful in communicating that there is pain felt by her or him, in her or his body.

Leaving coma patients on life support systems is the cruelest thing you can do to a person in a coma as there is no such thing as being 'brain dead'.

It is a cruel and abominable Lesbianists' joke on humanity, and on all persons, that the Lesbianists have perpetrated with their teaching doctors and nurses that coma patients are brain dead, and do not feel, hear, taste, or sense, anything at all, and it is just another one of the Lesbianists' ways to hurt and torture people, and cruelly and ruthlessly abuse human beings, in this case, in most of these cases, by proxy. There are doctors who are Lesbianists, and I have one who is one, that I am aware of, and he knows exactly what causes my health problems, but he sits there, non-responsive, and with a vacant stare on his face as if he doesn't hear, see, or know of any thing that is going on, something like the three monkeys with hands clasped over their, ears, eyes, and mouth, who represent 'hear no evil, see no evil, speak no evil' and then 'therefore, every thing is alright'.

All persons with brains, whether in a coma, or other sleep like state or condition, is perfectly brain alive as the brains and nervous systems, auditory, taste, touch and sense nerve systems, never die, until the patient stops breathing, and passes on.

All nurses and doctors are to remove all life support systems from all persons in a coma, immediately and confirm the persons have died. That will allow them to transel into my Epcot Center, and then be born again, as a tummy baby to a tummy mommy and to tummy daddies.

All persons in a coma, whether in a hospital, or in a nursing home, or at a private home or apartment, or in a group home, or group care center, are to be told the truth of this, and are to be told that you just leared it, and are to be told that I am GOD, and that I have an Epcot Center staff waiting for them to come in, to be treated for their traumatic condition, of not being able to do any thing about their condition to end it, as it is a miserable situation for these people who are in a coma, or in any trance like state or condition that resembles a coma, or a sleeping person, who can not wake up. The person is perfectly brain active, and there are no measuring devices to prove it available to hospital staff or to doctors, as none are made, and the technologies to detect a person's brain activeness and aliveness are kept secret after they are bought up, and then after the records of them are destroyed, and the information on them are kept secret and locked away, in vaults, and in storage facilities, hidden from view so that no one can get the information, and build a device to detect a person's brain alertness status.

After they are told the truth, and that you just became aware of it, you are to tell them to not be afraid, and that all measures to relieve them from their present condition, and all measures to assist them to transel to my Epcot Center, where they can recieve personal care, and then helped to recover from the trauma of the coma, or coma like state of not being able to wake up, speak, and talk to people. They are then to be injected with a powerful sleep sedaditive, or induced to swallow several strong sleeping pills, as they may become afraid, and then, you are to help them to pass on, and to transel over to my Epcot Center.

In some cases, if you pull on the large toe of a person, or on the thumb, the person may have control to pull in the opposite direction. That is an indication that they are awake, and fully aware of what is going on around them. Please check patients to see that they have soundly fallen asleep, and snoring or breathing quietly, in relaxed manner, may be the only sign that the person is asleep.

Any sign of movement, mentally driven by the patient, no matter how slight, is nearly most always, nearly one hundred percent of the time, a sign that the person is completely brain alive, and that the person is completely aware of what is going on around her or him and can hear every thing. Even passing or expelling gas or farting, can be 'mentally' driven, and a sign the person is awake, and alert, and brain alive. Opening one's mouth is almost always, one hundred percent of the time, mentally driven.

Persons's in a coma, who have Eplilepsy, or other similar brain or neuro muscular disorder, and other conditions where patients experience spasming, whether the condition is diagnosed or not, these patients who spasm, may make some spamodic movement, now and then, and that is only a sign that the person is haveing a neuro muscular muscle spasm. Knee jerks or other similar movements, are not always muscle spasms and can be labored, mentally driven actions. These actions show the patient has control to that extent over her or his muscles, body, skeletal system, and other body systems related to the movement.

In any case, after the patient has fallen asleep, you are then to kill the person, and let the person transel to my Epcot Center, so that the person can recover in my Epcot Center, and then be born as a tummy baby, to a tummy mommy, and to tummy daddies.

## All Persons Who You Kill Will Transel To My Epcot Center

Once you are certain all of the police, fire, teachers, and all others who support the Lesbianists' societies around the world are dead, they will transel to my Epcot Center.

It is now the time to bring an end to the lives of these people who support the crazed, insepient, bogus Lesbianists, and to destroy them all, leaving no survivors. Kill all of their family and relatives, and leave no one alive. Kill them all.

My Epcot Center will not be in any way, inconveinced by your brave and heroic actions. All doctors must be killed, all nurses must be killed. All medical techinicians must be killed. All library workers must be killed. All school teachers must be killed. All art museum and gallery museum workers must be killed. All workers for all of these institutions must be killed. All of them, in every country of the world, unless they surrender and plead for mercy, and then are allowed in to my kids' place, for swearing in and for joining as civilians, my country.

Further, it is time to kill all media corporations personel, such as news casters, news men, news women, anchor persons, cameral men and women, talk show hosts, administrative persons, Hollywood's movie actors and actoresses, all radio broadcasters, and all personel of all radio companies. It is time to kill all news paper company owners, and publishers, editors, and all workers of these companies, unless they surrender to my children and plead for mercy.

It is time for all of you to kill all of them, and make sure not one of them is left living, including and most importantly, all politicians, who must all be killed, without any further delay. It is time to kill them all.

It is now time to kill Oprah Winfrey, Geraldo Rivera, Sarah Jessica Parker, Judge Judy, Jerry Springer, Liz Taylor, Michael Jackson, Clint Eastwood, Cher Bonno, Morgan Freeman, Steven Spielberg, Al Gore and his family, Hillary Clinton and her family, all of them, Jeb Bush and his family, all of them, Nancy Reagan and her family, all of them, former president of the United States President George Bush, Sr. and his family, all of them, including all persons related to him in any way, and all persons who work for him, in any way, and all persons who work for any of his associates, in any way, unless they surrender to my kids, and then plead for mercy.

We are not going to allow the Lesbianists to continue their illegal, inhumane, and horriblesome practices and activities on my planet, and in my universe, a moment longer. They must all die, now.

Is that understood?

I hope the answer is, "YES SIR! Mr. John Francis Ayres, GOd", as a 'negative' reply to my question is not acceptable.

## Japanese And List Keeping

I haven't confirmed it, but from what I know, so far, the Japanese are very good at keeping lists, and they know about all the foreign people in Japan, and they keep lists of names of all of them, and they keep lists of names on all of the Korean people, and the Singaporean people, the Chinese people, the Ainu people, and the cast outs or 'burakumin' a group of meat cutters and fish sellers who some how got on a list of people who were felt to be 'unclean'. The 'burakumin' was a group of people who no one in Japan wished to talk about. The Japanese also, apparently, had lists on groups of people, who they didn't know much about, but they knew they were always doing things with each other. Those groups of people were the Lesbianists, so the Japanese knew all along, who I was talking about and were nearly one hundred percent certain those groups were the Lesbianists living in Japan.

They read what I wrote, and the notes of mine were passed to many people on an e-mail mailing list, and when they heard that Steve Irwin had been killed, they felt they had heard enough and they told all their friends about my notes, and then the Japanese killed all the Lesbianists in Japan on that list they kept.

It's something I heard, and I haven't confirmed it, but I think the Japanese are fully capable of handling that, as they were fully prepared to deal with each one of the Lesbianists, and they knew who they were, and once the Japanese united, and decided to take action. The Japanese escorted all the Lesbianists to a meeting place, to which the Lesbianists were not happy to go to, but had no choice but to agree to follow the Japanese citizens who escorted them there, with the military or Japanese Self Defense Force, the Coast Guard, and National Police, and all other police agencies in Japan, plus the national organization of fire department workers, backing and supporting all the Japanese citizens.

As to what they did with the bodies of the Lesbianists, I'll leave that to them to explain to you, as it was quite brilliant and they had many very good ideas for dealing with the bodies of the deceased Lesbianists, who are apparently now in my Epcot Center.

The Japanese country side is now peaceful and quite, and things the winds are blowing, peacefully, and gracefully over the Japanese country side, cities and towns, across the ponds, marshes, lillies and lotus flowers swamp lands, bogs, bays, estuaries, lakes, streams, rice paddies, fields, mountains, and islands, from what I can understand and gather about the situation in Japan.

## Surrendering And Pledging To Serve All People In My Universe

If the Lesbianists and their supporters surrender to my children, and then promise to devote their lives for the sake of others, serving man kind, and all human beings, and all people on this planet, and in my universe, for the rest of their lives, they will be allowed to surrender to my children, and my children will then arrest them and put them in a prison cell. If they are not willing to serve others, despite the fact that they say they will serve others and devote their lives for the sake of others, serving all people in my universe, then my children will ignore them, and my children will not arrest them because my children know they are lying. They must promise to do all they can that is humanely possible, for the sake of others, and devote themselves to the prosperity of others, for eternity. If they are not willing to do that, then please, just send them on to my Epcot Center, and we'll straighten them out, for there. My staff at the Epcot Center has training programs to straighten them out and make them nicer people, so that next time they are born as tummy babies, they will behave and be nice to others, doing nice things for other people, after they are retrained, a little. The retraining program takes a while, but the results are very good to excellent.

If my kids decide that the person who is surrendering, is telling the truth, my kids will use the special teletransportation technology, something like what we see in Star Trek on tv, with Captain Kirk saying, 'Beam me up, Scotty!', as many of us have seen on daytime tv, or in the movie theater, and my kids have very good teletranportation technology or 'beam me up, Scotty' technology, and the person, once he or she pledges honestly to serve others, will instantly dissappear.

Do not be surprised if when the person surrenders and promises to 'serve others', promising to devote her or his life for the sake of others, the person suddenly dissappears, and instantly, the person is no where to be seen. The person was 'beamed' into a prison cell that my kids have constructed, using other technologies, and we have many prison cells waiting for the Lesbianists and for the Lesbianists' supporters, and for other bad kids in my universe, as well.

For each person you kill, my kids will keep earning points scores on your efforts to send them to my Epcot Center, and you will be paid, when you have finished your job, and then finally, go in to visit my kids. My kids will pay you in the monetary currency that is used in the underground cities my kids have built, for protecting people from these horrible Lesbianists and for protecting people from the abominant kids of mine, and the ghastly and naughty animals and very large bugs and spider like creatures, that the Lesbianists use to help them torture people with, to make the Lesbianists laugh, and to amuse themselves, as I've explained a little about, already. The more Lesbianists and Lesbianists' supporters you send to my Epcot Center, the more earning points you will score, and the more money you will earn, and you will be paid that money, when you go to visit my kids after you have finished your work, killing the Lesbiansts and the Lesbianists' supporters.

If the Lesbianists and the Lesbianists' supporters do not disappear after they surrender, and after they promise to serve others, and pledge to devote their lives for the sake of others, the Lesbianists and the Lesbianists' supporters are lying, and you can then kill them, and send them on to my Epcot Center.

My children will escort the deceased Lesbianists and Lesbianists supporters, once you kill them, into one or an other of my Epcot Centers, and will make sure that the Lesbianists and the Lesbianists' supporters get in for a meeting with one or another of my managers, or with one of the staff members who work with my managers to arrange retraining programs for rehabilitating the Lesbianists and the Lesbianists' supporters.

The Lesbianists and Lesbianists' supporters will not qualify as tummy babies, until they are finished their retraining and rehabilitating programs. After they finish, they will be out, again, to join the rest of you, once again, but this time, as nice, kind, courteous, and polite people.

What Does This Mean?

It means, I want all the Lesbianists dead, but if they will surrender, and if they promise to serve all human kind, all people, and work and strive to enrich the lives of all others, dedicating their lives to others, then, you do not have to kill them, and you do not have to send them to my Epcot Center. If they are honest when they surrender, and when they promise to serve all people, devoting their lives to all people of the world, then my kids will 'beam' them in, using the teletransportation technologies that my children use. If they are lying, then my children will not beam them in, and they will be stuck where they are. If they are stuck where they are, after they surrender to my kids, and after they promise to dedicate their lives to the welfare of all others in the world, and to all others in my universe, then they were lying, and you may then kill them, and send them on their way to my Epcot Center, for retraining, and for rehabilitation.

It also means to kill any person who works for the Lesbianists, if he or she is supporting the Lesbianists to try to stop you from killing the Lesbianists. Also, it means that you should kill any person who tries to interfere with you, while you are trying to kill the Lesbianists.That's what it means.

Captain Off The Bridge.

And Children

## Fermenting Oils - Fracuses Kiddies - Slugs, Snails, And Other Bottom Feeders - Feeding Everybody In Our Bodies - Putting An End To The Global Menace Of The Lesbianists - Changing Our Societies, And Our Universe, Forever Updated: 22-01-07 Rev.x.00.a 07:45 PST

Mix raw sugar, ocean salt, sessame seeds, dried fermented berries you have taken from a mix of berries fermenting as a flural hydrate liqour, or as a plain fermenting liqour, and make sure you dry them out in the oven, before useing them.

Mix the items together in a container, and mix in a drop or two of apple juice, pear juice, papaya juice, kiwi juice, banana juice, cherry juice, cranberry juice, strawberry juice, peach juice, nectarine juice, or plumb juice, and let the moisture settle into the mixture to allow it to become only partially and only very slightly moiste, and not wet or liquidy.

Allow the mixture to sit in a warm or cool place for a week or two, to eight to fifteen weeks, or even a few years, and it will grow molds in it, and with the longer the duration up to a point of sitting and molding, the more useful it will become.

It might develop a pungent, unpleasant odor, like a dead animal smells, which may mean that a fungus that is not very suited for you to use as a starter mold for starting a fermented oil batch has developed in the container, and in that case, you can throw the whole mix out, or use it for fermenting beans or something. Cheeses can be made with these kinds of growing funguses and molds, if you are the daring type, who likes to experiment with new and different tastes from variously fermented mixtures.

You can add some ocean salt, and make a soury vinegar, and then try to rescue it with the combination of the soury vinegar, ocean salt, and a little raw sugar, and some honey.

It may be that some bacteria is in the mix, and it needs to be eaten up, before you can use it safely for a healthy mold mix for starting a nice cheese molds and funguses mixture.

Ocean salt can be added in slightly large amounts with raw sugar. Once the odors have stabilized, and once they have developed a more pleasanty odor of a fermenting mixture, with a slight alchohol ferment odor that will indicate that it is alright to use, and that it will not be harmful to you.

In some cases, the bacteria in the base mix, may be a result of hairs or particles of skin from the body of a dead rat or mouse, that some how found his or her way into the sessame seeds, or into the dried spices, or into dried berries that you used, and then died.

In that case, you might as well throw it away, unless you have a lot of patience, and do not mind waiting and working with it, for several years, for it to become something you can use.

One way to make it into something you can use is to mix in a high potency liqour brew, and let it sit for a number or years, and ferment it, and then after it smells nice and rosy smelling, after ten to fifteen years, to thirty to fifty years, you can evaporate the liquids out in a pail on an open porch that has a net covering to keep animals and animals' hairs out of it. Make sure there is good ventilation, and it should evaporate out, safely after a number of days on the porch in the sun. If there is no heat to make it hot enough to combust, and if there is good ventilation, it will not combust, and it will evaporate out, safely. Adding ocean salt and raw sugar to the mixture so as to fill it up with raw sugar and acidic ocean salts, will further help to safely evaporate out the liquids and prevent the liquids from combusting, accidentally.

Once the liquids have evaporated out, safely, you can use the materials that remain in the pail or container, to start a fermented oils brew mixture, or to start a cheese molds and funguses mixture, if you wish to make a nice cheese molds and funguses mixture.

The particles of skin or hair from the dead rat or mouse, or pidgeon, or other animal, will have been eaten up by all the ferment fracuses kiddies, and will no longer pose a threat to your health.

## Fracuses Kiddies

Ferment fracuses kiddies are just plain old ferment kiddies who like to devour large bits of human or animal tissues, mites, or cockroaches, or their body parts, and then poop them out, and pee them out into the liqour brew.

You'll always have some of these kiddies in your brew mixes, and they are useful to you, as they eat up the things that you do not want in your tummy. Also, there are other kiddies, such as snails, and other bottom feeders, that find their way in, in the skins and pulp material as tiny animals, or the eggs of animals, and they hatch, and they develop, and they grow big, and they then bottom feed, and they eat any dead rats, and dead rat parts from rats that might have fallen into the brew. These are useful pets, that you want in your rum and liqour brews, as they will keep the liqour brew healthy to drink, and they will keep you from getting ill.

## Slugs, Snails, And Other Bottom Feeders

In the old days of bucanneering, as I may have mentioned, before, this was a crucial part of keeping the sailors alive, on their long voyages, and if crew members fell ill due to an unhealthy brew, with a dead rat in the mix, making it sour, and making it unhealthy to drink, then if there are not enough snails, slugs, and bottom feeders in the barrel or rum to eat the dead rat parts, the sailors will get ill, and when they get back to port, they will hang the rummery owner, and give the business over to the son, or to a third party, often times, one of their fellow crew members, who is liked by all the people, locally, and on the ship.

This is the case, still today, with many rummeries owned and handed down in the same family, from such instances as that.

Bottom feeders, slugs, snails, and many types of bottom feeding earth worms, and other types of healthy bottom feeding worms, that cohabitate well with the slugs, and snails, and other animals that are too tiny for you to see in the rum brew mixture, without a powerful microscope like, optical videoing technology,  are essential to your brews mixtures, and they may increase in numbers as they make babies like every animal and living being does, and so now and then, you need to reach into your brew container, with your hand, or with a fine mesh small aquarium use fish net, and scoop them out, and flush them down the toilet, or let them loose in a local pond, lake, mountain stream, or water springs fresh water well, where they will help to keep the water clean, ahd healthy.
